Brief Halt Planned

## 'Steelmark' Tour Group Waited In Valley Program

A group of visiting industrialists, public officials and civic leaders touring the Ohio Valley by chartered bus in the first day of a week-long regional Steelmark Days program is scheduled to halt at the Travelers Hotel this afternoon at 3 for a brief reception.

The stop will mark the midpoint in a tour which began at Steubenville early this afternoon following a luncheon at the Masonic Temple at which the principal speaker was Hickman Price Jr., assistant U. S. secretary of commerce for domestic affairs.

The tour bus is moving northward along the Ohio River through Hancock County while a running commentary describes points of interest such as the new Stratton "super-dam," various prospective industrial sites, the new Ohio Edison Co. electric generating plant, Waterford Park Race Track and the Globe Brick Co. plant.

The bus will come into East Liverpool via the Chester Bridge. The halt here will last about 30 minutes. Then the tour will resume along the Ohio side for the return trip to Wheeling. Meanwhile, a similar tour is being made by another group, headed south from Steubenville to Bridgeport.

The two groups will have a first-hand look at segments of the Ohio Valley, which has been dubbed the "Ruhr of America" because of its prominent role in production and fabrication of steel.

Members of the Crucible staff participating in today's events include: George Burrier, works manager, Sidney Paige, manager of employe relations, Glenn Roberts, superintendent of community relations, Mike Peterson, his assistant, Inez Artico, editor of the publication, "The Steelman," Van Viot, vice president in charge of employe relations, and Walter Gregg, vice president, operations.

Steelmark Days is a regional program designed to point up the importance of steel's role as a prime moving force in the regional economy.

A reception and television pro-

(Turn to STEELMARK, Page 3)

### Tribute To Steel

Steel and allied industries are saluted in a special 12-page section in today's Review.

The section was prepared in conjunction with the city's participation in the "Steelmark Days" programs being sponsored by communities in the Upper Ohio Valley.

## Trial Links Eichmann To Death Orders

### Telegrams Direct Execution Of Jews In Front Of Others

JERUSALEM (AP)—Two telegrams, signed by Adolf Eichmann and ordering the execution of specific groups of Jews, were put in evidence today by the prosecution in an effort to link him directly with the wartime exterminations.

Eichmann's attorney, Dr. Robert Servatius, promptly disputed the messages.

Earlier a spectator in the gallery burst into hysterical tears and shouted, "Where is my family? Kill! Kill!"

Police hustled the man outside. He said he was Zvi Scheffer, 46, Hungarian-born, and that he broke down when a witness described a Nazi deportation train on which members of Scheffer's own family were taken away.

He told reporters that only four members of his family, out of 62, survived the Nazi holocaust.

"I only wanted to hit him (Eichmann) once," Scheffer told police. "Why don't they kill him? What are they doing?"

During the early part of the morning session, witnesses described Nazi cruelties in Poland soon after the invasion of the Soviet Union began in 1941.

One told of a Gestapo officer who took a Jewish child from its mother's arms, swung the baby by its heels and smashed its head on the pavement.

Testimony about beatings, torture by electricity, and forcible sexual relations "before the eyes of children" also went in the record.

Then Attorney General Gideon Hausner submitted for evidence the two telegrams. He said both were signed by Eichmann. Both were labelled "special treatment of the Jews." The Jews were identified by name—four in one case, seven in another—and the messages ordered that they be hanged "in the presence of members of their race."

Eichmann has denied that he ever ordered the killing of a single Jew.

The telegrams were dated March 27, 1942, and May 6, 1942.

"I demand a report of this execution," the messages read.

### Postal Boosts Seen

CINCINNATI (AP)—J. Edward Day, U.S. postmaster general, says he believes the rate increases asked of Congress will be approved. He said Sunday night "There is strong support in both houses of Congress for doing something about the fact we have the largest deficit in the history of the postal service." Day was here for ceremonies to break ground for a new $3.5 million postal annex.

## Senate Eyes U.S. Role In Cuban Fiasco

### Questioning Slated For Both Rusk And CIA's Allen Dulles

WASHINGTON (AP) — A Senate subcommittee today begins its efforts to pin down the extent of U. S. involvement in the Cuban invasion fiasco.

Administration leaders who have agreed to testify—starting with Secretary of State Dean Rusk in secret session—may be in for some determined questioning by members of the subcommittee on Latin American affairs.

The Senate always is zealous in asserting its prerogatives in international relations. Subcommittee Chairman Wayne Morse, D-Ore., already has complained that the administration failed to inform Congress of the U. S. role in the Cuban invasion.

Over the weekend, both Rusk and Allen W. Dulles, director of the Central Intelligence Agency, agreed to testify. The CIA has criticized in some parts for its appraisal of the Cuban situation. However, an administration official has said there were no miscalculations on the part of the CIA.

The State Department advised American citizens to leave Cuba. The Swiss Embassy in Havana, which has been taking care of U. S. interests since the United States broke relations with Cuba, has notified Americans it would be in their interest to return to the United States.

The U. S. role in the Cuban invasion sparked picketing of CIA headquarters in Washington by 90 pacifist-lead demonstrators Sunday. While nine plan to fast the others intend to demonstrate around the clock for two weeks.

Police kept the demonstrators separate from George Lincoln Rockwell, commander of the American Nazi party, and 19 of his khaki-uniformed followers.

### Water Line Shutoff Delayed To Tuesday

A water service shutoff scheduled today for all of Dixonville and most of Beechwood has been postponed until Tuesday morning, Supt. Donald T. Duke warned householders.

The shutoff will be made tomorrow at 8 a. m. and will continue for about two hours. Delay in cutting pipe forced the postponement. A bypass is being constructed around the site of an earth slide on Anderson Blvd.

### Israeli Aide Buried

TEL AVIV, Israel (AP) — Dr. Fritz Peretz Naphtali, labor and economic expert and former Israeli Cabinet member, was buried today at the Alumot Kibutz on the Sea of Galilee.

## Rebels Offer Cease-Fire, Press Drive

### Phouma Proposes Truce, But Troops Fight At Ban Keun

**BULLETIN**

**VIENTIANE, Laos (AP) — King Savang Vathana opposes a 14-nation peace conference on Laos, Cambodia's Prince Norodom Sihanouk said today. This might throw up another roadblock to a cease-fire.**

VIENTIANE, Laos (AP)—The pro-Communist Pathet Lao rebels proposed a cease-fire meeting in no-man's land areas north of Vientiane, but they showed no sign of slackening their drive against the Western-backed Laotian government.

A government officer carrying a white flag was to try to contact the Pathet Lao today near Ban Namon, about 35 miles north of this administrative capital. A similar mission Saturday was ignored by the rebels.

Neutralist Prince Souvanna Phouma, whom the Communist bloc recognizes as premier of Laos, said he would agree to a military meeting in Ban Namon before Wednesday. Capt. Kong Le, commander of one faction of the rebels, followed up with a broadcast promise of safe conduct to Ban Namon.

Kong proposed that each side send a delegation of five to ten persons "to discuss the fixing of a specific date and hour at which a cease-fire should begin, and to discuss the rules governing the cease-fire."

It was the first time the rebels had proposed a meeting outside their stronghold at Xieng Khouang, on the central plain, or at Vang Vieng, 45 miles north of Vientiane, which the rebels seized recently.

This cheering note was offset by enemy attempts to seize Ban Keun, only 25 miles north of Vientiane.

Military circles were apprehensive the rebels might strike next at Nam Tha, about 70 miles northeast of Luang Prabang. The city, which has a big airstrip, is easily accessible from the Chinese frontier.

Rebel moves in the northwest were seen as part of a general attempt to seize as much territory as possible before a cease-fire takes effect.

## Hancock Fills Juvenile Post

### Prosecutor Names Coach At Weirton

The appointment of a Weirton coach as new probation and juvenile officer of Hancock County was announced today by the office of Prosecuting Atty. Floyd R. Tarr.

John T. Grossi, 31, basketball and football coach at Weirton Madonna High School for several years, was named to the post by Judge Ralph E. Pryor of the 1st Judicial Circuit.

Grossi, who apparently has tendered his resignation as coach of the two sports at Madonna, will begin new duties June 1.

Grossi succeeds William Paolisso of Weirton, who served as probation and juvenile officer of the county for four years under former Circuit Court Judge J. Harold Brennan.

Edward Frankovitch of Weirton, a deputy on the staff of County Sheriff Joseph H. Manypenny, has been serving as temporary probation and juvenile officer since Paolisso vacated the post in January.

A graduate of Weir High and West Virginia Tech, Grossi is married to the former Irene Yacos of Weirton and has four children.

# U.S. Weighing New Support In Laos As Rebels Advance

Risks Safety Odds Of 100 To 1

## U.S. Astronaut Awaits Tuesday's Launch Into Space At Canaveral

COMM. ALAN SHEPARD

COL. JOHN GLENN

CAPT. VIRGIL GRISSOM

CAPE CANAVERAL, Fla. (AP) —A keenly trained American will try to get some sleep tonight knowing that in the morning he may rocket into space.

Sometime after dawn he may be strapped into a space capsule atop a relatively puny rocket.

Perhaps 100 minutes later the Redstone rocket will fling him 115 miles up and 290 miles south over the Atlantic. The experts say the odds are 100 to 1 that he will come through without harm.

This Redstone is less than a tenth as powerful as the monster rocket that shot Yuri Gagarin, Soviet army major, on a space trip around the world in 108 minutes last month.

Still, this is the first relatively safe step in a program that will —before the year is out—give an American the same thrilling ride around the globe.

The space pilot himself knows there is some risk involved, says a source close to the astronauts. But for a man with experience in testing high-powered aircraft, it is an accustomed risk.

Fabulous steps have been taken to insure the space pilot's safety. Anything that might fail in the space capsule comes in duplicates, so that one will always be in service.

The countdown has begun on the rocket and men are readying it for flight.

Two possible space pilots whose names are still secret are being prepared for the trip. One of them will go. One will be on the ready, should something—even a slight cold—disqualify the first.

The chosen two were picked from three known names: John Herschel Glenn Jr., a Marine Corps lieutenant colonel from Concord, Ohio; Alan Bartlett Shepard Jr., a Navy commander from East Derry, N. H.; and Virgil Ivan Grissom, an Air Force captain from Mitchell, Ind.

The day of the shot, two of these men will get up at 2:30 a. m., shower and shave in their secluded quarters in Hangar S, 15 minutes away from the waiting rocket.

(Turn to SPACE TRY, Page 3)

## Fund Planned For Program In Recreation

### Council Proposes More Playgrounds, Community Center

Councilmen agreed informally Sunday to recommend appropriation of $5,000 out of income tax funds to expand the city's recreation program with establishment of several new playgrounds and creation of a community center to serve all age brackets, with emphasis on teen-agers and "senior citizens."

The preliminary plans were discussed at a meeting which brought together Councilmen John Melvin, Norman Bucher, John Kelly and Donald Hancock.

One of the first steps will be a series of meetings with interested citizens and organizations to help decide the location and cost of new playgrounds and work out further plans for establishment of the recreation center.

The councilmen said they want to discuss the idea with the public representatives and organize committees to help work out details of the program. Council's principal role will be to appropriate the funds and enact any other legislation required to make the program a reality, they said.

Parent - teacher organizations will be among those consulted, as they have had a leading role for years in establishment and operation of playgrounds, the councilmen said. Pending issuance of invitations to interested persons and groups, no dates have been set for the public meetings.

The councilmen said most discussion of the need for a recreation center cites particularly the lack of local facilities for youth, but they added they feel adequate provision also should be made for all other age brackets, particularly retired persons who have time hanging heavy on their hands.

After the new playgrounds are established, they will be turned over to some organization such as a PTA or the Recreation Council for operation, the councilmen said.

The four members agreed there are at least two sites immediately available for playlots — part of a city-owned tract on E. 2nd St. between Broadway and Washington St. and a plot of ground fronting on Avondale St. between Bradshaw Ave. and Minerva St.

(Turn to FUND, Page 3)

Voting Waited Tuesday

## Showers, Chilly Due For Primary

Cold, damp weather may reduce the turnout for municipal and village primary elections Tuesday in Columbiana County.

The Ohio weatherman threatened scattered light showers and chilly weather as Republicans and Democrats awaited the biennial trek to the polls to pick slates for the November general election.

Polls will open at 7:30 a. m. and close at 7:30 p. m. (DST).

In East Liverpool, 26 Democrats and 19 Republicans are seeking party nominations for 11 municipal offices.

Both parties also will hold primaries in the county's other three cities — Wellsville, Salem and East Palestine.

The Ohio "no contest" law will eliminate voting on party tickets in the three villages, except for Leetonia Democrats.

Because there are no races to be settled, there will be neither Republican nor Democratic primaries in Lisbon and Columbiana. The Leetonia Republican primary has been eliminated for the same reason, but the village's Democrats have several contests to settle.

In communities where primaries are bypassed, the Election Board will issue certificates of nomination to the candidates, giving them a "free ride" into the November general election.

In addition to its Democratic primary, Leetonia will vote in a special election on renewal of a 4-mill village current expense levy. A 55 per cent affirmative vote is required for approval.

Special elections also are scheduled in Lisbon village and the Lisbon Exempted Village School District. The school district, which includes the village, will vote on a $350,000 bond issue for a building program. A 60 per cent affirmative vote is required for passage.

Lisbon village will vote on a new 3-mill current expense levy. It requires a 55 per cent vote for approval. At Salem, there will be a vote on a 4-mill school district current expense levy.

(Turn to PRIMARY, Page 3)

House Action Asked

## Probe Sought On Alleged Inflated Ohio Utility Base

COLUMBUS, Ohio (AP) — Demands for investigation of alleged utility rate dishonesty are due for an airing at a special meeting of the Ohio House Rules Committee tonight.

First - term Rep. Richard M. Christiansen, D - Richland, called for the inquiry on the basis of a letter he said George B. Quatman of Lima, head of 16 Ohio telephone firms, admitted writing to a New York utility broker.

The letter termed election of a Republican - controlled legislature a repudiation of what Quatman called an anti-utility policy of Democratic state administrations. Christiansen has declined to say how he came by the letter but indicated he might tell the committee.

A section of Quatman's letter carried in the probe resolution made this observation about applications for approval of gas, electric and telephone rates by the Public Utilities Commission:

". . . The utilities now, instead of being honest with their contentions on rate base, inflate them, knowing they are going to be pulled down."

Christiansen said he hoped for widespread publicity on the situation but House Speaker Roger Cloud, R-Logan, chairman of the powerful Rules Committee, observed that he had no intention of making a production out of the hearing.

Sessions of the Rules Committee usually are closed but Cloud said the hearing would be open. It will follow the start of the legislature's 18th work week.

## Cubans Fete May Day And Rebel Defeat

### 3 Million To Hear Castro, Winner Of Soviet Peace Prize

KEY WEST, Fla. (AP) — Cubans massed today in Havana's civic square for a Moscow-styled May Day of Fidel Castro's Socialist revolution and the victory of his troops over insurgent invaders.

Castro, who Sunday was awarded the Lenin peace prize, President Osvaldo Dorticos and economic chief Ernesto Guevara were scheduled to address multitudes of workers and militia brought into the capital for the day. Havana radio said about three million persons would participate in the rally.

The prime minister, fresh from his victory over invasion forces that landed in Cuba two weeks ago, was expected to speak at length on the course of his regime now that it has entered into its "Socialist phase."

Troops will be on the alert throughout the island against an attack which Castro propagandists said they fear.

Foreign delegations will include groups from the Soviet Union, European Communist countries, Asia and even one American group which the radio said will march to show that "all Americans are not imperialists."

A Havana newspaper was quoted as saying an effigy of President Kennedy would be burned at the rally. The report said Kennedy would be represented as a Statue of Liberty dressed in a Ku Klux Klan robe and carrying a torch in the right hand and a crown of cannons on his head, topped by a vulture and a Nazi swastika.

Simultaneously with the Havana rally, Castro's brother Raoul, who heads the Cuban armed forces, will speak at another rally at Santiago de Cuba, the island's second largest city.

The May Day celebrations follow a massive, weeklong dose of anti-American propaganda and an equally concentrated ration of praises for the virtues of socialism.

Notice! Local 86. Polls open in general election on May 2 from 12 noon to 7 p. m. All members urged to vote. By order of Pres.—Ad.

## Kennedy Set To Counter Red Moves

### Military Aid Would Be Made Through SEATO's Program

WASHINGTON (AP)—President Kennedy calls in the National Security Council again today to weigh a more active role for the United States in strife-torn Laos.

Presumably, Kennedy and his top military and diplomatic advisers will consider the possibility of U.S. and allied military intervention as a means of countering Communist advances in Laos and elsewhere in Southeast Asia.

Any intervention would be made through the Southeast Asia Treaty Alliance.

This is the fourth session for the top strategy group within 10 days. It last met Saturday.

There was a chance tension in Laos would be eased by the time Kennedy met with his advisers in late afternoon. The State Department was studying with interest news dispatches from Laos which told of a rebel-backed cease-fire offer.

There was no official comment in Washington, but one official said privately the move by Prince Souvanna Phouma "is encouraging—if true."

The dispatches said Souvanna, who is recognized as premier by the Communist-dominated Pathet Lao rebels, proposed a meeting of military leaders on the front north of Vientiane, the capital.

A white flag mission Saturday failed to establish contact with the rebels.

There were no reports of strong military action Sunday. Saturday, strong anti-government forces struck at Ban Keun, the last large town north of Vientiane.

While it remained in doubt whether a cease-fire formula could be worked out, the United States canceled the airlift of some 6,000 troops to Europe for a planned NATO exercise.

U.S. armed forces appeared to be preparing for any role they may be called on to play in Southeast Asia or elsewhere. They were doing it in a tight-drawn secrecy equaled only in wartime.

Kennedy cut short his weekend rest in the Virginia countryside Sunday to review the Laotian crisis with top government officials.

## Run Clearing Job To Begin

### Demolition Slated At Staats' Property

Demolition of the rear portion of the M. F. Staats property on Virginia Ave., with whom the city has been feuding for years over flooding of the East End Run, will begin Tuesday morning, Safety-Service Director Lee Copenhaver said today.

The director said the Christy Demolition Co. will tear down a 12-foot section of the store room and also will remove a collapsed garage so city crews can clear the run.

The cost of the work will be charged against the property owner, the director said.

In mid-March, Council approved legislation ordering Staats to remove the alleged obstructions from the run within seven days or the city would do the work and charge Staats.

Council authorized its street and finance committees to work with the director and Solicitor Joseph W. Cooper in an effort to agree on a purchase price for the property.

The two committees were designated at the April 17 Council meeting after Copenhaver said he would welcome aid in working out the negotiations.

**WEATHER**
High today, 48-54, low tonight, 35-40; Tuesday, cool with light showers.
Dam 7 — Sunday 6 p. m. 60, Sunday midnight 50, today 6 a. m. 46, today noon 62. High 62, low 45.

Brief Halt Planned

## 'Steelmark' Tour Group Waited In Valley Program

A group of visiting industrialists, public officials and civic leaders touring the Ohio Valley by chartered bus in the first day of a week-long regional Steelmark Days program is scheduled to halt at the Travelers Hotel this afternoon at 3 for a brief reception.

The stop will mark the midpoint in a tour which began at Steubenville early this afternoon following a luncheon at the Masonic Temple at which the principal speaker was Hickman Price Jr., assistant U. S. secretary of commerce for domestic affairs.

The tour bus is moving northward along the Ohio River through Hancock County while a running commentary describes points of interest such as the new Stratton "super-dam," various prospective industrial sites, the new Ohio Edison Co. electric generating plant, Waterford Park Race Track and the Globe Brick Co. plant.

The bus will come into East Liverpool via the Chester Bridge. The halt here will last about 30 minutes. Then the tour will resume along the Ohio side for the return trip to Wheeling. Meanwhile, a similar tour is being made by another group, headed south from Steubenville to Bridgeport.

The two groups will have a first-hand look at segments of the Ohio Valley, which has been dubbed the "Ruhr of America" because of its prominent role in production and fabrication of steel.

Members of the Crucible staff participating in today's events include: George Burrier, works manager, Sidney Paige, manager of employe relations, Glenn Roberts, superintendent of community relations, Mike Peterson, his assistant, Inez Artico, editor of the publication, "The Steelman," Van Viot, vice president in charge of employe relations, and Walter Gregg, vice president, operations.

Steelmark Days is a regional program designed to point up the importance of steel's role as a prime moving force in the regional economy.

A reception and television pro-

(Turn to STEELMARK, Page 3)

### Tribute To Steel

Steel and allied industries are saluted in a special 12-page section in today's Review.

The section was prepared in conjunction with the city's participation in the "Steelmark Days" programs being sponsored by communities in the Upper Ohio Valley.

## Trial Links Eichmann To Death Orders

### Telegrams Direct Execution Of Jews In Front Of Others

JERUSALEM (AP)—Two telegrams, signed by Adolf Eichmann and ordering the execution of specific groups of Jews, were put in evidence today by the prosecution in an effort to link him directly with the wartime exterminations.

Eichmann's attorney, Dr. Robert Servatius, promptly disputed the messages.

Earlier a spectator in the gallery burst into hysterical tears and shouted, "Where is my family? Kill! Kill!"

Police hustled the man outside. He said he was Zvi Scheffer, 46, Hungarian-born, and that he broke down when a witness described a Nazi deportation train on which members of Scheffer's own family were taken away.

He told reporters that only four members of his family, out of 62, survived the Nazi holocaust.

"I only wanted to hit him (Eichmann) once," Scheffer told police. "Why don't they kill him? What are they doing?"

During the early part of the morning session, witnesses described Nazi cruelties in Poland soon after the invasion of the Soviet Union began in 1941.

One told of a Gestapo officer who took a Jewish child from its mother's arms, swung the baby by its heels and smashed its head on the pavement.

Testimony about beatings, torture by electricity, and forcible sexual relations "before the eyes of children" also went in the record.

Then Attorney General Gideon Hausner submitted for evidence the two telegrams. He said both were signed by Eichman. Both were labelled "special treatment of the Jews." The Jews were identified by name—four in one case, seven in another—and the messages ordered that they be hanged "in the presence of members of their race."

Eichmann has denied that he ever ordered the killing of a single Jew.

The telegrams were dated March 27, 1942, and May 6, 1942.

"I demand a report of this execution," the messages read.

### Postal Boosts Seen

CINCINNATI (AP)—J. Edward Day, U.S. postmaster general, says he believes the rate increases asked of Congress will be approved. He said Sunday night "There is strong support in both houses of Congress for doing something about the fact we have the largest deficit in the history of the postal service." Day was here for ceremonies to break ground for a new $8.5 million postal annex.

## Senate Eyes U.S. Role In Cuban Fiasco

### Questioning Slated For Both Rusk And CIA's Allen Dulles

WASHINGTON (AP) — A Senate subcommittee today begins its efforts to pin down the extent of U. S. involvement in the Cuban invasion fiasco.

Administration leaders who have agreed to testify—starting with Secretary of State Dean Rusk in secret session—may be in for some determined questioning by members of the subcommittee on Latin American affairs.

The Senate always is zealous in asserting its prerogatives in international relations. Subcommittee Chairman Wayne Morse, D-Ore., already has complained that the administration failed to inform Congress of the U. S. role in the Cuban invasion.

Over the weekend, both Rusk and Allen W. Dulles, director of the Central Intelligence Agency, agreed to testify. The CIA has criticized in some parts for its appraisal of the Cuban situation. However, an administration official has said there were no miscalculations on the part of the CIA.

The State Department advised American citizens to leave Cuba. The Swiss Embassy in Havana, which has been taking care of U. S. interests since the United States broke relations with Cuba, has notified Americans it would be in their interest to return to the United States.

The U. S. role in the Cuban invasion sparked picketing of CIA headquarters in Washington by 90 pacifist-lead demonstrators Sunday. While nine plan to fast the others intend to demonstrate around the clock for two weeks.

Police kept the demonstrators separate from George Lincoln Rockwell, commander of the American Nazi party, and 19 of his khaki-uniformed followers.

### Water Line Shutoff Delayed To Tuesday

A water service shutoff scheduled today for all of Dixonville and most of Beechwood has been postponed until Tuesday morning, Supt. Donald T. Duke warned householders.

The shutoff will be made tomorrow at 8 a. m. and will continue for about two hours. Delay in cutting pipe forced the postponement. A bypass is being constructed around the site of an earth slide on Anderson Blvd.

### Israeli Aide Buried

TEL AVIV, Israel (AP) — Dr. Fritz Peretz Naphtali, labor and economic expert and former Israeli Cabinet member, was buried today at the Alumot Kibutz on the Sea of Galilee.

## Rebels Offer Cease-Fire, Press Drive

### Phouma Proposes Truce, But Troops Fight At Ban Keun

**BULLETIN**

**VIENTIANE, Laos (AP) — King Savang Vathana opposes a 14-nation peace conference on Laos, Cambodia's Prince Norodom Sihanouk said today. This might throw up another roadblock to a cease-fire.**

VIENTIANE, Laos (AP)—The pro-Communist Pathet Lao rebels proposed a cease-fire meeting in no-man's land areas north of Vientiane, but they showed no sign of slackening their drive against the Western-backed Laotian government.

A government officer carrying a white flag was to try to contact the Pathet Lao today near Ban Namon, about 35 miles north of this administrative capital. A similar mission Saturday was ignored by the rebels.

Neutralist Prince Souvanna Phouma, whom the Communist bloc recognizes as premier of Laos, said he would agree to a military meeting in Ban Namon before Wednesday. Capt. Kong Le, commander of one faction of the rebels, followed up with a broadcast promise of safe conduct to Ban Namon.

Kong proposed that each side send a delegation of five to ten persons "to discuss the fixing of a specific date and hour at which a cease-fire should begin, and to discuss the rules governing the cease-fire."

It was the first time the rebels had proposed a meeting outside their stronghold at Xieng Khouang, on the central plain, or at Vang Vieng, 45 miles north of Vientiane, which the rebels seized recently.

This cheering note was offset by enemy attempts to seize Ban Keun, only 25 miles north of Vientiane.

Military circles were apprehensive the rebels might strike next at Nam Tha, about 70 miles northeast of Luang Prabang. The city, which has a big airstrip, is easily accessible from the Chinese frontier.

Rebel moves in the northwest were seen as part of a general attempt to seize as much territory as possible before a cease-fire takes effect.

## Hancock Fills Juvenile Post

### Prosecutor Names Coach At Weirton

The appointment of a Weirton coach as new probation and juvenile officer of Hancock County was announced today by the office of Prosecuting Atty. Floyd R. Tarr.

John T. Grossi, 31, basketball and football coach at Weirton Madonna High School for several years, was named to the post by Judge Ralph E. Pryor of the 1st Judicial Circuit.

Grossi, who apparently has tendered his resignation as coach of the two sports at Madonna, will begin new duties June 1.

Grossi succeeds William Paolisso of Weirton, who served as probation and juvenile officer of the county for four years under former Circuit Court Judge J. Harold Brennan.

Edward Frankovitch of Weirton, a deputy on the staff of County Sheriff Joseph H. Manypenny, has been serving as temporary probation and juvenile officer since Paolisso vacated the post in January.

A graduate of Weir High and West Virginia Tech, Grossi is married to the former Irene Yacos of Weirton and has four children.

## Kennedy Set To Counter Red Moves

### Military Aid Would Be Made Through SEATO's Program

WASHINGTON (AP)—President Kennedy calls in the National Security Council again today to weigh a more active role for the United States in strife-torn Laos.

Presumably, Kennedy and his top military and diplomatic advisers will consider the possibility of U.S. and allied military intervention as a means of countering Communist advances in Laos and elsewhere in Southeast Asia.

Any intervention would be made through the Southeast Asia Treaty Alliance.

This is the fourth session for the top strategy group within 10 days. It last met Saturday.

There was a chance tension in Laos would be eased by the time Kennedy met with his advisers in late afternoon. The State Department was studying with interest news dispatches from Laos which told of a rebel-backed cease-fire offer.

There was no official comment in Washington, but one official said privately the move by Prince Souvanna Phouma "is encouraging—if true."

The dispatches said Souvanna, who is recognized as premier by the Communist-dominated Pathet Lao rebels, proposed a meeting of military leaders on the front north of Vientiane, the capital.

A white flag mission Saturday failed to establish contact with the rebels.

There were no reports of strong military action Sunday. Saturday, strong anti-government forces struck at Ban Keun, the last large town north of Vientiane.

While it remained in doubt whether a cease-fire formula could be worked out, the United States canceled the airlift of some 6,000 troops to Europe for a planned NATO exercise.

U.S. armed forces appeared to be preparing for any role they may be called on to play in Southeast Asia or elsewhere. They were doing it in a tight-drawn secrecy equaled only in wartime.

Kennedy cut short his weekend rest in the Virginia countryside Sunday to review the Laotian crisis with top government officials.

## Fund Planned For Program In Recreation

### Council Proposes More Playgrounds, Community Center

Councilmen agreed informally Sunday to recommend appropriation of $5,000 out of income tax funds to expand the city's recreation program with establishment of several new playgrounds and creation of a community center to serve all age brackets, with emphasis on teen-agers and "senior citizens."

The preliminary plans were discussed at a meeting which brought together Councilmen John Melvin, Norman Bucher, John Kelly and Donald Hancock.

One of the first steps will be a series of meetings with interested citizens and organizations to help decide the location and cost of new playgrounds and work out further plans for establishment of the recreation center.

The councilmen said they want to discuss the idea with the public representatives and organize committees to help work out details of the program. Council's principal role will be to appropriate the funds and enact any other legislation required to make the program a reality, they said.

Parent - teacher organizations will be among those consulted, as they have had a leading role for years in establishment and operation of playgrounds, the councilmen said. Pending issuance of invitations to interested persons and groups, no dates have been set for the public meetings.

The councilmen said most discussion of the need for a recreation center cites particularly the lack of local facilities for youth, but they added they feel adequate provision also should be made for all other age brackets, particularly retired persons who have time hanging heavy on their hands.

After the new playgrounds are established, they will be turned over to some organization such as a PTA or the Recreation Council for operation, the councilmen said.

The four members agreed there are at least two sites immediately available for playlots — part of a city-owned tract on E. 2nd St. between Broadway and Washington St. and a plot of ground fronting on Avondale St. between Bradshaw Ave. and Minerva St.

Voting Waited Tuesday

## *Showers, Chilly Due For Primary*

Cold, damp weather may reduce the turnout for municipal and village primary elections Tuesday in Columbiana County.

The Ohio weatherman threatened scattered light showers and chilly weather as Republicans and Democrats awaited the biennial trek to the polls to pick slates for the November general election.

Polls will open at 7:30 a. m. and close at 7:30 p. m. (DST).

In East Liverpool, 26 Democrats and 19 Republicans are seeking party nominations for 11 municipal offices.

Both parties also will hold primaries in the county's other three cities — Wellsville, Salem and East Palestine.

The Ohio "no contest" law will eliminate voting on party tickets in the three villages, except for Leetonia Democrats.

Because there are no races to be settled, there will be neither Republican nor Democratic primaries in Lisbon and Columbiana. The Leetonia Republican primary has been eliminated for the same reason, but the village's Democrats have several contests to settle.

In communities where primaries are bypassed, the Election Board will issue certificates of nomination to the candidates, giving them a "free ride" into the November general election.

In addition to its Democratic primary, Leetonia will vote in a special election on renewal of a 4-mill village current expense levy. A 55 per cent affirmative vote is required for approval.

Special elections also are scheduled in Lisbon village and the Lisbon Exempted Village School District. The school district, which includes the village, will vote on a $350,000 bond issue for a building program. A 60 per cent affirmative vote is required for passage.

Lisbon village will vote on a new 3-mill current expense levy. It requires a 55 per cent vote for approval. At Salem, there will be a vote on a 4-mill school district current expense levy.

(Turn to PRIMARY, Page 3)

House Action Asked

## Probe Sought On Alleged Inflated Ohio Utility Base

COLUMBUS, Ohio (AP) — Demands for investigation of alleged utility rate dishonesty are due for an airing at a special meeting of the Ohio House Rules Committee tonight.

First - term Rep. Richard M. Christiansen, D - Richland, called for the inquiry on the basis of a letter he said George B. Quatman of Lima, head of 16 Ohio telephone firms, admitted writing to a New York utility broker.

The letter termed election of a Republican - controlled legislature a repudiation of what Quatman called an anti-utility policy of Democratic state administrations. Christiansen has declined to say how he came by the letter but indicated he might tell the committee.

A section of Quatman's letter carried in the probe resolution made this observation about applications for approval of gas, electric and telephone rates by the Public Utilities Commission:

". . . The utilities now, instead of being honest with their contentions on rate base, inflate them, knowing they are going to be pulled down."

Christiansen said he hoped for widespread publicity on the situation but House Speaker Roger Cloud, R-Logan, chairman of the powerful Rules Committee, observed that he had no intention of making a production out of the hearing.

Sessions of the Rules Committee usually are closed but Cloud said the hearing would be open. It will follow the start of the legislature's 18th work week.

## Cubans Fete May Day And Rebel Defeat

### 3 Million To Hear Castro, Winner Of Soviet Peace Prize

KEY WEST, Fla. (AP) — Cubans massed today in Havana's civic square for a Moscow-styled May Day of Fidel Castro's Socialist revolution and the victory of his troops over insurgent invaders.

Castro, who Sunday was awarded the Lenin peace prize, President Osvaldo Dorticos and economic chief Ernesto Guevara were scheduled to address multitudes of workers and militia brought into the capital for the day. Havana radio said about three million persons would participate in the rally.

The prime minister, fresh from his victory over invasion forces that landed in Cuba two weeks ago, was expected to speak at length on the course of his regime now that it has entered into its "Socialist phase."

Troops will be on the alert throughout the island against an attack which Castro propagandists said they fear.

Foreign delegations will include groups from the Soviet Union, European Communist countries, Asia and even one American group which the radio said will march to show that "all Americans are not imperialists."

A Havana newspaper was quoted as saying an effigy of President Kennedy would be burned at the rally. The report said Kennedy would be represented as a Statue of Liberty dressed in a Ku Klux Klan robe and carrying a torch in the right hand and a crown of cannons on his head, topped by a vulture and a Nazi swastika.

Simultaneously with the Havana rally, Castro's brother Raoul, who heads the Cuban armed forces, will speak at another rally at Santiago de Cuba, the island's second largest city.

The May Day celebrations follow a massive, weeklong dose of anti-American propaganda and an equally concentrated ration of praises for the virtues of socialism.

Notice! Local 86. Polls open in general election on May 2 from 12 noon to 7 p. m. All members urged to vote. By order of Pres.—Ad.

## Run Clearing Job To Begin

### Demolition Slated At Staats' Property

Demolition of the rear portion of the M. F. Staats property on Virginia Ave., with whom the city has been feuding for years over flooding of the East End Run, will begin Tuesday morning, Safety-Service Director Lee Copenhaver said today.

The director said the Christy Demolition Co. will tear down a 12-foot section of the store room and also will remove a collapsed garage so city crews can clear the run.

The cost of the work will be charged against the property owner, the director said.

In mid-March, Council approved legislation ordering Staats to remove the alleged obstructions from the run within seven days or the city would do the work and charge Staats.

Council authorized its street and finance committees to work with the director and Solicitor Joseph W. Cooper in an effort to agree on a purchase price for the property.

The two committees were designated at the April 17 Council meeting after Copenhaver said he would welcome aid in working out the negotiations.

# Swim SUITS

...for posing or plunging

from our Album of Summer scenes

*Even the tide waits for the girl who's in a swimsuit from our new collection. Ride the high wave of fashion.*

Such flattery! The secret is in its off-the-face contours, patterned after a Paris hair-do. Try "coif" with exclusive dri-guard seal; in top fashion shades. One size fits all, 1.98.

**just wear a smile and a Jantzen**

## We'll be seeing more of you . . . definitely!

And these new Jantzen "bare essentials" show the beautiful reasons why. Cut lower in front, raised higher on the leg or plunging deep in back . . . Never, never, never have swim suits dared such baring. "Back dive" lower (right) gives a new definition to the low, low backed sheath, scooping waist deep for a smooth tan from there to there. Shock colors with back tie straps in contrast shades, 8-18.

"Star Bright" Maillot (center) incovers extra inches for the leggiest look ever. Foamy-light moonglow knit of nylon and spandex; gently rounded neckline, blazing rhinestone straps, 8-16. (left) deeply V'D "Neo--Classic" sheath of silken Helenca Nylon, 8-18..Each 19.95.

**just wear a smile and a Jantzen**

# Services Set For City Man

Services for John F. Gilligan, 50, of 705 Orchard Grove Ave., will be held Wednesday at 11 a.m. at the Turel Funeral Home in Toronto by Fr. A. F. Cappelli, pastor of St. Francis Catholic Church in Toronto.

Burial will be in Union Cemetery in Toronto.

He was pronounced dead on arrival Friday night at City Hospital after suffering a heart attack while at the home of American Legion Post 70 in Wellsville.

He was born in Toronto July 16, 1910, son of John N. Gilligan, who now lives in Hammond, Ind., and the late Mary McCuen Gilligan. He had lived in East Liverpool for several years. He was employed at Midland Works of the Crucible Steel Co. for 15 years and for the last several years worked in the Titanium Plant. He worked last Friday. He was a member of United Steelworkers Local 1212.

Besides his father, he is survived by his widow, Mrs. Netta Waters Gilligan at home; three daughters, Mrs. J. Dean Jones and Miss Carol McSwiggen, both of Cleveland, and Mrs. Walter L. Traill of Newark, N. J.; three step-daughters, Mrs. Charles Rockwood and Mrs. Harry Nesselrode, both of East Liverpool, and Mrs. Anita Campbell of Cleveland; three brothers, James J. Gilligan of Wireton, Pa. Nicholas Gilligan, stationed with the Marines in California, Vincent Gilligan of Hammond, and 11 grandchildren.

Friends may call at the MacLean Funeral Home in Wellsville this afternoon and tonight. The body will be removed to the Toronto funeral home Tuesday, where friends may call Tuesday afternoon and night.

### James Robinson

James W. Robinson, 68, retired crane operator at the Weirton Steel Co., died of a heart attack Sunday morning at 3:45 at the home of a daughter, Mrs. Ethel Jones of Mingo Junction, with whom he resided.

He was born Feb. 7, 1893, in Wirt County (W.Va.) son of the late Thomas Robinson and Ella Butcher Thomas Robinson. He married the former Florence E Welling, who died April 12, 1960. He was a member of the Steubenville Christian Church.

He leaves another daughter, Mrs. Emma Dowdy of Weirton; a son, James H. Robinson of Steubenville; two sisters, Mrs. Vera Jones of Steubenville and Mrs. Clariol Tingler of New Cumberland and five grandchildren.

Services will be held Wednesday at 1 p. m. at the Steel-Wolfe Funeral Home in Weirton by the Rev. George Crenshaw. Burial will be in Chapel Hill Memorial Gardens in Weirton.

Friends may call at the funeral home after 3 this afternoon.

### Mrs. Louisa Shook

Mrs. Louisa Shook of Toronto died Sunday at 11:15 a. m. at the Ohio Valley Hospital in Steubenville following a long illness. She was 79.

Mrs. Shook was born in Monroe County, daughter of the late Barton Mercer and Rebecca Haught Mercer. She was a member of the Empire Methodist Church and the Toronto Star of the Valley Council, Daughters of America.

She leaves a son, Russell Shook of Toronto; a brother Samuel Mercer of Germano, Ohio, five grandchildren, seven great-grandchildren, and several nephews and nieces.

Services will be held Wednesday at 11 a. m. at the Clarke Funeral Home at Toronto by the Rev. William Mautz. Burial will be in New Cumberland Cemetery.

Friends may call at the funeral home tonight from 7 to 9 and Tuesday from 2 to 4 and 7 to 9 p. m.

### Frank Bailey

Frank Edward Bailey of Langeloth, Pa., husband of Mrs. Elsie Loy Bailey, a former resident of Chester, died Saturday night at a hospital in Washington, Pa., following a brief illness. He was 63.

He was born April 3, 1898, in New Cumberland, son of the late Robert Bailey and Susan Parsons Bailey.

Besides his widow, at home, he leaves four daughters, Mrs. Pete Milanovich of Aliquippa, Mrs. George O'Shanko and Mrs. Steve Slopek, both of Burgettstown, and Mrs. Curtis Newton of Mobile, Ala.; a brother, John Bailey of Burgettstown, 15 grandchildren and one great-grandchild.

Services will be held Tuesday at 2 p. m. at the Lee-Wilson Funeral Home in Burgettstown. Burial will be in the Hammondsville Cemetery.

Friends may call at the funeral home tonight.

### Thomas O'Brien

Thomas P. O'Brien of Los Angeles, a former resident of East Liverpool, died of a heart attack Sunday morning while visiting a daughter, Mrs. James Hanratty of Hopkinsville, Ky.

He left this area about 30 years ago. He formerly operated a tavern here.

He leaves another daughter, Mrs. Carl White of Los Angeles. Burial will be in Kentucky.

### William Miller

EAST PALESTINE — William E. Miller of Carbon Hill Rd., R. D. 1, died of a heart attack at his home Sunday at 6 p. m. He was 57.

Mr. Miller was born in Unity Township May 15, 1903, a son of the late David and Clara Hoover Miller. A former Pennsylvania Railroad employe, he had worked for several years as a trucker. He was a member of the Evangelical United Brethren Church.

Survivors include two daughters, Mrs. Joann Fowler of Rogers R. D. 1 and Mrs. Helen Spear of East Palestine; a brother, Elmer Miller of New Waterford R. D.; a sister, Mrs. Grace Floor of East Palestine, and three grandchildren.

Services will be held Wednesday at 1:30 p. m. at the Van Dyke Funeral Home by the Rev. Thomas Hammerton. Burial will be in Glenview Cemetery.

Friends may call at the funeral home Tuesday from 7 to 9 p. m.

### Tag Day Nets $208

EAST PALESTINE — A total of $208 was raised in a Cancer Fund Tag Day held Saturday by 26 elementary pupils, according to Mrs. Paul Brittain, chairman, Mrs. Gwen Gallatin, general chairman, said the city total now stands at $1,531.

**Fourth Ward**

A: St. Stephen's Parish House, 220 W. 4th St.

B: B'Nai Israel Temple, Monroe and W. 5th St.

C: McKinnon residence, 620 Jefferson St.

D: Westgate School, W. 8th St.

E: Hoschar residence, 934 May St.

F: Pleasant Heights School, 1540 Lisbon St.

G: Rumberger residence, 1005 Dresden Ave.

H: Pleasant Heights School, Lisbon St.

## Space Try

(Continued from Page One)

It will be a busy morning, with a physical examination, and the complicated process of getting into the space suit.

The suit itself is an example of the double safety standards taken for the astronauts. This suit will be filled with pure oxygen. If the space capsule is damaged and won't hold air, the space suit will become the small world of the astronaut.

There are two radio channels, two microphones, and if they fail, a telegraph key. On the ground there are two radio command receivers. If one battery system in the space capsule fails, there is a 15-hour spare.

The automatic systems that release the parachutes are backed up by manual systems operated by the pilot. There is a spare parachute.

Radio beacons to help ships locate the capsule in the water are backed up by manual systems. There is a special flashing light, and dyes to color the water, aiding air searchers. If the capsule should leak, the astronaut can escape aboard a life raft.

Through much of the flight, the space pilot has a job to do. He must report to the ground stations below at regular intervals. He must handle some of the manual switches to see if he can guide the space craft during the stresses of the flight.

Not only his life, but the lives of future American astronauts are involved in the completeness with which this has been planned.

### 14 Hear Bonds Aired

LISBON — Fourteen attended a meeting of the Citizen's Council on Education Sunday afternoon at the Lisbon High School to discuss problems in the schools which they think should be corrected. Lisbon Village School District will vote Tuesday on a $350,000 bond issue for construction of a 14-room addition at McKinley Elementary School to house the overflow of pupils in coming years.

## Steelmark

(Continued from Page One)

gram tonight in Steubenville will climax the first day's observance. But in East Liverpool and in other communities along the Ohio as south to Wheeling, the program will continue for the balance of the week.

East Liverpool stores have set up 15 displays of steel products furnished by the Midland Works of the Crucible Steel Co.

Thursday through Saturday, East Liverpool stores will conduct a special sale tied in with the promotion, featuring products made of steel.

Meanwhile, a series of carnival amusement rides will be set up on Washington St. between E. 5th and E. 6th Sts. Participating merchants will distribute half-price tickets entitling their customers to rides.

The local program is being sponsored by the East Liverpool Merchants Association, the Chamber of Commerce and Jaycees.

The sale, with the carnival rides in conjunction, will continue through Saturday. Nolan Amusement Co. of Zanesville will furnish the rides, including amusements for kiddies and a merry-go-round and ferris wheel.

The climax of the local program will come Saturday night at 6 with a "Salute to Steel" parade being arranged by the Jaycees. It will feature five district bands, floats, military units, fire equipment and many new cars.

Stores will remain open until 8:30 p.m. Saturday because of the parade. They also will be open as usual until 8:30 Thursday night.

Research chemists have succeeded in taking chlorophyll apart and putting it together again. But no one has yet managed to duplicate photosynthesis.

Mr. Miller was born in Unity Township May 15, 1903, a son of the late David and Clara Hoover Miller. A former Pennsylvania Railroad employe, he had worked for several years as a trucker. He was a member of the Evangelical United Brethren Church.

Survivors include two daughters, Mrs. Joann Fowler of Rogers R. D. 1 and Mrs. Helen Spear of East Palestine; a brother, Elmer Miller of New Waterford R. D.; a sister, Mrs. Grace Floor of East Palestine, and three grandchildren.

Services will be held Wednesday at 1:30 p. m. at the Van Dyke Funeral Home by the Rev. Thomas Hammerton. Burial will be in Glenview Cemetery.

Friends may call at the funeral home Tuesday from 7 to 9 p. m.

## Tag Day Nets $208

EAST PALESTINE — A total of $208 was raised in a Cancer Fund Tag Day held Saturday by 26 elementary pupils, according to Mrs. Paul Brittain, chairman, Mrs. Gwen Gallatin, general chairman, said the city total now stands at $1,531.

# Primary

(Continued from Page One)

A 60 per cent vote is required for approval.

The Southern Local District will vote on a combination $356,000 bond issue and half - mill levy designed to finance a building program. A bare majority is required for approval.

Except in communities where there will be two-party primaries, the board has assigned four-member precinct staffs, two fewer than the regular number.

Here's the list of East Liverpool polling places:

**First Ward**

A: Klondyke School, Ohio Ave.
B: Collins residence, 1124 St. George St.
C: Louis-James Clothing Store, 539 Mulberry St.
D: Horace Mann School, Erie St.
E: Tice Market, 1646 Pennsylvania Ave.
F: Adkins residence, 447 Virginia Ave.
G: St. Ann Church Hall, 1500 Pennsylvania Ave.

**Second Ward**

A: Litten Motors, 433 Walnut St.
B: Parts Service Co., 640 Bradshaw Ave.
C: McKinley School, Ambrose Ave.
D: Pepin residence, 617 Minerva St.
E: North Side Fire Station, St. Clair Ave.
F: Emmanuel Presbyterian Church, Park Blvd.
G: McKinley School, Ambrose Ave.
H: McKinley School, Ambrose Ave.
I: Torrence residence, 151 Center St.
J: Emmanuel Presbyterian Church, Park Blvd.

**Third Ward**

A: B'nai Jacob Synagogue, E. 3rd St.
B: City Hall, W. 6th St.
C: Central Fire Station, Broadway.
D: Franklin residence, 333 Grant St.
E: Lincoln School, 800 Orchard Grove Ave.
F: Wilson residence, 416 Prospect St.
G: Lincoln School, 800 Orchard Grove Ave.

**Fourth Ward**

A: St. Stephen's Parish House, 220 W. 4th St.
B: B'Nai Israel Temple, Monroe and W. 5th St.
C: McKinnon residence, 620 Jefferson St.
D: Westgate School, W. 8th St.
E: Hoschar residence, 934 May St.
F: Pleasant Heights School, 1540 Lisbon St.
G: Rumberger residence, 1005 Dresden Ave.
H: Pleasant Heights School, Lisbon St.

# Space Try

(Continued from Page One)

It will be a busy morning, with a physical examination, and the complicated process of getting into the space suit.

The suit itself is an example of the double safety standards taken for the astronauts. This suit will be filled with pure oxygen. If the space capsule is damaged and won't hold air, the space suit will become the small world of the astronaut.

There are two radio channels, two microphones, and if they fail, a telegraph key. On the ground there are two radio command receivers. If one battery system in the space capsule fails, there is a 15-hour spare.

The automatic systems that release the parachutes are backed up by manual systems operated by the pilot. There is a spare parachute.

Radio beacons to help ships locate the capsule in the water are backed up by manual systems. There is a special flashing light, and dyes to color the water, aiding air searchers. If the capsule should leak, the astronaut can escape aboard a life raft.

Through much of the flight, the space pilot has a job to do. He must report to the ground stations below at regular intervals. He must handle some of the manual switches to see if he can guide the space craft during the stresses of the flight.

Not only his life, but the lives of future American astronauts are involved in the completeness with which this has been planned.

## 14 Hear Bonds Aired

LISBON — Fourteen attended a meeting of the Citizen's Council on Education Sunday afternoon at the Lisbon High School to discuss problems in the schools which they think should be corrected. Lisbon Village School District will vote Tuesday on a $350,000 bond issue for construction of a 14-room addition at McKinley Elementary School to house the overflow of pupils in coming years.

# Steelmark

(Continued from Page One)

gram tonight in Steubenville will climax the first day's observance. But in East Liverpool and in other communities along the Ohio as south to Wheeling, the program will continue for the balance of the week.

East Liverpool stores have set up 15 displays of steel products furnished by the Midland Works of the Crucible Steel Co.

Thursday through Saturday, East Liverpool stores will conduct a special sale tied in with the promotion, featuring products made of steel.

Meanwhile, a series of carnival amusement rides will be set up on Washington St. between E. 5th and E. 6th Sts. Participating merchants will distribute half-price tickets entitling their customers to rides.

The local program is being sponsored by the East Liverpool Merchants Association, the Chamber of Commerce and Jaycees.

The sale, with the carnival rides in conjunction, will continue through Saturday. Nolan Amusement Co. of Zanesville will furnish the rides, including amusements for kiddies and a merry-go-round and ferris wheel.

The climax of the local program will come Saturday night at 6 with a "Salute to Steel" parade being arranged by the Jaycees. It will feature five district bands, floats, military units, fire equipment and many new cars.

Stores will remain open until 8:30 p.m. Saturday because of the parade. They also will be open as usual until 8:30 Thursday night.

Research chemists have succeeded in taking chlorophyll apart and putting it together again. But no one has yet managed to duplicate photosynthesis.

Monday, May 1, 1961 — Page 4

## Recommendations For The Primary

East Liverpool voters will select Republican and Democratic nominees for 11 offices when they go to the polls in Tuesday's primary election.

All offices are at stake except municipal judge and city solicitor, with principal interest centering on mayoralty contests.

—:—

**THREE ARE SEEKING** the nomination for mayor on the Republican ticket. They are William T. Kind, Paul V. Baxter and O. Earl Greenawalt. Mr. Kind and Mr. Baxter are former city councilmen. Mr. Greenawalt served six terms as mayor and later was Municipal Court bailiff for 10 years.

Experience in the office is on Mr. Greenawalt's side.

Incumbent Bert H. Goodballet is opposed by Lawrence A. Finlay on the Democratic ticket. Mr. Goodballet should be renominated, his qualifications far outweighing those of Mr. Finlay.

—:—

**THERE ARE CONTESTS** for president of Council on both tickets.

John W. Paul is opposing Samuel B. Webber on the GOP slate. Mr. Webber was Fourth Ward councilman in 1958-59. Mr. Paul also is a former councilman and was a one-time candidate for mayor.

The Review recommends Mr. Webber.

The Democratic candidates for president of Council are Arch H. Smith, an employe of the Midland Works of the Crucible Steel Co.; Charles N. Edwards, the incumbent, and Robert Owen, hardware operator and a former councilman.

Mr. Edwards deserves the nomination, having performed capably during his first term in office.

—:—

**SIX ARE SEEKING** three councilmen-at-large posts on both the Republican and Democratic tickets.

The Republicans are William Y. Orr, Robert W. Sample, George E. Willshaw, Frank J. Youst, George F. Crossen and A. Stanley Kidder.

Mr. Orr, Mr. Sample and Mr. Willshaw have served creditably in Council in the past and are recommended for the nomination.

The Democratic candidates are Donald S. Hancock, John A. Melvin, James A. Moore, Albert R. Sayre, Norman R. Bucher and Frank Duffy.

Mr. Hancock, Mr. Melvin and Mr. Bucher are incumbents and are recommended to the voters.

—:—

**THERE ARE NO** contests for treasurer or solicitor on either ticket Tuesday.

Incumbent Bert A. Dawson is the Republican candidate for treasurer and Atty. Donald E. Smith for solicitor. Their Democratic opponents in the fall will be Gloria W. Young and Joseph W. C. Cooper, the present solicitor.

In addition there are races for ward Council posts. It again is suggested that voters in the various precincts cast their ballots for the candidates they feel will serve not only their ward well, but the city as a whole.

## A Salute To Those In Steel

East Liverpool and other Upper Ohio Valley communities today begin to pay a fitting tribute to the steel industry which is such a vital part of the district's economy.

The occasion is known as "Steelmark Days" and is intended to encourage the buying of American - made steel products.

Steel plays an important part in the East Liverpool area's employment picture. Some 6,000 depend on the mills and allied industries for their livelihood.

The "Steelmark Days" program demonstrates forcefully what can be done when communities get their heads together in worthwhile promotions. The response and cooperation has been enthusiastic and gratifying since the idea first was kicked around. Much thought and effort has gone into the various projects that are being featured in the individual communities.

East Liverpool, linked closely to both the Midland Works of the Crucible Steel Company of America and the Weirton Works of the National Steel Corp., has done itself proud in joining in the "Steelmark" activities. The week-long program, to be climaxed by a parade on Saturday, not only will honor steel but will fit in well with the campaign to emphasize the shopping opportunities offered by the city's many stores.

Such endeavors are the sign of an energetic community. A do-nothing attitude has no place in today's highly - competitive world.

A salute to steel and to those who have seen fit to pay it deserving recognition.

## On Behalf Of Safety

Mayor Goodballet's proclamation designating May as "Industrial Safety Month" brings to mind the outstanding job being done in Columbiana County in the direction of such a program.

Many county firms were honored last month for their efforts on behalf of industrial safety at the annual banquet in Salem. The meeting is always one of the best attended in the state and provides an enthusiastic climax for the year - round safety program.

Industrial safety is a basic part of any properly - operated company. County firms can hold their heads high for the active work they are doing in the field of safety.

## Hour A Day For Six Months

Daylight saving time is with us once again, providing an extra hour of daylight at the end of the day for some 50.7 per cent of Americans.

Some people still don't like it. They are the ones who must sleep in the daytime because they work at night. TV programmers, farmers and transportation workers.

But most people do like it because it gives them an extra hour after their work to putter in their gardens, play golf or tennis, go swimming or fishing, or do any of the many pleasant things that make people want to be outdoors in summertime.

Daylight time was pressed upon the nation during World War 1 to conserve electric power. Some areas retained it after the war because they liked it. Others went back to standard "slow" time. By 1948 the estimate was that 37 percent of the population had daylight time during the summer. Last year the percentage had risen to more than half.

It would be complicated indeed for East Liverpool to ignore "fast" time, because every major city nearby has it.

You lost an hour's sleep, but you'll make up the lost hour the last Sunday in October, when you'll set your clock back again to standard time.

Meanwhile, think of the many enjoyable ways in which you can use an extra hour of daylight during the next six months.

## The Once Over

Flash from Washington: Central Intelligence Agency has just discovered that Gen. Grant is up to something in the vicinity of Appomattox Courthouse.

New York is probling allegations of racketeers in bingo. This is one field where it should be easy to get crooks' 'numbers."

Suggestion of hour: "Let's go to the Supreme Court and see the fights."

AT&T had a big drop. Probably due to a report, "Come here, Watson; I can hear you," was a misquotation. Just met a Paris-bound tourist who says, "I hope it won't be a case of sitting at an outdoor cafe and seeing the well-known army tanks go by."

Secretary Abraham Ribicoff says American schools are "soft, lax, weak and slovenly." This won't affect the kids, since few can read words like "lax" and "weak," and think "slovenly" is for college honor students.

President Kennedy has a French cook in White House, and continued warmth for De Gaulle may depend on him.

Russia has agreed to a cease fire in Laos while it replenishes its ammunition. It will suspend aggression Sundays and holidays.

Three famous horses were guests at Waldorf-Astoria luncheon of trotting-track folks. They seemed to have as much trouble with finger-bowls as the humans. We hear the horses didn't go for "eminence of oats" or "hay under glass with green peas." One was overheard to say, "I wish we could go some place for a plain green apple on a roll." It was one lunch at which the crack, "I'm so hungry I could eat a horse," could have meant a genuine test.

Bob Kennedy is among those probing C.I.A. and will probably ask, "How come we goofed? Answer yes or no."

Mica is a mineral that can be fashioned into sheets as thin as tissue paper. A piece of this mineral an inch thick can be made into almost a thousand sheets, each of them as thin as the thinnest tissue paper.

## This And That

Copyright registrations, under the Act of 1909, apply for a period of 28 years, and may be extended, upon application, for a second term of 28 years. Copyrights may be secured for unpublished works such as lectures, sermons, dramatic compositions, works of art, and motion picture plays — or for published works such as books, maps, prints, and periodical publications.

Although for many years the age of 65 marked the time of retirement, today three-fifths of all men between the ages of 65 and 70 are still employed, almost two-fifths of those between the ages of 70 and 75 are still working, and about one-fifth of those beyond the age of 75.

When Lyndon B. Johnson was elected vice president, he was the first man in American history to be elected on the same day to two high offices in the nation. Not only was he elected vice president, but also was re-elected as senator from Texas. He gave up the senatorial office.

Brazil, the only Latin American nation deriving its culture and language from Portugal, is by far the largest country in South America, covering nearly half the continent. In the Western Hemisphere, it is second to Canada, and in the world it ranks after the U.S.S.D., China, and Canada.

Plants demonstrated their remarkable ability to travel on the wind after the volcanic eruption on Krakatau in 1883. The explosion killed every living thing on the Indonesian island, yet in 10 years the naked isle was again clothed with vegetation.

Uranium, the valuable metal of today which, as the source of atomic energy, has completely changed man's way of life, was used only about 16 years ago for such prosaic things as coloring false teeth, pottery, and glassware.

## *Look Nik, They Weren't Talking About Golf*

## Bridge's Union Hall Hosts Reds

By Victor Riesel

During a recent meeting in New York City of the Communist party (U.S.A.) leadership behind the tightly closed doors at 23 W. 26th St., it was decided that San Francisco was the happiest hunting ground for those in Red politics. The party leader, Gus Hall, said they would attempt to run their biggest May Day celebration in that city.

Victor Riesel

They knew they'd have difficulty renting a hall. Being realists, they did what any pragmatist would do. They went to the manager in the headquarters building of Harry Bridges' International Longshoremen's and Warehousemen's Union (ILWU). He checked his open dates closest to May Day.

This opening fell on April 29. The hall was hired for an 8:30 p.m. rally — the ILWU national headquarters hall at 150 Golden Gate — starring Elizabeth Gurley Flynn, chairman of the American Communist party. Not inconsequential is the fact that the rental is quite nominal.

**THE USE** of the longshoremen's hall by the American Communist party leadership raises some fascinating questions.

True the hall is for hire. But not, certainly, to all comers.

Would Mr. Bridges lease the hall paid for by his members' dues to the Ku Klux Klan or the American Nazi party? I doubt it.

He would not want news stories to be tapped out on the world's news tickers stating that the KKK met in the ILWU hall.

But news stories, especially those filed behind the Iron and Bamboo curtains, will say that American Communists met in the longshoremen's auditorium.

This will lend prestige to the party. This will insinuate that American labor and American Communists are in some sort of united front.

This may not embarrass Harry Bridges. After all this truly powerful Pacific waterfront leader once did write that:

"The position of our union should be understood . . . (when) on strike they will take help from any source and if it is a question of Communist or others, in Australia, Great Britain, Russia, France or anywhere else in the world, when we send out a call for help, we don't say, 'Just accept this call if you are not a Communist union,' we send it out and we hope for the best.

"That is true of my membership and that is the way we work, and that is all we are after."

**HARRY BRIDGES** may not be embarrassed by the Communist-led meeting in his headquarters hall, for did he not organize a Pacific and Asian Dockworkers' Conference of bitterly anti-U. S. unions? He did.

They met in Tokyo, May 13, 1959, and their continuation committee has been meeting ever since. Bridges himself issued a call for that parley.

Back there in Tokyo they agreed that their affiliated unions would help each other across the world in the event any of them struck in their home ports.

The conference also intrigued observers by urging a division of the United Nations to investigate labor conditions in Okinawa and Cambodia.

This resolution said that working conditions in these areas were "inhuman and slavelike."

It should be pointed out right here that the U.S. governs Okinawa, on which rests one of our mightiest defense bases. And Cambodia nestles right alongside besieged Laos. Fascinating, isn't it?

**THE PARLEY** demanded that we get our atomic arms out of Asia and our bases out of Japan. Harry Bridges, addressing delegates from Russian, Indonesian and Australian waterfront unions, denounced our peace treaty with Japan.

To bring this right up to the minute, let me report an interesting set of almost similar resolutions passed by the recent ILWU convention in Hawaii. These included a pledge of cooperation with all Pacific and Asian dockworkers.

All of this may not embarrass Harry Bridges. But what of congressmen, including one U.S. senator who called him "my friend Harry"?

And what of the labor men who have pacts with his union? What have they to say now of the ones responsible for permitting a union hall to be used by those who serve as agitation-propagandists for Chairman Khrushchev?

## Letter To The Editor

Residents of Southern Local School District: Do you think you can afford not to build a new school? Do we ever get anything worthwhile in life without paying a price?

More than dollars is the importance of a better education for more children. Our children are our most precious possession. Each year brings a need for change and improvement. A new school building will not answer all the problems and wherever it were built everyone wouldn't be pleased. A beginning, or a first step, toward betterment is the plan for a new school near Highlandtown.

But many can't accept the vision for personal or local reasons. Please don't base your decision alone on your children alone. We must consider all children and all issues and make our fnial decision for the best of all concerned.

For years our children got on the bus at the end of our lane shortly after 7:15 and rode quite a ways. It didn't seem to affect their health. This was a price we felt we paid for wanting to live in the country and having our children attend a school out of town away from temptations cities offer.

Few complain of money spent for pleasure and amusements. Recently there was an incident bringing attention to the Wellsville jail. And the governor of Ohio, in a recent statement about capital punishment, stated that many persons given death sentences are uneducated and can hardly read or write. Isn't it more important to be concerned about better education than better jails?

Many older people feel no responsibility toward the welfare of our youth. Did they not need the support of their elders in the days of their youth?

When there is such a need, and a number of years may pass before we would get a school if this one is voted down, please don't let past regrets or mistakes or bitterness or personal reasons deprive the whole district. For all children's sake we must look forward not backward.

NANCY SWARTZ
Wellsville

## Down Through The Years

From The Review Files

**THIRTY YEARS AGO** — Miss Mildred Weaver directed the Madrigal Club's benefit concert in the high school auditorium, with proceeds going to the East Liverpool playground.

A chapter of the Daughters of the American Revolution was organized here.

The county commissioners approved plans for the improvement of Clark Ave. between 17th and 25th Sts. in Wellsville.

**TWENTY YEARS AGO** — The weather observer at Millport reported the driest April in 50 years.

Services were held at the $20,000 addition to the Emmanuel Presbyterian Church on Park Blvd.

Clyde Frame Jr., of the Lincoln grade school captured the third annual district YMCA-sponsored marble tournament.

**TEN YEARS AGO** — Jane Barbour received an award for activities at the annual Mother-Daughter banquet of the East Liverpool High School Hi-Tri Club.

Barbara Asher was chosen queen to reign over a dance during the annual May day program at Chester High School.

Mrs. Albert Pittenger was named director of the annual Day Camp of the East Liverpool Area Girl Scout Council.

### Odd Facts

Memorial or Decoration Day was originated by the women of the South at the close of the Civil War. These women made a practice of decorating the graves of soldiers, both Confederate and Union, early in the spring of each year. This struck a sympathetic chord through the North and on May 5, 1868, a general order was issued proclaiming May 30 as the day "for the purpose of strewing flowers or decorating the graves of comrades who died during the late war."

All 4,600,000 residents of Angola in southwest Africa are regarded as Portuguese citizens, but natives must attain certain standards of civilization before they may enjoy full rights of citizenship. Less than one per cent of the natives have graduated to this class.

The governor of St. Eustatius Island in the Dutch West Indies was the first foreign official to acknowledge American independence. He saluted a Continental flag flying the U. S. flag on Nov. 16, 1776.

## Knell Of School Aid?

By David Lawrence

### Federal Order Aimed At Virginia System

President Kennedy may have dealt a fatal blow to the movement to obtain money from the federal government to subsidize public schools.

David Lawrence

He has just demanded that the legislature of a sovereign state — Virginia — be compelled to take punitive action against a single county for failing to open its schools or else abandon the whole public - school system throughout the state. In view of this development, will Congress now take a chance and appropriate money that gives a bureau in Washington potential power over the operation of the public schools throughout the United States?

To tell a state how it must appropriate its funds, how it shall set up its own system of education and what steps it must take to satisfy the federal government's demands is unprecedented in American history.

Yet this, in effect, is the authority sought by the Department of Justice, with the approval of the President, in applying to a federal court for an order against the State of Virginia.

The step is far - reaching. It could mean that in the future the federal government could even tell a state it must have a uniform system of government applying to every county or city.

It so happens that the State of Virginia permits its counties and independent cities to adopt, as they choose, various forms of executive management or control by boards of supervisors elected by the people. But, under the theory just applied by the U.S. Department of Justice, the counties and municipalities would not be permitted to have their own forms of local government but would have to adopt a system uniform throughout the state.

If any county or city deviated, it would be in danger of being compelled to accept an order of the federal government in Washington served upon the state through the courts.

This doctrine is, of course, based upon the concept of the 14th Amendment which the Supreme Court of the United States proclaimed in its "desegregation" decisions in 1954.

The point was made then that "equal protection of the laws" means equal application of state laws to children attending public schools. But there is nothing in the 14th Amendment or anywhere else in the Constitution which says that the federal government may tell a state it cannot provide funds to keep its public schools open in 97 counties and 32 independent cities because a single county happens to close such schools.

This is an obvious form of punitive action that can readily be repeated by an executive order directing any state which accepts federal funds to operate all its schools according to standards laid down by a federal bureau.

**FOR MONTHS** now, the lobbyists for federal aid to education and the politicians who hope to get votes through promised increases in teachers' salaries have been denying that any form of federal control of education would be involved in current proposals for financial aid to state schools.

Now it turns out that, without any specific right granted through existing law, an executive order could be issued — or a court decree sought by direct intervention of the federal government — telling a state how to run its educational system.

The federal government is demanding not only that a state reopen public schools in a particular county but that it shall stop state and county tuition grants for the use of parents who send their children to private schools and cease to pay from state funds for the "maintenance and operation of public schools anywhere in Virginia" as long as the public schools in one county are closed.

This can only mean that the federal government now feels it can interfere in any tuition grants, fellowships, scholarships or other forms of aid if it doesn't like the way the states operate such educational programs.

It certainly is something novel for the federal government to tell state legislatures how to spend their money.

**IT WILL BE** contended that the Supreme Court has not as yet ruled on the new demand of the Department of Justice for dictatorial powers over education in the states. But it may be taken for granted that the lawyers at the department have blazed a new trail and probably have found new devices satisfactory to them whereby the end will justify the means.

If the federal government can tell the State of Virginia that it cannot provide funds for its public schools unless it makes every county and city conform to a pattern approved by the federal government, then constitutional government, as it has been known since the founding of the republic, will indeed have vanished.

Government by executive order or court decree will have supplanted acts of Congress and the laws of 50 state legislatures.

## A Giveaway Fallacy

By Phillip Deane

UNITED NATIONS, N.Y.—According to the figures available at the United Nations, to give United States and other Western food surpluses away not only risks disrupting regular marketing but would be a gross disservice to the recipients.

Dr. Norman Wright, deputy director general of the Food and Agricultural Organization of the U.N. says there are approximately 125 million metric tons of food surpluses available, mostly in the U.S.

More than half of this is in coarse grains, which are not acceptable even to the starving in many parts of the woorld. But even if the hungry five-eighths of mankind were prepared to eat anything and they were given the total of the surpluses accumulated over the past 10 years, Dr. Wright calculates on the basis of the calories contained in the feed the world's 1,8 million hungry people for only three months.

**ALTERNATIVELY**, every Asian could be given an extra 200 calories a day for three years. This need not be negligible but calories from proteins and there are no surpluses of proteins. It wouldn't be sensible to export Western surplus grain to feed Indian cattle: These are highly unproductive, diseased cattle which should not be helped to perpetuate themselves. A good, new breed is needed.

All these arguments are as nothing, however, compared to the cost of shipping the surpluses. The charges for seagoing transport from the United States to Asia would be at least $10 a ton and there would be extra the grain from the storage bin to the ports and to the consumers at the other end. And 125 million tons, at $10 a ton, amounts to $1.25 billion.

It may be argued that if the U.S. wishes to spend this money, why should anyone object. But the U.S. could do the hungry more good by spending the money, not on shipping surplus grain, but on building fertilizer plants.

Greece, which is not among the well-developed countries of Europe, and which has a shortage of water, grows approximately 3,600 pounds of rice per acre, whereas India grows 1,230 pounds per acre.

Italy grows 4,750 pounds of rice per acre . . . in other words, Indian rice production per acre is only one-fourth that of Italy and one-third less than that of Greece; rice culture requires much manual labor and India has plenty of that.

**IMPROVEMENTS** in agricultural techniques, better plows, even healthier workers would help India raise its yields, but the principal reason for the low yield is the poverty of the soil.

Indian fields have hardly ever been fertilized. Animal manure is used as fuel. India consumes an average of 1.4 pounds of fertilizer per acre.

The figure for Greece, possibly free Europe's poorest country, is 18 pounds per acre—these quantities refer to nitrogenous fertilizers, which are best for rice. In soils so starved as the fields of India, even a little fertilizer would double the crop.

Of course there are complications and the simple figures don't tell the whole story. But it is figures like these that have made the FAO conclude that giving away surpluses is not the best way to help.

The "coffee break" has become generally accepted in business operations in the U. S., but more often than not there's more than one of these a day — each "break" averaging about 15 minutes. Business analysts have reported that the major benefit from these "coffee breaks" is a "morale boost" among employes.

**East Liverpool Review**

Monday, May 1, 1961 — Page 4

## Recommendations For The Primary

East Liverpool voters will select Republican and Democratic nominees for 11 offices when they go to the polls in Tuesday's primary election.

All offices are at stake except municipal judge and city solicitor, with principal interest centering on mayoralty contests.

—:—

**THREE ARE SEEKING** the nomination for mayor on the Republican ticket. They are William T. Kind, Paul V. Baxter and O. Earl Greenawalt. Mr. Kind and Mr. Baxter are former city councilmen. Mr. Greenawalt served six terms as mayor and later was Municipal Court bailiff for 10 years.

Experience in the office is on Mr. Greenawalt's side.

Incumbent Bert H. Goodballet is opposed by Lawrence A. Finlay on the Democratic ticket. Mr. Goodballet should be renominated, his qualifications far outweighing those of Mr. Finlay.

—:—

**THERE ARE CONTESTS** for president of Council on both tickets.

John W. Paul is opposing Samuel B. Webber on the GOP slate. Mr. Webber was Fourth Ward councilman in 1958-59. Mr. Paul also is a former councilman and was a one-time candidate for mayor.

The Review recommends Mr. Webber.

The Democratic candidates for president of Council are Arch H. Smith, an employe of the Midland Works of the Crucible Steel Co.; Charles N. Edwards, the incumbent, and Robert Owen, hardware operator and a former councilman.

Mr. Edwards deserves the nomination, having performed capably during his first term in office.

—:—

**SIX ARE SEEKING** three councilmen-at-large posts on both the Republican and Democratic tickets.

The Republicans are William Y. Orr, Robert W. Sample, George E. Willshaw, Frank J. Youst, George F. Crossen and A. Stanley Kidder.

Mr. Orr, Mr. Sample and Mr. Willshaw have served creditably in Council in the past and are recommended for the nomination.

The Democratic candidates are Donald S. Hancock, John A. Melvin, James A. Moore, Albert R. Sayre, Norman R. Bucher and Frank Duffy.

Mr. Hancock, Mr. Melvin and Mr. Bucher are incumbents and are recommended to the voters.

—:—

**THERE ARE NO** contests for treasurer or solicitor on either ticket Tuesday.

Incumbent Bert A. Dawson is the Republican candidate for treasurer and Atty. Donald E. Smith for solicitor. Their Democratic opponents in the fall will be Gloria W. Young and Joseph W. C. Cooper, the present solicitor.

In addition there are races for ward Council posts. It again is suggested that voters in the various precincts cast their ballots for the candidates they feel will serve not only their ward well, but the city as a whole.

## A Salute To Those In Steel

East Liverpool and other Upper Ohio Valley communities today begin to pay a fitting tribute to the steel industry which is such a vital part of the district's economy.

The occasion is known as "Steelmark Days" and is intended to encourage the buying of American - made steel products.

Steel plays an important part in the East Liverpool area's employment picture. Some 6,000 depend on the mills and allied industries for their livelihood.

The "Steelmark Days" program demonstrates forcefully what can be done when communities get their heads together in worthwhile promotions. The response and cooperation has been enthusiastic and gratifying since the idea first was kicked around. Much thought and effort has gone into the various projects that are being featured in the individual communities.

East Liverpool, linked closely to both the Midland Works of the Crucible Steel Company of America and the Weirton Works of the National Steel Corp., has done itself proud in joining in the "Steelmark" activities. The week-long program, to be climaxed by a parade on Saturday, not only will honor steel but will fit in well with the campaign to emphasize the shopping opportunities offered by the city's many stores.

Such endeavors are the sign of an energetic community. A do-nothing attitude has no place in today's highly - competitive world.

A salute to steel and to those who have seen fit to pay it deserving recognition.

## On Behalf Of Safety

Mayor Goodballet's proclamation designating May as "Industrial Safety Month" brings to mind the outstanding job being done in Columbiana County in the direction of such a program.

Many county firms were honored last month for their efforts on behalf of industrial safety at the annual banquet in Salem. The meeting is always one of the best attended in the state and provides an enthusiastic climax for the year - round safety program.

Industrial safety is a basic part of any properly - operated company. County firms can hold their heads high for the active work they are doing in the field of safety.

## Hour A Day For Six Months

Daylight saving time is with us once again, providing an extra hour of daylight at the end of the day for some 50.7 per cent of Americans.

Some people still don't like it. They are the ones who must sleep in the daytime because they work at night. TV programmers, farmers and transportation workers.

But most people do like it because it gives them an extra hour after their work to putter in their gardens, play golf or tennis, go swimming or fishing, or do any of the many pleasant things that make people want to be outdoors in summertime.

Daylight time was pressed upon the nation during World War 1 to conserve electric power. Some areas retained it after the war because they liked it. Others went back to standard "slow" time. By 1948 the estimate was that 37 percent of the population had daylight time during the summer. Last year the percentage had risen to more than half.

It would be complicated indeed for East Liverpool to ignore "fast" time, because every major city nearby has it.

You lost an hour's sleep, but you'll make up the lost hour the last Sunday in October, when you'll set your clock back again to standard time.

Meanwhile, think of the many enjoyable ways in which you can use an extra hour of daylight during the next six months.

## The Once Over

Flash from Washington: Central Intelligence Agency has just discovered that Gen. Grant is up to something in the vicinity of Appomattox Courthouse.

New York is probling allegations of racketeers in bingo. This is one field where it should be easy to get crooks' 'numbers."

Suggestion of hour: "Let's go to the Supreme Court and see the fights."

AT&T had a big drop. Probably due to a report, "Come here, Watson; I can hear you," was a misquotation. Just met a Paris-bound tourist who says, "I hope it won't be a case of sitting at an outdoor cafe and seeing the well-known army tanks go by."

Secretary Abraham Ribicoff says American schools are "soft, lax, weak and slovenly." This won't affect the kids, since few can read words like "lax" and "weak," and think "slovenly" is for college honor students.

President Kennedy has a French cook in White House, and continued warmth for De Gaulle may depend on him.

Russia has agreed to a cease fire in Laos while it replenishes its ammunition. It will suspend aggression Sundays and holidays.

Three famous horses were guests at Waldorf-Astoria luncheon of trotting-track folks. They seemed to have as much trouble with finger-bowls as the humans. We hear the horses didn't go for "eminence of oats" or "hay under glass with green peas." One was overheard to say, "I wish we could go some place for a plain green apple on a roll." It was one lunch at which the crack, "I'm so hungry I could eat a horse," could have meant a genuine test.

Bob Kennedy is among those probing C.I.A. and will probably ask, "How come we goofed? Answer yes or no."

Mica is a mineral that can be fashioned into sheets as thin as tissue paper. A piece of this mineral an inch thick can be made into almost a thousand sheets, each of them as thin as the thinnest tissue paper.

## This And That

Copyright registrations, under the Act of 1909, apply for a period of 28 years, and may be extended, upon application, for a second term of 28 years. Copyrights may be secured for unpublished works such as lectures, sermons, dramatic compositions, works of art, and motion picture plays — or for published works such as books, maps, prints, and periodical publications.

Although for many years the age of 65 marked the time of retirement, today three-fifths of all men between the ages of 65 and 70 are still employed, almost two-fifths of those between the ages of 70 and 75 are still working, and about one-fifth of those beyond the age of 75.

When Lyndon B. Johnson was elected vice president, he was the first man in American history to be elected on the same day to two high offices in the nation. Not only was he elected vice president, but also was re-elected as senator from Texas. He gave up the senatorial office.

Brazil, the only Latin American nation deriving its culture and language from Portugal, is by far the largest country in South America, covering nearly half the continent. In the Western Hemisphere, it is second to Canada, and in the world it ranks after the U.S.S.D., China, and Canada.

Plants demonstrated their remarkable ability to travel on the wind after the volcanic eruption on Krakatau in 1883. The explosion killed every living thing on the Indonesian island, yet in 10 years the naked isle was again clothed with vegetation.

Uranium, the valuable metal of today which, as the source of atomic energy, has completely changed man's way of life, was used only about 16 years ago for such prosaic things as coloring false teeth, pottery, and glassware.

## *Look Nik, They Weren't Talking About Golf*

## Bridge's Union Hall Hosts Reds

By Victor Riesel

During a recent meeting in New York City of the Communist party (U.S.A.) leadership behind the tightly closed doors at 23 W. 26th St., it was decided that San Francisco was the happiest hunting ground for those in Red politics. The party leader, Gus Hall, said they would attempt to run their biggest May Day celebration in that city.

Victor Riesel

They knew they'd have difficulty renting a hall. Being realists, they did what any pragmatist would do. They went to the manager in the headquarters building of Harry Bridges' International Longshoremen's and Warehousemen's Union (ILWU). He checked his open dates closest to May Day.

This opening fell on April 29. The hall was hired for an 8:30 p.m. rally — the ILWU national headquarters hall at 150 Golden Gate — starring Elizabeth Gurley Flynn, chairman of the American Communist party. Not inconsequential is the fact that the rental is quite nominal.

**THE USE** of the longshoremen's hall by the American Communist party leadership raises some fascinating questions.

True the hall is for hire. But not, certainly, to all comers.

Would Mr. Bridges lease the hall paid for by his members' dues to the Ku Klux Klan or the American Nazi party? I doubt it.

He would not want news stories to be tapped out on the world's news tickers stating that the KKK met in the ILWU hall.

But news stories, especially those filed behind the Iron and Bamboo curtains, will say that American Communists met in the longshoremen's auditorium.

This will lend prestige to the party. This will insinuate that American labor and American Communists are in some sort of united front.

This may not embarrass Harry Bridges. After all this truly powerful Pacific waterfront leader once did write that:

"The position of our union should be understood . . . (when) on strike they will take help from any source and if it is a question of Communist or others, in Australia, Great Britain, Russia, France or anywhere else in the world, when we send out a call for help, we don't say, 'Just accept this call if you are not a Communist union,' we send it out and we hope for the best.

"That is true of my membership and that is the way we work, and that is all we are after."

**HARRY BRIDGES** may not be embarrassed by the Communist-led meeting in his headquarters hall, for did he not organize a Pacific and Asian Dockworkers' Conference of bitterly anti-U. S. unions? He did.

They met in Tokyo, May 13, 1959, and their continuation committee has been meeting ever since. Bridges himself issued a call for that parley.

Back there in Tokyo they agreed that their affiliated unions would help each other across the world in the event any of them struck in their home ports.

The conference also intrigued observers by urging a division of the United Nations to investigate labor conditions in Okinawa and Cambodia.

This resolution said that working conditions in these areas were "inhuman and slavelike."

It should be pointed out right here that the U.S. governs Okinawa, on which rests one of our mightiest defense bases. And Cambodia nestles right alongside besieged Laos. Fascinating, isn't it?

**THE PARLEY** demanded that we get our atomic arms out of Asia and our bases out of Japan. Harry Bridges, addressing delegates from Russian, Indonesian and Australian waterfront unions, denounced our peace treaty with Japan.

To bring this right up to the minute, let me report an interesting set of almost similar resolutions passed by the recent ILWU convention in Hawaii. These included a pledge of cooperation with all Pacific and Asian dockworkers.

All of this may not embarrass Harry Bridges. But what of congressmen, including one U.S. senator who called him "my friend Harry"?

And what of the labor men who have pacts with his union? What have they to say now of the ones responsible for permitting a union hall to be used by those who serve as agitation-propagandists for Chairman Khrushchev?

## Letter To The Editor

Residents of Southern Local School District: Do you think you can afford not to build a new school? Do we ever get anything worthwhile in life without paying a price?

More than dollars is the importance of a better education for more children. Our children are our most precious possession. Each year brings a need for change and improvement. A new school building will not answer all the problems and wherever it were built everyone wouldn't be pleased. A beginning, or a first step, toward betterment is the plan for a new school near Highlandtown.

But many can't accept the vision for personal or local reasons. Please don't base your decision alone on your children alone. We must consider all children and all issues and make our fnial decision for the best of all concerned.

For years our children got on the bus at the end of our lane shortly after 7:15 and rode quite a ways. It didn't seem to affect their health. This was a price we felt we paid for wanting to live in the country and having our children attend a school out of town away from temptations cities offer.

Few complain of money spent for pleasure and amusements. Recently there was an incident bringing attention to the Wellsville jail. And the governor of Ohio, in a recent statement about capital punishment, stated that many persons given death sentences are uneducated and can hardly read or write. Isn't it more important to be concerned about better education than better jails?

Many older people feel no responsibility toward the welfare of our youth. Did they not need the support of their elders in the days of their youth?

When there is such a need, and a number of years may pass before we would get a school if this one is voted down, please don't let past regrets or mistakes or bitterness or personal reasons deprive the whole district. For all children's sake we must look forward not backward.

NANCY SWARTZ
Wellsville

## Down Through The Years

From The Review Files

**THIRTY YEARS AGO** — Miss Mildred Weaver directed the Madrigal Club's benefit concert in the high school auditorium, with proceeds going to the East Liverpool playground.

A chapter of the Daughters of the American Revolution was organized here.

The county commissioners approved plans for the improvement of Clark Ave. between 17th and 25th Sts. in Wellsville.

**TWENTY YEARS AGO** — The weather observer at Millport reported the driest April in 50 years.

Services were held at the $20,000 addition to the Emmanuel Presbyterian Church on Park Blvd.

Clyde Frame Jr., of the Lincoln grade school captured the third annual district YMCA-sponsored marble tournament.

**TEN YEARS AGO** — Jane Barbour received an award for activities at the annual Mother-Daughter banquet of the East Liverpool High School Hi-Tri Club.

Barbara Asher was chosen queen to reign over a dance during the annual May day program at Chester High School.

Mrs. Albert Pittenger was named director of the annual Day Camp of the East Liverpool Area Girl Scout Council.

### Odd Facts

Memorial or Decoration Day was originated by the women of the South at the close of the Civil War. These women made a practice of decorating the graves of soldiers, both Confederate and Union, early in the spring of each year. This struck a sympathetic chord through the North and on May 5, 1868, a general order was issued proclaiming May 30 as the day "for the purpose of strewing flowers or decorating the graves of comrades who died during the late war."

All 4,600,000 residents of Angola in southwest Africa are regarded as Portuguese citizens, but natives must attain certain standards of civilization before they may enjoy full rights of citizenship. Less than one per cent of the natives have graduated to this class.

The governor of St. Eustatius Island in the Dutch West Indies was the first foreign official to acknowledge American independence. He saluted a Continental flag flying the U. S. flag on Nov. 16, 1776.

## Knell Of School Aid?

By David Lawrence

### Federal Order Aimed At Virginia System

President Kennedy may have dealt a fatal blow to the movement to obtain money from the federal government to subsidize public schools.

David Lawrence

He has just demanded that the legislature of a sovereign state — Virginia — be compelled to take punitive action against a single county for failing to open its schools or else abandon the whole public - school system throughout the state. In view of this development, will Congress now take a chance and appropriate money that gives a bureau in Washington potential power over the operation of the public schools throughout the United States?

To tell a state how it must appropriate its funds, how it shall set up its own system of education and what steps it must take to satisfy the federal government's demands is unprecedented in American history.

Yet this, in effect, is the authority sought by the Department of Justice, with the approval of the President, in applying to a federal court for an order against the State of Virginia.

The step is far - reaching. It could mean that in the future the federal government could even tell a state it must have a uniform system of government applying to every county or city.

It so happens that the State of Virginia permits its counties and independent cities to adopt, as they choose, various forms of executive management or control by boards of supervisors elected by the people. But, under the theory just applied by the U.S. Department of Justice, the counties and municipalities would not be permitted to have their own forms of local government but would have to adopt a system uniform throughout the state.

If any county or city deviated, it would be in danger of being compelled to accept an order of the federal government in Washington served upon the state through the courts.

This doctrine is, of course, based upon the concept of the 14th Amendment which the Supreme Court of the United States proclaimed in its "desegregation" decisions in 1954.

The point was made then that "equal protection of the laws" means equal application of state laws to children attending public schools. But there is nothing in the 14th Amendment or anywhere else in the Constitution which says that the federal government may tell a state it cannot provide funds to keep its public schools open in 97 counties and 32 independent cities because a single county happens to close such schools.

This is an obvious form of punitive action that can readily be repeated by an executive order directing any state which accepts federal funds to operate all its schools according to standards laid down by a federal bureau.

**FOR MONTHS** now, the lobbyists for federal aid to education and the politicians who hope to get votes through promised increases in teachers' salaries have been denying that any form of federal control of education would be involved in current proposals for financial aid to state schools.

Now it turns out that, without any specific right granted through existing law, an executive order could be issued — or a court decree sought by direct intervention of the federal government — telling a state how to run its educational system.

The federal government is demanding not only that a state reopen public schools in a particular county but that it shall stop state and county tuition grants for the use of parents who send their children to private schools and cease to pay from state funds for the "maintenance and operation of public schools anywhere in Virginia" as long as the public schools in one county are closed.

This can only mean that the federal government now feels it can interfere in any tuition grants, fellowships, scholarships or other forms of aid if it doesn't like the way the states operate such educational programs.

It certainly is something novel for the federal government to tell state legislatures how to spend their money.

**IT WILL BE** contended that the Supreme Court has not as yet ruled on the new demand of the Department of Justice for dictatorial powers over education in the states. But it may be taken for granted that the lawyers at the department have blazed a new trail and probably have found new devices satisfactory to them whereby the end will justify the means.

If the federal government can tell the State of Virginia that it cannot provide funds for its public schools unless it makes every county and city conform to a pattern approved by the federal government, then constitutional government, as it has been known since the founding of the republic, will indeed have vanished.

Government by executive order or court decree will have supplanted acts of Congress and the laws of 50 state legislatures.

## A Giveaway Fallacy

By Phillip Deane

UNITED NATIONS, N.Y.—According to the figures available at the United Nations, to give United States and other Western food surpluses away not only risks disrupting regular marketing but would be a gross disservice to the recipients.

Dr. Norman Wright, deputy director general of the Food and Agricultural Organization of the U.N. says there are approximately 125 million metric tons of food surpluses available, mostly in the U.S.

More than half of this is in coarse grains, which are not acceptable even to the starving in many parts of the woorld. But even if the hungry five-eighths of mankind were prepared to eat anything and they were given the total of the surpluses accumulated over the past 10 years, Dr. Wright calculates on the basis of the calories contained in the feed the world's 1.8 million hungry people for only three months.

**ALTERNATIVELY**, every Asian could be given an extra 200 calories a day for three years. This need not be negligible but calories from proteins and there are no surpluses of proteins. It wouldn't be sensible to export Western surplus grain to feed Indian cattle: These are highly unproductive, diseased cattle which should not be helped to perpetuate themselves. A good, new breed is needed.

All these arguments are as nothing, however, compared to the cost of shipping the surpluses. The charges for seagoing transport from the United States to Asia would be at least $10 a ton and there would be extra the grain from the storage bin to the ports and to the consumers at the other end. And 125 million tons, at $10 a ton, amounts to $1.25 billion.

It may be argued that if the U.S. wishes to spend this money, why should anyone object. But the U.S. could do the hungry more good by spending the money, not on shipping surplus grain, but on building fertilizer plants.

Greece, which is not among the well-developed countries of Europe, and which has a shortage of water, grows approximately 3,600 pounds of rice per acre, whereas India grows 1,230 pounds per acre.

Italy grows 4,750 pounds of rice per acre . . . in other words, Indian rice production per acre is only one-fourth that of Italy and one-third less than that of Greece; rice culture requires much manual labor and India has plenty of that.

**IMPROVEMENTS** in agricultural techniques, better plows, even healthier workers would help India raise its yields, but the principal reason for the low yield is the poverty of the soil.

Indian fields have hardly ever been fertilized. Animal manure is used as fuel. India consumes an average of 1.4 pounds of fertilizer per acre.

The figure for Greece, possibly free Europe's poorest country, is 18 pounds per acre—these quantities refer to nitrogenous fertilizers, which are best for rice. In soils so starved as the fields of India, even a little fertilizer would double the crop.

Of course there are complications and the simple figures don't tell the whole story. But it is figures like these that have made the FAO conclude that giving away surpluses is not the best way to help.

The "coffee break" has become generally accepted in business operations in the U. S., but more often than not there's more than one of these a day — each "break" averaging about 15 minutes. Business analysts have reported that the major benefit from these "coffee breaks" is a "morale boost" among employes.

130 Expected At Banquet

# Style Show Will Highlight Hi-Tri Event Wednesday

A style show will highlight the annual mother-daughter banquet of the Hi-Tri Club of East Liverpool High School at 6:30 p. m. Wednesday at the Country Club. Some 133 students and their guests are expected to attend.

The models are: Colleen Bucher, Barbara Dallis, Joan Gilmore, Susan Horger, Judy Jones, Barbara Littell, Mona McComas, Sondra Osborne, Jean Sauerbrei, Susan Shaffer, Anne Sixt, Nancy Amith, Barbara Sneddon, Mary Ellen Stoffel and Susan Vodrey.

Assisting the models will be: Elaine Vohar, Barbara Yager, Vicki Heidel, Jennifer Grove, Diane Marchette, Jane Swoger and Cathy Baumgarner.

Margie Brown will be narrator and Kay Wakefield will provide organ background music. Fashions will be provided by Ogilvie's. Employes assisting are Mrs. Mary Lou Springer, Mrs. Mary Ross, Miss Mildred Gardner, Mrs. Mildred Williams, Mrs. Katherine Baldwin and Mrs. Wilma Hilditch.

Nancy Smith will give the invocation. Diane Hall will give the toast to the mothers and her mother, Mrs. Eugene Hall, will give the response.

The program will consist of folk songs by Susan Vodrey, Nancy Fowler, Mona McComas and Mary Ann Hayes, a magic act by Pat Beck and Jim Lang, and piano selections by Miss Hays and Miss Wakefield.

Joyce Massey, president of the club, will make the presentations of awards and announce the new officers for the coming year.

Decorations for the tables will feature dolls and surprise favors. The committee is Peggy Crytzer and Joan Gilmore, co-chairmen, assisted by Kay Wakefield, Mary Ellen Walker, Janet Eardley, Anne Sixt, Barbara Sneddon, Frances Leon, Susan Vodrey, Sue Smith, Mary Lou Curren and Sherril Dawson.

The favors committee is comprised of Nancy Fowler and Nancy Payton, co-chairmen, along with Mary Ann Hays, Connie Sillence, Nancy Smith, Diane Hall, Marilyn Boley, Kay Hocking, Beverly Pickering and Judy Fickel.

Hi-Tri sponsors are Mrs. Walter Ashbaugh, Mrs. Mary Carrol, Miss Edna Clouse, Miss Irene Clouse, Miss Carol Hand, Miss Maryann Lindsey, Miss Koula Svokis and Miss Ruth Winland.

Club officers are: Joyce Massey, president; Nancy Smith, vice president; Jean Sauerbrei, secretary, and Mary Ellen Stoffel, treasurer.

## Clarkson Group To Hold Meeting

The United Presbyterian Women's Association will meet Tuesday at 7:30 p. m. in the Clarkson Presbyterian Church annex, with Mrs. Mildred Welce, president, in charge.

Reports will be made on proceeds of the cafeteria supper held Saturday night by women of the church. Mrs. Iverness Betts and Mrs. Maxie Gilham will lead devotions, a study of the Book of St. John. Mrs. Dorothy Davis and Mrs. Harry Thompson will be cohostesses for refreshments.

The Clarkson Grange will meet Thursday at 8:30 p. m. at the Grange Hall. Reuben Lunger, master, will preside.

Mr. and Mrs. Louis Hole returned home Friday after spending the past month at their winter home at Ft. Myers, Fla.

Benjamin Franklin is credited with invention of the rocking chair.

FRANK MAUS
*He'll Appear In Leetonia.*

## Weirton Official To Talk At Scout Dinner Tuesday

Frank Maus, director of management development and training at the Weirton Steel Co., will be guest speaker at the annual awards dinner of the Columbiana County Boy Scout Council Tuesday at Orchard School in Leetonia.

Maus was born in western Nebraska in 1903. His family moved to Dover in 1917. Graduated from Dover High School in 1923, he worked for a year as a brakeman on the Baltimore & Ohio Railroad. In 1924, he entered Wittenberg College, where he received a degree in business administration.

Maus was employed two years in the personnel department of Armco Steel at Middletown and five years in the same type of work with the Proctor and Gamble Co. at Cincinnati.

He spent eight years as safety director and personnel director of the Alpha Portland Cement Co. in Easton, Pa., and seven years as general supervisor of training at the South Works of the U. S. Steel Corp. in Chicago. Before joining Weirton Steel in 1959, he was director of industrial relations for Youngstown Kitchens in Warren.

## Ex-Boy Friend Slays Girl, 17, In New York

MOOERS FORKS, N. Y. (AP)— A teen-age girl was shot and killed Sunday night by an ex-boy friend who flew into a jealous rage when he saw her out with another boy, state police said today.

Betty Ann Davison, 17, was shot twice with a rifle by Charles Duscharme, 20, a farm laborer, in this Clinton County community five miles from the Canadian border, state police said.

Duscharme was being sought by police.

## April Showered

CLEVELAND (AP)— Cleveland will be a horticulturist's paradise this month—if the saying "April showers bring May flowers" has any basis in fact. It rained here 23 days in April. The monthly total of 6.61 inches was more than twice normal and topped the 20-year high of 5.9 inches.

# 2 Women Named To Head Midland's Cancer Campaign

Mrs. Gilbert J. Liberatore and Mrs. Rudy Dragelevich will head the Midland Cancer Crusade as co-chairmen, Lawrence Thurman of Ambridge, Beaver County drive chairman, said.

Key workers in Midland will include Mrs. Samuel Kosanovich, Mrs. Robert Reighard, Mrs. Lester Trainer, Mrs. James Vesco, Mrs. Mike Prodonovich, Mrs. Willie Burke, Mrs. Mildred Vuich and Mrs. Michael Raich.

Mrs. Liberatore, a real estate agent and active in Parent-Teacher Association activities, said the house-to-house solicitation in Midland will begin next week.

"The life-saving literature about cancer's seven danger signals and the importance of early detection and frequent health check - ups will be left at every home by our volunteer crusaders," she said.

"Over one million Americans are alive today, cured of cancer, warned in time by the American Cancer Society's relentless campaign to control cancer. This is the reason for the independent crusade because in no other way can so many people be reached with this vital message."

Mrs. Dragelevich is actively interested in the county drive, since as a registered nurse she has given free home nursing care to cancer patients being assisted by the Beaver County Cancer Unit.

"I admire what the ACS is doing," she said. "It certainly is helping a good many unfortunate families made destitute by the fantastic cost of this disease.

"In addition to furnishing nursing care and drugs, the Beaver County unit transports patients to treatment centers and gives away quantities of dressings and sickroom supplies.

"All of these services are free. I think services like these merit support."

## Not For Re-Use

BALTIMORE (AP) — It happened at a soda fountain on East Franklin Street. Sundaes and similar sweets were served in paper cups plainly labeled for hospital use as storage cartons for false teeth.

## 125 Hancock 4-H'ers Join In 'Nature Walk'

Approximately 125 Hancock County 4-H Club members participated in the annual nature walk Saturday morning at Tomlinson Run State Park near Pughtown.

The youngsters received instruction in wildlife lore from adult leaders while hiking through the park to the upper shelter, where a cook-out was held.

Local naturalists who aided included E. R. Chandler and John Pinney of Chester and Bill Murray of New Cumberland. Four members of the Audubon Society of Steubenville also attended.

James Arehart of Pughtown was chairman. The event was a project of the County 4-H Leaders Association headed by Mrs. Arehart. The annual 4-H exhibit will be held May 26-28 in New Cumberland High School.

130 Expected At Banquet

# Style Show Will Highlight Hi-Tri Event Wednesday

A style show will highlight the annual mother-daughter banquet of the Hi-Tri Club of East Liverpool High School at 6:30 p. m. Wednesday at the Country Club. Some 133 students and their guests are expected to attend.

The models are: Colleen Bucher, Barbara Dallis, Joan Gilmore, Susan Horger, Judy Jones, Barbara Littell, Mona McComas, Sondra Osborne, Jean Sauerbrei, Susan Shaffer, Anne Sixt, Nancy Amith, Barbara Sneddon, Mary Ellen Stoffel and Susan Vodrey.

Assisting the models will be: Elaine Vohar, Barbara Yager, Vicki Heidel, Jennifer Grove, Diane Marchette, Jane Swoger and Cathy Baumgarner.

Margie Brown will be narrator and Kay Wakefield will provide organ background music. Fashions will be provided by Ogilvie's. Employes assisting are Mrs. Mary Lou Springer, Mrs. Mary Ross, Miss Mildred Gardner, Mrs. Mildred Williams, Mrs. Katherine Baldwin and Mrs. Wilma Hilditch.

Nancy Smith will give the invocation. Diane Hall will give the toast to the mothers and her mother, Mrs. Eugene Hall, will give the response.

The program will consist of folk songs by Susan Vodrey, Nancy Fowler, Mona McComas and Mary Ann Hayes, a magic act by Pat Beck and Jim Lang, and piano selections by Miss Hays and Miss Wakefield.

Joyce Massey, president of the club, will make the presentations of awards and announce the new officers for the coming year.

Decorations for the tables will feature dolls and surprise favors. The committee is Peggy Crytzer and Joan Gilmore, co-chairmen, assisted by Kay Wakefield, Mary Ellen Walker, Janet Eardley, Anne Sixt, Barbara Sneddon, Frances Leon, Susan Vodrey, Sue Smith, Mary Lou Curren and Sherril Dawson.

The favors committee is comprised of Nancy Fowler and Nancy Payton, co-chairmen, along with Mary Ann Hays, Connie Sillence, Nancy Smith, Diane Hall, Marilyn Boley, Kay Hocking, Beverly Pickering and Judy Fickel.

Hi-Tri sponsors are Mrs. Walter Ashbaugh, Mrs. Mary Carrol, Miss Edna Clouse, Miss Irene Clouse, Miss Carol Hand, Miss Maryann Lindsey, Miss Koula Svokis and Miss Ruth Winland.

Club officers are: Joyce Massey, president; Nancy Smith, vice president; Jean Sauerbrei, secretary, and Mary Ellen Stoffel, treasurer.

## Clarkson Group To Hold Meeting

The United Presbyterian Women's Association will meet Tuesday at 7:30 p. m. in the Clarkson Presbyterian Church annex, with Mrs. Mildred Welce, president, in charge.

Reports will be made on proceeds of the cafeteria supper held Saturday night by women of the church. Mrs. Iverness Betts and Mrs. Maxie Gilham will lead devotions, a study of the Book of St. John. Mrs. Dorothy Davis and Mrs. Harry Thompson will be cohostesses for refreshments.

The Clarkson Grange will meet Thursday at 8:30 p. m. at the Grange Hall. Reuben Lunger, master, will preside.

Mr. and Mrs. Louis Hole returned home Friday after spending the past month at their winter home at Ft. Myers, Fla.

Benjamin Franklin is credited with invention of the rocking chair.

FRANK MAUS
*He'll Appear In Leetonia.*

## Weirton Official To Talk At Scout Dinner Tuesday

Frank Maus, director of management development and training at the Weirton Steel Co., will be guest speaker at the annual awards dinner of the Columbiana County Boy Scout Council Tuesday at Orchard School in Leetonia.

Maus was born in western Nebraska in 1903. His family moved to Dover in 1917. Graduated from Dover High School in 1923, he worked for a year as a brakeman on the Baltimore & Ohio Railroad. In 1924, he entered Wittenberg College, where he received a degree in business administration.

Maus was employed two years in the personnel department of Armco Steel at Middletown and five years in the same type of work with the Proctor and Gamble Co. at Cincinnati.

He spent eight years as safety director and personnel director of the Alpha Portland Cement Co. in Easton, Pa., and seven years as general supervisor of training at the South Works of the U. S. Steel Corp. in Chicago. Before joining Weirton Steel in 1959, he was director of industrial relations for Youngstown Kitchens in Warren.

## Ex-Boy Friend Slays Girl, 17, In New York

MOOERS FORKS, N. Y. (AP)— A teen-age girl was shot and killed Sunday night by an ex-boy friend who flew into a jealous rage when he saw her out with another boy, state police said today.

Betty Ann Davison, 17, was shot twice with a rifle by Charles Duscharme, 20, a farm laborer, in this Clinton County community five miles from the Canadian border, state police said.

Duscharme was being sought by police.

## April Showered

CLEVELAND (AP)— Cleveland will be a horticulturist's paradise this month—if the saying "April showers bring May flowers" has any basis in fact. It rained here 23 days in April. The monthly total of 6.61 inches was more than twice normal and topped the 20-year high of 5.9 inches.

# 2 Women Named To Head Midland's Cancer Campaign

Mrs. Gilbert J. Liberatore and Mrs. Rudy Dragelevich will head the Midland Cancer Crusade as co-chairmen, Lawrence Thurman of Ambridge, Beaver County drive chairman, said.

Key workers in Midland will include Mrs. Samuel Kosanovich, Mrs. Robert Reighard, Mrs. Lester Trainer, Mrs. James Vesco, Mrs. Mike Prodonovich, Mrs. Willie Burke, Mrs. Mildred Vuich and Mrs. Michael Raich.

Mrs. Liberatore, a real estate agent and active in Parent-Teacher Association activities, said the house-to-house solicitation in Midland will begin next week.

"The life-saving literature about cancer's seven danger signals and the importance of early detection and frequent health check - ups will be left at every home by our volunteer crusaders," she said. "Over one million Americans are alive today, cured of cancer, warned in time by the American Cancer Society's relentless campaign to control cancer. This is the reason for the independent crusade because in no other way can so many people be reached with this vital message."

Mrs. Dragelevich is actively interested in the county drive, since as a registered nurse she has given free home nursing care to cancer patients being assisted by the Beaver County Cancer Unit.

"I admire what the ACS is doing," she said. "It certainly is helping a good many unfortunate families made destitute by the fantastic cost of this disease.

"In addition to furnishing nursing care and drugs, the Beaver County unit transports patients to treatment centers and gives away quantities of dressings and sickroom supplies.

"All of these services are free. I think services like these merit support."

## Not For Re-Use

BALTIMORE (AP) — It happened at a soda fountain on East Franklin Street. Sundaes and similar sweets were served in paper cups plainly labeled for hospital use as storage cartons for false teeth.

## 125 Hancock 4-H'ers Join In 'Nature Walk'

Approximately 125 Hancock County 4-H Club members participated in the annual nature walk Saturday morning at Tomlinson Run State Park near Pughtown.

The youngsters received instruction in wildlife lore from adult leaders while hiking through the park to the upper shelter, where a cook-out was held.

Local naturalists who aided included E. R. Chandler and John Pinney of Chester and Bill Murray of New Cumberland. Four members of the Audubon Society of Steubenville also attended.

James Arehart of Pughtown was chairman. The event was a project of the County 4-H Leaders Association headed by Mrs. Arehart. The annual 4-H exhibit will be held May 26-28 in New Cumberland High School.

# Mishap Hurts District Youth

An area youth injured while roller skating was admitted to City Hospital, where 10 other persons were treated over the weekend.

Clyde Beaver Jr., 17, son of Clyde Beaver of R. D. 1, is in "good" condition today with head contusions suffered when he fell Saturday night while skating at the Kay Bee Roller Arena.

Six were treated Saturday. Charles Muskgrove Jr., 13, son of Charles Muskgrove, 81 Harrison St., Newell, cut his left wrist in a fall.

Robert L. Boyce, 31, of Wellsville R. D. 1 cut his left thumb on a power saw at home.

Mrs. Helen Wawrzniak, 46, of 415 Elm St., suffered a possible fracture of the right arm in a fall.

Thomas Warrick of Westfield suffered a partial amputation of the right index finger when he caught his hand in a swing.

Michael Glover, 13, son of James Glover, 104 Church Alley, Chester, injured his left knee and elbow in a fall down steps at home.

Raymond Roe, 907 Vine St., suffered first and second degree burns of the face when his furnace flashed out into his face.

Four were treated Sunday. Crystal Jarvis, 5, daughter of Harry Jarvis of Henry Ave., injured her left ankle in a fall.

Richard Lugano, 12, son of Frank Lugano, 408 Grant St., Newell, hurt his right arm while playing ball.

James Anthony, 14, son of William Anthony of the Old Salineville Rd., Wellsville, was cut over the left eyebrow when struck by a jack while changing an auto tire.

David Seanor, 8, son of John Seanor, 934 Neptune Ave., cut his left forearm on a storm door at home.

## Officers Arrest Youth In Damage At City Laundry

Thomas R. Pinkerton, 19, of East Palestine R. D. 1 was taken into custody Saturday night, accused of causing damage to machines in an East End coin-operated laundry Friday night by moving them in search for coins dropped by patrons.

Pinkerton was arrested by Patrolman Jack Strobel at 9:05 p.m., accused of malicious destruction of property in connection with alleged damage to machines at the Econ-O-Wash Laundry on State St., owned by Joe Clements.

Pinkerton pleaded not guilty this morning, but was convicted by Municipal Judge Samuel M. Chertoff following testimony of Patrolman Strobel and Clements.

Strobel presented a statement from Pinkerton in which the youth said he began moving the machines after seeing a dime under one unit. He recovered a total of 90 cents dropped by other patrons, he admitted.

Judge Chertoff delayed sentencing until Wednesday morning and said Pinkerton makes arrangements to pay for the damages he will take into consideration.

Police obtained an auto license number from a witness who said he observed Pinkerton moving the machines in the laundry about 11 p. m. Friday. Shifting the machines broke four drain hoses valued at $3.18 each and a water mixer valued at $15, Clements told police. Pinkerton was released on $57.50 bond pending today's hearing.

## Little Lady Gives Birth To Her 91st Offspring

PORT WASHINGTON, N. Y. (AP) —Little Lady has just given birth to her 91st offspring — something all the more remarkable in view of the fact that Little Lady is 13 years old.

She is part-Persian cat who has kept her mistress, Mrs. Katherine Winget, busy finding homes for the young ones. But Mrs. Winget doesn't mind because Little Lady is, as she says, a perfect lady, except twice a year.

## Counting Birds

CONYERS, Ga. (AP) — A monk in the Trappist monastery here has counted 162 species of birds during his bird watching. He reports that about 200 species appear each year in this rural area about 30 miles east of Atlanta and that bird watchers have recorded 460 species either living in or flying over Georgia.

**CHURCH CORNERSTONE RITE.** While a crowd of 350 looked on, the cornerstone was laid Sunday afternoon for the new Trinity United Presbyterian Church under construction on Maine Blvd. near McKinnon Ave. David (Pete) Beatty, representing the Potters Construction Co., is shown in the foreground grasping the stone, assisted by Willen N. Baumgarner, church elder. Immediately to the left of the steel beam in the foreground is Earl D. Lones, elder and clerk of Session, who read the list of items placed in the cornerstone, including a Bible, a history of the church, a roll of active members, sacrificial donations, pictures and calendars.

## Warner's Named General Manager Of Michigan Firm

B. E. Warner, 1316 Perry Ave., has been named general manager of the Schaberg - Dietrich Hardware Co. of Lansing, Mich.

The announcement was made by N. F. Luekens, president of the George Worthington Co. of Cleveland, of which Schaberg - Dietrich is a subsidiary.

Warner joined the Worthington company earlier this year after resigning as general manager of the Milligan Hardware & Supply Co. here.

Schaberg - Dietrich is one of Michigan's leading hardware wholesalers and industrial distributors.

Mr. and Mrs. Warner and their children will move to Lansing in the near future.

## Legion Roadblock Set For Cancer Donations

American Legion Post 374 will conduct a roadblock Saturday in the East End to raise funds for the cancer campaign, Samuel W. Brown, chairman of the city drive, said today.

Legionnaires will solicit motorists between 7 a.m. and 5 p.m. at Pennsylvania and Dewey Aves. James Cregar, post commander, and John Ruhe, chairman of the post's cancer committee, will be in charge.

Brown said a roadblock conducted a week ago by the Glenmoor American Legion Post netted $209 for the cancer fund.

When a recipe using dry yeast directs that it be dissolved in very warm water, have the water between 105 and 115 degrees.

## Fair Warning

NORTH VERNON, Ind. (AP) — Jennings County authorities knew what they were doing when they hired a school attendance officer. Her name is Mary Will Ketcham.

# Rioting Ends In Galveston

GALVESTON, Tex. (AP)—An uneasy peace returned to this Gulf of Mexico resort city today following a weekend of rioting by thousands of thrill-seeking youths who flocked here for the opening of the tourist season.

Police counted more than 700 youths, many of them college students, arrested. Two persons died in traffic accidents.

Officers armed with shotguns and accompanied by trained dogs from the Houston police department rounded up 51 youths Sunday night at a dance hall and a drive-in restaurant after a shot was fired. No one was hurt. The arrested youths were hustled off to jail.

The arrests climaxed a comparatively quiet day during which an estimated 100,000 persons lined the main street to watch a parade of floats carrying bathing beauties entered in the Miss Splash Day contest. Thousands played in the surf and sunbathed on the five-mile long beach.

The trouble started Friday night in fights along the beach front among 3,000 college students from Texas, Oklahoma and Louisiana and thousands of other youngsters who had gathered here for the weekend. An estimated 250 policemen from neighboring cities and Texas Rangers were rushed here to restore order.

More than 500 youths were arrested Friday night as officers waded into the rock-throwing youths. Several shots were fired but no one was hurt. Scores were treated for cuts and bruises.

Another 150 youths were arrested Saturday night for unlawful assembly.

Police Commissioner Walter B. Rourke said the city collected about $14,000 in fines over the weekend.

## Get The Point?

HARTFORD, Conn. (AP) — State police came before the Legislature with pointed arguments in support of bills to stiffen penalties against convict rioters. A police representative appeared at a recent committee hearing with a bushel-sized basket full of knives and other weapons used in last year's riot at the state prison.

Advertisement

## Science Shrinks Piles New Way Without Surgery Stops Itch—Relieves Pain

**New York, N. Y. (Special) — For the first time science has found a new healing substance with the astonishing ability to shrink hemorrhoids, stop itching, and relieve pain — without surgery.**

In case after case, while gently relieving pain, actual reduction (shrinkage) took place.

**Most amazing of all—results were** so thorough that sufferers made astonishing statements like "Piles have ceased to be a problem!"

The secret is a new healing substance (Bio-Dyne®)—discovery of a world-famous research institute.

This substance is now available in *suppository or ointment form* under the name *Preparation H®*. At all drug counters.

## May Clinics Slated For Hancock Towns

Hancock County Health Department officials have announced the May schedule for immunization clinics for infants and expectant mothers.

The dates are Tuesday, and May 16 in Chester in the Hancock County Federal Savings & Loan Assn. building; Wednesday and May 17 in New Cumberland; Thursday, May 18, and 25 in Weirton, and May 9 and 23 in the Aaron Building in Newell.

Clinics in Chester, Newell and Weirton are held from 10 a.m. to noon and New Cumberland hours are 9 a.m. to noon.

# FLAMELESS ELECTRIC HOME HEATING

*A New Value and Comfort for Your Home*

## Another Electrical Age Achievement Here Today!

Now you can heat your home with electricity—the same clean, dependable marvel that helps you with household jobs so effortlessly.

You can enjoy a wonderful new world of modern convenience, comfort, safety and cleanliness, offered by an all-electric home—a home that is completely flameless!

And, through this full use of electricity—the one service that does everything—you can take full advantage of the lowest electric rates. Read about how this finest, most modern heat of all can bring so much more comfort and convenience into your home at a cost so low it will surprise you.

Look how clean flameless Electric House Heating keeps the modern home! Even a snow white handkerchief comes away from dust catchers unsoiled when a home has clean Electric House Heating.

### PLANNING A NEW HOME?

Plan it so that it will be as modern tomorrow as it is today. Install flameless electric heating, the heating system that offers the utmost in cleanliness, comfort and convenience. Ten, fifteen or twenty years from now, home buyers will insist more and more on the exclusive benefits of flameless electric heat. It's the way to protect your new home investment.

### REMODELING YOUR PRESENT HOME?

You can make it more pleasant to live in and enhance its value by installing flameless electric heating—and it's usually more economical to install. There are many types of heating systems, one or a combination of which is perfect for your home. You can have it installed in any weather with no muss, fuss or inconvenience. And electric heat is ideal for that extra room.

More and more home owners (many of them your own friends and neighbors) are glad they switched to flameless electric heat. You will be too!

### NO OTHER HEATING COMPARES WITH FLAMELESS ELECTRIC HEATING

TRULY MODERN—Electric Heating will add years-ahead value to your home—it's modern today and will be modern tomorrow.

### NOTHING UNDER THE SUN IS AS ADAPTABLE AS ELECTRIC HEATING

Flameless electric heating lets you select the ideal heating for your entire home . . . for a single room . . . for new homes and older homes alike.

With many types of electric heating you can have *individual room control*. This gives you the exact heat you want, when and where you want it—the correct temperature in each room, without waste. You can reduce the heat in unused areas and increase it in the bathroom, nursery or sickroom.

One increasingly popular type, the heat pump, heats in winter, cools in summer. This single unit gives you ideal indoor climate all year 'round. And it switches from heating to cooling automatically.

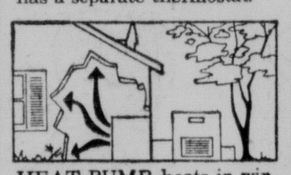
There are also compact central heating systems which circulate, filter, and condition the air and are easily combined with central air conditioning for summer cooling.

### TYPES OF ELECTRIC HEATING

CEILING CABLE heat is invisible. Wires less than 1/8" thick are fastened to ceilings before plastering. Each room has a separate thermostat.

BASEBOARD UNITS heat by both radiation and convection. All surfaces are warmed evenly, and control is by individual room thermostat.

WALL PANEL heaters have heating coils behind a decorative grill. Small fans may be used with this thermostatically controlled unit.



HEAT PUMP heats in winter, cools in summer. It automatically maintains any desired year 'round temperature.

ELECTRIC FURNACE provides compact central heating which can be combined with central air conditioning.

LIVE BETTER ELECTRICALLY

Flameless Electric House Heating is so clean ...YOU LIVE BETTER ELECTRICALLY

WHICH TYPE IS BEST FOR YOUR HOME? Let us review your specific needs and recommend the type of Electric Heat best for *your* home and family.

## Questions Often Asked about Electric Heating

**Q** *Can I get individual room temperature control?*

**A** Yes. With many Electric Heating systems a thermostat in each room gives you automatic room by room control. You never have over-heated or cold rooms.

**Q** *Can I maintain healthful humidity?*

**A** Yes. The air is not parched or dried out by high temperature heating surfaces. No special humidifiers are required.

**Q** *Can I have summer air conditioning with Electric Heating?*

**A** Yes. Central air conditioning may be easily combined with Central Electric Heating systems. With other types, individual room air conditioners can be easily and economically installed.

**Q** *Is electric heat clean?*

**A** Yes. Flameless electric heat doesn't make any smoke, soot or fumes. You will save on cleaning and redecorating bills.

**Q** *Can Electric Heating be installed without losing valuable floor space?*

**A** Yes. There's no need for fuel storage tanks, bins or bulky old-fashioned furnaces.

**Q** *Is Electric Heating efficient?*

**A** Yes. 100 per cent of the electric energy is always converted into heat. With other types the efficiency depends on the condition and maintenance of the unit installed.

**Q** *Is Electric Heating truly modern?*

**A** Yes. The wonders of electricity for heating have been talked about for years and now more than 850,000 homes in this country have proved its merits and advantages. It's the most modern heating system.

**Q** *Can Electric Heating be installed in old homes quickly and conveniently?*

**A** Yes. It's easy to modernize your home with electric heat. There's no need to rip out walls or floors . . . no expensive, time-consuming installation or inconvenience.

**Q** *Is Electric Heating worry-free?*

**A** Yes. Electric Heating is flameless. Approved Electric Heating units must meet the rigid tests of the Underwriters' Laboratory.

**Q** *Will Electric Heating save me money?*

**A** Yes. Electric Heating is your best buy today and for the future, because, while the cost of other fuels has risen the cost of electricity has remained constant. You will save, too, on cleaning and redecorating expense—flameless Electric Heating is 100 per cent clean.

To appreciate the true value of electric house heating, you actually have to feel it. Perhaps you have visited electrically heated homes in your neighborhood. Then you know the very special kind of wonderful warmth electricity provides. You know, too, the tremendous pride, peace of mind, and prestige it brings to families who have it.

### PROPER INSULATION ASSURES MAXIMUM COMFORT AND THRIFTY OPERATION

Good insulation will pay for itself within a few years through savings—savings both on your cost of original equipment and day-by-day heating costs.

The purpose of insulation is to provide resistance to the flow of heat—whether it's heat escaping from a house in winter or entering a house in summer. The same insulation that keeps heat in your house during the fall and winter, keeps heat out of your house during spring and summer. The insulation that reduces your heating costs also reduce your costs of air conditioning equipment and operation.

Until recently, inches of thickness have been used as an indication of insulation value. However, products similar in appearance and thickness have wide differences in insulating effectiveness. The insulation industry has recently developed a system of identifying the quality of the insulation by the "R" factor. The "R" number is printed on the vapor barrier and the carton. Where this identification is used it's easy to specify the insulation necessary to meet the All Weather Comfort Standard for Electrically Heated and Air Conditioned Homes.

This industry standard has been adopted by Ohio Power Company.

## Modern ELECTRIC HEATING is a Good Investment

### 1. ENHANCES THE VALUE OF YOUR HOME

Modern Electric Heating is an asset to your property which will not go out of style—modern today—and just as modern in the "Electrical Age" to come.

### 2. DECREASES CLEANING AND REDECORATING

Healthful clean flameless Electric Heating is smoke-and-soot free. It will save on cleaning bills for draperies, rugs and upholstery. Your walls will need redecorating much less often. Less vacuuming, less scrubbing, too. More precious time for the family!

### 3. NO CHIMNEY OR FLUE NEEDED

There is no smoke, odors, or fumes from flameless Electric Heating—*and no waste heat!*

### 4. NO TANKS OR BINS NEEDED

Because there is no flame there is no need to store fuel in your home or on your premises. You save on building costs and have more room for living. Fuel ordering and fuel delivery days will end forever. What a convenience!

### 5. LONG, TROUBLE-FREE LIFE

Flameless Electric Heating is always ready for instant operation with little or no attention or effort on your part. Maintenance and repairs are at a minimum. There's no overheating, no dirt to impair its operation. You save on annual clean-up and servicing.

### 12-MONTH EQUAL PAYMENT PLAN

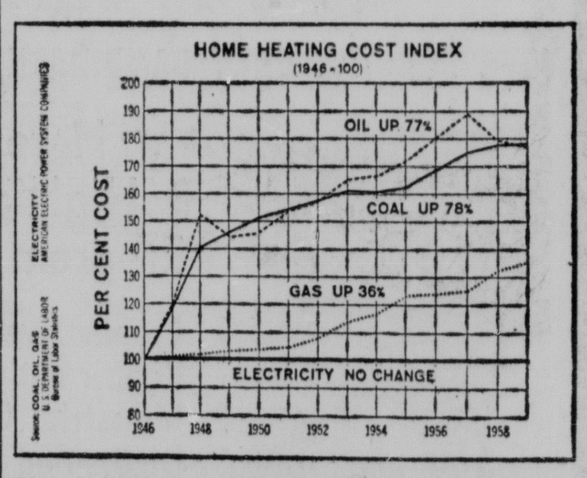
Many families now heating their homes electrically have found our convenient 12-month Equal Payment Plan helpful. It lets you spread your heating costs over a longer period of time—your small monthly payments stay the same, even in the coldest months to help you plan your budget.

Ask us for details about the 12-month Equal Payment Plan.

### LIVE BETTER ELECTRICALLY ALL THE WAY!

*Make your decision right now!* Our Electric Heating specialists are available to review your Electric Heating needs and provide you with information on installation, maintenance and operating costs pertaining to your own home. There will be no obligation of course.

Simply contact an electric heating dealer or our nearest office for details about Electric Heating equipment and installations. You will always be glad you did!



**WILL ELECTRIC HEAT COST MORE IN THE FUTURE?** The cost trend for the various fuels is in favor of electricity. Other fuels have gone up in price over the last several years. And this trend is likely to continue! Look at the chart above and see another reason why electricity is the better way to heat your home.

# Mishap Hurts District Youth

An area youth injured while roller skating was admitted to City Hospital, where 10 other persons were treated over the weekend.

Clyde Beaver Jr., 17, son of Clyde Beaver of R. D. 1, is in "good" condition today with head contusions suffered when he fell Saturday night while skating at the Kay Bee Roller Arena.

Six were treated Saturday. Charles Muskgrove Jr., 13, son of Charles Muskgrove, 81 Harrison St., Newell, cut his left wrist in a fall.

Robert L. Boyce, 31, of Wellsville R. D. 1 cut his left thumb on a power saw at home.

Mrs. Helen Wawrzniak, 46, of 415 Elm St., suffered a possible fracture of the right arm in a fall.

Thomas Warrick of Westfield suffered a partial amputation of the right index finger when he caught his hand in a swing.

Michael Glover, 13, son of James Glover, 104 Church Alley, Chester, injured his left knee and elbow in a fall down steps at home.

Raymond Roe, 907 Vine St., suffered first and second degree burns of the face when his furnace flashed out into his face.

Four were treated Sunday. Crystal Jarvis, 5, daughter of Harry Jarvis of Henry Ave., injured her left ankle in a fall.

Richard Lugano, 12, son of Frank Lugano, 408 Grant St., Newell, hurt his right arm while playing ball.

James Anthony, 14, son of William Anthony of the Old Salineville Rd., Wellsville, was cut over the left eyebrow when struck by a jack while changing an auto tire.

David Seanor, 8, son of John Seanor, 934 Neptune Ave., cut his left forearm on a storm door at home.

## Officers Arrest Youth In Damage At City Laundry

Thomas R. Pinkerton, 19, of East Palestine R. D. 1 was taken into custody Saturday night, accused of causing damage to machines in an East End coin-operated laundry Friday night by moving them in search for coins dropped by patrons.

Pinkerton was arrested by Patrolman Jack Strobel at 9:05 p.m., accused of malicious destruction of property in connection with alleged damage to machines at the Econ-O-Wash Laundry on State St., owned by Joe Clements.

Pinkerton pleaded not guilty this morning, but was convicted by Municipal Judge Samuel M. Chertoff following testimony of Patrolman Strobel and Clements.

Strobel presented a statement from Pinkerton in which the youth said he began moving the machines after seeing a dime under one unit. He recovered a total of 90 cents dropped by other patrons, he admitted.

Judge Chertoff delayed sentencing until Wednesday morning and said Pinkerton makes arrangements to pay for the damages he will take into consideration.

Police obtained an auto license number from a witness who said he observed Pinkerton moving the machines in the laundry about 11 p. m. Friday. Shifting the machines broke four drain hoses valued at $3.18 each and a water mixer valued at $15, Clements told police. Pinkerton was released on $57.50 bond pending today's hearing.

## Little Lady Gives Birth To Her 91st Offspring

PORT WASHINGTON, N. Y. (AP) —Little Lady has just given birth to her 91st offspring — something all the more remarkable in view of the fact that Little Lady is 13 years old.

She is part-Persian cat who has kept her mistress, Mrs. Katherine Winget, busy finding homes for the young ones. But Mrs. Winget doesn't mind because Little Lady is, as she says, a perfect lady, except twice a year.

## Counting Birds

CONYERS, Ga. (AP) — A monk in the Trappist monastery here has counted 162 species of birds during his bird watching. He reports that about 200 species appear each year in this rural area about 30 miles east of Atlanta and that bird watchers have recorded 460 species either living in or flying over Georgia.

**CHURCH CORNERSTONE RITE.** While a crowd of 350 looked on, the cornerstone was laid Sunday afternoon for the new Trinity United Presbyterian Church under construction on Maine Blvd. near McKinnon Ave. David (Pete) Beatty, representing the Potters Construction Co., is shown in the foreground grasping the stone, assisted by Willen N. Baumgarner, church elder. Immediately to the left of the steel beam in the foreground is Earl D. Lones, elder and clerk of Session, who read the list of items placed in the cornerstone, including a Bible, a history of the church, a roll of active members, sacrificial donations, pictures and calendars.

## Warner's Named General Manager Of Michigan Firm

B. E. Warner, 1316 Perry Ave., has been named general manager of the Schaberg - Dietrich Hardware Co. of Lansing, Mich.

The announcement was made by N. F. Luekens, president of the George Worthington Co. of Cleveland, of which Schaberg - Dietrich is a subsidiary.

Warner joined the Worthington company earlier this year after resigning as general manager of the Milligan Hardware & Supply Co. here.

Schaberg - Dietrich is one of Michigan's leading hardware wholesalers and industrial distributors.

Mr. and Mrs. Warner and their children will move to Lansing in the near future.

## Legion Roadblock Set For Cancer Donations

American Legion Post 374 will conduct a roadblock Saturday in the East End to raise funds for the cancer campaign, Samuel W. Brown, chairman of the city drive, said today.

Legionnaires will solicit motorists between 7 a.m. and 5 p.m. at Pennsylvania and Dewey Aves. James Cregar, post commander, and John Ruhe, chairman of the post's cancer committee, will be in charge.

Brown said a roadblock conducted a week ago by the Glenmoor American Legion Post netted $209 for the cancer fund.

When a recipe using dry yeast directs that it be dissolved in very warm water, have the water between 105 and 115 degrees.

## Fair Warning

NORTH VERNON, Ind. (AP) — Jennings County authorities knew what they were doing when they hired a school attendance officer. Her name is Mary Will Ketcham.

# Rioting Ends In Galveston

GALVESTON, Tex. (AP)—An uneasy peace returned to this Gulf of Mexico resort city today following a weekend of rioting by thousands of thrill-seeking youths who flocked here for the opening of the tourist season.

Police counted more than 700 youths, many of them college students, arrested. Two persons died in traffic accidents.

Officers armed with shotguns and accompanied by trained dogs from the Houston police department rounded up 51 youths Sunday night at a dance hall and a drive-in restaurant after a shot was fired. No one was hurt. The arrested youths were hustled off to jail.

The arrests climaxed a comparatively quiet day during which an estimated 100,000 persons lined the main street to watch a parade of floats carrying bathing beauties entered in the Miss Splash Day contest. Thousands played in the surf and sunbathed on the five-mile long beach.

The trouble started Friday night in fights along the beach front among 3,000 college students from Texas, Oklahoma and Louisiana and thousands of other youngsters who had gathered here for the weekend. An estimated 250 policemen from neighboring cities and Texas Rangers were rushed here to restore order.

More than 500 youths were arrested Friday night as officers waded into the rock-throwing youths. Several shots were fired but no one was hurt. Scores were treated for cuts and bruises.

Another 150 youths were arrested Saturday night for unlawful assembly.

Police Commissioner Walter B. Rourke said the city collected about $14,000 in fines over the weekend.

## Get The Point?

HARTFORD, Conn. (AP) — State police came before the Legislature with pointed arguments in support of bills to stiffen penalties against convict rioters. A police representative appeared at a recent committee hearing with a bushel-sized basket full of knives and other weapons used in last year's riot at the state prison.

## Science Shrinks Piles New Way Without Surgery Stops Itch—Relieves Pain

New York, N. Y. (Special) — For the first time science has found a new healing substance with the astonishing ability to shrink hemorrhoids, stop itching, and relieve pain — without surgery.

In case after case, while gently relieving pain, actual reduction (shrinkage) took place.

Most amazing of all—results were so thorough that sufferers made astonishing statements like "Piles have ceased to be a problem!"

The secret is a new healing substance (Bio-Dyne®)—discovery of a world-famous research institute.

This substance is now available in *suppository or ointment form* under the name *Preparation H®*. At all drug counters.

## May Clinics Slated For Hancock Towns

Hancock County Health Department officials have announced the May schedule for immunization clinics for infants and expectant mothers.

The dates are Tuesday, and May 16 in Chester in the Hancock County Federal Savings & Loan Assn. building; Wednesday and May 17 in New Cumberland; Thursday, May 18, and 25 in Weirton, and May 9 and 23 in the Aaron Building in Newell.

Clinics in Chester, Newell and Weirton are held from 10 a.m. to noon and New Cumberland hours are 9 a.m. to noon.

FLAMELESS ELECTRIC HOME HEATING

*A New Value and Comfort for Your Home*

## Another Electrical Age Achievement Here Today!

Now you can heat your home with electricity—the same clean, dependable marvel that helps you with household jobs so effortlessly.

You can enjoy a wonderful new world of modern convenience, comfort, safety and cleanliness, offered by an all-electric home—a home that is completely flameless!

And, through this full use of electricity—the one service that does everything—you can take full advantage of the lowest electric rates. Read about how this finest, most modern heat of all can bring so much more comfort and convenience into your home at a cost so low it will surprise you.

Look how clean flameless Electric House Heating keeps the modern home! Even a snow white handkerchief comes away from dust catchers unsoiled when a home has clean Electric House Heating.

## Modern ELECTRIC HEATING is a Good Investment

**1. ENHANCES THE VALUE OF YOUR HOME**

Modern Electric Heating is an asset to your property which will not go out of style—modern today—and just as modern in the "Electrical Age" to come.

**2. DECREASES CLEANING AND REDECORATING**

Healthful clean flameless Electric Heating is smoke-and-soot free. It will save on cleaning bills for draperies, rugs and upholstery. Your walls will need redecorating much less often. Less vacuuming, less scrubbing, too. More precious time for the family!

**3. NO CHIMNEY OR FLUE NEEDED**

There is no smoke, odors, or fumes from flameless Electric Heating—*and no waste heat!*

**4. NO TANKS OR BINS NEEDED**

Because there is no flame there is no need to store fuel in your home or on your premises. You save on building costs and have more room for living. Fuel ordering and fuel delivery days will end forever. What a convenience!

**5. LONG, TROUBLE-FREE LIFE**

Flameless Electric Heating is always ready for instant operation with little or no attention or effort on your part. Maintenance and repairs are at a minimum. There's no overheating, no dirt to impair its operation. You save on annual clean-up and servicing.

**12-MONTH EQUAL PAYMENT PLAN**

Many families now heating their homes electrically have found our convenient 12-month Equal Payment Plan helpful. It lets you spread your heating costs over a longer period of time—your small monthly payments stay the same, even in the coldest months to help you plan your budget.

Ask us for details about the 12-month Equal Payment Plan.

**LIVE BETTER ELECTRICALLY ALL THE WAY!**

*Make your decision right now!* Our Electric Heating specialists are available to review your Electric Heating needs and provide you with information on installation, maintenance and operating costs pertaining to your own home. There will be no obligation of course.

Simply contact an electric heating dealer or our nearest office for details about Electric Heating equipment and installations. You will always be glad you did!

**PLANNING A NEW HOME?**

Plan it so that it will be as modern tomorrow as it is today. Install flameless electric heating, the heating system that offers the utmost in cleanliness, comfort and convenience. Ten, fifteen or twenty years from now, home buyers will insist more and more on the exclusive benefits of flameless electric heat. It's the way to protect your new home investment.

**REMODELING YOUR PRESENT HOME?**

You can make it more pleasant to live in and enhance its value by installing flameless electric heating—and it's usually more economical to install. There are many types of heating systems, one or a combination of which is perfect for your home. You can have it installed in any weather with no muss, fuss or inconvenience. And electric heat is ideal for that extra room.

More and more home owners (many of them your own friends and neighbors) are glad they switched to flameless electric heat. You will be too!

**NO OTHER HEATING COMPARES WITH FLAMELESS ELECTRIC HEATING**

TRULY MODERN—Electric Heating will add years-ahead value to your home—it's modern today and will be modern tomorrow.

**NOTHING UNDER THE SUN IS AS ADAPTABLE AS ELECTRIC HEATING**

Flameless electric heating lets you select the ideal heating for your entire home... for a single room... for new homes and older homes alike.

With many types of electric heating you can have *individual room control*. This gives you the exact heat you want, when and where you want it—the correct temperature in each room, without waste. You can reduce the heat in unused areas and increase it in the bathroom, nursery or sickroom.

One increasingly popular type, the heat pump, heats in winter, cools in summer. This single unit gives you ideal indoor climate all year 'round. And it switches from heating to cooling automatically.

There are also compact central heating systems which circulate, filter, and condition the air and are easily combined with central air conditioning for summer cooling.

**TYPES OF ELECTRIC HEATING**

CEILING CABLE heat is invisible. Wires less than 1/8" thick are fastened to ceilings before plastering. Each room has a separate thermostat.

BASEBOARD UNITS heat by both radiation and convection. All surfaces are warmed evenly, and control is by individual room thermostat.

WALL PANEL heaters have heating coils behind a decorative grill. Small fans may be used with this thermostatically controlled unit.

HEAT PUMP heats in winter, cools in summer. It automatically maintains any desired year 'round temperature.

ELECTRIC FURNACE provides compact central heating which can be combined with central air conditioning.

LIVE BETTER ELECTRICALLY

Flameless Electric House Heating is so clean ...YOU LIVE BETTER ELECTRICALLY

WHICH TYPE IS BEST FOR YOUR HOME? Let us review your specific needs and recommend the type of Electric Heat best for *your* home and family.

## Questions Often Asked about Electric Heating

*Q Can I get individual room temperature control?*

A Yes. With many Electric Heating systems a thermostat in each room gives you automatic room by room control. You never have over-heated or cold rooms.

*Q Can I maintain healthful humidity?*

A Yes. The air is not parched or dried out by high temperature heating surfaces. No special humidifiers are required.

*Q Can I have summer air conditioning with Electric Heating?*

A Yes. Central air conditioning may be easily combined with Central Electric Heating systems. With other types, individual room air conditioners can be easily and economically installed.

*Q Is electric heat clean?*

A Yes. Flameless electric heat doesn't make any smoke, soot or fumes. You will save on cleaning and redecorating bills.

*Q Can Electric Heating be installed without losing valuable floor space?*

A Yes. There's no need for fuel storage tanks, bins or bulky old-fashioned furnaces.

*Q Is Electric Heating efficient?*

A Yes. 100 per cent of the electric energy is always converted into heat. With other types the efficiency depends on the condition and maintenance of the unit installed.

*Q Is Electric Heating truly modern?*

A Yes. The wonders of electricity for heating have been talked about for years and now more than 850,000 homes in this country have proved its merits and advantages. It's the most modern heating system.

*Q Can Electric Heating be installed in old homes quickly and conveniently?*

A Yes. It's easy to modernize your home with electric heat. There's no need to rip out walls or floors... no expensive, time-consuming installation or inconvenience.

*Q Is Electric Heating worry-free?*

A Yes. Electric Heating is flameless. Approved Electric Heating units must meet the rigid tests of the Underwriters' Laboratory.

*Q Will Electric Heating save me money?*

A Yes. Electric Heating is your best buy today and for the future, because, while the cost of other fuels has risen the cost of electricity has remained constant. You will save, too, on cleaning and redecorating expense—flameless Electric Heating is 100 per cent clean.

To appreciate the true value of electric house heating, you actually have to feel it. Perhaps you have visited electrically heated homes in your neighborhood. Then you know the very special kind of wonderful warmth electricity provides. You know, too, the tremendous pride, peace of mind, and prestige it brings to families who have it.

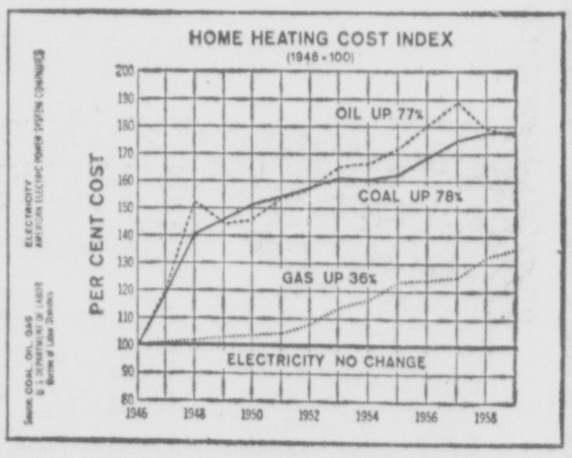
**PROPER INSULATION ASSURES MAXIMUM COMFORT AND THRIFTY OPERATION**

Good insulation will pay for itself within a few years through savings—savings both on your cost of original equipment and day-by-day heating costs.

The purpose of insulation is to provide resistance to the flow of heat—whether it's heat escaping from a house in winter or entering a house in summer. The same insulation that keeps heat in your house during the fall and winter, keeps heat out of your house during spring and summer. The insulation that reduces your heating costs also reduce your costs of air conditioning equipment and operation.

Until recently, inches of thickness have been used as an indication of insulation value. However, products similar in appearance and thickness have wide differences in insulating effectiveness. The insulation industry has recently developed a system of identifying the quality of the insulation by the "R" factor. The "R" number is printed on the vapor barrier and the carton. Where this identification is used it's easy to specify the insulation necessary to meet the All Weather Comfort Standard for Electrically Heated and Air Conditioned Homes.

This industry standard has been adopted by Ohio Power Company.



**WILL ELECTRIC HEAT COST MORE IN THE FUTURE?** The cost trend for the various fuels is in favor of electricity. Other fuels have gone up in price over the last several years. And this trend is likely to continue! Look at the chart above and see another reason why electricity is the better way to heat your home.

# Hancock Elementary Pupils Learn Science 'By Doing'

Boys and girls in Hancock County's elementary grades are learning science by doing the things that children in other schools are only told, Mrs. Audrey Litman, curriculum director, said.

"Science is being learned, wondered about, and appreciated by the boys and girls in the county's elementary schools, in Grades 1 through 6, for the first time," she said.

"The children are not simply being told about science, they aren't merely assigned lessons and asked questions, they are learning science by doing the things children in other schools are told," Mrs. Litman asserts.

The science program is a part of a joint effort of the principals, teachers, and administrators of the county, plus consultants from West Virginia University and the State Department of Education, Mrs. Litman said.

She pointed to the Jefferson School in Newell as a "good example" of the development of a science program.

Principal Ernest John said that "Children are being given the opportunity to manipulate and experience the many facets of electricity, the wonder of living things, the magic of physical science and the chemistry of modern living."

"This problem solving and guided activity approach to teaching science sets up a situation within which the children are looking forward to another day in school while working harder than ever before with less pressure," the principal said.

Under the leadership of John, and Mrs. Ruth Haynes, science co-ordinator, the Jefferson School has become one of the pilot schools in the exploration of the teaching of science along with other selected elementary schools of West Virginia.

"Imagine the enthusiasm of first grade children who begin to learn the source of life by hatching and caring for chicks," Principal John said. "This begins with a question: 'Where do we get baby chicks?' asked by some child."

"They learn the answer by working through the entire problem of hatching eggs in an incubator to the emergence of chicks from the broken shells. It may be argued that these children know nothing of what happened. More than two weeks after the eggs were hatched, these children could describe, with understanding, exactly what happened, and why it happened that way."

Learning of this kind also is being followed in the Weirton Heights, Liberty, Broadview, Cove, Chester Central Schools and others," Principal John said.

Science teachers at Jefferson School include Mrs. Vera Nease, Mrs. Helen Doane, Mrs. Effie Fitch, Mrs. Laverne Finley, Mrs. Elinore Smith, Mrs. Ruth Haynes, Mrs. Freda Arnott, Miss Susan Finley, Miss Helen Beaumont, Miss Margaret Birch and Mrs. Marguerite Walters.

The science program in the county is the direct result of a state workshop held last year at West Liberty State College.

## Poor Weather Trims Turnpike's Revenues

CLEVELAND (AP) — Revenue from operation of the Ohio Turnpike in April dropped off by $177,000 from the same month in 1960, according to James W. Shocknessy, chairman of the Ohio Turnpike Commission.

Shocknessy said Sunday night the total was $1,789,000. He attributed the decline to the poor weather and to an early Easter. He said most of the pre-Easter traffic on the superhighway was in March.

## Bishop, 74, Taken

BERKELEY, Calif. (AP)—The Rt. Rev. Henry H. Shires, 74, the first suffragan bishop of the Episcopal diocese of California, died Saturday of a heart attack. He was born in Troy, Ny.

# *Scouts' Head Named Again At Wellsville*

Mrs. George Elliott was elected to her third consecutive two-year term as chairman of the Wellsville Girl Scout Neighborhood group Thursday afternoon in the Covenant United Presbyterian Church.

Mrs. Audrey Stevens was chosen consultant and Mrs. Almeta Fieldings was named secretary-treasurer. No troop organizer has been named.

Mrs. Bea Henderson, director, was in charge of the election. Mrs. Geneva Heaton's resignation as leader of Intermediate Troop 30 was accepted.

Girl Scouts have been granted permission by the city to beautify the Riverside Park at 4th St. Mrs. Pauline Robinson, Troop 16 leader, and Mrs. Esther Lanam, Troop 41 leader, will be in charge of the planning. Girl Scout rose bushes and other yellow blossoms will be planted in keeping with organization's 50th birthday anniversary observed throughout the nation this year.

Leaders will attend a training session at the Scout camp, Echo Dell, Wednesday from 10 a. m. to 2 p. m. Brownie Day camp and intermediate day camp plans were made. Leaders urged all parents to encourage their children to attend the respective camps. Mrs. Elliott, neighborhood chairman, presided and 11 attended.

Mrs. Beth Beatty, president of the East Liverpool Council, and Mrs. Franklin Palmer, a former Scout Council member in Warren, now residing at Russell Heights, were guests. Mrs. Palmer volunteered her services in scouting work.

The next meeting will be May 25.

## Ike Seen Giving New Backing For Kennedy

GETTYSBURG, Pa. (AP)—Republican leaders expect Gen. Dwight D. Eisenhower to give fresh support today to President Kennedy in the Laotian and Cuban crises.

Senate Republican Leader Everett M. Dirksen of Illinois predicted in advance a conference of GOP congressional chieftains with the former president will be concerned with international as well as domestic problems.

"I would expect Gen. Eisenhower to give some expression of his views on the current international crises," Dirksen said. "I am sure he will tell the country President Kennedy has his support in these dangerous times."

# Hancock Elementary Pupils Learn Science 'By Doing'

Boys and girls in Hancock County's elementary grades are learning science by doing the things that children in other schools are only told, Mrs. Audrey Litman, curriculum director, said.

"Science is being learned, wondered about, and appreciated by the boys and girls in the county's elementary schools, in Grades 1 through 6, for the first time," she said.

"The children are not simply being told about science, they aren't merely assigned lessons and asked questions, they are learning science by doing the things children in other schools are told," Mrs. Litman asserts.

The science program is a part of a joint effort of the principals, teachers, and administrators of the county, plus consultants from West Virginia University and the State Department of Education, Mrs. Litman said.

She pointed to the Jefferson School in Newell as a "good example" of the development of a science program.

Principal Ernest John said that "Children are being given the opportunity to manipulate and experience the many facets of electricity, the wonder of living things, the magic of physical science and the chemistry of modern living."

"This problem solving and guided activity approach to teaching science sets up a situation within which the children are looking forward to another day in school while working harder than ever before with less pressure," the principal said.

Under the leadership of John, and Mrs. Ruth Haynes, science co-ordinator, the Jefferson School has become one of the pilot schools in the exploration of the teaching of science along with other selected elementary schools of West Virginia.

"Imagine the enthusiasm of first grade children who begin to learn the source of life by hatching and caring for chicks," Principal John said. "This begins with a question: 'Where do we get baby chicks?' asked by some child."

"They learn the answer by working through the entire problem of hatching eggs in an incubator to the emergence of chicks from the broken shells. It may be argued that these children know nothing of what happened. More than two weeks after the eggs were hatched, these children could describe, with understanding, exactly what happened, and why it happened that way."

Learning of this kind also is being followed in the Weirton Heights, Liberty, Broadview, Cove, Chester Central Schools and others," Principal John said.

Science teachers at Jefferson School include Mrs. Vera Nease, Mrs. Helen Doane, Mrs. Effie Fitch, Mrs. Laverne Finley, Mrs. Elinore Smith, Mrs. Ruth Haynes, Mrs. Freda Arnott, Miss Susan Finley, Miss Helen Beaumont, Miss Margaret Birch and Mrs. Marguerite Walters.

The science program in the county is the direct result of a state workshop held last year at West Liberty State College.

## Poor Weather Trims Turnpike's Revenues

CLEVELAND (AP) — Revenue from operation of the Ohio Turnpike in April dropped off by $177,000 from the same month in 1960, according to James W. Shocknessy, chairman of the Ohio Turnpike Commission.

Shocknessy said Sunday night the total was $1,789,000. He attributed the decline to the poor weather and to an early Easter. He said most of the pre-Easter traffic on the superhighway was in March.

## Bishop, 74, Taken

BERKELEY, Calif. (AP)—The Rt. Rev. Henry H. Shires, 74, the first suffragan bishop of the Episcopal diocese of California, died Saturday of a heart attack. He was born in Troy, Ny.

# *Scouts' Head Named Again At Wellsville*

Mrs. George Elliott was elected to her third consecutive two-year term as chairman of the Wellsville Girl Scout Neighborhood group Thursday afternoon in the Covenant United Presbyterian Church.

Mrs. Audrey Stevens was chosen consultant and Mrs. Almeta Fieldings was named secretary-treasurer. No troop organizer has been named.

Mrs. Bea Henderson, director, was in charge of the election. Mrs. Geneva Heaton's resignation as leader of Intermediate Troop 30 was accepted.

Girl Scouts have been granted permission by the city to beautify the Riverside Park at 4th St. Mrs. Pauline Robinson, Troop 16 leader, and Mrs. Esther Lanam, Troop 41 leader, will be in charge of the planning. Girl Scout rose bushes and other yellow blossoms will be planted in keeping with organization's 50th birthday anniversary observed throughout the nation this year.

Leaders will attend a training session at the Scout camp, Echo Dell, Wednesday from 10 a. m. to 2 p. m. Brownie Day camp and intermediate day camp plans were made. Leaders urged all parents to encourage their children to attend the respective camps. Mrs. Elliott, neighborhood chairman, presided and 11 attended.

Mrs. Beth Beatty, president of the East Liverpool Council, and Mrs. Franklin Palmer, a former Scout Council member in Warren, now residing at Russell Heights, were guests. Mrs. Palmer volunteered her services in scouting work.

The next meeting will be May 25.

## Ike Seen Giving New Backing For Kennedy

GETTYSBURG, Pa. (AP)—Republican leaders expect Gen. Dwight D. Eisenhower to give fresh support today to President Kennedy in the Laotian and Cuban crises.

Senate Republican Leader Everett M. Dirksen of Illinois predicted in advance a conference of GOP congressional chieftains with the former president will be concerned with international as well as domestic problems.

"I would expect Gen. Eisenhower to give some expression of his views on the current international crises," Dirksen said. "I am sure he will tell the country President Kennedy has his support in these dangerous times."

### Rail Executive Taken

LOCUST VALLEY, N. Y. (AP) —Cedric Alwin Major, 69, president of the Lehigh Valley Railroad since 1947 and a onetime national tennis champion, died Friday of a heart attack while playing tennis. Major, who had been with the railroad since 1916, was born in Otisville, N. Y.

**During School Event**

## King, Queen Crowned

Miss Judy Jones, daughter of of Mr. and Mrs. G. Richard Jones, 1520 Wyoming Ave., and Steve Cooper, son of Atty. and Mrs. Joseph W. Cooper, 903 North St., are shown following their crowning as queen and king at the 29th annual banquet and dance of the East Liverpool High School Band and Orchestra Mothers Association Saturday night at the Country Club. Some 225 attended.

Attendants were Janet Eardley and Pat Conley, along with George Prince and David Pennybaker.

George Hargraves, principal, gave the invocation. Mrs. Richard Curren, president of the mothers group, introduced Vincent Maola, director, who gave recognition to each senior with original verse, accompanied by a gift presented by the mothers group.

Cooper, band president, read the "last will and testament." Responses were read by Miss Eardley, Cathy Baumgarner and Tom Fannin.

Other band officers presiding were: Mike Bloor, vice president; Margie Brown, secretary, and Miss Jones, treasurer. The officers of the orchestra are: Bob McElhaney, president; Bloor, vice president; Suzanne Nagel, secretary, and Pennybaker, treasurer.

The room featured a "Top Hat, White Tie and Tails" theme with a false ceiling of black and white paper streamers highlighting decorations. Large posters of men and women in formal attire formed a focal point in the background.

A large top hat, white tie, miniature instruments and walking canes with gold knobs were used on the east mantle. Another point of interest was a dressing table and mirror featuring a red and white striped skirt and antique chair.

The speakers' table was decorated with an arrangement of red carnations, flanked by white tapers in crystal candelabra. The program booklets, favors and napkins followed the theme, as did the decorations on the other tables.

Eddie Frasier and his orchestra provided the music. Guests were Mr. and Mrs. Maola, Supt. Ralph Betts, Principal and Mrs. Hargraves and Mr. and Mrs. E. King Mathews.

Mrs. Lawrence Johnston was general chairman. Punch was served during the dance by the chaperones: Mr. and Mrs. Paul Bloor, Mr. and Mrs. Thomas Fannin, Atty. and Mrs. Cooper, Mr. and Mrs. Frank Marshall and Mr. and Mrs. Johnston.

### 400 At Play Given By Seniors At Lisbon

LISBON — Approximately 400 attended the Senior Class play, "Father of the Bride", Friday evening at the high school auditorium.

Miss Barbara Dei, dramatics teacher, was director with Ruth Lemley as student director.

The cast included Paul Fry, Debbie Lodge, Jay McKenzie, Kathy Mugridge, Jim Brooks, Noah Carlisle, Roger McCaughin, Melinda Calhoun, Penny Beers, Jeanne Wandle, Karen Westfall, Steve Frew, Judy Davner, David Bruey, Dennis Roberts and Calvin Rice.

### Cub Scout Group Tours Seminary

Cub Scout Pack 7 of St. Aloysius Catholic Church toured the St. John Seminary in Bloomingdale Sunday.

Divided into four groups, the boys and leaders toured the dormitories, classrooms, chapels, recreation rooms and kitchens. Seminarians in charge of the groups were James Moran, Eugene Hall, Thomas Petronek, William Helliker, Martin Holler, Bernard Bober, James Serera, Joseph Zomary, Donald Horak and James Wittig. Refreshments were served.

There are 31 students in the major seminary and 74 in the minor seminary. The Very Rev. Cronan T. Molloy is rector. Leaders accompanying the boys were Matthew Kuzmich, cubmaster, Al Gloeckner, pack chairman, Robert Hissam and James Sherwood. Also in the group were Mary King, Florence Gloeckner, Pauline Melvin and Mary Musuraca, den mothers, and Ronald Geon, Richard Shilling and Matthew Kuzmich, den chiefs.

Kuzmich said the boys will receive communion Sunday, May 14, at the 9 a. m. Mass.

---

A dictionary of hymnology says that the total number of Christian hymns in the 200 or more languages and dialects in which they have been written or translated is not less than 400,000.

### Dairy Income Rises

COLUMBUS, Ohio (AP) — The gross Ohio farm income from dairy products in 1960 was the highest in three years, the Agriculture Department reported today. It totaled $219½ million, an increase of $7½ million or 3½ per cent over the previous year.

## Newell Society

*Charles Cronin FU 5-4545*

"Love" was the theme for devotions led by Mrs. Birtie Jividen at a coverdish dinner of the Willing Workers Class of the Church of the Nazarene Friday night with Mrs. Jennie Mills.

Mrs. Margaret Silliman and Mrs. Ora Quick read poems. Mrs. Vera Eckleberry conducted games and prizes were awarded Mrs. Audrey Cline, Mrs. Minnie Peters and Mrs. Mary Meeks.

Mrs. Mills, president, presided.

Next meeting is May 19 with Mrs. Carrie Peters, 117 Grant St.

### Rail Executive Taken

LOCUST VALLEY, N. Y. (AP) —Cedric Alwin Major, 69, president of the Lehigh Valley Railroad since 1947 and a onetime national tennis champion, died Friday of a heart attack while playing tennis. Major, who had been with the railroad since 1916, was born in Otisville, N. Y.

**During School Event**

## King, Queen Crowned

Miss Judy Jones, daughter of Mr. and Mrs. G. Richard Jones, 1520 Wyoming Ave., and Steve Cooper, son of Atty. and Mrs. Joseph W. Cooper, 903 North St., are shown following their crowning as queen and king at the 29th annual banquet and dance of the East Liverpool High School Band and Orchestra Mothers Association Saturday night at the Country Club. Some 225 attended.

Attendants were Janet Eardley and Pat Conley, along with George Prince and David Pennybaker.

George Hargraves, principal, gave the invocation. Mrs. Richard Curren, president of the mothers group, introduced Vincent Maola, director, who gave recognition to each senior with original verse, accompanied by a gift presented by the mothers group.

Cooper, band president, read the "last will and testament." Responses were read by Miss Eardley, Cathy Baumgarner and Tom Fannin.

Other band officers presiding were: Mike Bloor, vice president; Margie Brown, secretary, and Miss Jones, treasurer. The officers of the orchestra are: Bob McElhaney, president; Bloor, vice president; Suzanne Nagel, secretary, and Pennybaker, treasurer.

The room featured a "Top Hat, White Tie and Tails" theme with a false ceiling of black and white paper streamers highlighting decorations. Large posters of men and women in formal attire formed a focal point in the background.

A large top hat, white tie, miniature instruments and walking canes with gold knobs were used on the east mantle. Another point of interest was a dressing table and mirror featuring a red and white striped skirt and antique chair.

The speakers' table was decorated with an arrangement of red carnations, flanked by white tapers in crystal candelabra. The program booklets, favors and napkins followed the theme, as did the decorations on the other tables.

Eddie Frasier and his orchestra provided the music. Guests were Mr. and Mrs. Maola, Supt. Ralph Betts, Principal and Mrs. Hargraves and Mr. and Mrs. E. King Mathews.

Mrs. Lawrence Johnston was general chairman. Punch was served during the dance by the chaperones: Mr. and Mrs. Paul Bloor, Mr. and Mrs. Thomas Fannin, Atty. and Mrs. Cooper, Mr. and Mrs. Frank Marshall and Mr. and Mrs. Johnston.

### 400 At Play Given By Seniors At Lisbon

LISBON — Approximately 400 attended the Senior Class play, "Father of the Bride", Friday evening at the high school auditorium.

Miss Barbara Dei, dramatics teacher, was director with Ruth Lemley as student director.

The cast included Paul Fry, Debbie Lodge, Jay McKenzie, Kathy Mugridge, Jim Brooks, Noah Carlisle, Roger McCaughin, Melinda Calhoun, Penny Beers, Jeanne Wandle, Karen Westfall, Steve Frew, Judy Davner, David Bruey, Dennis Roberts and Calvin Rice.

### Cub Scout Group Tours Seminary

Cub Scout Pack 7 of St. Aloysius Catholic Church toured the St. John Seminary in Bloomingdale Sunday.

Divided into four groups, the boys and leaders toured the dormitories, classrooms, chapels, recreation rooms and kitchens. Seminarians in charge of the groups were James Moran, Eugene Hall, Thomas Petronek, William Helliker, Martin Holler, Bernard Bober, James Serera, Joseph Zomary, Donald Horak and James Wittig. Refreshments were served.

There are 31 students in the major seminary and 74 in the minor seminary. The Very Rev. Cronan T. Molloy is rector. Leaders accompanying the boys were Mathew Kuzmich, cubmaster, Al Gloeckner, pack chairman, Robert Hissam and James Sherwood. Also in the group were Mary King, Florence Gloeckner, Pauline Melvin and Mary Musuraca, den mothers, and Ronald Geon, Richard Shilling and Matthew Kuzmich, den chiefs.

Kuzmich said the boys will receive communion Sunday, May 14, at the 9 a. m. Mass.

A dictionary of hymnology says that the total number of Christian hymns in the 200 or more languages and dialects in which they have been written or translated is not less than 400,000.

### Dairy Income Rises

COLUMBUS, Ohio (AP) — The gross Ohio farm income from dairy products in 1960 was the highest in three years, the Agriculture Department reported today. It totaled $219½ million, an increase of $7½ million or 3½ per cent over the previous year.

Mr. and Mrs. William C. Pipes, 629½ Dresden Ave., a daughter, April 30, at City Hospital.

Mr. and Mrs. Kelly Smith, 668 Riley Ave., a son, April 30, at City Hospital.

Mr. and Mrs. Kelsey Hedrick, 627½ Minerva St., a daughter, May 1.

Mr. and Mrs. Michael Raffa, 93 Hillcrest, Midland, a daughter, April 29, at Osteopathic Hospital.

The Rev. and Mrs. E. D. Crispens, 517 Grant St., Newell, a daughter, April 22, at Rochester General Hospital.

**With The Patients**

Miss Anna Mae Fenton, 942 Fairview St., is recovering at home after minor surgery April 24 in City Hospital.

Mrs. Laura Swan of Washington St., Newell, is a patient at City Hospital.

Elmer Betts of Clarkson is ill at his home.

Mrs. Mary Buzzard, 2108 Pennsylvania Ave., Ext., has returned home from Salem City Hospital.

Mrs. Jay Mathess of Glenmoor is recuperating with a severe laceration of the right hand suffered in a fall a week ago.

Mrs. Irene McBane, 300 10th St., Wellsville, is under observation at City Hospital.

Mrs. Zora Tyson and Miss Carolyn Slappy, both of Midland, were admitted Saturday at Rochester General Hospital. Discharged were Nicholas Cracchiolo and Miss Anna Kosanovich, both of Midland. Admitted Sunday were Mrs. Angeline Colista and Joel Levenson, both of Midland, and Joseph Martell of Industry. Mrs. Rose Piquet of Industry was discharged.

# Brokaw Role In Dispute Hit

Prosecuting Atty. G. William Brokaw was blasted Sunday by Mrs. Kay Blackburn of Columbiana, county Democratic chairwoman, for his role in the dispute over the civil service status of courthouse employes.

At a meeting of women party leaders Sunday afternoon, Mrs. Blackburn said Brokaw "is nothing but chief counsel for the Republican party while drawning his pay as a public servant."

Charging that Brokaw "should represent all the people," Mrs. Blackburn said the chief justice of the Ohio Supreme Court should be notified that "Brokaw is representing a GOP job-seeker at public expense in a case before the Supreme Court, and an assistant is helping him prepare the case."

Three legal jobholders must hire private attorneys to protect their interests, she said.

She called for Brokaw to resign if he wants to represent the Republican party interests.

Meanwhile, it was announced that Rep. Wayne L. Hays will be the principal speaker at a Democratic banquet May 20 at 6:30 p. m. at the Lisbon American Legion Home.

The dinner is being sponsored by the Central Columbiana County Democratic Club. Mrs. Rex Teagarden is in charge of arrangements. Lew Sowards, president, said tickets now are on sale.

# Vacant House Hit By Flames

A vacant two-story brick building scheduled to be demolished for a new city parking lot was damaged Saturday night in a fire that was set deliberately, firemen reported.

Youngsters are believed to be responsible for setting the fire, but an investigation still is under way, firemen said. It may be completed today.

The unoccupied dwelling adjoining the Ceramic Theater is owned by the Tallman Estate and is a part of the tract which the city now is in the process of acquiring for a parking lot.

The photo shows firemen opening a second floor window to clear smoke so they could enter to fight the flames. One fireman nearly collapsed twice while crawling into the building to make certain it was empty.

The fire started in the kitchen and spread to the dining room and porch before it was extinguished, firemen said. The alarm was received at 7:45.

During the fire, Thomas Roberts, 36, of Glenmoor was cited at 8:27 p. m. by police on E. 4th St. for driving over a fire hose, a violation of a city ordinance.

Roberts was fined $10 and costs this morning by Municipal Judge Samuel M. Chertoff after pleading guilty.

**It's No Surprise**

BUFFALO, N. Y. (AP) — It wasn't really surprising when Mrs. Octavio Maldonado gave birth to triplets. She previously had two sets of twins. The couple has 14 children in all.

**535 Get Trailer Plate**

LISBON — A total of 535 trailer licenses had been purchased for 1961-62 when the deadline expired Saturday morning, according to County Auditor Kenneth Bell. The total is 165 less than the number purchased last year.

Cook a package of thin noodles until almost soft; drain and fry in deep hot fat. Serve with piping hot chicken and vegetable broth.

Mrs. Laura Swan of Washington St., Newell, is a patient at City Hospital.

Elmer Betts of Clarkson is ill at his home.

Mrs. Mary Buzzard, 2108 Pennsylvania Ave., Ext., has returned home from Salem City Hospital.

Mrs. Jay Mathess of Glenmoor is recuperating with a severe laceration of the right hand suffered in a fall a week ago.

Mrs. Irene McBane, 300 10th St., Wellsville, is under observation at City Hospital.

Mrs. Zora Tyson and Miss Carolyn Slappy, both of Midland, were admitted Saturday at Rochester General Hospital. Discharged were Nicholas Cracchiolo and Miss Anna Kosanovich, both of Midland. Admitted Sunday were Mrs. Angeline Colista and Joel Levenson, both of Midland, and Joseph Martell of Industry. Mrs. Rose Piquet of Industry was discharged.

# Brokaw Role In Dispute Hit

Prosecuting Atty. G. William Brokaw was blasted Sunday by Mrs. Kay Blackburn of Columbiana, county Democratic chairwoman, for his role in the dispute over the civil service status of courthouse employes.

At a meeting of women party leaders Sunday afternoon, Mrs. Blackburn said Brokaw "is nothing but chief counsel for the Republican party while drawning his pay as a public servant."

Charging that Brokaw "should represent all the people," Mrs. Blackburn said the chief justice of the Ohio Supreme Court should be notified that "Brokaw is representing a GOP job-seeker at public expense in a case before the Supreme Court, and an assistant is helping him prepare the case."

Three legal jobholders must hire private attorneys to protect their interests, she said.

She called for Brokaw to resign if he wants to represent the Republican party interests.

Meanwhile, it was announced that Rep. Wayne L. Hays will be the principal speaker at a Democratic banquet May 20 at 6:30 p. m. at the Lisbon American Legion Home.

The dinner is being sponsored by the Central Columbiana County Democratic Club. Mrs. Rex Teagarden is in charge of arrangements. Lew Sowards, president, said tickets now are on sale.

# Vacant House Hit By Flames

A vacant two-story brick building scheduled to be demolished for a new city parking lot was damaged Saturday night in a fire that was set deliberately, firemen reported.

Youngsters are believed to be responsible for setting the fire, but an investigation still is under way, firemen said. It may be completed today.

The unoccupied dwelling adjoining the Ceramic Theater is owned by the Tallman Estate and is a part of the tract which the city now is in the process of acquiring for a parking lot.

The photo shows firemen opening a second floor window to clear smoke so they could enter to fight the flames. One fireman nearly collapsed twice while crawling into the building to make certain it was empty.

The fire started in the kitchen and spread to the dining room and porch before it was extinguished, firemen said. The alarm was received at 7:45.

During the fire, Thomas Roberts, 36, of Glenmoor was cited at 8:27 p. m. by police on E. 4th St. for driving over a fire hose, a violation of a city ordinance.

Roberts was fined $10 and costs this morning by Municipal Judge Samuel M. Chertoff after pleading guilty.

**It's No Surprise**

BUFFALO, N. Y. (AP) — It wasn't really surprising when Mrs. Octavio Maldonado gave birth to triplets. She previously had two sets of twins. The couple has 14 children in all.

**535 Get Trailer Plate**

LISBON — A total of 535 trailer licenses had been purchased for 1961-62 when the deadline expired Saturday morning, according to County Auditor Kenneth Bell. The total is 165 less than the number purchased last year.

Cook a package of thin noodles until almost soft; drain and fry in deep hot fat. Serve with piping hot chicken and vegetable broth.

# Tshombe Due Arrest Move

COQUILHATVILLE, the Congo (AP)—Prompt transfer to Leopoldville is expected for President Moise Tshombe of Katanga, arrested by the Congolese central government in a new try at unifying the country's provincial factions.

Foreign Minister Justin Bomboko said Tshombe will be kept under house arrest indefinitely while the central government pursues its policy of ending all threats to nationwide stability.

Tshombe's secessionist government at Elisabethville sent word Sunday that he should return to the unity talks he stormed away from in disagreement with other Congolese leaders last Wednesday. That act of defiance caused the Congo army to hold him, in hopes of preserving the conference.

# Fine Decreed On 2 Charges

A 19-year-old Midland youth was fined a total of $75 and costs today in Municipal Court on two charges filed by police as the aftermath of a disturbance Friday night at an East End home.

William Frank Smith Jr., 383 Midland Ave., Midland, was fined $50 and costs for carrying a 10-inch butcher knife as a concealed weapon and $25 and costs for malicious destruction of property after smashing a 24-x-24-inch window at the home of Mr. and Mrs. Earl Taylor, 703 Oakland Ave.

Smith pleaded guilty to both counts, but Judge Samuel M. Chertoff listened to testimony from the defendant along with Taylor, Capt. R. H. Pyle and Patrolman Orin Smith.

The two officers along with Patrolman Paul Carter and C. E. (Bill) Tice, responded to the call from Taylor's wife after the window had been smashed.

Smith fled on foot but was apprehended at Harvey Ave. and Putnam St. and the butcher knife was recovered from a nearby sewer where the defendant dropped it.

# 30 Given Call On Jury Duty

LISBON — A venire of 30 prospective jurors has been summoned for May 8 to hear criminal trials which will begin before Common Pleas Judge Raymond S. Buzzard.

The first case tentatively set is the trial of Robert Earl Wolf, 37, of Salem, accused of a burglary of the home of Martha and William Sprague, 551 Main St., Wellsville, Jan. 19, in which a television was stolen.

The next scheduled case will be Philip Regis Monac of Midland, accused of the theft of a tool box valued at approximately $100 from the home of George Brand Jan. 21, 1960.

The prospective jurors include: Margaret Betz, 590 Blackmore St., Francis J. Cloran 540 Henry Ave., Rosalie Davis and Elizabeth Holden, R.D. 1, Bess Smith, 315 Rural Ln., Leo J. Sutton, 322 Vine St., Nellie Vogt, 625½ Jefferson St., Nell B. Heidel, 1233 Cora St., Jean Hanselman, 919 W. 8th St., Louise Nicholson R.D. 2, and Georgiana Neidengard of Oakmont, all East Liverpool.

Ada Frye, Raymond Johns, Mary K. England, and Gordon E. Edwards all Salem.

Jenny Hammond of Wellsville; Phillip Ketchum R.D. 2, Lisbon; Charlotte Mancuso and Margaret Cope of Leetonia; Sara Jane Griffith and Pearl Brown of Salineville; William Close of North Georgetown; Henry Ashbridge, David Davis and Robert Morris of East Palestine.

Carl Vandergrift of Minerva R.D. 2; Helen Cope of New Waterford; Laura M. Esterly of Columbiana; Ina Mae Mellott of Washingtonville and Janet Hays of Summitville.

## Grange 'Open House' Program Draws 150

Some 150 attended the "open house" and coverdish dinner of the Fairview Grange Saturday evening in the Grange Hall in Ohio Township.

Mrs. F. Paul Dawson, lecturer, was in charge of the program. John Hineman and Thomas George screened movies of their hunting trip through the South. Juveniles, under the direction of Mrs. Charles Richards, sang selections.

Mrs. Dawson directed a candlelighting service. Participating were Paul Dawson, master, Mrs. Robert Smith, Mrs. Henry Smith, Mrs. Robert Nott and Walter Schuffert.

## Operetta Scheduled In Midland Tuesday

The operetta, "Mikado" will be presented Tuesday at 8 p. m. at the Midland Lincoln High School auditorium, sponsored by the Midland Lions Club.

It will be presented by the Beaver Valley Opera Association, with Anthony Caputo as director. Don Page of New York will sing the lead.

Albert Masters, club president, said the club's share of the proceeds will be used for sight conservation projects. Paul Schlosser, first vice president, is in charge of arrangements for the club.

## City Driver Fined $10 On Charge In Mishap

A city motorist was fined and a Wellsville driver, cited over the weekend, failed to appear today in Municipal Court.

Released on his own recognizance, Charles E. Joy Jr., 1214 Springhill Rd., Wellsville, failed to appear this morning for a hearing on a charge of crashing a traffic light at W. 8th and Jefferson Sts. at 1:37 a. m. Sunday.

Dale E. Reeder, 152 Thompson Ave., was fined $10 and costs on a charge of failing to yield the right-of-way. Reeder was cited April 23 after a traffic accident on Pennsylvania Ave.

He pleaded guilty April 24, but sentencing was delayed to allow him to make arrangements to pay for the damages.

# 'Open House' Set On School Bonds

An "open house" program on the proposed $5¼ million school bond issue for Hancock County will be held all day Tuesday in the Grandview School near Chester, sponsored by the school's Parent-Teacher Association.

Slides of schools similar in design to those planned for the county will be screened. Officials will discuss the new high school that would be built in Pughtown for students now attending schools in Chester, Newell and New Cumberland and a new elementary school proposed for Chester.

The bond issue will be decided in a special election May 16. Present tax rates would not be increased if the bond plan is approved, Supt. Robert H. Hall has emphasized. The present rates would be continued for 20 years.

Robert Lindsey, assistant county superintendent, will install new officers of the PTA at a meeting Tuesday night at 7:30 in the school. Mrs. Charles Wagner is president. She will be succeeded by Russell Smith.

## Britain Aids India

NEW DELHI (AP)—Britain today agreed to make two loans totalling $112 million as an initial contribution to India's third five-year plan.

# Group Takes State Contest

LISBON — The Columbiana County Grange Degree Team won the state Grange first degree contest Saturday night at Millersport High School in Fairfield County, scoring 909 out of a possible 1,000 points.

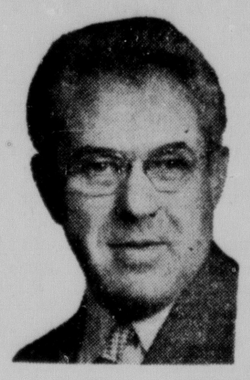
Shelby County finished second with 857 and Summit County was third with 836.

With victory, the 28 - member Columbiana County team earned a free trip to the state Grange convention Oct. 23 at Akron, to exemplify the first degree for the delegates.

Mr. and Mrs. Jack Pozenel of West Point, county Grange deputies, are in charge of the team. Its chartered bus trip across the state was sponsored by the 22 Granges in Columbiana County and 48 members attended the contest.

Unity Grange will entertain the team and all who assisted with a turkey dinner at 6 p. m. Sunday, May 14, in the Grange Hall, Pozenel said.

TO THE REPUBLICAN VOTERS OF EAST LIVERPOOL



MOST OF YOU KNOW THAT I HAVE SERVED YOU AS MAYOR IN THE PAST -- I BELIEVE THAT I CAN PUT THAT EXPERIENCE TO GOOD USE -- AND BE OF SERVICE TO YOU AND OUR CITY -- AND RESPECTFULLY ASK FOR YOUR VOTE AND SUPPORT AT THE POLLS NEXT TUESDAY.

# Tshombe Due Arrest Move

COQUILHATVILLE, the Congo (AP)—Prompt transfer to Leopoldville is expected for President Moise Tshombe of Katanga, arrested by the Congolese central government in a new try at unifying the country's provincial factions.

Foreign Minister Justin Bomboko said Tshombe will be kept under house arrest indefinitely while the central government pursues its policy of ending all threats to nationwide stability.

Tshombe's secessionist government at Elisabethville sent word Sunday that he should return to the unity talks he stormed away from in disagreement with other Congolese leaders last Wednesday. That act of defiance caused the Congo army to hold him, in hopes of preserving the conference.

# Fine Decreed On 2 Charges

A 19-year-old Midland youth was fined a total of $75 and costs today in Municipal Court on two charges filed by police as the aftermath of a disturbance Friday night at an East End home.

William Frank Smith Jr., 383 Midland Ave., Midland, was fined $50 and costs for carrying a 10-inch butcher knife as a concealed weapon and $25 and costs for malicious destruction of property after smashing a 24-x-24-inch window at the home of Mr. and Mrs. Earl Taylor, 703 Oakland Ave.

Smith pleaded guilty to both counts, but Judge Samuel M. Chertoff listened to testimony from the defendant along with Taylor, Capt. R. H. Pyle and Patrolman Orin Smith.

The two officers along with Patrolman Paul Carter and C. E. (Bill) Tice, responded to the call from Taylor's wife after the window had been smashed.

Smith fled on foot but was apprehended at Harvey Ave. and Putnam St. and the butcher knife was recovered from a nearby sewer where the defendant dropped it.

# 30 Given Call On Jury Duty

LISBON — A venire of 30 prospective jurors has been summoned for May 8 to hear criminal trials which will begin before Common Pleas Judge Raymond S. Buzzard.

The first case tentatively set is the trial of Robert Earl Wolf, 37, of Salem, accused of a burglary of the home of Martha and William Sprague, 551 Main St., Wellsville, Jan. 19, in which a television was stolen.

The next scheduled case will be Philip Regis Monac of Midland, accused of the theft of a tool box valued at approximately $100 from the home of George Brand Jan. 21, 1960.

The prospective jurors include: Margaret Betz, 590 Blackmore St., Francis J. Cloran 540 Henry Ave., Rosalie Davis and Elizabeth Holden, R.D. 1, Bess Smith, 315 Rural Ln., Leo J. Sutton, 322 Vine St., Nellie Vogt, 625½ Jefferson St., Nell B. Heidel, 1233 Cora St., Jean Hanselman, 919 W. 8th St., Louise Nicholson R.D. 2, and Georgiana Neidengard of Oakmont, all East Liverpool.

Ada Frye, Raymond Johns, Mary K. England, and Gordon E. Edwards all Salem.

Jenny Hammond of Wellsville; Phillip Ketchum R.D. 2, Lisbon; Charlotte Mancuso and Margaret Cope of Leetonia; Sara Jane Griffith and Pearl Brown of Salineville; William Close of North Georgetown; Henry Ashbridge, David Davis and Robert Morris of East Palestine.

Carl Vandergrift of Minerva R.D. 2; Helen Cope of New Waterford; Laura M. Esterly of Columbiana; Ina Mae Mellott of Washingtonville and Janet Hays of Summitville.

## Grange 'Open House' Program Draws 150

Some 150 attended the "open house" and coverdish dinner of the Fairview Grange Saturday evening in the Grange Hall in Ohio Township.

Mrs. F. Paul Dawson, lecturer, was in charge of the program. John Hineman and Thomas George screened movies of their hunting trip through the South. Juveniles, under the direction of Mrs. Charles Richards, sang selections.

Mrs. Dawson directed a candlelighting service. Participating were Paul Dawson, master, Mrs. Robert Smith, Mrs. Henry Smith, Mrs. Robert Nott and Walter Schuffert.

## Operetta Scheduled In Midland Tuesday

The operetta, "Mikado" will be presented Tuesday at 8 p. m. at the Midland Lincoln High School auditorium, sponsored by the Midland Lions Club.

It will be presented by the Beaver Valley Opera Association, with Anthony Caputo as director. Don Page of New York will sing the lead.

# Aliquippa Woman To Talk At Fellowship Day Friday

Mrs. Eric Garing of Aliquippa will be the guest speaker at the May Fellowship Day luncheon of the Council of United Church Women Friday afternoon at 1 o'clock at St. John's Evangelical Lutheran Church.

A graduate of Thiel College of Greenville, she is an active member of the Thiel Women's Club. She is past president of the Women's Auxiliary of the Lutheran Old People's Home at Zelienople.

Mrs. Garing, a cousin of Dr. F. Eppling Reinartz, former pastor of St. John's Church, is serving as vice president and a member of the Executive Board of United Lutheran Church Women of the Pittsburgh Synod.

Mrs. Kenneth Scott, general chairman, announced the theme will be "The Churches — Free and Responsible."

The Rev. Charles Kampmeyer, pastor, will give the invocation. Mrs. Alvin Stevens will be soloist. Mrs. Harold Bricker is in charge of registration.

Participating in the program will be Mrs. William E. Dunlap Jr. of St. Stephen's Episcopal Church, Mrs. Charles Rippeth, Orchard Grove Community Methodist; Mrs. Florence Early, Second Baptist; Mrs. Howard Tice, Boyce Methodist, and Mrs. Melvin Johnson, First Methodist.

MRS. ERIC GARING
*She'll Be Guest At Luncheon*

Mrs. Wesley Montgomery of the Trinity United Presbyterian will install the officers.

The program for the annual observance is prepared by the National Council of Churches.

# Installation Planned Friday By Women's Singing Group

Final plans for the installation of officers were made at the meeting of Sweet Adelines, Inc., Friday night at Tice's Restaurant.

The ceremony is set for Friday at the restaurant. The Magnolia Chapter of Carrollton, along with husbands of local members, will be guests.

Mrs. Ruth Rinehart, retiring president, and Mrs. Clara Hall, retiring corresponding secretary, are in charge of the program.

Mrs. Madalyn Mack, chairman, assisted by Mrs. Jan Dietz, Mrs. Edith Alexander, Mrs. Wilma Laughlin, Mrs. Margie Reed, Miss Norma Jones, Mrs. Lorida Harvey, Mrs. Betty Pettibon and Mrs. Betti Damaska head the welcoming committee.

Identification tags will be in charge of Mrs. Sonja Rose and Mrs. Edna Phelps. Mrs. June Morgan and Miss Nancy McBrian are in charge of refreshments.

The social committee is Mrs. Marjorie Stover, chairman, assisted by Miss Marie Stall, Mrs. Dorothy Preston, Mrs. Dorothy Hamilton, Mrs. Florence Gloeckner, Mrs. Wanda Schussler and Miss Marian Pratley.

Glenn Woods will direct singing for the joint chapters and Miss Jo Ann Vannoy will be pianist for group singing. The clean - up committee is: Mrs. Mary Leeper, chairman, Mrs. Nancy Pryor, Mrs. Vallie Mostoller, Mrs. Kathleen Galeno, Mrs. Arden Hartenbach and Mrs. Jane Powell.

Mrs. Rinehart conducted business. Mrs. June Morgan read the minutes and Mrs. Alexander gave the financial report.

It was announced Mrs. Dietz was named editor of "The Add-A-Line" newspaper of Region 14. Deadline for payment of dues is June 1.

Mrs. Sally Lynn, Miss Thea McSwegin and Mrs. Dietz were named to the auditing committee. The chapter accepted a singing engagement for the Lambskin Club May 17 at Beaver.

Woods gave an evaluation of the regional competition in which the group participated last weekend at Baltimore. He also set up a code for section leaders and the acceptance of new members.

Mrs. Rinehart thanked the chapter for its co-operation during her 2 years as president. A practice singing session was held. Seth Phelps of Lisbon was a guest.

## Akron U. Gets Gift

AKRON, Ohio (AP)—The Firestone Tire & Rubber Co. has given a $250,000 gift to the University of Akron. Dr. Norman P. Auburn, university president, said the money will help finance a multi-million-dollar expansion program on a 27-acre site on the south side of the campus.

Buffalo, N. Y., is the greatest flour - milling city in the world, with 26,441,980 hundred - pound sacks milled in 1960.

Glenn Woods will direct singing for the joint chapters and Miss Jo Ann Vannoy will be pianist for group singing. The clean - up committee is: Mrs. Mary Leeper, chairman, Mrs. Nancy Pryor, Mrs. Vallie Mostoller, Mrs. Kathleen Galeno, Mrs. Arden Hartenbach and Mrs. Jane Powell.

Mrs. Rinehart conducted business. Mrs. June Morgan read the minutes and Mrs. Alexander gave the financial report.

It was announced Mrs. Dietz was named editor of "The Add-A-Line" newspaper of Region 14. Deadline for payment of dues is June 1.

Mrs. Sally Lynn, Miss Thea McSwegin and Mrs. Dietz were named to the auditing committee. The chapter accepted a singing engagement for the Lambskin Club May 17 at Beaver.

Woods gave an evaluation of the regional competition in which the group participated last weekend at Baltimore. He also set up a code for section leaders and the acceptance of new members.

Mrs. Rinehart thanked the chapter for its co-operation during her 2 years as president. A practice singing session was held. Seth Phelps of Lisbon was a guest.

## Akron U. Gets Gift

AKRON, Ohio (AP)—The Firestone Tire & Rubber Co. has given a $250,000 gift to the University of Akron. Dr. Norman P. Auburn, university president, said the money will help finance a multi-million-dollar expansion program on a 27-acre site on the south side of the campus.

Buffalo, N. Y., is the greatest flour - milling city in the world, with 26,441,980 hundred - pound sacks milled in 1960.

# Eastern Star Observes 50th Year

The 50th anniversary of Crescent Chapter 49, Order of Eastern Star, was observed at a dinner and program Saturday night in the Chester Masonic Temple.

Mrs. Gussie Rice of New Cumberland, a charter member who received a 50-year pin, is shown above as she cut an imitation cake. Looking on, from left, are: E. G. Jackson of Chester, worthy patron; Mrs. Doris Durham of Newell, worthy matron; Mrs. June Mooney of Newell, associate matron, and Harold Davis of Chester, associate patron.

Mrs. Durham gave the welcome and made brief remarks, along with Jackson. A presentation "in memory" was made to Mrs. Elizabeth Pryor in honor of her mother, Mrs. Sarah Nicholls, who founded the chapter and served as its first worthy matron in 1911-12.

In the dining room, a spotlight was trained on 50 dolls on a revolving table, representing 50 worthy matrons. The dolls were dressed in bouffant formal gowns in Eastern Star colors. The doll's dresses were knitted by Mrs. Durham. The electrical device on which they were placed was built by Walter Elliott, past patron.

Selections were presented by the Weirton Steel Male Chorus. Miss DeErla Smith sang the National Anthem and Miss Wanda Martin gave a solo, "Bless This House."

About 250 attended, including Mrs. Eva McFadden of St. Albans, worthy grand matron of West Virginia, and Veril Cain of Littleton, associate grand patron of the state.

Officers of the chapter presented a program in Mrs. Rice's honor. She also was presented a bouquet of yellow roses and a monetary gift.

Those who received 25-year pins included Mrs. Margaret Turner, Mrs. Clara Piper, Mrs. Julia Davis, Mrs. Carrie Hisson, Mrs. Margaret Jackson, Mrs. Annie Osborn, Mrs. Miriam Abrams, Mrs. Ollie Brenneman, Mrs. Ada Henry, Mrs. Carrie Mountjoy, Mrs. Helen Matthew, Mrs. Roxie Hall, Mrs. Phoebe Smith, Mrs. Josephine Kimble and Jackson.

The chapter received two golden coin baskets from the Weirton chapter. Walter Elliott of Chester was presented a gift for "outstanding services."

Mrs. Nicholls, a member of Crystal Chapter 18 in East Liverpool, first suggested that an Eastern Star chapter be instituted in Chester. The chapter met for organization on Feb. 23, 1911. O. C. Ogden of St. Marys, worthy grand patron, and 13 members of Miriam Chapter No. 1 at Wheeling were present.

In addition to Mrs. Nicholls, the officers were: George Ahrendts, Callie McKinnie, Minnie Ahrends, Oscar Allison, Martha Sinclair, Mary Owen, Jennie Bernard, Fannie Smith, Julia Ahrendts, Ora Russell, Mrs. Rice, Edith Nicholls, Fred Owen and Robert Nicholls. O. C. Ahrendts, Edward McKinney and Fred Owen were trustees.

Crescent Chapter serves members in Newell, New Cumberland and Chester.

The initial meeting was held in the IOOF Hall at 5th St. and Carolina Ave. Plans were made to hold meetings in officers' homes. Several meetings were held in the Masonic Hall, which was located on the Chester-Newell Rd. In 1913, Chester Masonic Lodge 142 moved to rooms on the upper floor of the Chester Hotel at Virginia Ave. and 1st St. Eastern Star meetings were discontinued for five months while the rooms were remodelled. Meetings were held in that building until 1921, when the present Masonic Temple was purchased.

Other 1960-61 officers are: Dorothy Hissam, secretary; Margaret Sims, treasurer; Alveria Haynes, conductress; Christine Collins, associate conductress; Rea Nathaniel, chaplain; Kathryn March, marshal; Elma Lowers, organist; Sandra Mey, Adah; Kathryn Davis, Ruth; Gilda Davis, Esther; Helen Matthew, Martha; Thea McSwegin, Electa; Anna Newman, warder; Stella Ward, sentinel, and Olive John, Helen Hobbs and James Kidder, trustees.

## Cub's Committee To Meet May 22

A committee meeting for Hookstown Cub Scout Pack 496 will be held May 22 at the Mill Creek Presbyterian Church.

Some nine Bobcats received pins at a meeting of the pack Thursday evening including Ronald Mundon, Dennis Allinder, Arthur Stewart, Raymond Scott, Gary Rogers, Larry Berger, Ronald Schwarz, Charles Green and Richard Dydek.

Edward Reed received a lion badge and Charles Reed and Charles Andrews, wolf badges. A puppet show was presented by Billy Mercer and Charles Mercer. Mrs. Martha Stewart's new Den 5 gave a skit.

Joe Mercer, cubmaster, presided. An explanation of model airplanes was given by three members of Boy Scout Troop 496, including Dennis Fox, new chief of Den 3, Tommy Jones and Terry Campbell. They exhibited models.

## Jet Service Starts

CINCINNATI (AP) — American Airlines has opened jet flights from Cincinnati east to New York and west to Los Angeles with a stop at St. Louis. The flights started Sunday. American followed the jet lead of Delta Airlines which last December started service to Miami and last Saturday added jet coach flights linking Cincinnati to Detroit and Miami.

## Pughtown Group Slates Induction

A slate of new officers headed by Mrs. Howard Hayward Jr. will be installed when the Pughtown Parent-Teacher Association meets tonight at 8 in the elementary school.

Mrs. Anthony DiBart, president of the Hancock County PTA Council, will seat officers for the 1961-62 term. Mrs. Hayward succeeds Mrs. Lester Hill.

Plans for tonight's meeting were outlined at a weekend meeting of the executive committee in Mrs. Hayward's home on State Route 2.

Mrs. Rebecca Kaul's first graders will lead devotions. The school's junior band will present selections. Slides of Newark (Ohio) schools, similar in design to two new high schools proposed for the county, will be screened by Robert Lindsey, assistant county superintendent.

The Executive Committee will serve refreshments. Attending the planning meeting in Mrs. Hayward's home were Mrs. Hill, Mrs. William Bailey Jr., Mrs. R. G. Rosich, Mrs. Ted Pryor and Mrs. Emory Ford. The hostess served refreshments.

## Swiss Aide Honored

WILMINGTON, Ohio (AP)—August R. Lindt, Swiss ambassador to the United States, has won an honorary doctorate from Wilmington College for his four years of work as United Nations commissioner for refugees.

## Firm Sets Expansion

YOUNGSTOWN, Ohio (AP) — McKay Machine Co. has announced plans to build a $3.5 million plant and general office building in Wickliffe near Cleveland. It is designed to increase efficiency of production facilities here.

# Man Charged After Mishap

Police filed two charges against a 37-year-old motorist after his station wagon struck a parked 1961 sedan Sunday at 12:57 a. m. on Mulberry St. near Locust St.

Robert Prescott, 931 Dresden Ave., was charged with reckless operation and driving an auto without an operator's permit after his 1957 station wagon hit the parked car of Edward T. Croxall, 1621 Alpha St.

In a hearing this morning, Municipal Judge Samuel M. Chertoff suspended Prescott's license for 30 days and fined him $50 and costs on the reckless driving charge.

The charge of driving without an operator's permit was dismissed when the motorist produced his license.

Prescott told police he pulled from a parking spot on Mulberry St. when "something happened" to his right front tire, causing his auto to veer across the street and hit Croxall's car.

In another mishap at 12:45 this morning, a 47-year-old man's auto went onto the Pennsylvania Railroad Co. tracks after he fell asleep while driving on E. 2nd St.

The 1955 four-door sedan, driven by Carl Carnes, 306 E. 2nd St., came to a halt on right-of-way between the eastbound and westbound tracks, police said. The car is owned by Arthur G. Blystone, also of 306 E. 2nd St.

A parked auto drifted away from Orchard Grove Ave. Saturday at 1:22 p. m., struck a northbound auto on St. Clair Ave. and then crashed into a wall on the west side of St. Clair, police said.

The parked auto, a 1956 model, was owned by Robert Gessford, 1702 Jennings Ave., police said. It was halted on Orchard Grove, facing St. Clair, when it drifted away and hit the rear of a 1953 auto operated by Alonzo Spencer, 32, of 1233 Pennsylvania Ave., police said. The right front of the Gessford car and the right rear of the Spencer auto were damaged, police said.

Meanwhile, Hilda Richmond, 404 W. 4th St., told police the left rear of her 1955 two-door sedan was damaged when struck by a hit-skip vehicle Sunday night while parked in front of her home.

## 250 Attend Local Fashion Exhibits

About 250 attended a fashion show Saturday evening at the East Junior High School, sponsored by the East Liverpool Branch of the National Association for the Advancement of Colored People.

The principal model was Mrs. Marqurite Belafonte of New York City. Twenty - four other models participated. Mrs. Janice Southall was narrator. Music was provided by John Cilli at the organ.

Mrs. William Carswell was chairman of the event; Mrs. Annie May Jones and Mrs. Alonzo Spencer, co-chairmen of the model arrangements; Mrs. Elizabeth Carter, music, and Mrs. Dorothy Peters, chairman of the receiving line. Other committee members included Mrs. Louise Fitch, Mrs. Alice Carter, Mrs. Olivia Lacey and Mrs. Margaret Veney.

Mrs. Elizabeth Carter entertained at a buffet dinner at her home on Erie St. for Mrs. Belafonte and the fashion show committee, prior to the show.

State Contest's Next

# Local Students 'Sweep' Road-E-O

East Liverpool High School students swept the field in the Junior Chamber of Commerce teen-age driving Road-E-O contest Sunday afternoon, taking all three top positions in both the boys' and girls' divisions.

Jack Chapman, chairman, is shown presenting plaques to Roy Burson, center, first place winner in the boys' division, and Miss Kathy Pinkerton, right, first in the girls' division.

Burson, son of Mr. and Mrs. Ralph Burson of Pennsylvania Ave., scored a total of 363 points out of a possible 400, while Miss Pinkerton, daughter of Mr. and Mrs. A. C. Pinkerton Jr., 913 Florence St., scored 329 points. Burson was in the top three last year.

They will represent the city in the state contest June 11 at Portsmouth. Chapman said 60 students from East Liverpool, Beaver Local, Chester and Wells High Schools participated. The obstacle courses were set up at Westgate School.

The first place winners also received $20 each in cash. The second and third place winners each received $10 and $5 cash prizes.

The runnerups were Diana Marchette, daughter of Mr. and Mrs. J. H. Marchette of Oakwood Ave., second with 311 points, and Linda White, daughter of Mr. and Mrs. Fred White, 612 Fisher Ave., third with 287; Robert Lawrence, son of Mr. and Mrs. Leo Lawrence of Midway Ln., second boy winner with 347 points, and Wilmer Bryson Jr., son of Mr. and Mrs. Wilmer Bryson of Glenmoor, third with 342 points.

## Vote Scheduled Over Control Of Alleghany Corp.

BALTIMORE (AP) — Alleghany Corp. shareholders gathered today to settle the issue in a battle of millionaires for control in the giant holding corporation and its $6.7 billion financial empire.

The contest was without parallel in American history, overshadowing the duels of railroad and oil barons of a half century ago.

The principals, Alleghany Chairman Allan P. Kirby and Texas financier John D. Murchison, his challenger, both professed optimism. Kirby inherited a Woolworth 5-and-10 cent store fortune; Murchison has a fortune built on oil.

But Murchison and close allies of Kirby, agreed that it might take two weeks of painstaking scrutiny of stockholder votes to determine the outcome of the annual meeting of shareholders.

At stake was control of a holding company which, although it has only 10 persons including secretaries on its payroll, governs the destiny of the $2.5-billion New York Central Railroad and Investors Diversified Services, $3.7-billion investment company complex.

## Car Club In Chester Accepts 2 Members

The Cherioteers Car Club met Saturday evening in its clubroom on Carolina Ave., Chester, and accepted two new members, Charles Potts and Richard Mey.

The club decided to purchase new jackets. It also decided to paint curbs yellow at such spots as bus stops and school zones if the city will furnish paint.

William Harper Jr., president, presided. The club meets each week.

Commercial air transports in the United States began in 1921, when planes began to fly regularly from coast to coast.

## Woman's Head Found By Boys In California

GARDEN GROVE, Calif. (AP) —Three boys found the head of a woman wrapped in a plastic bag when they bicycled past a tomato field Saturday.

Police, unable so far to identify the woman, said the head had been struck six times with a sharp instrument.

Coroner Raymond Brandt said the woman had been slain less than 12 hours. The body was not found.

Toss plain boiled macaroni with grated Parmesan cheese and butter and serve with breaded veal chops garnished with a little tomato sauce.

## Assembly Slated Wednesday For Faculty Tribute

East Liverpool High School's 44 faculty members will be honored at the first annual "Teacher Appreciation Assembly" Wednesday at 12:55 p. m. in Memorial Auditorium.

Teachers will sit in a group on the stage while students from each department speak on behalf of the instructors. The program will include selections by the high school concert band and choir.

Paul Bloor, city pharmacist, will speak on behalf of the community as an alumnus of ELHS.

The assembly is a project of the Student Council. Students will observe "dress up" day and will present small gifts to each instructor. Posters will be displayed in various rooms expressing appreciation for the teachers.

The student speakers will include Kenneth Miller, president of Student Council, Marjorie Brown, Joyce Massey, David Lampman, Thomas Fannin, Jane Bendheim, Tim Archer, Gary Hicks, Joan Leon, Paul Jarvis, David Thorne, Jack Alpern, and Linda VanDyne.

Mrs. Ruth Connor, dean of girls, and Bert Dawson, dean of boys, co-sponsor the Student Council. The program is open to the public, they said.

METROPOLITAN

announces a service for all fathers

FAMILY SECURITY CHECK-UP

Family Security Check-Up

Now you can check up on your financial health, just as you check up on your physical health. This service is more than an interview. It is a review every father should have regularly—whether he needs insurance or not.

EVERY YEAR, millions of fathers have health check-ups. Yet, millions of fathers don't check up on their family's *financial* health.

Metropolitan Life Insurance Company now offers a service which lets you do just that: The Family Security Check-Up. It is a service which can bring you new information and correct mistakes. It lets you make sure you've planned your family's future with your head as well as your heart.

What you could lose without one

Our experience with millions of families shows there are mistakes, oversights, gaps in the average man's financial security program. Too much of it is haphazard. Too much of it is left to chance. It lacks a *plan* or too often it simply falls behind the times. For example—

**You can unintentionally "disinherit" a child,** in effect, if you have overlooked naming him among your beneficiaries.

**Social Security benefits** for your wife and your children may not dovetail efficiently with your pension or insurance programs.

**As much as 20% more actual cash** can be provided depending upon the mode of payment selected.

**A guaranteed income**—until your youngest child is grown up—can be provided even if you are a man with a moderate income.

**Times change;** many changes can affect your plans. Changes in income, occupation, in children's ages, in the cost of living—all these mean that a father should have a financial check-up regularly. And he should also make sure he has taken advantage of the most *modern* insurance provisions and benefits.

More than an interview—a service

Metropolitan, the company you look to for authoritative information on physical health, offers a way to check up on your family's financial health.

You'll see, below, all the steps you go through to satisfy yourself that the provisions you have made for your family will do what you intend.

Metropolitan representatives have been trained in Metropolitan's own schools and are qualified by solid experience to bring you this service. They are equipped with businesslike charts and tables that show you exactly where you stand.

**Whether you need insurance or not,** this service makes sense. Remember, Metropolitan is as local as Main Street ... as close as your phone. Call your Metropolitan man today.

**There is no obligation**—*except to those you love.*

Family Security Check-Up

WHAT IT IS AND WHAT IT DOES FOR YOU

With the help of your Metropolitan man—

1. **You check the facts:** your Social Security, your home, your life insurance, your pension plan, your savings and other assets. You may be surprised to learn how *much* you're worth.

2. **You weigh your responsibilities:** mortgage or rent payments, education, retirement, accident and sickness emergencies; how much it would cost your family to live without you.

3. **You learn where you stand.** You determine your weak and strong points ... whether the provisions you have made for your family will do what you intend. You get the facts in front of you.

4. **You plan for the future.** Based on these facts, you decide what action, if any, may be needed to give you a family security plan, tailor-made to your own needs and ambitions—one which makes good sense for *you.*

# Here Are Items Of Interest For Average Home Owner

By ANDY LANG
AP Newsfeatures

From various sources come these bits of information of interest to the home owner:

Hardwood flooring manufacturers are disturbed because the word resilient is always applied to certain kinds of flooring materials but seldom to hardwood.

They say that hardwood floors are truly resilient, being capable of withstanding shock without permanent deformation or rupture and being able to absorb shock caused by walking.

A motivation research firm has completed a survey to determine what factors most influence the purchase of a house.

Those interviewed were asked to rank five factors according to importance. The factors were: style of house; type of construction and materials; size of rooms; arrangement of rooms; and low price. According to the company, 74 per cent rated construction and materials first. Next came size of rooms, arrangements of rooms, and low price.

Thinking about making a patio or terrace? For a concrete floor that's a little different, you might consider the use of brightly colored pebbles imbedded in the concrete and left exposed.

This not only gives a striking finish that blends with the surrounding landscape, but provides a non - skid surface.

A gentlemen we know who wanted a second bathroom in his home, but had very little space for it, solved the problem by using undersized mobile - home fixtures.

He discovered that he could get a bathtub only 46½ inches long. Made of fiberglass - reinforced plastic, with molded-in color, the tub fitted neatly into the small space available. He was able to finish the bathroom with other under - sized fixtures weighing considerably less than the conventional types.

Speaking of space — or the lack of it — there's usually more of it in your home than you realize. In closets, for example, there is usually a lot of wasted space over the clothes poles. This area can be outfittde with a series of shelves and-or a perforated hardboard panel.

Fitted with specially - made hooks, these panels can be utilized for hanging hats and other bits of wearing apparel that are used only occasionally. There is extra space, too, under desks and typewriter tables, under the kitchen sink, under the bathroom lavatory and, in some kitchens, over the cabinets.

DESIGNED FOR EFFICIENCY. In olden days, cooking for many guests called for a mammoth-sized kitchen. But today's homemaker finds the job easier in a compact kitchen like this, where cabinets have been expertly tailored to keep utensils at her fingertips. This petite cookhouse features built-in beauty, too, with cabinets, wall panoling and ceilings in rich, autumn-hued western red cedar.

## Hancock Court Gives Probation To 2 Men

Two New Cumberland men were placed on probation Friday in Hancock County Circuit Court after they withdrew innocent pleas to indictments returned by the April Grand Jury.

Robert E. Mercer and Homer Fisher were charged with entering the home of the late Mary Watson on Route 66 south of Newell.

Judge Ralph E. Pryor sentenced the pair to 1-10-year terms in Moundsville State Penitentiary but granted five-year probation on petitions filed by their attorneys.

Fisher and Mercer had entered innocent pleas when arraigned April 14 before Judge Pryor.

## Warning Enough

BUFFALO, N. Y. (AP) — Sign on the rear of a florist's truck: "Drive carefully. The next load may be for you."

## Assessment Check Asked

The West Virginia State Tax Department has advised Hancock County officials to review their property assessments immediately and determine whether they meet legal requirements.

In a letter to Assessor Anthony Leon, and three county commissioners, Tax Commissioner C. Howard Hardesty Jr. reminded them that after July 1 he is required to take corrective steps in cases where assessments and valuations do not comply with the law.

In the event that properties are not assesses at 50 per cent of the appraised valuations, immediate steps should be taken during the present assessment period to make the necessary changes. Hardesty advised.

Under an act of the 1961 legislature, tax commissioner's representatives are required to go into counties not in compliance with the 50-per cent provision and review and correct assessments.

Leon is checking his assessments in an attempt to raise them by one-third this year under the provisions of Senate Bill 121. The bill eliminates the requirement of raising the county's assessments 50 per cent this year, or increasing them by over $18 million.

Thus, Leon has three years in which to bring the county assessments up to the 50 per cent figure, with only 19,000 parcels of land to assess and hardly enough tax deputies to complete the job.

The requirement that county assessors raise assessments to a 50-per cent level is part of the revaluation program started in West Virginia in 1957.

## Residents In Tucson Go Around In Circles

TUCSON, Ariz. (AP) — Residents of Circle Drive have pleaded with with the City Council to change the name of their street.

There also is an East Circle Drive and a West Circle Drive and this brought the following headaches:

Somebody on West Circle ordered groceries. They were delivered to a Circle family. It took a long argument with the store owner before the order was cancelled.

A resident of East Circle forgot to pay his water bill. The city shut off the water at a home on Circle.

Someone on East Circle ordered his paper stopped. A Circle home owner went a week without the news.

## Tips Are Offered For Spray Guns

AP Newsfeatures

Question: I expect to rent a spray gun soon for a project I will be working on. I have been reading up on spraying and have a pretty good idea of the subject, but opinions differ on how far the gun should be held from the material being sprayed. Cany you help me?

Answer: In most cases, the spray gun should be held about 12 inches from the work. But this is by no means an inflexible rule.

A lot depends on what kind of fluid is being used and how much it has been thinned, if any. For that reason, it is always wise to test the gun first on some scrap stock. You want a finish that will cover well yet does not sag or run.

If you get a dryish, dusty spray that does not seem to cover the material thoroughly, it means that you are holding the gun too far away. If the sprayed fluid begins to run and sag, it means that the gun is being held too close.

An important factor is that the spraying be done across the material on a straight line — with no arcing motion.

Lurking in the waters of the Great Barrier Reef, off Australia, are 100 species of shark. Eight are man-eaters.

Here are the facts you need

Starting a new lawn this spring?

1. Don't worry about poor soil. You don't need to go to the trouble and expense of bringing in topsoil. Any soil—even subsoil—can give a satisfying lawn with regular feedings of Scotts protein-building TURF BUILDER®.

2. Don't be taken in by seed "bargains." You want a good lawn, not a hayfield. Cheap mixtures contain wild grasses that will plague you for the life of your lawn. Scotts seed is all good grass, perennial and weed-free.

3. Don't plant the wrong kind of lawn. Be realistic. If you need a lawn that stands up to the punishment of children and weather, choose Scotts PLAY seed. If appearance is paramount, Scotts FAMILY® or CLASSIC®.

Ask us about the Scotts guarantee... a better lawn or your money back!

# Here Are Items Of Interest For Average Home Owner

By ANDY LANG
AP Newsfeatures

From various sources come these bits of information of interest to the home owner:

Hardwood flooring manufacturers are disturbed because the word resilient is always applied to certain kinds of flooring materials but seldom to hardwood.

They say that hardwood floors are truly resilient, being capable of withstanding shock without permanent deformation or rupture and being able to absorb shock caused by walking.

A motivation research firm has completed a survey to determine what factors most influence the purchase of a house.

Those interviewed were asked to rank five factors according to importance. The factors were: style of house; type of construction and materials; size of rooms; arrangement of rooms; and low price. According to the company, 74 per cent rated construction and materials first. Next came size of rooms, arrangements of rooms, and low price.

Thinking about making a patio or terrace? For a concrete floor that's a little different, you might consider the use of brightly colored pebbles imbedded in the concrete and left exposed.

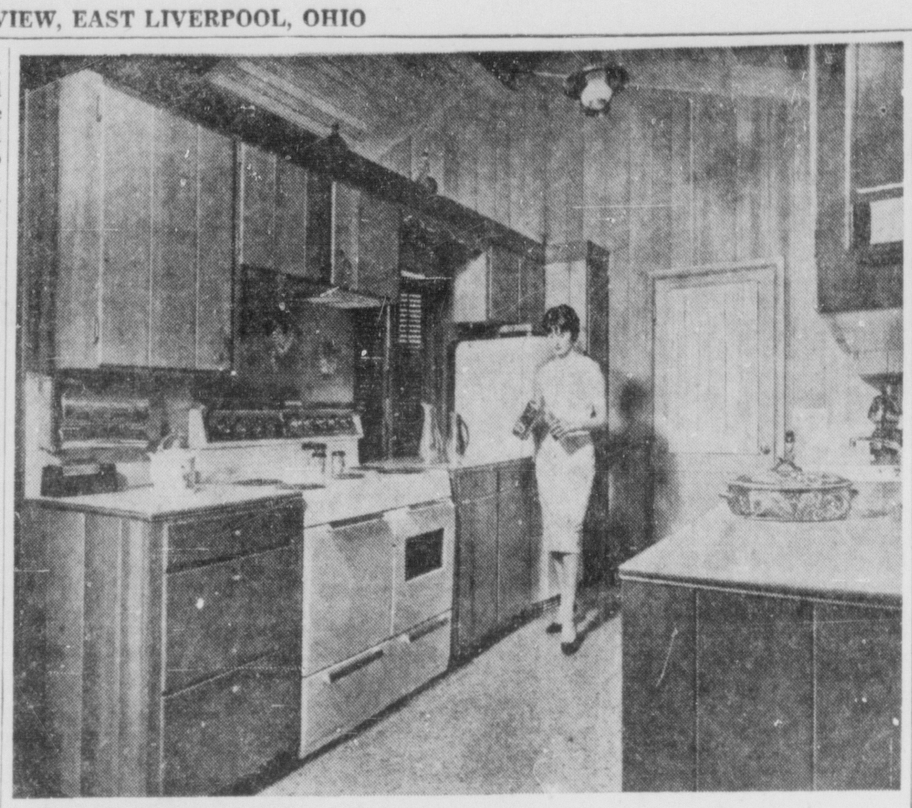
This not only gives a striking finish that blends with the surrounding landscape, but provides a non - skid surface.

A gentlemen we know who wanted a second bathroom in his home, but had very little space for it, solved the problem by using undersized mobile - home fixtures.

He discovered that he could get a bathtub only 46½ inches long. Made of fiberglass - reinforced plastic, with molded-in color, the tub fitted neatly into the small space available. He was able to finish the bathroom with other under - sized fixtures weighing considerably less than the conventional types.

Speaking of space — or the lack of it — there's usually more of it in your home than you realize. In closets, for example, there is usually a lot of wasted space over the clothes poles. This area can be outfittde with a series of shelves and-or a perforated hardboard panel.

Fitted with specially - made hooks, these panels can be utilized for hanging hats and other bits of wearing apparel that are used only occasionally. There is extra space, too, under desks and typewriter tables, under the kitchen sink, under the bathroom lavatory and, in some kitchens, over the cabinets.



DESIGNED FOR EFFICIENCY. In olden days, cooking for many guests called for a mammoth-sized kitchen. But today's homemaker finds the job easier in a compact kitchen like this, where cabinets have been expertly tailored to keep utensils at her fingertips. This petite cookhouse features built-in beauty, too, with cabinets, wall panling and ceilings in rich, autumn-hued western red cedar.

## Hancock Court Gives Probation To 2 Men

Two New Cumberland men were placed on probation Friday in Hancock County Circuit Court after they withdrew innocent pleas to indictments returned by the April Grand Jury.

Robert E. Mercer and Homer Fisher were charged with entering the home of the late Mary Watson on Route 66 south of Newell.

Judge Ralph E. Pryor sentenced the pair to 1-10-year terms in Moundsville State Penitentiary but granted five-year probation on petitions filed by their attorneys.

Fisher and Mercer had entered innocent pleas when arraigned April 14 before Judge Pryor.

## Warning Enough

BUFFALO, N. Y. (AP) — Sign on the rear of a florist's truck: "Drive carefully. The next load may be for you."

## Assessment Check Asked

The West Virginia State Tax Department has advised Hancock County officials to review their property assessments immediately and determine whether they meet legal requirements.

In a letter to Assessor Anthony Leon, and three county commissioners, Tax Commissioner C. Howard Hardesty Jr. reminded them that after July 1 he is required to take corrective steps in cases where assessments and valuations do not comply with the law.

In the event that properties are not assesses at 50 per cent of the appraised valuations, immediate steps should be taken during the present assessment period to make the necessary changes. Hardesty advised.

Under an act of the 1961 legislature, tax commissioner's representatives are required to go into counties not in compliance with the 50-per cent provision and review and correct assessments.

Leon is checking his assessments in an attempt to raise them by one-third this year under the provisions of Senate Bill 121. The bill eliminates the requirement of raising the county's assessments 50 per cent this year, or increasing them by over $18 million.

Thus, Leon has three years in which to bring the county assessments up to the 50 per cent figure, with only 19,000 parcels of land to assess and hardly enough tax deputies to complete the job.

The requirement that county assessors raise assessments to a 50-per cent level is part of the revaluation program started in West Virginia in 1957.

# Carport Wins New Place In Home Picture

PORTLAND, Ore. — Cinderella of home design is the carport. After years of existing only for utilitarian reasons and in purely utilitarian form — generally a lowly outbuilding — the carport now has blossomed into one of the modern home's most striking features.

Today the carport occupies a place of prominence at the front of the house, often adjacent to the main entrance, where its swept - wing styling adds drama and dimension to the home.

Generally it is open in design, appearing to hover above the ground like a giant, protective butterfly. Lack of walls creates the illusion, for the newest design consists only of a roof supported on a few slender columns.

The roof is usually just an extension of the house roof that juts out in an exaggerated overhang to form the car shelter. It is of such size that it affords adequate protection without the need for walls, though the house itself, of course, does form one wall for the carport.

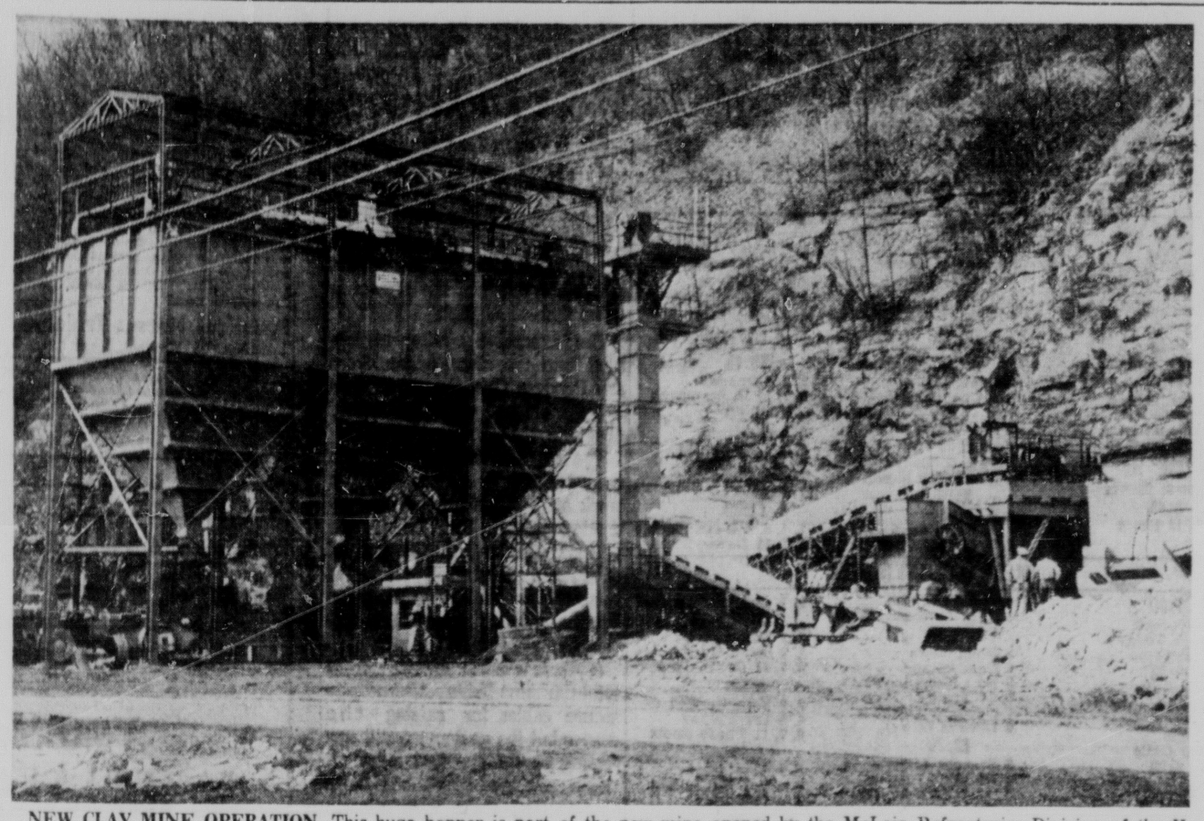
The dramatic beauty of the carport is built-in. Structural posts and beams are exposed to view to create an exciting, skeletal pattern of line and shape that shows to advantage in the open styling.

But the open design also presents its problems, for structural elements must be able to withstand maximum exposure to the weather yet retain top appearance and require a minimum of upkeep. For these reasons, beams are generally tough. Douglas fir, either sawn or glue laminated, and supporting columns and roof decking, too, are fir.

No protective paint is needed for fir posts and beams, though architects generally stain them a soft, natural wood shade to match the house siding.

If a good exterior stain is used, no touchups are needed for many years. Paint can be used, of course, and often is to provide accent color. Beams painted a gay shade of peacock blue, vermillion or Chinese red can produce an exciting effect.

The carport always should connect to the side door so that groceries can be carried from car to kitchen without getting out in the weather. And whenever possible, the carport roof should be extended to shelter the front entrance walkway.



NEW CLAY MINE OPERATION. This huge hopper is part of the new mine opened by the McLain Refractories Division of the H. K. Porter Co., Inc., along Route 45 near Wellsville. It is nearing completion and should go into operation within the next few weeks. The new mine and hopper are part of a $1½ million expansion project at the McLain operations. Two new tunnel kilns, additional dryers and new machinery and equipment are being installed. The modernization will provide additional ladle brick production, enabling the firm to better serve the steel industry of the area.

## How Can I?

By ANNE ASHLEY

**Q. How can I improvise a good wax for my linoleum?**

A. Here's an easy and fast way of doing it: Simply add a handful of starch to your washing water, and when your floor has dried—presto, it will have a gloss almost as high as if it had been hand-polished!

**Q. How can I clean floor matting?**

A. Sweep with a soft brush or clean with a vacuum cleaner. Once weekly, after it has been cleaned, roll it up so that the floor underneath can be cleaned—which is important because of the dirt that sifts through the matting. Occasionally wipe the matting with a damp cloth wrung out of water containing one or two teaspoons of ammonia. Don't soak the matting, or you may get a musty smell.

**Q. How can I remedy some salad dressing that has curdled?**

A. Add a little unbeaten white of egg to it, and it will become as smooth as velvet. This is especially good for curdled mayonnaise.

## 4 Drivers Given Year Suspension

LISBON — Four Columbiana County motorists received one-year suspensions of their driving permits under the state's 12-point demerit system Friday before Common Pleas Judge Joel J. Sharp.

They included Thomas W. Earl, 22, of Salem and Gene Daniel Boals, 30, of Salem R.D. 1, each for two convictions of driving while intoxicated and for reckless driving.

James E. Marchbanks, 37, of Hanoverton R.D. accumulated five charges of speeding and failing to stop within the assured clear distance and one of reckless driving, and James Allen Ray, 24, of near Salem, had been charged with speeding, driving left of center and following too closely.

Marchbanks was given permission to obtain a restricted permit for business purposes only, and Ray's employer requested a similar permit. The court gave permission and also placed him on probation for the six violations over a two-year period.

The port of Buffalo, N. Y., is closer to most Scandinavian ports than are the ports of New York, Philadelphia or Baltimore.

The opossum carries its young in a pouch like the kangaroo.

In ancient Sparta, celibacy was a crime and bachelors were often set upon by groups of women and beaten.

# Out Of The Air

By HAL HUMPHREY

## *Are We Ready For Globel TV?*

Global war isn't the only thing we have to worry about. We're told now that "television stands on the threshold of the worldwide transmittal of picture and sound." That quoted statement is from a slick multi-colored brochure just issued by the Academy of Television Arts and Sciences.

Hal Humphrey

It is an official announcement that during the week of Nov. 4-11 the academy will hold its First International Assembly. The academy hopes to be hosting some 2,000 delegates from 40 countries when the conclave opens in New York City. Red China is the only one which hasn't been invited. Apparently no one here is sure that China has TV.

Because we're on the brink of global TV transmission, academy members (including the international assembly chairman, Ed Sullivan) decided it was time that TV broadcasters, artists and technical people from around the world should sit down and talk about it.

-:-

**SOMEONE** or some group has to determine whether the first TV image flashed around old Mother Earth is a snowy picture of Mickey Mouse of Nikita Khrushchev threatening to bury us.

Brig. Gen. David Sarnoff, the wily old chairman of RCA, recently suggested that leaders of the U.N. begin planning now to program the first satellite TV channel. The general probably figures that if Russia has the first satellite transmitting stations buzzing around us, our only chance of getting a program on the global airwaves will be through the U.N.

We may have to take the old Sunday afternoon "Omnibus" hour, while Nikita has "Ivan Maverick" at 7:30 Sunday night, but at least we'll be on the Moscow network.

Gen. Sarnoff says global TV will be a reality in five years or less. Harry S. Ackerman, president of the TV Academy, believes we'll have it by 1963.

-:-

**WHEN TV'S** First International Assembly meets next November, Ackerman hopes there will be a free exchange of ideas and that American broadcasters can broaden their base of programming as a result of rubbing ideas with their foreign counterparts.

"We're not inviting these delegates here to watch our television," Ackerman states. "We don't want them to feel that everything has to be American."

Ackerman and his academy members will have to do a selling job to convince some of the other free nations of that. Countries like England, Italy, Mexico and Japan already are importing so many American TV film series that they think we're a nation of horseback riders and private eyes.

Of course, the Japanese have seen Jack Paar in person, but there are some Americans who aren't sure that helped our TV image in the Orient.

-:-

**IT WAS HINTED** in Variety that some of the delegates coming to this First International Assembly may try to sell some of their programs to us. It might be a good idea for us to buy a few, just to prove we know what reciprocity means.

If delegates to this meeting get the idea that we're trying to take over the whole global show, all of the academy's efforts will have gone for naught.

Gen. Sarnoff says he sees global TV as offering "a bright new promise for moving the world closer to civilized harmony." If the general had any particular TV programs in mind for accomplishing this feat, he didn't mention them.

We only can hope that the competition developed in outer-space TV for global viewers don't get as rough as it sometimes does here in the U.S.

It would be rather frightening to peer up at the moon some warm summer night and see written across its face in huge flashing letters the advice—"Smoke Dillies, because they're good at both ends."

## TV Highlights

**TONIGHT**

**7:30, WTAE, WEWS, Cheyenne:** He and five strangers wait for an Indian war party to attack.

**8, WSTV, Steelmark Month:** The Ohio Valley urges people to buy American-made steel products.

**8:30, KDKA, Bringing Up Buddy:** His aunts lend their picture and endorsement to a frozen cake mix.

**9, WJAC, WTRF, WIIC, May Day in Moscow:** Portions of May Day festivities there are presented.

**9:30, WTRF, West Virginia** White: The governor's cleanup is discussed.

**10, KDKA, WSTV, Hennesey:** A patient disappears.

**10, WJAC, WTRF, WIIC, Barbara Stanwyck:** A couple attempts to escape from a revolution-torn Latin American country.

**10:30, WTAE, WEWS, WSTV,** Peter Gunn: He searches for a woman when two brothers are mysteriously murdered.

**11:20, WSTV, Movie: "Dark Mirror,"** Olivia DeHavilland, Lew Ayres.

# 5 Of Faculty To Quit Posts

LISBON — Village schools will lose five teachers this term, one due to retirement and four because of resignations, according to Supt. Russell Armitage.

Mrs. Marie Parry announced intentions to retire at the close of the term. Mrs. Parry has been on the Lisbon staff for 25 years. Resignations include Mrs. Christine Chappell, Mrs. Mary Jane Flora, Mrs. Margaret Trunick and Geraldo Chappell.

Chappell is going to Northwestern University to complete his master's degree in speech therapy. For the past two years he has served as the speech and hearing therapist in the Lisbon system. Mrs. Janet Baker, currently teaching English in the high school and a qualified speech therapist, will replace him next term.

All remaining teachers have received their contracts for the coming term. Because schools will be overcrowded and some classes will be placed in temporary quarters it will be necessary to add some teachers to the staff next term, Armitage said.

Miss Nancy Shattuck has accepted a position in the elementary schools. She previously taught in this district as a cadet teacher and then resigned to return to school to complete her degree. She returns to the district as a fully-certified teacher, Armitage said.

## East Junior High Bands Will Give Concert Tuesday

The annual spring concert of the East Junior High School bands will be held Tuesday night at 7:30 in the school auditorium under the direction of Alex N. Demkowicz.

The program will feature selections by the concert band, including "Die Meistersinger," selections from "My Fair Lady," "Fiesta Calypso," "Our Gorious Land March," "Time Out for a Jam Session" and "Autumn Silhouette."

Other selections will include "A Night In June," by a saxophone quartet; "Two Imps" by a flute duet, "Interlude" by a clarinet quartet and "Three of a Kind" by a trombone trio.

The combined band, consisting of members of the Concert and Cadet Bands, will play "Orpheus In a Jam," a novelty selection from themes of Offenbach, a "Chorale," by Wagner, and "Look Forward March."

Advanced tickets are being sold by members of the East Junior Band. Tickets also may be purchased at the door.

## Palestine Girl Chosen For Majorette Post

EAST PALESTINE — Sue Ann Kennedy has been named head majorette of the East Palestine High School Band for the 1961-62 season. She won in the tryouts held this week. Eleven were competing for the top position.

Frances Geiger was runnerup. Both will attend a summer majorette camp. The date will be set later. Each received a $50 camp scholarship from the Band Parents Association.

# Bringing Up A Family

By GARRY C. MEYERS

## *Imagination Good For Child*

Around the age of two or earlier the child begins to respond to things not present and to act and speak of them or to them as if they were really right before his eyes. "See the birdie coming out of the bottle," said a two-year-old girl to her mother. No bird or bottle was in sight, yet the youngster looked and spoke as if they were. Some little children, two, three or four, have all sorts of imaginary playmates, pets, or other creatures. The playmate may have a place beside the child at the table, the pet may go walking with him. Always one must be careful to hold open the door till the pet or playmate enters.

Dr. Garry Meyers

—:—

**WITH GOOD** insight and long practice, one may easily learn to act properly toward these imaginary creatures and further their young creator's happiness.

A favorite imaginary companion may exist for weeks and months. Others may come for short periods and disappear. Several may exist at the same time.

As a rule, imaginary companions are longer-lived and more important to the first or only child, especially if he seldom plays with other children.

When our oldest child was almost four and his sister under two, he would sometimes shiek angrily at her: "You're stepping on my Captain Ben!" Sometimes he threatened to hit her then and she looked puzzled and astonished. When soon thereafter her imagination took wings, she could get new playmates he created and both these children could enjoy them.

**WHEN THE** youngster, four, five, or much older, pushes plain blocks, cars, or tractors over the floor, he is not just pushing the blocks, cars, or tractors one may see. Each toy stands for something else and he imagines he is operating them — imagines he is a grown-up doing grown-up things.

It's this child's imagination which enables him to have fun with his toy animals and dolls, and later to engage in all sorts of play at pretending which makes him a dramatist.

If the child three to five has been read to a great deal from fanciful tales he may spin many choice ones of his own. Appreciative parents take down some of them and read them back to the young creator.

In this column I have printed some such yarns sent me by the children's parents. Usually these stories have more literary value than stories written by most school children.

My bulletin "Beginnings of Imagination," may be had by sending a self-addressed, stamped envelope to me in care of this newspaper.

# Cranes Still Rest In River

Salvage operations continued today at Port Homer where three cranes tumbled from a barge into the muddy, swollen Ohio River.

A 60-ton crane and two smaller ones rest on the river bottom where the depth of the stream is estimated at 40 feet.

The expensive equipment toppled into the river across from the Peerless Clay Co. plant when a barge shipped water and nearly upset.

The cranes were to have been unloaded nearby for construction work at the Ohio Edison Co. generating plant in Stratton.

The Crain Brothers Towing Co. of Pittsburgh started efforts to raise the cranes Friday afternoon but the swirling stream is hampering salvage operations.

A diver worked underwater in total darkness Friday afternoon to secure cables for raising the cranes but the equipment still was resting on the riverbed today.

The salvage operations are commencing about a mile north of the Stratton super-dam. The river is exceptionally deep at the site because of dredging for construction of piers for the nearby loading dock.

## Rep. Hays Lists Foods Given County Needy

Rep. Wayne L. Hays today announced the foodstuffs that were distributed to Columbiana County needy during April by the Ohio Department of Welfare, pursuant to the president's order of stepping up the Federal Surplus Commodities program.

The commodity and number of pounds distributed follow:

Flour, 12,000; cornmeal, 8,000; creamery butter, 3,712; rice, 2,600; lard, 3,504; canned pork gravy, 7,221; rolled oats, 3,996; dried eggs, 3,237; dried pea beans, 7,968, and dried milk, 3,780.

## PTA Sets Election

SALINEVILLE — Mrs. Gilda Shaff, Miss Ada Kirk and Mrs. Joe Feth have been appointed a nominating committee for election of officers of the Parent-Teacher Association at a meeting May 11.

By HAL HUMPHREY

*Are We Ready For Globel TV?*

Global war isn't the only thing we have to worry about. We're told now that "television stands on the threshold of the worldwide transmittal of picture and sound." That quoted statement is from a slick multi-colored brochure just issued by the Academy of Television Arts and Sciences.

Hal Humphrey

It is an official announcement that during the week of Nov. 4-11 the academy will hold its First International Assembly. The academy hopes to be hosting some 2,000 delegates from 40 countries when the conclave opens in New York City. Red China is the only one which hasn't been invited. Apparently no one here is sure that China has TV.

Because we're on the brink of global TV transmission, academy members (including the international assembly chairman, Ed Sullivan) decided it was time that TV broadcasters, artists and technical people from around the world should sit down and talk about it.

-:-

**SOMEONE** or some group has to determine whether the first TV image flashed around old Mother Earth is a snowy picture of Mickey Mouse of Nikita Khrushchev threatening to bury us.

Brig. Gen. David Sarnoff, the wily old chairman of RCA, recently suggested that leaders of the U.N. begin planning now to program the first satellite TV channel. The general probably figures that if Russia has the first satellite transmitting stations buzzing around us, our only chance of getting a program on the global airwaves will be through the U.N.

We may have to take the old Sunday afternoon "Omnibus" hour, while Nikita has "Ivan Maverick" at 7:30 Sunday night, but at least we'll be on the Moscow network.

Gen. Sarnoff says global TV will be a reality in five years or less. Harry S. Ackerman, president of the TV Academy, believes we'll have it by 1963.

-:-

**WHEN TV'S** First International Assembly meets next November, Ackerman hopes there will be a free exchange of ideas and that American broadcasters can broaden their base of programming as a result of rubbing ideas with their foreign counterparts.

"We're not inviting these delegates here to watch our television," Ackerman states. "We don't want them to feel that everything has to be American."

Ackerman and his academy members will have to do a selling job to convince some of the other free nations of that. Countries like England, Italy, Mexico and Japan already are importing so many American TV film series that they think we're a nation of horseback riders and private eyes.

Of course, the Japanese have seen Jack Paar in person, but there are some Americans who aren't sure that helped our TV image in the Orient.

-:-

**IT WAS HINTED** in Variety that some of the delegates coming to this First International Assembly may try to sell some of their programs to us. It might be a good idea for us to buy a few, just to prove we know what reciprocity means.

If delegates to this meeting get the idea that we're trying to take over the whole global show, all of the academy's efforts will have gone for naught.

Gen. Sarnoff says he sees global TV as offering "a bright new promise for moving the world closer to civilized harmony." If the general had any particular TV programs in mind for accomplishing this feat, he didn't mention them.

We only can hope that the competition developed in outer-space TV for global viewers don't get as rough as it sometimes does here in the U.S.

It would be rather frightening to peer up at the moon some warm summer night and see written across its face in huge flashing letters the advice—"Smoke Dillies, because they're good at both ends."

## TV Highlights

**TONIGHT**

**7:30, WTAE, WEWS, Cheyenne:** He and five strangers wait for an Indian war party to attack.

**8, WSTV, Steelmark Month:** The Ohio Valley urges people to buy American-made steel products.

**8:30, KDKA, Bringing Up Buddy:** His aunts lend their picture and endorsement to a frozen cake mix.

**9, WJAC, WTRF, WHC, May Day in Moscow:** Portions of May Day festivities there are presented.

**9:30, WTRF, West Virginia** White: The governor's cleanup is discussed.

**10, KDKA, WSTV, Hennesey: A** patient disappears.

**10, WJAC, WTRF, WHC, Barbara Stanwyck:** A couple attempts to escape from a revolution-torn Latin American country.

**10:30, WTAE, WEWS, WSTV,** Peter Gunn: He searches for a woman when two brothers are mysteriously murdered.

**11:20, WSTV, Movie: "Dark** Mirror," Olivia DeHavilland, Lew Ayres.

Lake Erie is the biggest fish-producing fresh water lake in the world. Twelve million pounds of blue pike were taken from the lake in 1956.

# 5 Of Faculty To Quit Posts

LISBON — Village schools will lose five teachers this term, one due to retirement and four because of resignations, according to Supt. Russell Armitage.

Mrs. Marie Parry announced intentions to retire at the close of the term. Mrs. Parry has been on the Lisbon staff for 25 years. Resignations include Mrs. Christine Chappell, Mrs. Mary Jane Flora, Mrs. Margaret Trunick and Geraldo Chappell.

Chappell is going to Northwestern University to complete his master's degree in speech therapy. For the past two years he has served as the speech and hearing therapist in the Lisbon system. Mrs. Janet Baker, currently teaching English in the high school and a qualified speech therapist, will replace him next term.

All remaining teachers have received their contracts for the coming term. Because schools will be overcrowded and some classes will be placed in temporary quarters it will be necessary to add some teachers to the staff next term, Armitage said.

Miss Nancy Shattuck has accepted a position in the elementary schools. She previously taught in this district as a cadet teacher and then resigned to return to school to complete her degree. She returns to the district as a fully-certified teacher, Armitage said.

## East Junior High Bands Will Give Concert Tuesday

The annual spring concert of the East Junior High School bands will be held Tuesday night at 7:30 in the school auditorium under the direction of Alex N. Demkowicz.

The program will feature selections by the concert band, including "Die Meistersinger," selections from "My Fair Lady," "Fiesta Calypso," "Our Gorious Land March," "Time Out for a Jam Session" and "Autumn Silhouette."

Other selections will include "A Night In June," by a saxophone quartet; "Two Imps" by a flute duet, "Interlude" by a clarinet quartet and "Three of a Kind" by a trombone trio.

The combined band, consisting of members of the Concert and Cadet Bands, will play "Orpheus In a Jam," a novelty selection from themes of Offenbach, a "Chorale," by Wagner, and "Look Forward March."

Advanced tickets are being sold by members of the East Junior Band. Tickets also may be purchased at the door.

## Palestine Girl Chosen For Majorette Post

EAST PALESTINE — Sue Ann Kennedy has been named head majorette of the East Palestine High School Band for the 1961-62 season. She won in the tryouts held this week. Eleven were competing for the top position.

Frances Geiger was runnerup. Both will attend a summer majorette camp. The date will be set later. Each received a $50 camp scholarship from the Band Parents Association.

# Bringing Up A Family

By GARRY C. MEYERS

*Imagination Good For Child*

Around the age of two or earlier the child begins to respond to things not present and to act and speak of them or to them as if they were really right before his eyes. "See the birdie coming out of the bottle," said a two-year-old girl to her mother. No bird or bottle was in sight, yet the young-

Dr. Garry Meyers

ster looked and spoke as if they were. Some little children, two, three or four, have all sorts of imaginary playmates, pets, or other creatures. The playmate may have a place beside the child at the table, the pet may go walking with him. Always one must be careful to hold open the door till the pet or playmate enters.

—:—

**WITH GOOD** insight and long practice, one may easily learn to act properly toward these imaginary creatures and further their young creator's happiness.

A favorite imaginary companion may exist for weeks and months. Others may come for short periods and disappear. Several may exist at the same time.

As a rule, imaginary companions are longer-lived and more important to the first or only child, especially if he seldom plays with other children.

When our oldest child was almost four and his sister under two, he would sometimes shiek angrily at her: "You're stepping on my Captain Ben!" Sometimes he threatened to hit her then and she looked puzzled and astonished. When soon thereafter her imagination took wings, she could get new playmates he created and both these children could enjoy them.

**WHEN THE** youngster, four, five, or much older, pushes plain blocks, cars, or tractors over the floor, he is not just pushing the blocks, cars, or tractors one may see. Each toy stands for something else and he imagines he is operating them — imagines he is a grown-up doing grown-up things.

It's this child's imagination which enables him to have fun with his toy animals and dolls, and later to engage in all sorts of play at pretending which makes him a dramatist.

If the child three to five has been read to a great deal from fanciful tales he may spin many choice ones of his own. Appreciative parents take down some of them and read them back to the young creator.

In this column I have printed some such yarns sent me by the children's parents. Usually these stories have more literary value than stories written by most school children.

My bulletin "Beginnings of Imagination," may be had by sending a self-addressed, stamped envelope to me in care of this newspaper.

FINLAY WINDS UP HIS CAMPAIGN for MAYOR ON WOHI AT 7:30 P.M. TONIGHT.
(Paid Political Advertisement)

# Cranes Still Rest In River

Salvage operations continued today at Port Homer where three cranes tumbled from a barge into the muddy, swollen Ohio River.

A 60-ton crane and two smaller ones rest on the river bottom where the depth of the stream is estimated at 40 feet.

The expensive equipment toppled into the river across from the Peerless Clay Co. plant when a barge shipped water and nearly upset.

The cranes were to have been unloaded nearby for construction work at the Ohio Edison Co. generating plant in Stratton.

The Crain Brothers Towing Co. of Pittsburgh started efforts to raise the cranes Friday afternoon but the swirling stream is hampering salvage operations.

A diver worked underwater in total darkness Friday afternoon to secure cables for raising the cranes but the equipment still was resting on the riverbed today.

The salvage operations are commencing about a mile north of the Stratton super-dam. The river is exceptionally deep at the site because of dredging for construction of piers for the nearby loading dock.

## Rep. Hays Lists Foods Given County Needy

Rep. Wayne L. Hays today announced the foodstuffs that were distributed to Columbiana County needy during April by the Ohio Department of Welfare, pursuant to the president's order of stepping up the Federal Surplus Commodities program.

The commodity and number of pounds distributed follow:

Flour, 12,000; cornmeal, 8,000; creamery butter, 3,712; rice, 2,600; lard, 3,504; canned pork gravy, 7,221; rolled oats, 3,996; dried eggs, 3,237; dried pea beans, 7,968, and dried milk, 3,780.

## PTA Sets Election

SALINEVILLE — Mrs. Gilda Shaff, Miss Ada Kirk and Mrs. Joe Feth have been appointed a nominating committee for election of officers of the Parent-Teacher Association at a meeting May 11.

# Ann Landers

## ANSWERS YOUR PROBLEMS

Dear Ann Landers: All my married life I've worked hard to help my husband in his business. When he was employed by an ice company I sat home day and night answering the phone and taking guff from the customers.

When he was in the moving business and his helper didn't show up I helped him load and unload the truck. Now he has a restaurant and I work as a waitress.

A few months ago he decided to hire a second waitress which I didn't think we could afford. She's a green-eyed redhead and he calls her "Doll." All the work she does you can put in a thimble and still sew pretty well. I told him to get rid of her and he said, "She's a drawing card and the customers like her."

It seems to me that people come to a restaurant for good, clean food. The floor show they can get at a night club. Am I right?

If you don't agree, please don't answer. I've got plenty of trouble now.—WORKHORSE WIFE.

-:-

**Dear W.H.W.: If you continue to nag your husband to fire the redhead he may get the crazy idea that you're jealous. Do this instead: Tell her AND him what she is expected to do. If she is so busy being a drawing card that she doesn't do the job, tell your husband he will have to do it.**

### Picked Plucker

Dear Ann: Your apology for "Public Pluckers" was inadequate.

Sure, some people who are friendly will brush dandruff off your shoulders and pick threads off your suit. But the majority of people who have the habit aren't doing it because they want you to look neat. They are self-conscious and can't think of anything to say or do, so they keep themselves busy at your expense.

A friend of mine used to do this much to my annoyance. Her faked solicitude griped my soul. I decided to put an end to it.

The next time she plucked a nonexistent piece of lint off my dress I placed my hand over hers and lifted it off my shoulder with just enough pressure so that she understood. She never pulled that on me again.—C.B.W.

### Motherly Neighbor

Dear Ann: An 18-year-old married "woman" who lives in our apartment had a baby boy two weeks ago. Her husband had to leave to go into the service and she asked my husband if we would drive her to the airport to say goodbye. When we knocked on their door she had the 2-week-old baby ready to go.

I said, "Are you kidding? You aren't going to take that infant out to the airport in this rain?"

She replied, "I wouldn't think of not having our son see his Daddy off to war."

I told her in the first place there's no war on, that he's putting in his time like many others. And in the second place a 2-week-old infant doesn't know what he's looking at.

My husband pulled me aside and told me to mind my own business. Do you think I was out of line? If you say so I'll apologize.—NO MEDDLER.

-:-

**Dear No: A 2-week-old infant does not belong at an airport in a rainstorm. You should have contented yourself with that point only, however.**

**No apology is necessary but in the future let her mother give her motherly advice.**

**Ann Landers will be glad to help you with your problems. Send them to her in care of The Review, enclosing a stamped, self-addressed envelope.**

## Needle Pattern

By LAURA WHEELER

Make a happy match — towels, curtains, dinette cloth trimmed with color-lively roosters.

Color doodle do! Easy to embroider roosters and trim with rick-rack — so big they cover almost half a towel. Pattern 655: four 7x9-inch motifs; directions.

Send 35 cents in coins for this pattern to Laura Wheeler, in care of the East Liverpool Review, 45 Needlecraft Dept., P. O. Box 161, Old Chelsea Station, New York 11, N. Y. Print plainly your name, address and the pattern number.

### Tank Turret Kills GI

CAMP PICKETT, Va. (AP)—Spec. 4 Carl R. Barker, 20, of Fresno (Coshocton County), Ohio, was killed Saturday when the turret of the light tank he was driving swung around suddenly and crushed him.

## Intruders Hit Coin Machine

A soft drink vending machine was looted of an undetermined amount of change in a burglary Saturday night or Sunday at Westgate School in which several rooms were ransacked and four windows were broken, police reported.

The intruders forced open the machine in the manual arts room, officers said, during an entry sometime between 1 p. m. Saturday and 2 p. m. Sunday. Entry was gained by throwing a stone through a rear window. The intruders ransacked offices and other rooms on two floors, police said.

Police said the intruders broke two 32-x-48-inch windows, one pane 30-x-36 inches and another 18-x-36 inches.

Fred Cornell of Negley R.D. 1 told police a 24-x-9-foot tarpaulin valued at approximately $65 was stolen from his tractor - trailer between 5 p. m. Saturday and 10 a. m. Sunday while it was parked on the Milliron Co. property on E. 2nd St.

Harold Bissell, 462 Woodlawn Ave., reported to police at 11:30 p. m. Saturday that four gallons of gasoline was stolen from his auto while it was parked on Woodbine Ave.

Vandalism was reported by officials of the Seventh - day Adventist Church Sunday. Two copper drain pipes were broken by youngsters and a two - foot section was carried away, they said.

### Bugs, Animals Don't Frighten Little Girls

DAYTON, Ohio (AP) — Sixth grade girls at Murlin Heights School are pretty much immune to teasing with bugs and such things.

Mrs. Clifford Shank's class has already dissected, studied and stuffed a squirrel, a duck and a goose and collected a multitude of formaldehyde - soaked specimens. And not a weak stomach — boy or girl — in the lot, teacher says.

### Emmanuel Cub Group To Push Paper Drive

Cub Scout Pack 11 of the Emmanuel Presbyterian Church will continue a paper drive through May, raising funds to finance a trip to a Pittsburgh Pirate baseball game.

At a recent meeting of the pack, awards were presented Larry Carter, Danny Smith, Ricky Metz, Bobby Kinsey, Bill McHenry and Jimmy Riggs. Each cub was given a kite by Charles Adams, former committee chairman.

The next meeting will be Wednesday, May 24, at Thompson Park.

### Blacktop Outlined For Township Group

The summer blacktop program was explained to a delegation from Broadview Circle of the Hill Addition at a meeting of the Liverpool Township trustees Friday night at City Hall.

It was reported Waterson Ave. has been made a part of Broadview to complete the circle. The section will be canvassed later and each home assigned a street number for mailing purposes.

G. V. Digman, chairman, presided. Next meeting is May 12.

### Elks Install Feigert

COLUMBUS, Ohio (AP) — The new president of the Ohio Elks Association is Martin W. Feigert, Van Wert County's representative in the Ohio House. An Elk since 1932, Feigert was installed in the post Saturday night at the association's 63rd annual convention here. Other new officers include Robert Antram of Alliance, secretary - treasurer, and C. Ross Cline of Chillicothe, trustee.

# Ann Landers

## ANSWERS YOUR PROBLEMS

Dear Ann Landers: All my married life I've worked hard to help my husband in his business. When he was employed by an ice company I sat home day and night answering the phone and taking guff from the customers.

When he was in the moving business and his helper didn't show up I helped him load and unload the truck. Now he has a restaurant and I work as a waitress.

A few months ago he decided to hire a second waitress which I didn't think we could afford. She's a green-eyed redhead and he calls her "Doll." All the work she does you can put in a thimble and still sew pretty well. I told him to get rid of her and he said, "She's a drawing card and the customers like her."

It seems to me that people come to a restaurant for good, clean food. The floor show they can get at a night club. Am I right?

If you don't agree, please don't answer. I've got plenty of trouble now.—WORKHORSE WIFE.

-:-

**Dear W.H.W.: If you continue to nag your husband to fire the redhead he may get the crazy idea that you're jealous. Do this instead. Tell her AND him what she is expected to do. If she is so busy being a drawing card that she doesn't do the job, tell your husband he will have to do it.**

### Picked Plucker

Dear Ann: Your apology for "Public Pluckers" was inadequate.

Sure, some people who are friendly will brush dandruff off your shoulders and pick threads off your suit. But the majority of people who have the habit aren't doing it because they want you to look neat. They are self-conscious and can't think of anything to say or do, so they keep themselves busy at your expense.

A friend of mine used to do this much to my annoyance. Her faked solicitude griped my soul. I decided to put an end to it.

The next time she plucked a nonexistent piece of lint off my dress I placed my hand over hers and lifted it off my shoulder with just enough pressure so that she understood. She never pulled that on me again.—C.B.W.

### Motherly Neighbor

Dear Ann: An 18-year-old married "woman" who lives in our apartment had a baby boy two weeks ago. Her husband had to leave to go into the service and she asked my husband if we would drive her to the airport to say goodbye. When we knocked on their door she had the 2-week-old baby ready to go.

I said, "Are you kidding? You aren't going to take that infant out to the airport in this rain?"

She replied, "I wouldn't think of not having our son see his Daddy off to war."

I told her in the first place there's no war on, that he's putting in his time like many others. And in the second place a 2-week-old infant doesn't know what he's looking at.

My husband pulled me aside and told me to mind my own business. Do you think I was out of line? If you say so I'll apologize.—NO MEDDLER.

-:-

**Dear No: A 2-week-old infant does not belong at an airport in a rainstorm. You should have contented yourself with that point only, however.**

**No apology is necessary but in the future let her mother give her motherly advice.**

**Ann Landers will be glad to help you with your problems. Send them to her in care of The Review, enclosing a stamped, self-addressed envelope.**

### Tank Turret Kills GI

CAMP PICKETT, Va. (AP)—Spec. 4 Carl R. Barker, 20, of Fresno (Coshocton County), Ohio, was killed Saturday when the turret of the light tank he was driving swung around suddenly and crushed him.

## Needle Pattern

By LAURA WHEELER

Make a happy match — towels, curtains, dinette cloth trimmed with color-lively roosters.

Color doodle do! Easy to embroider roosters and trim with rick-rack — so big they cover almost half a towel. Pattern 655: four 7x9-inch motifs; directions.

Send 35 cents in coins for this pattern to Laura Wheeler, in care of the East Liverpool Review, 45 Needlecraft Dept., P. O. Box 161, Old Chelsea Station, New York 11, N. Y. Print plainly your name, address and the pattern number.

## Intruders Hit Coin Machine

A soft drink vending machine was looted of an undetermined amount of change in a burglary Saturday night or Sunday at Westgate School in which several rooms were ransacked and four windows were broken, police reported.

The intruders forced open the machine in the manual arts room, officers said, during an entry sometime between 1 p. m. Saturday and 2 p. m. Sunday. Entry was gained by throwing a stone through a rear window. The intruders ransacked offices and other rooms on two floors, police said.

Police said the intruders broke two 32-x-48-inch windows, one pane 30-x-36 inches and another 18-x-36 inches.

Fred Cornell of Negley R.D. 1 told police a 24-x-9-foot tarpaulin valued at approximately $65 was stolen from his tractor - trailer between 5 p. m. Saturday and 10 a. m. Sunday while it was parked on the Milliron Co. property on E. 2nd St.

Harold Bissell, 462 Woodlawn Ave., reported to police at 11:30 p. m. Saturday that four gallons of gasoline was stolen from his auto while it was parked on Woodbine Ave.

Vandalism was reported by officials of the Seventh - day Adventist Church Sunday. Two copper drain pipes were broken by youngsters and a two - foot section was carried away, they said.

### Bugs, Animals Don't Frighten Little Girls

DAYTON, Ohio (AP) — Sixth grade girls at Murlin Heights School are pretty much immune to teasing with bugs and such things.

Mrs. Clifford Shank's class has already dissected, studied and stuffed a squirrel, a duck and a goose and collected a multitude of formaldehyde - soaked specimens. And not a weak stomach — boy or girl — in the lot, teacher says.

### Emmanuel Cub Group To Push Paper Drive

Cub Scout Pack 11 of the Emmanuel Presbyterian Church will continue a paper drive through May, raising funds to finance a trip to a Pittsburgh Pirate baseball game.

At a recent meeting of the pack, awards were presented Larry Carter, Danny Smith, Ricky Metz, Bobby Kinsey, Bill McHenry and Jimmy Riggs. Each cub was given a kite by Charles Adams, former committee chairman.

The next meeting will be Wednesday, May 24, at Thompson Park.

### Blacktop Outlined For Township Group

The summer blacktop program was explained to a delegation from Broadview Circle of the Hill Addition at a meeting of the Liverpool Township trustees Friday night at City Hall.

It was reported Waterson Ave. has been made a part of Broadview to complete the circle. The section will be canvassed later and each home assigned a street number for mailing purposes.

G. V. Digman, chairman, presided. Next meeting is May 12.

### Elks Install Feigert

COLUMBUS, Ohio (AP) — The new president of the Ohio Elks Association is Martin W. Feigert, Van Wert County's representative in the Ohio House. An Elk since 1932, Feigert was installed in the post Saturday night at the association's 63rd annual convention here. Other new officers include Robert Antram of Alliance, secretary - treasurer, and C. Ross Cline of Chillicothe, trustee.

# Mays Swats 4 HR's, Has 8 RBI's, Braves Beaten, 14-4

By JOE REICHLER
Associated Press Sports Writer

Willie Mays clouted four home runs, a feat accomplished by only eight others in a single game, to lead the San Francisco Giants to a 14-4 victory over the Milwaukee Braves Sunday.

The Giants either set or tied other records by smashing eight home runs as they regained first place in the National League pennant race. Milwaukee's Henry Aaron hit two homers to enable the two teams to establish a league mark of 10 homers. San Francisco added another slugging record to the books with a two-day total of 13 homers. The Giants hit five in Saturday's 7-3 victory over the Braves.

## It's Homer Or No Count For Frisco

Pittsburgh, held to a split by Cincinnati, dropped into second place. The Pirates lost the second game 4-2 after winning the opener 6-3. Los Angeles nipped Chicago 2-1 on Tommy Davis two-run homer in the ninth inning but the Cubs came back with a seven-run second inning to win the nightcap 10-5. Philadelphia spotted St. Louis a 6-2 lead, then roared back with seven runs in the eighth and four in the 10th to win 11-7.

Mays put on a tremendous show for the 13,134 Milwaukee spectators. Probably the most interested was Joe Adcock, the slugging first baseman. Big Joe was the last National Leaguer to hammer four out of the park in one day. He did it July 31, 1954, in Ebbets Field, Brooklyn.

Willie, who had hit only two homers prior to Sunday's fireworks, greeted Milwaukee starter Lew Burdette with a four-bagger in the first inning. There was no one on base. Mays tagged Burdette again in the third with one mate aboard. Southpaw Seth Morehead was pitching in the sixth when Mays pounded his third homer with two on. Willie got his fourth homer in the eighth, off right-hander Don McMahon, with one mate aboard. That gave him a total of eight runs batted in for the day, four behind the record of 12 set by Sunny Jim Bottomley of the 1924 Cardinals.

Billy Loes was the winner. He went all the way, giving up eight hits for his second victory. Aaron drove in all four Milwaukee runs.

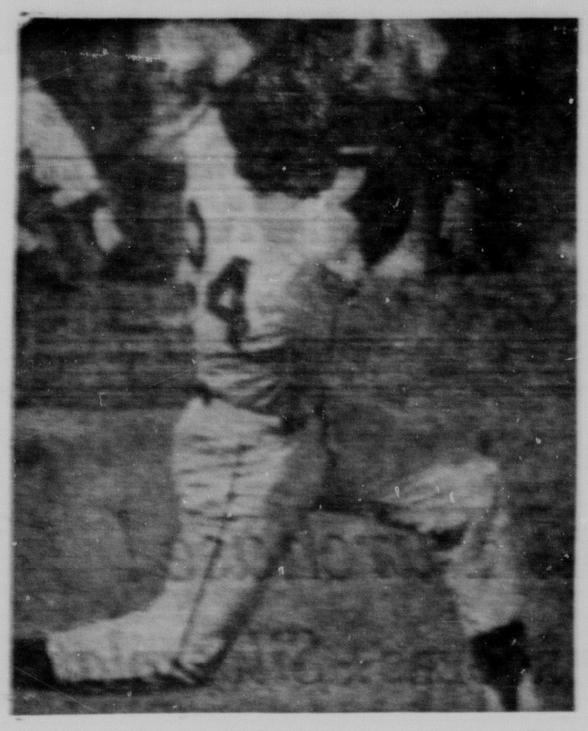
Pittsburgh dropped Cincinnati into last place, handing the Reds their eighth straight defeat in the opener. The Reds retaliated by knocking the Pirates out of first place with their second game triumph. Bob Friend won his fourth in a row in the opener but the Pirates had to call on Elroy Face in the ninth to retire the last three batters. Four hits, capped by Billy Virdon's triple produced three Pirate runs in the fifth and sent Cincinnati right-hander Jay Hook to the showers with his second defeat.

Bob Purkey hurled a six-hitter for his third Redleg victory in the nightcap. Shortstop Leo Cardenas drove in a pair of runs with a double and two singles off loser Joe Gibbon.

The Cubs shook off a tough 2-1 opening game loss to the Dodgers on Tommy Davis two-run homer in the ninth, scoring seven runs in the second inning of the nightcap for a split in their doubleheader. Chicago reached Dodger starter Roger Craig for five hits in that riotous inning. Billy Williams, Al Heist, Dick Bertell and winning pitcher Bob Anderson singled and Don Zimmer chased Craig with a double.

The Phillies spotted the Cardinals a 6-0 lead but rallied for seven runs in the eighth and four in the 10th to win their second straight from St. Louis. Johnny Callison, Tony Taylor and Pancho Herrera, who rapped seven hits and drove in eight runs among them, knocked in the 10th inning tallies.

## This Got To Be Old Stuff For Willie Mays Sunday



WILLIE MAYS, SAN FRANCISCO'S star outfielder, is shown (left) hitting his fourth home run against the Milwaukee Braves Sunday at Milwaukee. At right, Mays crosses home plate after hitting his fourth home run. The four homers by Mays tied a record. The Giants hit 8 home runs to top the Braves, 14-4 and broke a National League record. # Hawkins Goes Distance In 10-1 Decision

## N. Waterford Product Eyes Starting Job

CLEVELAND (AP) — As the Cleveland Indians headed into the second month of play—all even after 18 games—Manager Jimmie Dykes expressed satisfaction with his pitching staff.

As a result of Sunday's doubleheader split with the Boston Red Sox, Gary Bell preserved his status as a starting hurler and Wynn Hawkins became a fifth starter.

Bell got beat 4-2 when Vic Wertz cracked a two-run homer in the ninth inning of the opener. Although he was tagged with his fourth straight defeat, Bell pitched well, giving up eight hits while fanning eight and walking only a pair.

Hawkins handcuffed the Red Sox in the nightcap with a five-hitter, walking two and striking out five as the Indians backed him with 14 hits for a 10-1 triumph. Included in the offensive flurry were Tito Francona's three hits, climaxed by a three-run homer, and a round-tripper by John Romano. Johnny Temple stretched his hitting skein through all 16 games with two hits in the opener and a last-ditch double in the nightcap.

But it was the pitching that pleased Dykes:

"Hawkins was using that fork ball most of the time. He kept his pitches low. That was his secret. Sure he'll get another start. We need five starters and he's one right now.

"One bad pitch to Wertz did it and it was about the only bad one he (Bell) threw. There should have been only two runs against him, too."

Dykes nominated Jim Grant to face the visiting Chicago White Sox Tuesday night and Jim Perry for the Wednesday night contest.

Bill Monbouquette outpitched Bell in Sunday's first game. The Boston right-hander gave up two runs in the first frame on a walk, Jim Piersall's double, an error and Willie Kirkland's single. Vic Power also doubled, but Mombo shut the door after that. He gave up only five more hits and scattered them well.

The Indians made a rout of the second contest with a run in the second inning, two more in the third on four hits and two Boston errors, and another tally in the fifth on Romano's homer. Boston got its marker on a pair of singles and an error by Kirkland in the sixth.

Then Francona cracked his three-run blast over the left center field fence in the sixth following walks to Hawkins and Temple. Another run crossed in the seventh on Romano's double following a walk to Woodie Held. The Indians closed out the scoring with a pair of runs in the eighth when Temple doubled, and Francona and Piersall singled.

### Jazz Artist Claimed

NEW YORK (AP) — Irving (Miff) Mole, 64, a noted jazz musician who played with Benny Goodman, Paul Whiteman and other leading bands, died Saturday apparently of a stroke.

## Made Error About Dykes Paul Admits

CLEVELAND (AP)—Gabe Paul, the Cleveland Indians' new general manager, says he booted one after the 1958 season at Cincinnati.

Paul said he never should have fired Jimmie Dykes as the Redlegs' skipper. Paul then was the Cincinnati general manager.

"I made a mistake and I admit it," Paul said Sunday night as he checked in here and was greeted by one James Joseph Dykes, now the Indians' manager.

Said Paul:

"I said he was too old. I don't feel that way any more. He has a calming influence on a baseball team. And that's a most productive thing.

"Jimmie is capable and not afraid of his job. He has no fear or apprehensions. The ball players quickly realize this."

Although Paul has no contract with Cleveland, he said he is looking forward to a "long stay" here. He termed "ridiculous" reports that the post in Cleveland might be only a stop on the way back to Cincinnati.

Paul was named general manager of the Indians last Thursday, shortly after he resigned from a similar post with Houston, slated to be a National League member in 1962.

## Friend Gains 4th In Split At Cincy

CINCINNATI (AP)—It took the Cincinnati Reds' nearest thing to an "old reliable," Bob Purkey, to break the losing spell that plagued them for eight games.

His six-hit pitching paced Cincinnati's 4-2 victory in the second game of a doubleheader, after Pittsburgh's high - flying Pirates had won the opener, 6-3.

The veteran right-hander also had to chip in at the plate for the Reds, who haven't been getting many hits lately. His three key bunts figured in all their scoring.

The spotlight has been on the Reds' young pitchers, but Purkey has half the club's six victories.

After a first inning slipup, when Bill Virdon doubled and Dick Groat singled him in, Purkey worked through the lineup with little difficulty. Only one Pirate reached base from then until the eighth. Then Purkey's only walk, with hits by Don Hoak and Bill Virdon, scored the Pirates' other marker.

Cincinnati scored in the third, when Jerry Zimmerman walked, Purkey sacrificed, and Chico Cardenas hit a run-making single.

The same thing happened in the seventh after Zimmerman singled.

And in the fifth, after Gordie Coleman walked and Zimmerman singled, Purkey put down a perfect safe bunt that scored a run. Cardenas slammed a double that put Purkey on third, ready to score on Don Blasingame's sacrifice foul.

In the opener the Reds stacked up three quick runs, then frittered away the lead as Pittsburgh opened its heavy artillery.

Coleman's triple, plus singles by Frank Robinson, Gene Freese and Bob Schmidt produced two runs in the second inning. Another came in the third on singles by Gus Bell and Robinson, mixed with an error by Roberto Clemente.

But Clemente went to work on Jay Hook with a two run homer in the fourth, and a three-run uprising in the fifth routed Hook.

Bob Friend, the Pittsburgh starter, opened the rally with a single. Virdon tripled, Groat singled and Bob Skinner doubled.

An error put Clemente on in the sixth inning and he scored on Hal Smith's double.

A last-gasp threat in the ninth—a single by Freese and Jerry Lynch's pinch double—forced the Pirates to bring in ace reliever Roy Face to nail down Friend's fourth victory. He fanned Wally Post and got the next two men on easy outs.

Philadelphia is here tonight, starting a four-game series with winless Robin Roberts due to oppose Cincinnati's Jim O'Toole on the mound.

### FIGHT RESULTS

New York — Doug Jones, 182, New York, knocked out Pete Rademacher, 199, Columbus, Ga., 54 seconds 5th round.

Johannesburg, South Africa — Del Flanagan, St. Paul, Minn., defeated Gert Van Heerden when South African was disqualified in eighth for low blows.

Belfast, Northern Ireland — Freddy Gilroy, 129½, stopped Boualem Belouarti, 128¾, Algeria, 7th round.

# Mays Swats 4 HR's, Has 8 RBI's, Braves Beaten, 14-4

By JOE REICHLER
Associated Press Sports Writer

Willie Mays clouted four home runs, a feat accomplished by only eight others in a single game, to lead the San Francisco Giants to a 14-4 victory over the Milwaukee Braves Sunday.

The Giants either set or tied other records by smashing eight home runs as they regained first place in the National League pennant race. Milwaukee's Henry Aaron hit two homers to enable the two teams to establish a league mark of 10 homers. San Francisco added another slugging record to the books with a two-day total of 13 homers. The Giants hit five in Saturday's 7-3 victory over the Braves.

## It's Homer Or No Count For Frisco

Pittsburgh, held to a split by Cincinnati, dropped into second place. The Pirates lost the second game 4-2 after winning the opener 6-3. Los Angeles nipped Chicago 2-1 on Tommy Davis two-run homer in the ninth inning but the Cubs came back with a seven-run second inning to win the nightcap 10-5. Philadelphia spotted St. Louis a 6-2 lead, then roared back with seven runs in the eighth and four in the 10th to win 11-7.

Mays put on a tremendous show for the 13,114 Milwaukee spectators. Probably the most interested was Joe Adcock, the slugging first baseman. Big Joe was the last National Leaguer to hammer four out of the park in one day. He did it July 31, 1954, in Ebbets Field, Brooklyn.

Willie, who had hit only two homers prior to Sunday's fireworks, greeted Milwaukee starter Lew Burdette with a four-bagger in the first inning. There was no one on base. Mays tagged Burdette again in the third with one mate aboard. Southpaw Seth Morehead was pitching in the sixth when Mays pounded his third homer with two on. Willie got his fourth homer in the eighth, off right-hander Don McMahon, with one mate aboard. That gave him a total of eight runs batted in for the day, four behind the record of 12 set by Sunny Jim Bottomley of the 1924 Cardinals.

Billy Loes was the winner. He went all the way, giving up eight hits for his second victory. Aaron drove in all four Milwaukee runs.

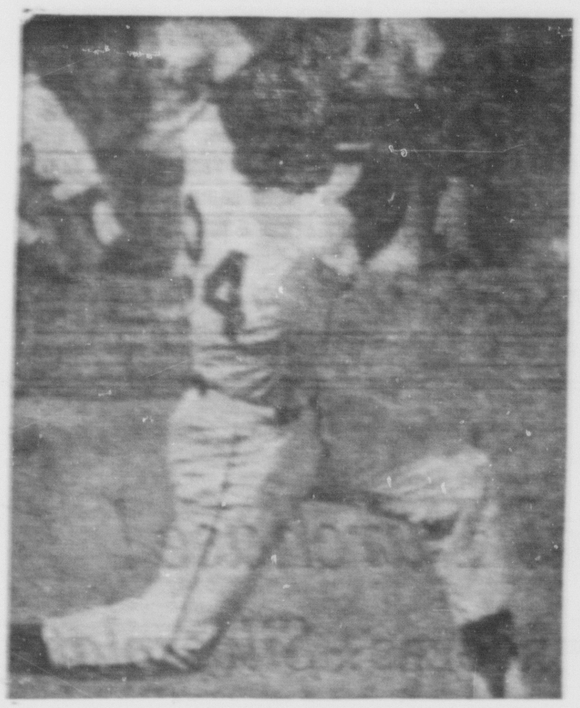
Pittsburgh dropped Cincinnati into last place, handing the Reds their eighth straight defeat in the opener. The Reds retaliated by knocking the Pirates out of first place with their second game triumph. Bob Friend won his fourth in a row in the opener but the Pirates had to call on Elroy Face in the ninth to retire the last three batters. Four hits, capped by Billy Virdon's triple produced three Pirate runs in the fifth and sent Cincinnati right-hander Jay Hook to the showers with his second defeat.

Bob Purkey hurled a six-hitter for his third Redleg victory in the nightcap. Shortstop Leo Cardenas drove in a pair of runs with a double and two singles off loser Joe Gibbon.

The Cubs shook off a tough 2-1 opening game loss to the Dodgers on Tommy Davis two-run homer in the ninth, scoring seven runs in the second inning of the nightcap for a split in their doubleheader. Chicago reached Dodger starter Roger Craig for five hits in that riotous inning. Billy Williams, Al Heist, Dick Bertell and winning pitcher Bob Anderson singled and Don Zimmer chased Craig with a double.

The Phillies spotted the Cardinals a 6-0 lead but rallied for seven runs in the eighth and four in the 10th to win their second straight from St. Louis. Johnny Callison, Tony Taylor and Pancho Herrera, who rapped seven hits and drove in eight runs among them, knocked in the 10th inning tallies.

## This Got To Be Old Stuff For Willie Mays Sunday



WILLIE MAYS, SAN FRANCISCO'S star outfielder, is shown (left) hitting his fourth home run against the Milwaukee Braves Sunday at Milwaukee. At right, Mays crosses home plate after hitting his fourth home run. The four homers by Mays tied a record. The Giants hit 8 home runs to top the Braves, 14-4 and broke a National League record. # Detroit Holds Game Lead Over Yankees In AL Scramble

## Yanks Split; Angels Shoot Streak To 3

By JOE REICHLER
Associated Press Sports Writer

Detroit's Tigers opened up a full game lead over the Yankees in the American League pennant race although held to a split in their doubleheader with Baltimore Sunday.

Chicago's White Sox defeated Minnesota 5-3 in 11 innings for the Twins' third straight loss. The Tigers won the opener 8-2 with Baltimore taking the second game 4-2.

New York's Yankees moved into second place by dividing a pair with Washington. The Yankees won the opener 4-3 and lost the second game 2-1. Cleveland and Boston also split a pair, the Indians taking the second game 10-1 after Boston had copped the first, 4-2.

Los Angeles ran its winning streak to three in a row, winning the first game from Kansas City 6-4 but the A's won the second game 3-2.

The Red Sox played in Cleveland without Jackie Jensen, their slugging right fielder who had rejoined the club this season after a year's layoff. Jensen, who was batting .130, left after leaving a note for manager Mike Higgins. The note read: "I will call you Sunday night when you reach Kansas City and tell you of my plans."

Boston won the opener on Vic Wertz' two-run homer in the ninth, giving pitcher Bill Monbouquette his first victory. He has lost three. Cleveland went on a 14-hit rampage in the second game as young right-hander Wynn Hawkins pitched a five hitter. Tito Francona led the Indians with three hits, including a three-run homer.

Held to two singles through the first six innings by southpaw Steve Barber of the Orioles, the Tigers suddenly exploded for eight runs in the next two innings to win the opener. Rookie third baseman Steve Boros had three hits in three official times at bat for Detroit and Phil Reagan hurled two hitless relief innings to begin his first major league triumph. The Orioles won the nightcap on successive seventh-inning home runs by Jim Gentile, Gus Triandos and Ron Hansen, tying a major league record. The long ball flurry gave Hector Brown his first victory.

Whitey Ford, with the relief help of Luis Arroyo, gained his third victory in four decisions in the Yankees' opening game victory. Cletis Boyer drove in what proved to be winning run with an eighth-inning single that scored Bill Skowron, who had doubled with two out. Catcher Dutch Dotterer's double drove in the winning run for Washington in the nightcap as southpaw Hal Woodeshick registered his first victory. A fine relief job by Pete Burnside, who retired the last two hitters with two runners on base in the ninth, preserved Woodeshick's triumph.

The White Sox snapped a 2-2 tie in the top of the 11th to hand the Twins their third straight defeat. After Jim Landis broke the tie with a run-scoring double, Roy Sievers clouted a two-run homer. This proved the clincher as the Twins came back with a run in their half.

Pinch hitter Leon Wagner hit a two-run homer for the Angels in the seventh, giving the Angels their third straight triumph in the opener. Rookie southpaw Jim Archer won his first major league game for the A's in the second game although he needed help from Dave Wickersham in the ninth. Rookie shortstop Dick Howser drove in what proved to be the winning run with a single in the top of the ninth.

### *Potter Grid Boosters Set Meeting Tonight*

The Potters Football Boosters will meet tonight at 7:30 in the Hi-Teen room of the YMCA to map plans for bake and rummage sales. The club also is planning a picnic for parents of boys from Westgate and East Junior High Schools that will be sophomore grid candidates this fall. Mrs. Alma Hall is president.

### Conners Loft Sweeps Opening Pigeon Race

Pat Conners' loft swept honors in the first old bird race of the 1961 season sponsored by the East Liverpool Homing Club.

Sunday's race was flown from Coshocton with 64 birds competing. Conners' birds copped the first four spots.

The next race will be flown May 7 from Coshocton.

Milt Bolling, brother of Milwaukee second baseman Frank Bolling, is an executive assistant with the Boston Red Sox.

### Olympic Stars Under Par

## Okla. State Pole Vaulter Hikes Drake Relay Record

DES MOINES, Iowa (AP)—Oklahoma State pole vaulter George Davies says the sky's the limit.

"My goal? Just to go as high as I can go," the 6-foot-4, 195-pound sophomore said after boosting the Drake Relays record to 15 feet 6 inches Saturday.

Although Davies failed three times in a bid for 15-10, more than 5,000 fans lingered an extra hour to cheer him on.

The fans possibly were disappointed by the performances of a trio of Olympic standouts, Broad jumper Ralph Boston and sprinter Wilma Rudolph of Tennessee State, and high jumper John Thomas of Boston University.

Boston leaped 26-1¼, far behind his world record. Miss Rudolph breezed to an :11.1 100-yard dash and Thomas—who has leaped 7 feet 71 times—settled for a high jump of 6-7¾.

However, lesser-known stars such as Davies established six relays marks, including an all-time American best in the four-mile relay.

Western Michigan, with John Bork running a 4:07 mile, set the four-mile mark of 16:50.4. Bork also was the trigger in Western Michigan's victory in the university distance medley, and his performances earned him the "outstanding athlete" award, with Davis ranking second.

Texas Southern won four relays in the college division and set two of the meet records. Anchored by the fleet Major Adams, Texas Southern set a mark of 7:35.2 in the college two-mile relay. The Texas school lowered the college half-mile record to 1:24.4 and also won the college 440 relay and the college sprint medley relay.

The other records were a 7:28.6 by Kansas' two-mile relay team, and :52.1 by Georgia Tech's Ronnie Ablowich in the 440-yard hurdles.

Baylor, headed by sprinter Bill Kemp, was the big winner in the university division. Kemp won the 100-yard dash and anchored Baylor's winning 440 and 880 relay teams. The Bears' John Fry won the discus throw.

Oklahoma's Mike Lindsay captured the shot put title with a toss of 57 feet 5 inches. The victory was his third straight and made him the 13th athlete in the 52-year history of the meet to turn the trick.

## *Palmer Wins Texas Open*

SAN ANTONIO, Tex. (AP) — Arnold Palmer returned to his role of golf's great clutch player, became the year's top tournament winner and closed in on young Gary Player in the race for the most money as he bagged the Texas Open.

With a dramatic finish, which saw Palmer come through with an eagle on one of the closing holes, the big-shouldered man from Pennsylvania shot a 3-under-par 68 for a 72-hole total of 270 and a one-stroke victory in the storied Texas Open Sunday. It was a repeat with the championship and Palmer's fourth tournament triumph of the year.

Gary Player of Johannesburg, South Africa, the leading money-winner and a three-tournament winner, tied for fourteenth place with 277 and won only $651.00. Player closed with a 74 as his putting went sour.

So now Player has won $47,068.54 in 15 tournaments while Palmer has taken down $39,886.58 in 14.

The Texas Open started its final round Sunday with Paul Harney and Al Geiberger tied for first with 201 for 54 holes while Palmer, Rex Baxter, Doug Sanders and Al Balding were tied at 202.

But Palmer rallied for an eagle on 15, where his 4-iron traveled 250 yards to the green, just three feet from the pin.

Palmer was able to bogey the final hole and still win the 14,300 first money as Harney missed a long putt that would have given him a birdie. He went past the pin and then two-putted from 18 inches for a bogey.

It gave Harney a 71 and knocked him down to third place at 272, when Balding posted a 69 for 271. Balding birdied the final hole with a 12-foot putt to grab the $3,000 second money. Harney won $2,000.

Arnold Palmer 67-63-72-68 — 270 ($4,300).

Al Balding 64-70-68-69—271 ($3,000).

Paul Harney 66-70-65-71 — 272 ($2,000).

Al Geiberger 68-65-68-72 — 273 ($1,600).

Doug Sanders 66-60-66-71—($1,600).

Jay Hebert 69-68-69-68—274 ($1,350).

Rex Baxter Jr. 69-67-66-72—274 ($1,350).

Bill Casper Jr. 70-70-70-65 — 275 ($1,062.50)

Jacky Cupit 69-70-68-68 — 275 ($1,062.50).

Dave Hill 67-72-67-69—275 ($1,062.50).

Gay Brewer Jr. 70-65-70-70—275 ($1,062.50).

Others included:

Bob Shave 72-69-71-67 — 279 ($306.67.)

## Jensen Leaves Baseball Again; No Reason Given

KANSAS CITY, Mo. (AP) — Jackie Jensen, Boston Red Sox outfielder, was on his way home by train today after leaving the team without explanation.

Jensen, the American League's most valuable player in 1958, had been trying a comeback after staying out of baseball last year. But his batting average for 12 games was only .130.

Jensen left the club in Cleveland Saturday night, leaving only a brief message for Manager Mike Higgins.

"Jackie said he would call me after we got to Kansas City," said Higgins, who arrived here with the Red Sox early today. "But he didn't say when he would call.

"I understand he won't get home until Tuesday. I don't know why he left. We'll just have to bide our time until we can talk to him."

Jensen quit last year because he disliked airplane travel and the long absences from his family.

He signed this year for a reported $50,000 salary, explaining that a hypnotist had helped cure his fear of flying.

At their home in Crystal Bay, Nev., his wife said Sunday night she didn't know what was wrong.

"The children and I were getting ready to move to Boston for the summer," said Mrs. Jensen. "Then this happens. He's still a little bugged about flying, but not to this extent."

Mrs. Jensen—former high diving star Zoe Ann Olsen — said Jackie wired her: "Arriving on train in Reno. Don't jump to conclusions."

JACKIE JENSEN
*Quits Baseball Again.*

Dick O'Connell, Red Sox vice president, said in Boston that Jensen "is too fine an athlete and person for us to take any action against him until we know what his reasons are."

## *7 Scheduled Tuesday In Derby Trial*

LOUISVILLE, Ky. (AP) — A baker's half dozen are expected to go to the post Tuesday in the Derby Trial Stakes, the last racing test for Kentucky Derby eligibles.

The one-mile dash, in which the seven are expected, should produce at least three or four starters for next Saturday's $125,000, added derby, the first triple crown jewel.

An even dozen Derby probables have not scheduled any more racing before the big one so, barring any mishaps, they figure to be sure Derby starters.

Likely to go in the trial are Four-And-Twenty, Crozier, Dr. Miller, Star X., Injun, He's A Pistol and Gay's Pal.

Not to be raced before the run for the roses are Ambiopoise, Carry Back, Globemaster, Flutterby Ronnie's Ace, Light Talk, Sherluck, Loyal Son, Jay Fox, Dearborn, Bass Clef and On His Metal.

Missing from both lists is Harbor View Farm's Garwol, whose last place finish in Saturday's Stepping Stone Purse at Churchill Downs against a field of Derby eligibles disappointed his trainer, Burley Parke.

Parke said he would ship the colt to New York early this week and planned to have him gelded in an effort to improve his disposition.

John Woodruff, sophomore from Nutley, N. J., is the only player on the Syracuse tennis team from out of New York state.

# Detroit Holds Game Lead Over Yankees In AL Scramble

## Yanks Split; Angels Shoot Streak To 3

By JOE REICHLER
Associated Press Sports Writer

Detroit's Tigers opened up a full game lead over the Yankees in the American League pennant race although held to a split in their doubleheader with Baltimore Sunday.

Chicago's White Sox defeated Minnesota 5-3 in 11 innings for the Twins' third straight loss. The Tigers won the opener 8-2 with Baltimore taking the second game 4-2.

New York's Yankees moved into second place by dividing a pair with Washington. The Yankees won the opener 4-3 and lost the second game 2-1. Cleveland and Boston also split a pair, the Indians taking the second game 10-1 after Boston had copped the first, 4-2.

Los Angeles ran its winning streak to three in a row, winning the first game from Kansas City 6-4 but the A's won the second game 3-2.

The Red Sox played in Cleveland without Jackie Jensen, their slugging right fielder who had rejoined the club this season after a year's layoff. Jensen, who was batting .130, left after leaving a note for manager Mike Higgins. The note read: "I will call you Sunday night when you reach Kansas City and tell you of my plans."

Boston won the opener on Vic Wertz' two-run homer in the ninth, giving pitcher Bill Monbouquette his first victory. He has lost three. Cleveland went on a 14-hit rampage in the second game as young right-hander Wynn Hawkins pitched a five hitter. Tito Francona led the Indians with three hits, including a three-run homer.

Held to two singles through the first six innings by southpaw Steve Barber of the Orioles, the Tigers suddenly exploded for eight runs in the next two innings to win the opener. Rookie third baseman Steve Boros had three hits in three official times at bat for Detroit and Phil Regan hurled two hitless relief innings to begin his first major league triumph. The Orioles won the nightcap on successive seventh-inning home runs by Jim Gentile, Gus Triandos and Ron Hansen, tying a major league record. The long ball flurry gave Hector Brown his first victory.

Whitey Ford, with the relief help of Luis Arroyo, gained his third victory in four decisions in the Yankees' opening game victory. Cletis Boyer drove in what proved to be winning run with an eighth-inning single that scored Bill Skowron, who had doubled with two out. Catcher Dutch Dotterer's double drove in the winning run for Washington in the nightcap as southpaw Hal Woodeshick registered his first victory. A fine relief job by Pete Burnside, who retired the last two hitters with two runners on base in the ninth, preserved Woodeshick's triumph.

The White Sox snapped a 2-2 tie in the top of the 11th to hand the Twins their third straight defeat. After Jim Landis broke the tie with a run-scoring double, Roy Sievers clouted a two-run homer. This proved the clincher as the Twins came back with a run in their half.

Pinch hitter Leon Wagner hit a two-run homer for the Angels in the seventh, giving the Angels their third straight triumph in the opener. Rookie southpaw Jim Archer won his first major league game for the A's in the second game although he needed help from Dave Wickersham in the ninth. Rookie shortstop Dick Howser drove in what proved to be the winning run with a single in the top of the ninth.

### *Potter Grid Boosters Set Meeting Tonight*

The Potters Football Boosters will meet tonight at 7:30 in the Hi-Teen room of the YMCA to map plans for bake and rummage sales. The club also is planning a picnic for parents of boys from Westgate and East Junior High Schools that will be sophomore grid candidates this fall. Mrs. Alma Hall is president.

### Conners Loft Sweeps Opening Pigeon Race

Pat Conners' loft swept honors in the first old bird race of the 1961 season sponsored by the East Liverpool Homing Club.

Sunday's race was flown from Coshocton with 64 birds competing. Conners' birds copped the first four spots.

The next race will be flown May 7 from Coshocton.

Milt Bolling, brother of Milwaukee second baseman Frank Bolling, is an executive assistant with the Boston Red Sox.

## *7 Scheduled Tuesday In Derby Trial*

LOUISVILLE, Ky. (AP) — A baker's half dozen are expected to go to the post Tuesday in the Derby Trial Stakes, the last racing test for Kentucky Derby eligibles.

The one-mile dash, in which the seven are expected, should produce at least three or four starters for next Saturday's $125,000, added derby, the first triple crown jewel.

An even dozen Derby probables have not scheduled any more racing before the big one so, barring any mishaps, they figure to be sure Derby starters.

Likely to go in the trial are Four-And-Twenty, Crozier, Dr. Miller, Star X., Injun, He's A Pistol and Gay's Pal.

Not to be raced before the run for the roses are Ambiopoise, Carry Back, Globemaster, Flutterby Ronnie's Ace, Light Talk, Sherluck, Loyal Son, Jay Fox, Dearborn, Bass Clef and On His Metal.

Missing from both lists is Harbor View Farm's Garwol, whose last place finish in Saturday's Stepping Stone Purse at Churchill Downs against a field of Derby eligibles disappointed his trainer, Burley Parke.

Parke said he would ship the colt to New York early this week and planned to have him gelded in an effort to improve his disposition.

John Woodruff, sophomore from Nutley, N. J., is the only player on the Syracuse tennis team from out of New York state.

# Study Started On Canal Plan

Hearings are scheduled to open today in Washington on the Kennedy administration's request for a $50,000 Congressional appropriation to finance a special survey of plans for a Lake Erie-Ohio River Waterway.

The hearings will be held before the House subcommittee on public works appropriations, of which Rep. Michael J. Kirwan of Youngstown is the senior member. Kirwan said the first witness will be Maj. Gen. Walker K. Wilson, new chief of the U. S. Army Engineers.

Eastern Ohio and Western Pennsylvania communities have given strong support to revived plans for the canal, which would link lake ports at Ashtabula with river ports at Rochester.

They feel construction of the waterway would help relieve present unemployment problems and later would make low cost water transportation available to move raw materials and finished products in and out of their industralized area.

The hearings are expected to require about a month. Detailed plans will be discussed by Brig. Gen. Jackson Graham, head of the engineers' Ohio River division, who is scheduled to appear May 12. In June, the hearings will be opened to civic groups and other representatives of the public.

President Kennedy asked the $50,000 fund for the canal survey for use during the federal government's new fiscal year opening July 1. It is one item in a long list of appropriations sought for planning public works.

## Warren Youth Named Elks Contest Winner

LAWRENCE, Mass. (AP)—Cornelius A. Dolby, 18, of Warren, Ohio, was named Sunday as a third place winner of the National Youth Leadership contest sponsored by the Benevolent and Protective Order of Elks.

For Dolby, a past state official of Buckeye Boys' State, the award was double recognition. Saturday he was named top winner of the Ohio Elks Youth Leadership contest. He received a $300 bond from the Elks for his national showing. A high school senior, he plans to attend Iowa State University in the fall.

## Engineer, 48, Dies

NEW YORK (AP)—George E. Suderow, 48, Marine design engineer, whose projects included the first of the "Texas Tower" radar warning stations in the Atlantic, died Saturday of lung cancer.

## Daily Pattern

By ANNE ADAMS

A deep - descending collar frames you in softest flattery above a slimming skirt. Smart in daytime cottons — elegant in silk or faille for gala evenings.

Printed Pattern 4704: Half Sizes 12½, 14½, 16½, 18½, 20½, 22½. Size 16½ requires 3¾ yards 35-inch fabric.

Send 50 cents in coins for this pattern to Anne Adams, in care of the East Liverpool Review, 49 Pattern Dept., 243 W. 17th St., New York 11, N. Y. Print plainly your name, address, size and the style number.

## Yesterday's Stars

Batting Willie Mays, Giants — Slammed four homers in one game, the ninth major leaguer to accomplish the feat, and drove in eight runs as the Giants buried the Milwaukee Braves under a 14-4 score.

Pitching Pete Burnside, Senators—The southpaw relief pitcher came out of the bullpen to retire the last two Yankee hitters with the tying and winning runs on bases in the ninth to preserve the Senators' 2-1 nightcap victory over the Yankees. New York won the opener 4-3.

## Navy Slates New Try In Balloon Launching

PENSACOLA, Fla. (AP)—The Navy plans to make a fourth try Thursday to launch a huge manned balloon from the deck of the aircraft carrier Antietam.

Three previous attempts were called off because of bad weather high above the launch area in the Gulf of Mexico about 100 miles out from Pensacola.

Thunderstorm activity aloft was blamed for postponement of today's scheduled ascent. Strong winds in the upper atmosphere caused the other delays.

## Opera Season Ends

CLEVELAND (AP) — The Metropolitan Opera closed one of its most successful seasons here. A turnout of 6,381 Sunday at Friedrich von Flotow's "Martha" brought the week's total to 50,904.

# Study Started On Canal Plan

Hearings are scheduled to open today in Washington on the Kennedy administration's request for a $50,000 Congressional appropriation to finance a special survey of plans for a Lake Erie-Ohio River Waterway.

The hearings will be held before the House subcommittee on public works appropriations, of which Rep. Michael J. Kirwan of Youngstown is the senior member. Kirwan said the first witness will be Maj. Gen. Walker K. Wilson, new chief of the U. S. Army Engineers.

Eastern Ohio and Western Pennsylvania communities have given strong support to revived plans for the canal, which would link lake ports at Ashtabula with river ports at Rochester.

They feel construction of the waterway would help relieve present unemployment problems and later would make low cost water transportation available to move raw materials and finished products in and out of their industralized area.

The hearings are expected to require about a month. Detailed plans will be discussed by Brig. Gen. Jackson Graham, head of the engineers' Ohio River division, who is scheduled to appear May 12. In June, the hearings will be opened to civic groups and other representatives of the public.

President Kennedy asked the $50,000 fund for the canal survey for use during the federal government's new fiscal year opening July 1. It is one item in a long list of appropriations sought for planning public works.

## Warren Youth Named Elks Contest Winner

LAWRENCE, Mass. (AP)—Cornelius A. Dolby, 18, of Warren, Ohio, was named Sunday as a third place winner of the National Youth Leadership contest sponsored by the Benevolent and Protective Order of Elks.

For Dolby, a past state official of Buckeye Boys' State, the award was double recognition. Saturday he was named top winner of the Ohio Elks Youth Leadership contest. He received a $300 bond from the Elks for his national showing. A high school senior, he plans to attend Iowa State University in the fall.

## Engineer, 48, Dies

NEW YORK (AP)—George E. Suderow, 48, Marine design engineer, whose projects included the first of the "Texas Tower" radar warning stations in the Atlantic, died Saturday of lung cancer.

## Daily Pattern

By ANNE ADAMS

A deep - descending collar frames you in softest flattery above a slimming skirt. Smart in daytime cottons — elegant in silk or faille for gala evenings.

Printed Pattern 4704: Half Sizes 12½, 14½, 16½, 18½, 20½, 22½. Size 16½ requires 3¾ yards 35-inch fabric.

Send 50 cents in coins for this pattern to Anne Adams, in care of the East Liverpool Review, 49 Pattern Dept., 243 W. 17th St., New York 11, N. Y. Print plainly your name, address, size and the style number.

## Yesterday's Stars

Batting Willie Mays, Giants — Slammed four homers in one game, the ninth major leaguer to accomplish the feat, and drove in eight runs as the Giants buried the Milwaukee Braves under a 14-4 score.

Pitching Pete Burnside, Senators—The southpaw relief pitcher came out of the bullpen to retire the last two Yankee hitters with the tying and winning runs on bases in the ninth to preserve the Senators' 2-1 nightcap victory over the Yankees. New York won the opener 4-3.

## Navy Slates New Try In Balloon Launching

PENSACOLA, Fla. (AP)—The Navy plans to make a fourth try Thursday to launch a huge manned balloon from the deck of the aircraft carrier Antietam.

Three previous attempts were called off because of bad weather high above the launch area in the Gulf of Mexico about 100 miles out from Pensacola.

Thunderstorm activity aloft was blamed for postponement of today's scheduled ascent. Strong winds in the upper atmosphere caused the other delays.

## Opera Season Ends

CLEVELAND (AP) — The Metropolitan Opera closed one of its most successful seasons here. A turnout of 6,381 Sunday at Friedrich von Flotow's "Martha" brought the week's total to 50,904.

By IDA JEAN KAIN

## *Action Proves Key To Slimming Magic*

In that wonderful story of the Wizard of Oz by Frank Baum, when the timid lion asked the Wizard for a magic potion that would give him courage, the Wizard requested the lion and his friends to scale the castle walls of the wicked witch. They carried out this mission and returned to claim their reward only to find they didn't need a magic potion. As the story shows, the Wizard's magic was in having them carry out the act of bravery, which earned for them the quality of courage.

Ida Jean Kain

And that's the way it is in real life. Action is the key word. Whatever theme in the daily column interests you the most, unless you act it avails you nothing — for nothing is yours until you act on it!

—:—

**DIETERS, FROM** reading your letters for 'lo these many years,' I am convinced that slimming is a mental triumph. In terms of pounds lost, reducing is a physical achievement, but it is mind-directed.

When you resolve to act to reduce, this is what happens: All the forces of your personality are brought to bear on the problem. Suddenly you are done with shilly-shallying. You stop looking for magic ways to slim down. You recognize that you, and you alone, can follow the course that will help you to reduce successfully.

Convinced that it is possible for you to be desirable weight, you live up to this conviction. This amounts to a mental - set. From then on, you think in terms of your goal.

When your thought - currents are channeled in the direction of your goal, you picture yourself in the right dress size. Fix that picture in your mind and your thoughts are on the slimming track. Think in terms of rewards and you'll be rewarded.

With a new viewpoint of what you want, you are eager to pursue the right course of nutrition ... the choice is yours and you choose well-balanced meals sufficiently low in calories to force nature to burn your excess fat. By this method, you use the power of your will to accomplish what you want.

The amount of food it takes to satisfy is largely habit. Give some thought to your slimming mental set before you sit down to the table. Take time to savor your food.

—:—

**EATING SLOWLY** allows nature's satiety mechanism to be effective. Practice getting up from the table before you have eaten to satiety.

Thinking in terms of your goal, you are no longer willing to trade the satisfaction of slimming down for that of five or ten minutes of continued eating. With this mature attitude toward food, you can lick the pounds for good!

Send a long, self - addressed, stamped envelope for "Hunger Control Diet." Address your request to Ida Jean Kain, in care of this newspaper. Postcard requests cannot be answered.

The state of California has more motor vehicles than any other state in the United States — or than any foreign country in the world.

## Ohio Marine Injured In Wreck Killing Pair

WILMINGTON, N. C. (AP)—Pfc. Michael F. Eder of 715 17th St. N.W., Canton, Ohio, was reported in satisfactory condition at James Walker Memorial Hospital here following a Saturday night auto wreck in which two Marine buddies were killed and another injured.

State Highway Patrolman E. E. Worrell said their car, traveling too fast to make a curve, ran over an embankment and into a tree and overturned about two miles south of here. The four, attached to the Second Marine Division at Camp LeJeune, N. C., were en route to Carlina Beach. Dead are Lance Cpl. Richard J. Bienko, 21, Buffalo, N. Y., and Pfc. Bobby F. Fleming, 21, Ocean Springs, Mass.

---

Add both lemon juice and drained capers to a white sauce to be served with fish fillets—fried or broiled.

## *'Misdeeds' Hurt U.S. Enterprise, Convention Told*

WASHINGTON (AP)—Misdeeds of a few businessmen can blemish the whole free enterprise system, U. S. Chamber of Commerce President Arthur H. Motley said today.

It is not the chamber's function to enforce the antitrust laws, Motley said in an address prepared for the opening of the organization's 49th annual meeting here.

But he told 3,000 business delegates:

"Our free market economic system demands protection against such violations as the recently exposed price fixing conspiracy among electrical equipment manufacturers.

"Competition must be maintained," said Motley, publisher of Parade magazine. "The antitrust laws are a proper form of government regulation and those laws must be obeyed.

"Violations should be punished, and all businessmen should recognize that even the relatively few misdeeds of this nature tend to weaken the whole economic system and make it harder to defend against those who want to change it," he said.

Motley said many of his friends have asked "why doesn't the chamber do something about these price fixers?"

Enforcement and punishment in the antitrust field is the function of the Justice Department and the courts, he said.

## Used Records, Maybe?

BUFFALO, N. Y. (AP) — Edward A. Rath was elected county executive after serving several years as Erie County comptroller. After his campaign headquarters closed, the Main Street location was occupied by a phonograph record firm called, appropriately enough, "Budget Records."

# Grinding Center To Speed Output For Globe Brick

Construction of a new grinding and manufacturing center by the Globe Brick Co. indicates an expression of faith in the future of the steel industry.

The 69-year-old factory at Kenilworth hopes to increase its production rate by one-third through the new facility.

It is designed to provide better control of grinding and screening facilities for producing ground clay, according to James A. Roslund, ceramic engineer of the company.

The elaborately-equipped grinding and manufacturing center is located in a four-story, steel, fire-resistant building situated in the heart of the plant area.

—:—

**THE NEW** facility was designed through the cooperative efforts of the Globe Co. and Dwight B. Hendryx & Associates of Pittsburgh, design engineers. Sidney C. Porter Jr., plant engineer, is in charge of the installation of equipment.

Impressive from the outside because of its immense size, the building, however, belies its intended purpose when seen from a distance. A maze of inclined conveyors and clay bins catch the eye upon entering.

The facility will contain 16 storage bins with a total capacity of 960 tons of ground, screened clay, ready for processing in extrusion and dry press machines.

The huge bins, each capable of holding 60 tons of the processed clay, hover over a mass of conveyors and other equipment unfamiliar to the layman.

Eight double-deck Starr Foundry & Machine Co. electrically-heated and vibrated screens and two Toronto Foundry & Machine Co. rim discharge grinders feature the new equipment.

—:—

**THE GRINDERS,** which pulverize the clay into particles before it is processed by the vibrator screens, will have an output capacity of 50 tons per hour.

For turning out the finished product—ladle bricks for the nation's steel mills—Globe's second auger machine will be installed in the new building.

The facility houses two Fate-Root-Heath auger machines with four-speed transmissions, fully-automatic clay tempering units.

All new drying facilities will be part of the expansion plan.

Work started on the building in the fall of 1960. The Swiss Fabricating Co. of Pittsburgh supplied the building materials.

Globe Brick joined in the "Buy Steel" campaign with the above expansion project.

Realizing that production of a top-quality product is necessary in today's competitive market, Globe Brick hasn't overlooked research.

A $100,000 research center was completed last year to enable the Kenilworth factory to continue the search for ways to improve its present product, both quality-wise and costwise.

—:—

**THE BUILDING,** with 2,000 square feet of space, was designed by Plant Engineer Porter.

The primary function of the research center is to provide a means for reproduction, leading to more uniformity and improvement in essential physical properties of ladle brick.

The facility is divided into two departments, the pilot plant and the research and quality control section. A. E. Covert and Edmund Starr, ceramic technicians, are assigned to the center.

The pilot plant can duplicate normal production practice. Its equipment includes dry pan, elevators, screens, storage bins and a conical blender.

New processes and more rugged use put increased demands on refractories for uniformity and improvement in essential physical properties. These include bulk density, volume change in reheat, apparent porosity, refractoriness, modulus of rupture, and uniform size of the finished product.

The research center provides the facilities to help meet the ever-mounting demands for production of a top-quality ladle brick.

Data accumulated is condensed into standard reports and the information is made available to the production department.

The plant provides Globe with an opportunity to produce large-size trial runs with the close control of laboratory practice. Customers may be supplied with trials of special materials in large enough quantities to give reliable service trials in the field, officials pointed out.

The Globe Company was founded by Capt. John Porter (1838-1922), one of the most prominent men in the history of Hancock County.

He started the company in 1892, beginning operations with only four kilns. He later encountered financial difficulties, lost the plant, but re-purchased it from a Beaver County man in 1906.

—:—

**THE FACTORY** has flourished in the intervening years and now is the largest and most modern ladle brick plant in West Virginia.

Under Capt. Porter's leadership, Globe produced the first brick used by Andrew Carnegie for lining steel mill ladles in Pittsburgh.

The pioneer industrialist manufactured brick for the first brick street in the country that was laid on Ridge Ave. in New Cumberland in 1871. These brick were produced at Capt. Porter's plant in New Cumberland. It later was destroyed by fire.

Capt. Porter also is considered responsible for the construction of a one-track railroad into the Northern Panhandle to serve its industries.

Fred G. Porter, one of Capt. Porter's sons, became the first president of Globe when the company was incorporated in 1909. He served until his death in 1933 and was succeeded by a brother, J. Nessly Porter.

—:—

**THE SECOND** president's term ended three weeks later when he was injured fatally in an auto accident. J. B. Porter and Sidney C. Porter Sr. were then elected president and vice president, respectively, and they served from 1933 to 1953.

Upon their retirement, the third generation was named to the top posts — Winston A. Porter, the current president, and William F. Porter, current vice president.

Highly - productive because of automation, Globe manufactures enough ladle brick in a single day to stretch from East Liverpool to Salem if laid end to end. A year's production by the same comparison would equal a distance of 8,317 miles!

Located on a 25-acre tract south of Newell, the factory employs about 200 men. Ladle bricks stamped "Globe" are shipped by rail and truck to steel mill centers across the nation.

Globe's No. 1 plant includes half of the production equipment and manufacturers a wire-cut series by the extrusion process in two production lines, feeding 34 periodic kilns that are completely automatic and program controlled.

The "beehive" kilns consume an estimated 840 million cubic feet of natural gas per year. Each kiln is capable of holding approximately 60,000 to 70,000 brick for the burning process.

Plant No. 2, built in 1925, is equipped with a Harrop tunnel kiln and power presses for the production of dry press brick in standard and special shapes, with an estimated capacity of 1 million per month.

Plant No. 4, built in 1952, is equipped with a "revolutionary" Allied tunnel kiln and produces both wire-cuts and dry press brick.

—:—

**GLOBE POINTS** with pride towards its Allied tunnel kiln, one of the few burning facilities of its kind in the entire industry.

The 536-foot long kiln is fired by 40 furnaces lining either side. The furnaces burn a special grade of stoker coal that is mined in Stone, Ky., and consume about 15,000 tons per year.

Globe's mine employs 40 men to mine the daily requirement of 900 tons of raw clay. The company owns 2,000 acres of clay-bearing ground — enough to last another 85 years or more.

The company stocks millions of ladle brick on its grounds, ready for shipment to steel mills at a moment's notice. The "life span" of a ladle brick in a steel mill ladle is estimated at four days to a week, depending on the number of "heats."

## Photography Class Held 'Spy Suspects'

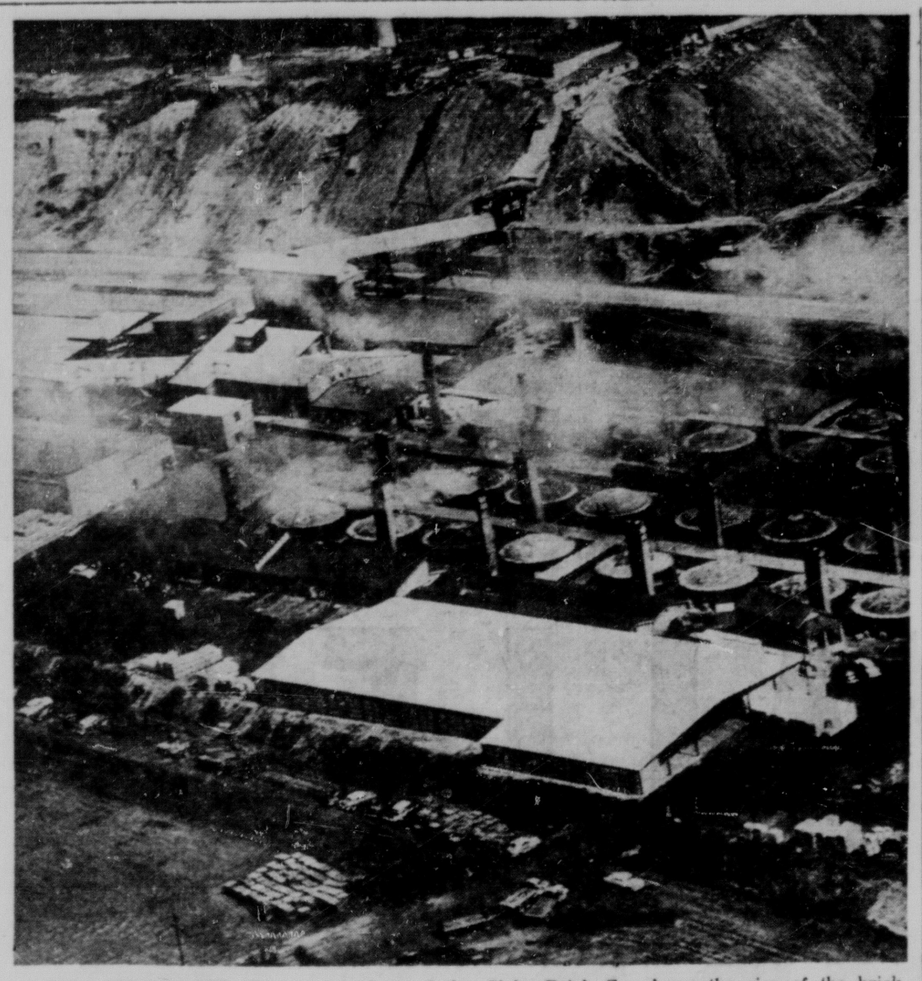
SHAWNEE, Okla. (AP) — Tom Isbill, Oklahoma Baptist University photography instructor, and his class were at the Rock Island depot learning to take pictures of moving objects at night.

They snapped a picture of a passing train.

A few minutes later they were surrounded by police and taken to headquarters to learn they had just photographed a train carrying secret atomic materials.

## Fisherman's Luck

OLD POINT COMFORT, Va. (AP) — That traditionally bad fisherman's luck isn't so bad after all. Fishing piers, complete with parking space for 300 autos, a coffee shop and a bait-tackle shop, are planned for each of two artificial islands to be built as a part of the bridge-tunnel project over and under Chesapeake Bay between Cape Charles and Cape Henry.



**ABOVE THE GLOBE.** This aerial photo of the Globe Brick Co. shows the size of the brick manufacturing factory in Kenilworth, near Newell. The company stocks millions of ladle brick, some of which can be seen stacked under the storage shed in the foreground.

## New Ordinance Due From Dirty Blankets

AKRON, Ohio (AP) — Because City Councilman John Mihaly had a pair of dirty blankets, Akron may have a new city ordinacne.

Mihaly took his blankets to a laundromat. While there, he said he noticed that a washer posted to run 20 minutes ran only 17, and a dryer supposed to run 10 minutes turned off after seven or eight. The councilman said he checked several other laundromats and encountered the same sort of thing.

He's asked the city's Law Department to prepare an ordinance which would make laundromats supply the machine time their signs say.

## Under Own Flag

HOLLYWOOS (AP) — Frank Sinatra, a man of far-flung enterprises, is now cutting records under the label of his own recording company, Esses. And, on another flank of musical performance, operatic star Eleanor Steber and husband Gordon Andrews have taken a similar plunge, with their STAND Company, Inc. The intitials stand for Steber and Andrews.

## Kangaroo Menace Worse In Australia

DARWIN, Australia (AP) — W. H. Petrick, a member of the Legislative Council, says the kangaroo menace in Central Australia is worse than ever.

He told the council 14,000 'roos have been shot on his own cattle station in the past two years.

"In the Alice Springs district they are well on the way to destroying the country completely," he said.

"They destroy the grass before it seeds. As a result, even after good rains, there is no growth in many areas."

59 YEARS OF FRIENDLY SERVICE

We salute the Men of Steel

Many of whom We are Privileged to Serve

First Federal is proud to salute the men of steel and we know the important part the manufacture and retailing of steel goods plays in our economy. It has been our pleasure to serve many of the steelworkers and their families in this area. We are proud to count them among our many depositors. Our home loan department has enabled many to obtain homes for their families. First Federal stands ready to serve you; our complete facilities are available to you. There's no obligation to an inquiry.

# Mill Has Grown Rapidly Under Crucible's Supervision

## Plant Bought By Company Back In 1911

The Midland Works of the Crucible Steel Company of America was originally the Midland Steel Co., which began operations as a single blast furnace plant in 1906.

In 1911, the company was purchased by Crucible Steel, which had been formed in 1900 by the merger of several companies engaged principally in the production of alloy and tool steels. Acquisition of the Midland plant gave Crucible basic producing facilities to supply its various specialty plants.

Over the years, the Midland plant has been expanded and improved until it now comprises a completely integrated unit designed for the production of a wide range of high quality, specialized products, supplying the primary material for other divisions and subsidiaries of the company.

—:—

**T. K. MILLER** of Pittsburgh got things rolling toward the present steel operations in 1905 when he bought the Neel farm, the Brucker farm, the Kaine farm and the McCoy farm for his organization, which called itself the Midland Steel Co.

In July of 1905 began the construction of an iron ore works.

In 1911, things really began to pop. The Pittsburgh Crucible Steel Co., a subsidiary of Crucible Steel, bought the Midland Steel Co.'s coke ovens and blast furnace. It also purchased surrounding land with thoughts to the future.

Pittsburgh Crucible began construction of additional facilities soon after obtaining the Midland Steel Co., which wasn't really a steel company since it produced only iron. In 1913, eight 60-ton open hearth furnaces and a 40-inch blooming mill were built. The mill rolled its first ingot on Aug. 4, 1913, and the future of Midland was assured.

Maintenance shops and a 24-inch bar mill were constructed in 1914. Two additional open hearths were installed in 1915. A 28-inch billet mill was added in 1916 and in 1917 two more new open hearths brought the total to 12.

Pittsburgh Iron & Steel began construction of its second open hearth in 1914, a furnace that was kept busy turning out a variety of ordnance castings for World War I. The years 1917 through 1919 saw the Midland plants working full time to produce materials used to further the war effort.

—:—

**THE END OF** the war didn't mean the end of steel expansion, however.

Crucible built 100 coke ovens with facilities for the recovery of phenol and other by-products. The new ovens did away with the old dirty foul smelling bee-hive ovens. By the time the furnaces were completed in 1920, Crucible had increased steel facilities even more.

Large finishing mills were installed, as was auxiliary equipment for heat treating, annealing and finishing. A second blast furnace supplemented by a second ore bridge increased iron capacity again.

At about the same time the Pittsburgh Iron and Steel Foundry discarded its iron cupola furnace and concentrated on steel castings. Mackintosh - Hemphill, a leader in the development and manufacturing of industrial machinery, bought the foundry company in 1922 to serve as its foundry.

Crucible increased the capacity of its 60-ton open hearths to 100 tons.

Standard Oil began construction of the oil storage tanks on the east part of town in 1929 to better serve the growing needs of the area for petroleum products.

And the capacities of the Midland furnaces were again increased, this time to 125 tons each.

In 1935, Crucible installed six single two-high hand rolling gap mills and six heating furnaces to supply the needs of the automotive industry.

The next year the Company purchased the National Drawn Steel plant in East Liverpool and made it a part of their Midland operations.

—:—

**THE FIRST** representative of the Steel Workers Organizing Committee came to Beaver County in July, 1936. Enrollment of steelworkers at Midland into the union proceeded at a slow but steady pace and finally the first charter meeting was held at the 5th St. Hall in 1937. Bert Hough was elected the first president.

On May 24, 1937, Crucible and the union signed their first agreement.

In early 1948 a committee was formed to plan the building of the new home for Local 1212. Groundbreaking ceremonies took place April 18, 1950.

The new home, one of the most beautiful buildings in Midland, was dedicated March 30, 1952. Other locals representing labor in Midland use the hall for meetings and many clubs in our town make constant use of the hall's facilities. One of the events looked forward to by the children here is the union's annual Christmas party held at the hall.

**THIS PICTURE ILLUSTRATES THE SIZE** of the Midland Works of the Crucible Steel Company of America. The expansive operation, a familiar and welcome sight to resident of the community, plays a key role in the district's economy. It has grown rapidly over the years to its place of major importance in the nation's steel picture.

In 1937 the Air Reduction Sales Co., a division of Air Reduction Company, Inc., became part of the Midland scene to facilitate the supplying of local industry with oxygen, nitrogen, and argon. In 1939, the company obtained a borough permit for the erection of a large air liquefaction plant in Midland.

Next the electrics came to Midland. In 1940 two 25-ton electric furnaces were installed by Crucible. The company added two more the following year.

Then came the bombing at Pearl Harbor and more war years. Midland produced with a new purpose.

In 1942 Air Reduction Sales enlarged its facilities here. At the same time Crucible installed a universal mill and added to its production of flat rolled sheet bar, slabs, and tool steels.

The next year saw the dedication of the government's Defense Plant Corp. building under Crucible operation for the production of material for use of the Armed Forces.

—:—

**DURING 1947** Crucible added another 21 coke ovens to the 100 they already had here. They installed a 24-inch billet mill, too. They transferred their Agriculture Department here from the famous LaBelle Works in Pittsburgh. The next year they added 63 more ovens and purchased the Defense Plant Corporation from the government.

In 1949, Crucible's hot and cold strip units were completed and placed into operation.

In 1950, Crucible completed a dephenolizing tower in the local plant so that substantially all phenol wastes would not be dumped into the Ohio.

The next year, construction began on a new blast furnace, and a 54-inch temper mill was put into operation along with a new grinding line and other finishing equipment.

Still another company appeared in Midland in 1951 — Rem-Cru Titanium, Inc. This company is now a national leader in the new titanium industry, producing a metal with the remarkable combination of light weight, strenght and resistance to corrosion

### Aged Chiseled Error Corrected On Stone

BALTIMORE (AP) — One of the oldest chiseled errors in Baltimore is preserved in a 146-year-old stone tablet in the yard of the Otterbein Church of the United Brethren in Christ.

In German, the stone records June 4, 1726, as the birth date of Bishop Wilhelm Otterbein, the founder. Bishop Otterbein actually was born June 3, 1726.

The date came from an ordination certificate unaccountably wrong. The error is corrected, in English, on a newer stone memorial installed in the yard in 1913.

### Tactical Burglars Hit Place 10th Time

EAST ST. LOUIS, Ill. (AP) — Burglars broke into the same tavern nine times and rifled coin-operated machines each time.

The owners installed a burglar alarm system protecting the doors, windows and roof of the building.

The burglars returned for a 10th time, digging a tunnel and entering through a trap door in the floor.

## *Hunter Began Career With Accounting Firm*

Joel Hunter, president and chief executive officer of the Crucible Steel Company of America, joined the company in 1951 as vice president in charge of finance.

He was elected a director and executive vice president in 1953 and president in 1954. In 1956 he was named chief executive officer.

Prior to his association with Crucible, Hunter was a partner in Haskins and Sells, New York, certified public accountants, which he joined in 1943 when his Atlanta, Ga., accounting firm, Joel Hunter and Company, merged its practice with the larger organization.

A native of Atlanta, Hunter is a graduate in business administration of Emory University in Georgia. Following his graduation in 1926, he joined the Atlanta accounting organization headed by his father and a year later was accredited as a certified public accountant.

Upon the death of his father in 1928, Hunter assumed management and ownership of the firm. He became a member of the Georgia bar in 1942 as a result of private study and a certified public accountant of New York the following year.

**JOEL HUNTER**
*President Of Crucible Steel.*

Hunter is a member of the Board of directors of the Allis-Chalmers Manufacturing Co. and the American Iron and Steel Institute.

He holds an honorary life membership in the American Society for Metals and is a member of the Accounting Principles Board of the American Institute of Certified Public Accountants.

## *Burrier Began Duties With Crucible In 1950*

George M. Burrier, works manager at the Midland Works of Crucible Steel, joined the company in 1950 as assistant general superintendent.

He was named assistant works manager in 1953.

A graduate of the University of Pennsylvania, where he received a Mechanical Engineering degree in 1932, Burrier began his career in steel during the same year when he joined the Youngstown Pressed Steel Co. as assistant to the product manager.

He moved to the Republic Steel Corp. the following year as a third helper in the Open Hearth department. With Republic, he also held the following jobs: melter foreman, assistant open hearth superintendent, assistant open hearth and electric furnace superintendent, open hearth superintendent and a special assignment as secretary of the open hearth committee.

Burrier was born in Baltimore, Md., where he completed his high school education.

He is a member of the American Institute of Mining and Metallurgical Engineers and American Iron and Steel Institute.

Burrier, his two daughters and son reside at Windy Ghoul Estates, Brighton Twp., Pa.

**GEORGE M. BURRIER**
*Works manager at Midland.*

## *Steel Moves Further Into Home Picture*

Steel as a home-building material is steadily gaining the acceptance of architects and builders alike as a means of a more economical and quicker method of construction plus its undenied qualities of strength.

A home which substitutes steel for more traditional home-building materials has stirred the interest and imagination of the home - buying public.

Through the years they have become aware of steel and its many, many applications in countless areas. Now, they are realizing this metal also has unlimited possibilities for use in the construction of a home.

Designers, however, have had one rule by which they have been guided: Use steel only when it is more economical and does a better job than the material it replaces in a home.

The hidden - secret of strength in steel style homes is found in its unique panel construction.

Other applications of steel in homes, again doing a better job at a lower price, are: all-steel all-fuel chimney and hood systems, a steel threshold support, an eye - catching all-steel cupola, and all-steel window frames.

The home buyer also may choose steel interior doors, steel kitchen cabinets, steel folding doors, a stainless steel kitchen sink and steel-based bathroom fixtures.

### Youth Is Shot Twice By Same .22-Pistol

HERRIN, Ill. (AP) — Gene Whitecotton, 20, wounded in the left leg when a .22 caliber pistol discharged accidentally as he showed it to a friend, vowed:

"That's all; I'm getting rid of that gun."

Six months earlier he was wounded in the right leg with the same weapon, while practicing a fast draw.

### Educators Learn

CHATTANOOGA (AP)—The Chattanooga school board went back to school — after its members flunked their math. After Max Vann, head of the city high school mathematics department, outlined a new math program for the schools, the board members confessed they didn't understand. They asked Vann for a couple hours of instruction.

## Every Crucible Employe Serves As A 'Salesman'

Crucible and its founding companies have had a reputation for making fine steels for almost a century and through the years Crucible has come to mean the first name in special purpose steels.

But reputation is not built on products alone. A company is also known through the integrity and progressiveness of its people, and the services they can offer to customers and community.

Contacting customers and helping them determine their steel needs is part of the basic responsibility of the Crucible salesman.

As the liaison between the customer and the company, the salesman must have detailed knowledge of all products. He must know how they are processed, their applications and their industrial use. In addition to customer officials, he works with mechanical, chemical and metallurgical engineers on problems relating to efficient use of steel. In making sure that the customer gets the right steel for his particular job, the salesman maintains good customer relations.

From that point, it takes one phone call, a customer placing an order for special steel, to set in motion activities which involve thousands of Crucible people, the sum total of whose efforts are needed to sell an order of steel — for selling steel is everybody's job.

Every man and woman in the Crucible organization is a salesman. Each plays a part in building the company's reputation, in insuring the quality of its product and in providing good service, all of which are the elements that sell steel.

In today's competitive market the customer buys from the producer who can be counted on to give uniform quality from shipment to shipment. If the quality is poor, the customer looks for a new supplier, someone who can give him what he wants.

This is why more than any single group the responsibility for quality of Crucible's product falls to the man in the mill — the blast furnace crews, the open hearth and electric furnace force, the operators of the mills, the metallurgists, the inspectors and the hundreds of others who help to process steel. Together these skilled steelmen build quality into steel.

For service, Crucible is outstanding in the steel industry. Installed in recent years are electronic systems aimed at the common goal of providing faster service to the customer. These new systems have solved the principal problem of the specialty steel business, that of keeping up with constantly changing specifications.

For example, faster service is being achieved on direct mill orders with a new electronic telecommunications system. As soon as an order is received it becomes a telecommunication and is sent by teletype to a switching center in Pittsburgh and automatically routed to the Order Service center. In addition to the teletyped order the Center receives simultaneously a tape bearing the same information. These tapes along with the teletype are received at each stage of the communications and are used for order acknowledgment, for record keeping, for the computer and finally for invoicing.

In the Service Center, the order is checked by a group of specialists. These men are product traffic experts.

Each screens the order in view of his special knowledge for proper specifications, completeness, price, coding, traffic and plant destination. The order is then sent, again by teletype, to the mill best suited to fill the order.

At the plant, a metallurgist determines the ingredients and the processes to be used. When he is finished with the specifications the order is turned over to the production planning staff which outlines the mill program and schedules operations to meet the delivery date.

Another system to speed customer service is a unique centralized inventory control over a vast warehouse chain. There are more than 30 standard specialty items, ready at points where they are likely to be needed in a hurry.

With the centralized control, the items in each of the warehouses become one huge stockpile. The brain of the system is a computer in the Pittsburgh control center which makes it possible to know at all times the exact location of any of the products in any and all of the warehouses.

Thus, if a customer wants a specific kind of steel which the salesman finds is not available at the local warehouse, he can, in a matter of minutes, query the control center for the nearest warehouse where the item is in stock.

The information is immediately available through records which are constantly updated by the computer, the order is written, filled and dispatched to the customer.

All of these qualities, company reputation, quality of product and service can only be achieved by the efforts of each and all the people who are Crucible.

### Coach Of Champions Does 'Selling Job'

ROANOKE, Va. (AP) — Mrs. Genevieve Dickinson, who has coached eight state public speaking champions, says she doesn't teach speech. "I teach Mary and Johnny," she said. "I don't teach speech to Mary and Johnny."

Mrs. Dickinson says speech is a tool subject like grammar or writing. She does a "selling job" to make children like and understand the value of the class to them. They learn to speak — something she believes of tremendous importance in an age when voices can circle the world in seconds.

### 'I Beg Your Pardon,' She's No Panhandler

BALTIMORE (AP) — The man and woman were begging money as a team near the bus terminal, but the man did all the talking. He asked one pedestrian for a dime for himself and something more "for my girl friend."

"What's the matter?" asked the pedestrian. "Can't the lady ask for her own dime?"

"She's no panhandler," said the bum, with a touch of indignation.

*Al Baldwin Knows*

**You Buy Better When You Buy Steel**

"It's easier to keep clean," says Allen C. Baldwin of Wellsville, Ohio, "and my son, Phil, and I are all for that. And besides, steel supplies the strength, the durability and the beauty I want in a car."

Mr. Baldwin can vouch for the quality of the steel, too. An employee in the metallurgical laboratory of Midland's Cold Strip Mill, he helps make sure that the steel shipped to automobile manufacturers is the very best that can be made.

CRUCIBLE STEEL COMPANY OF AMERICA

MIDLAND WORKS

# Mill Has Grown Rapidly Under Crucible's Supervision

## Plant Bought By Company Back In 1911

The Midland Works of the Crucible Steel Company of America was originally the Midland Steel Co., which began operations as a single blast furnace plant in 1906.

In 1911, the company was purchased by Crucible Steel, which had been formed in 1900 by the merger of several companies engaged principally in the production of alloy and tool steels. Acquisition of the Midland plant gave Crucible basic producing facilities to supply its various specialty plants.

Over the years, the Midland plant has been expanded and improved until it now comprises a completely integrated unit designed for the production of a wide range of high quality, specialized products, supplying the primary material for other divisions and subsidiaries of the company.

—:—

**T. K. MILLER** of Pittsburgh got things rolling toward the present steel operations in 1905 when he bought the Neel farm, the Brucker farm, the Kaine farm and the McCoy farm for his organization, which called itself the Midland Steel Co.

In July of 1905 began the construction of an iron ore works.

In 1911, things really began to pop. The Pittsburgh Crucible Steel Co., a subsidiary of Crucible Steel, bought the Midland Steel Co.'s coke ovens and blast furnace. It also purchased surrounding land with thoughts to the future.

Pittsburgh Crucible began construction of additional facilities soon after obtaining the Midland Steel Co., which wasn't really a steel company since it produced only iron. In 1913, eight 60-ton open hearth furnaces and a 40-inch blooming mill were built. The mill rolled its first ingot on Aug. 4, 1913, and the future of Midland was assured.

Maintenance shops and a 24-inch bar mill were constructed in 1914. Two additional open hearths were installed in 1915. A 28-inch billet mill was added in 1916 and in 1917 two more new open hearths brought the total to 12.

Pittsburgh Iron & Steel began construction of its second open hearth in 1914, a furnace that was kept busy turning out a variety of ordnance castings for World War I. The years 1917 through 1919 saw the Midland plants working full time to produce materials used to further the war effort.

—:—

**THE END OF** the war didn't mean the end of steel expansion, however.

Crucible built 100 coke ovens with facilities for the recovery of phenol and other by-products. The new ovens did away with the old dirty foul smelling bee-hive ovens. By the time the furnaces were completed in 1920, Crucible had increased steel facilities even more.

Large finishing mills were installed, as was auxiliary equipment for heat treating, annealing and finishing. A second blast furnace supplemented by a second ore bridge increased iron capacity again.

At about the same time the Pittsburgh Iron and Steel Foundry discarded its iron cupola furnace and concentrated on steel castings. Mackintosh - Hemphill, a leader in the development and manufacturing of industrial machinery, bought the foundry company in 1922 to serve as its foundry.

Crucible increased the capacity of its 60-ton open hearths to 100 tons.

Standard Oil began construction of the oil storage tanks on the east part of town in 1929 to better serve the growing needs of the area for petroleum products.

And the capacities of the Midland furnaces were again increased, this time to 125 tons each.

In 1935, Crucible installed six single two-high hand rolling gap mills and six heating furnaces to supply the needs of the automotive industry.

The next year the Company purchased the National Drawn Steel plant in East Liverpool and made it a part of their Midland operations.

—:—

**THE FIRST** representative of the Steel Workers Organizing Committee came to Beaver County in July, 1936. Enrollment of steelworkers at Midland into the union proceeded at a slow but steady pace and finally the first charter meeting was held at the 5th St. Hall in 1937. Bert Hough was elected the first president.

On May 24, 1937, Crucible and the union signed their first agreement.

In early 1948 a committee was formed to plan the building of the new home for Local 1212. Groundbreaking ceremonies took place April 18, 1950.

The new home, one of the most beautiful buildings in Midland, was dedicated March 30, 1952. Other locals representing labor in Midland use the hall for meetings and many clubs in our town make constant use of the hall's facilities. One of the events looked forward to by the children here is the union's annual Christmas party held at the hall.

In 1937 the Air Reduction Sales Co., a division of Air Reduction Company, Inc., became part of the Midland scene to facilitate the supplying of local industry with oxygen, nitrogen, and argon. In 1939, the company obtained a borough permit for the erection of a large air liquefaction plant in Midland.

Next the electrics came to Midland. In 1940 two 25-ton electric furnaces were installed by Crucible. The company added two more the following year.

Then came the bombing at Pearl Harbor and more war years. Midland produced with a new purpose.

In 1942 Air Reduction Sales enlarged its facilities here. At the same time Crucible installed a universal mill and added to its production of flat rolled sheet bar, slabs, and tool steels.

The next year saw the dedication of the government's Defense Plant Corp. building under Crucible operation for the production of material for use of the Armed Forces.

—:—

**DURING 1947** Crucible added another 21 coke ovens to the 100 they already had here. They installed a 24-inch billet mill, too. They transferred their Agriculture Department here from the famous LaBelle Works in Pittsburgh. The next year they added 63 more ovens and purchased the Defense Plant Corporation from the government.

In 1949, Crucible's hot and cold strip units were completed and placed into operation.

In 1950, Crucible completed a dephenolizing tower in the local plant so that substantially all phenol wastes would not be dumped into the Ohio.

The next year, construction began on a new blast furnace, and a 54-inch temper mill was put into operation along with a new grinding line and other finishing equipment.

Still another company appeared in Midland in 1951 — Rem-Cru Titanium, Inc. This company is now a national leader in the new titanium industry, producing a metal with the remarkable combination of light weight, strenght and resistance to corrosion

### Aged Chiseled Error Corrected On Stone

BALTIMORE (AP) — One of the oldest chiseled errors in Baltimore is preserved in a 146-year-old stone tablet in the yard of the Otterbein Church of the United Brethren in Christ.

In German, the stone records June 4, 1726, as the birth date of Bishop Wilhelm Otterbein, the founder. Bishop Otterbein actually was born June 3, 1726.

The date came from an ordination certificate unaccountably wrong. The error is corrected, in English, on a newer stone memorial installed in the yard in 1913.

### Tactical Burglars Hit Place 10th Time

EAST ST. LOUIS, Ill. (AP) — Burglars broke into the same tavern nine times and rifled coin-operated machines each time.

The owners installed a burglar alarm system protecting the doors, windows and roof of the building.

The burglars returned for a 10th time, digging a tunnel and entering through a trap door in the floor.

**THIS PICTURE ILLUSTRATES THE SIZE** of the Midland Works of the Crucible Steel Company of America. The expansive operation, a familiar and welcome sight to resident of the community, plays a key role in the district's economy. It has grown rapidly over the years to its place of major importance in the nation's steel picture.

## *Hunter Began Career With Accounting Firm*

Joel Hunter, president and chief executive officer of the Crucible Steel Company of America, joined the company in 1951 as vice president in charge of finance.

He was elected a director and executive vice president in 1953 and president in 1954. In 1956 he was named chief executive officer.

Prior to his association with Crucible, Hunter was a partner in Haskins and Sells, New York, certified public accountants, which he joined in 1943 when his Atlanta, Ga., accounting firm, Joel Hunter and Company, merged its practice with the larger organization.

A native of Atlanta, Hunter is a graduate in business administration of Emory University in Georgia. Following his graduation in 1926, he joined the Atlanta accounting organization headed by his father and a year later was accredited as a certified public accountant.

Upon the death of his father in 1928, Hunter assumed management and ownership of the firm. He became a member of the Georgia bar in 1942 as a result of private study and a certified public accountant of New York the following year.

**JOEL HUNTER**
*President Of Crucible Steel.*

Hunter is a member of the Board of directors of the Allis-Chalmers Manufacturing Co. and the American Iron and Steel Institute.

He holds an honorary life membership in the American Society for Metals and is a member of the Accounting Principles Board of the American Institute of Certified Public Accountants.

## *Burrier Began Duties With Crucible In 1950*

George M. Burrier, works manager at the Midland Works of Crucible Steel, joined the company in 1950 as assistant general superintendent.

He was named assistant works manager in 1953.

A graduate of the University of Pennsylvania, where he received a Mechanical Engineering degree in 1932, Burrier began his career in steel during the same year when he joined the Youngstown Pressed Steel Co. as assistant to the product manager.

He moved to the Republic Steel Corp. the following year as a third helper in the Open Hearth department. With Republic, he also held the following jobs: melter foreman, assistant open hearth superintendent, assistant open hearth and electric furnace superintendent, open hearth superintendent and a special assignment as secretary of the open hearth committee.

Burrier was born in Baltimore, Md., where he completed his high school education.

He is a member of the American Institute of Mining and Metallurgical Engineers and American Iron and Steel Institute.

Burrier, his two daughters and son reside at Windy Ghoul Estates, Brighton Twp., Pa.

**GEORGE M. BURRIER**
*Works manager at Midland.*

## *Steel Moves Further Into Home Picture*

Steel as a home-building material is steadily gaining the acceptance of architects and builders alike as a means of a more economical and quicker method of construction plus its undenied qualities of strength.

A home which substitutes steel for more traditional home-building materials has stirred the interest and imagination of the home - buying public.

Through the years they have become aware of steel and its many, many applications in countless areas. Now, they are realizing this metal also has unlimited possibilities for use in the construction of a home.

Designers, however, have had one rule by which they have been guided: Use steel only when it is more economical and does a better job than the material it replaces in a home.

The hidden - secret of strength in steel style homes is found in its unique panel construction.

Other applications of steel in homes, again doing a better job at a lower price, are: all-steel all-fuel chimney and hood systems, a steel threshold support, an eye - catching all-steel cupola, and all-steel window frames.

The home buyer also may choose steel interior doors, steel kitchen cabinets, steel folding doors, a stainless steel kitchen sink and steel-based bathroom fixtures.

## Every Crucible Employe Serves As A 'Salesman'

Crucible and its founding companies have had a reputation for making fine steels for almost a century and through the years Crucible has come to mean the first name in special purpose steels.

But reputation is not built on products alone. A company is also known through the integrity and progressiveness of its people, and the services they can offer to customers and community.

Contacting customers and helping them determine their steel needs is part of the basic responsibility of the Crucible salesman.

As the liaison between the customer and the company, the salesman must have detailed knowledge of all products. He must know how they are processed, their applications and their industrial use. In addition to customer officials, he works with mechanical, chemical and metallurgical engineers on problems relating to efficient use of steel. In making sure that the customer gets the right steel for his particular job, the salesman maintains good customer relations.

From that point, it takes one phone call, a customer placing an order for special steel, to set in motion activities which involve thousands of Crucible people, the sum total of whose efforts are needed to sell an order of steel — for selling steel is everybody's job.

Every man and woman in the Crucible organization is a salesman. Each plays a part in building the company's reputation, in insuring the quality of its product and in providing good service, all of which are the elements that sell steel.

In today's competitive market the customer buys from the producer who can be counted on to give uniform quality from shipment to shipment. If the quality is poor, the customer looks for a new supplier, someone who can give him what he wants.

This is why more than any single group the responsibility for quality of Crucible's product falls to the man in the mill — the blast furnace crews, the open hearth and electric furnace force, the operators of the mills, the metallurgists, the inspectors and the hundreds of others who help to process steel. Together these skilled steelmen build quality into steel.

For service, Crucible is outstanding in the steel industry. Installed in recent years are electronic systems aimed at the common goal of providing faster service to the customer. These new systems have solved the principal problem of the specialty steel business, that of keeping up with constantly changing specifications.

For example, faster service is being achieved on direct mill orders with a new electronic telecommunications system. As soon as an order is received it becomes a telecommunication and is sent by teletype to a switching center in Pittsburgh and automatically routed to the Order Service center. In addition to the teletyped order the Center receives simultaneously a tape bearing the same information. These tapes along with the teletype are received at each stage of the communications and are used for order acknowledgment, for record keeping, for the computer and finally for invoicing.

In the Service Center, the order is checked by a group of specialists. These men are product traffic experts.

Each screens the order in view of his special knowledge for proper specifications, completeness, price, coding, traffic and plant destination. The order is then sent, again by teletype, to the mill best suited to fill the order.

At the plant, a metallurgist determines the ingredients and the processes to be used. When he is finished with the specifications the order is turned over to the production planning staff which outlines the mill program and schedules operations to meet the delivery date.

Another system to speed customer service is a unique centralized inventory control over a vast warehouse chain. There are more than 30 standard specialty items, ready at points where they are likely to be needed in a hurry.

With the centralized control, the items in each of the warehouses become one huge stockpile. The brain of the system is a computer in the Pittsburgh control center which makes it possible to know at all times the exact location of any of the products in any and all of the warehouses.

Thus, if a customer wants a specific kind of steel which the salesman finds is not available at the local warehouse, he can, in a matter of minutes, query the control center for the nearest warehouse where the item is in stock.

The information is immediately available through records which are constantly updated by the computer, the order is written, filled and dispatched to the customer.

All of these qualities, company reputation, quality of product and service can only be achieved by the efforts of each and all the people who are Crucible.

### Youth Is Shot Twice By Same .22-Pistol

HERRIN, Ill. (AP) — Gene Whitecotton, 20, wounded in the left leg when a .22 caliber pistol discharged accidentally as he showed it to a friend, vowed:

"That's all; I'm getting rid of that gun."

Six months earlier he was wounded in the right leg with the same weapon, while practicing a fast draw.

### Educators Learn

CHATTANOOGA (AP)—The Chattanooga school board went back to school — after its members flunked their math. After Max Vann, head of the city high school mathematics department, outlined a new math program for the schools, the board members confessed they didn't understand. They asked Vann for a couple hours of instruction.

### Coach Of Champions Does 'Selling Job'

ROANOKE, Va. (AP) — Mrs. Genevieve Dickinson, who has coached eight state public speaking champions, says she doesn't teach speech. "I teach Mary and Johnny," she said. "I don't teach speech to Mary and Johnny."

Mrs. Dickinson says speech is a tool subject like grammar or writing. She does a "selling job" to make children like and understand the value of the elass to them. They learn to speak — something she believes of tremendous importance in an age when voices can circle the world in seconds.

### 'I Beg Your Pardon,' She's No Panhandler

BALTIMORE (AP) — The man and woman were begging money as a team near the bus terminal, but the man did all the talking. He asked one pedestrian for a dime for himself and something more "for my girl friend."

"What's the matter?" asked the pedestrian. "Can't the lady ask for her own dime?"

"She's no panhandler," said the bum, with a touch of indignation.

Mr. Baldwin can vouch for the quality of the steel, too. An employee in the metallurgical laboratory of Midland's Cold Strip Mill, he helps make sure that the steel shipped to automobile manufacturers is the very best that can be made.

CRUCIBLE STEEL COMPANY OF AMERICA

MIDLAND WORKS

# Weirton Steel Grew Rapidly After Beginning In 1905

## Nearby Mill Has 13,000 Upon Payroll

The Weirton Steel Co. had its beginning in 1905 at Clarksburg, W. Va., when the late Ernest T. Weir and his associates bought a rundown plant and formed the Phillips Sheet and Tin Plate Co.

Although the plant expanded, Weir saw the need for an integrated organization and in 1909 purchased land in the Weirton Valley. Before the year was out, 10 mills were in operation, and less than a year later there were 10 more. In 1911, the Pope Tin Plate Plant was purchased in Steubenville.

By 1915, 50 hot mills were in operation, making the company the world's largest independent producer of tin plate, a distinction it still holds today.

Weirton Steel grew rapidly and in 1929 Weir initiated the formation of the National Steel Corp., which he served as chairman and chief executive until his death in 1957.

National Steel, today headed by Chairman Thomas E. Millsop and President Paul Carnahan, is the nation's fifth largest steel producer. Charles G. Tournay is president of the Weirton Steel Co. division, which employs approximately 13,000 people in the tri-state area.

Today from the plants of Weirton Steel come tin plate, steel strip and sheets, galvanized sheets, zinc - coated steel and many other products familiar to people everywhere steel and steel products are used.

THE WORLD'S LARGEST OPEN HEARTH FURNACE, with a capacity of 600 tons per heat, receives a "drink" of hot metal at the Weirton Steel Co. division of the National Steel Corp. The function of the open hearth furnace is to refine its charge of raw materials into steel with predetermined specifications. Raw Materials consist principally of iron and steel scrap, blown metal from the Bessemers, molten pig iron from the blast furnaces, limestone which collects impurities to form a slag, small additions of alloys and iron ore. Weirton Steel operates a total of 14 furnaces.

## Steel Presses Research In Battle Of The Imports

The battle for the American steel market has been joined between American steel firms and foreign imports.

The battleground is the research laboratories of the big corporations here in America. The big producers are devoting more and more attention to higher quality, more even quality, production of steels which cannot easily be produced, stronger steel, more versatile steel—and lower costs.

Though foreign production hasn't cut too deeply into American sales yet, the potential is real.

Roger M. Blough, chairman of the board of U.S. Steel, pointed out recently that Japanese steelmakers can buy scrap on the West Coast, transport it to their mills in Japan and then ship finished steel products back to California and there undersell domestic producers.

"To meet foreign competition we must vigorously and continuously search and develop new and better products, improved services and more efficient sales methods," Blough said.

Steel researchers are working on such things as:

Improvement in present alloy steels with an aim toward greater strength per unit weight.

Development of suitable new steels for the field of missiles, space vehicles and manned aircraft.

Studies in cooperation with the Atomic Energy Commission for low cost steels for use in nuclear reactors;

Advanced studies with the electron microscope to study the movement, under stress, of groups of atoms in metal;

Basic studies of ore reduction;

Plans for the first, fully-instrumented and equipped four - foot diameter, experimental blast furnace making possible more knowledge of the complex processes that take place inside a blast furnace to improve the latter's efficiency;

Steel officials agree that a company must "keep a jump ahead" of competition in research in order to supply new products as soon as they are needed.

## 'Mother Hen' Due High College Degree

RICHMOND, Va. (AP) — Miss Helen Monsell has received a doctor of letters degree from the University of Richmond where she has been registrar and "mother hen" for 39 years.

During that time she has written 25 books — histories and mysteries for children — and now, she says, she intends to take up writing "seriously."

## *Costly Tools Play Role In Steel Output*

While it takes many different human skills to turn out the wide assortment of steels produced by Crucible, these skills alone are not enough.

They must be supported by modern and costly tools and equipment — mechanical marvels of today's American industrial might which help Crucible employes produce more and better while making jobs easier and safer.

The London Economist once spelled it out as follows: "If our children are going to produce twice as much as we do they are not going to do it by working harder than we do or by being cleverer than we are, but by having twice as many inanimate slaves to assist them. The way to plenty is to build up the national capital of machines, of buildings to house them in, of power to drive them, and of communications between them."

Crucible employes have as their assistants the finest and most complete array of these inanimate servants that money can buy: from modern typewriters and electronic computers to giant iron and steel melting furnaces.

Directed by progressive and visionary management, Crucible has spent more than $150,000,000 since the end of World War II for additions to an improvements of its plant and equipment. This is quite an expenditure for a company whose total plant and qeuipment net value in 1946 was only $29,600,000.

Among Crucible's largest and costliest pieces of equipment are the three large blast furnaces at its Midland works. In these tall structures (the newest one known as No. 1 is as high as an 18-story building) iron ore, coke and limestone are bought together to form metallic iron. No. 1 was constructed in 1952 at a cost of $12,000,000.

Crucible's steel melting facilities are located at Midland, Sanderson - Halcomb works in Syracuse, and Spaulding works in Harrison, N. J.

Melting special products like titanium and high purity alloys requires specialized equipment.

At the Titanium division in Midland there are 11 consumable electrode vacuum furnaces for melting titanium, while at Sanderson - Halcomb's Vacuum Metals, division, high purity alloys are melted in 3 vacuum induction furnaces with 3,000, 2,200 and 600 pound capacities.

## *'Survival Plan'*

### That's How Weirton Steel Looks At Promotion Of Products

*(In the March issue, editors of Weirton Steel's monthly "Bulletin" explained the importance of the Steelmark campaign to those communities whose economic life depends primarily on steel. Their remarks, reprinted below, present a clearcut challenge to such communities.)*

For more than 55 years, the Weirton Steel Co. has been a reliable producer of quality steel at a competitive price.

During that time, employes have demonstrated beyond a doubt that they are proud of their jobs and their company and that they will work hard to protect both. They have now been called upon again and have lined up solidly behind President C. G. Tournay in his efforts to strengthen the company's competitive position.

Not only employes, but many organizations throughout the community have joined in the "Better Buy—Steel" campaign of the Weirton Junior Chamber of Commerce and the promotion of the Steelmark as a buyers' guide to quality products.

The Weirton Chamber of Commerce has endorsed the effort and its individual members have taken the lead in creating public awareness of the project's importance. The object of "Better Buy—Steel" is to encourage the purchase of American - made steel products and food and drinks in tin cans. Public response has been excellent and sale of canned food and drinks has increased.

Canned beverages, of course, have many practical advantages to the distributor, the retailer and the consumer. To the consumer who is also a steelworker, however, the purchase of canned drinks offers a greater reward: Job security. Every time a steelworker — or any other consumer — buys canned food or drink he is increasing the demand of some can company for tin plate.

And Weirton Steel produces about one-fifth of all the tin plate in the industry. As far as Weirton Steel employes and their neighbors are concerned, there can be no better reason for buying cans and other American steel products.

This basic lesson has been learned quickly in Weirton. The cooperative effort, with organizations and individuals uniting for their own good, has spread through the community.

What has happened in Weirton is an example of what can happen in any community in America. If the instinct for progress is strong enough, any community can do as Weirton has done, and awaken its citizens to the economic facts of life. It is the hope of President Tourney and the management of the Weirton Steel Co. that Weirton's example will be followed. With vigorous action in every steel-producing community in the country, the steel industry can meet its competition head-on and protect its employes and their jobs.

## Man Believed Oldest Gold Rush Survivor

TAYLORVILLE, Ill. (AP) — D. D. Sharp, 90, is believed to be the oldest living survivor of the Alaskan Gold Rush of 1898.

Although he did not strike it rich, Sharp found enough gold by panning to keep going.

And once in a while, he would saw lumber for a little money and earned about $20 a week. Eggs were $12 a dozen, and tobacco was $5 a pound, he recalls.

## Couple Babies Turn Up At Wrong Homes

OKLAHOMA CITY (AP) — A couple of 4-day old infants left the same hospital only to turn up in the wrong homes.

The babies belonged to Mr. and Mrs. Albert Grimes and Mr. and Mrs. Jerry Woods.

One father discovered the slip-up when he undressed his tot and found his name - tape read something other than his given name.

He quickly called the other father. The babies were returned to the hospital and exchanged.

The switch apparently took place after the tots were dressed in identical clothing and taken to their mothers' rooms before going home.

## Flowers Flunk Out

MERIDEN, Conn. (AP) — The Board of Education got into trouble when announcements were made at the two high schools telling girls not to wear corsages to school dances. The board received protests from 12 florists.

The Weirton Steel Co. had its beginning in 1905 at Clarksburg, W. Va., when the late Ernest T. Weir and his associates bought a rundown plant and formed the Phillips Sheet and Tin Plate Co.

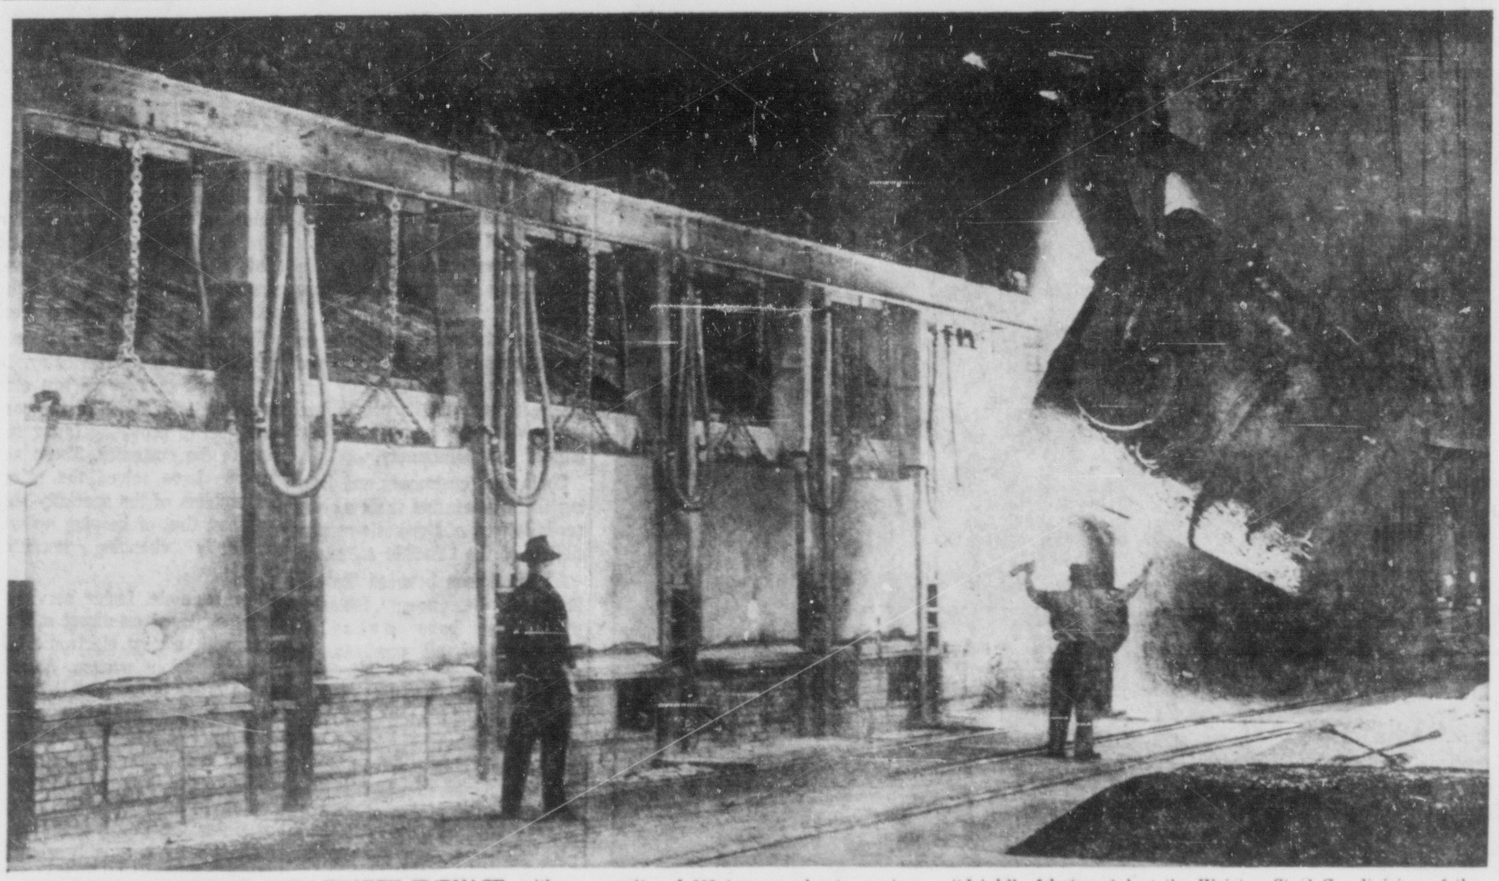
Although the plant expanded, Weir saw the need for an integrated organization and in 1909 purchased land in the Weirton Valley. Before the year was out, 10 mills were in operation, and less than a year later there were 10 more. In 1911, the Pope Tin Plate Plant was purchased in Steubenville.

By 1915, 50 hot mills were in operation, making the company the world's largest independent producer of tin plate, a distinction it still holds today.

Weirton Steel grew rapidly and in 1929 Weir initiated the formation of the National Steel Corp., which he served as chairman and chief executive until his death in 1957.

National Steel, today headed by Chairman Thomas E. Millsop and President Paul Carnahan, is the nation's fifth largest steel producer. Charles G. Tournay is president of the Weirton Steel Co. division, which employs approximately 13,000 people in the tri-state area.

Today from the plants of Weirton Steel come tin plate, steel strip and sheets, galvanized sheets, zinc - coated steel and many other products familiar to people everywhere steel and steel products are used.



THE WORLD'S LARGEST OPEN HEARTH FURNACE, with a capacity of 600 tons per heat, receives a "drink" of hot metal at the Weirton Steel Co. division of the National Steel Corp. The function of the open hearth furnace is to refine its charge of raw materials into steel with predetermined specifications. Raw Materials consist principally of iron and steel scrap, blown metal from the Bessemers, molten pig iron from the blast furnaces, limestone which collects impurities to form a slag, small additions of alloys and iron ore. Weirton Steel operates a total of 14 furnaces.

## Steel Presses Research In Battle Of The Imports

The battle for the American steel market has been joined between American steel firms and foreign imports.

The battleground is the research laboratories of the big corporations here in America. The big producers are devoting more and more attention to higher quality, more even quality, production of steels which cannot easily be produced, stronger steel, more versatile steel—and lower costs.

Though foreign production hasn't cut too deeply into American sales yet, the potential is real.

Roger M. Blough, chairman of the board of U.S. Steel, pointed out recently that Japanese steelmakers can buy scrap on the West Coast, transport it to their mills in Japan and then ship finished steel products back to California and there undersell domestic producers.

"To meet foreign competition we must vigorously and continuously search and develop new and better products, improved services and more efficient sales methods," Blough said.

Steel researchers are working on such things as:

Improvement in present alloy steels with an aim toward greater strength per unit weight.

Development of suitable new steels for the field of missiles, space vehicles and manned aircraft.

Studies in cooperation with the Atomic Energy Commission for low cost steels for use in nuclear reactors;

Advanced studies with the electron microscope to study the movement, under stress, of groups of atoms in metal;

Basic studies of ore reduction;

Plans for the first, fully-instrumented and equipped four - foot diameter, experimental blast furnace making possible more knowledge of the complex processes that take place inside a blast furnace to improve the latter's efficiency;

Steel officials agree that a company must "keep a jump ahead" of competition in research in order to supply new products as soon as they are needed.

## 'Mother Hen' Due High College Degree

RICHMOND, Va. (AP) — Miss Helen Monsell has received a doctor of letters degree from the University of Richmond where she has been registrar and "mother hen" for 39 years.

During that time she has written 25 books — histories and mysteries for children — and now, she says, she intends to take up writing "seriously."

## *Costly Tools Play Role In Steel Output*

While it takes many different human skills to turn out the wide assortment of steels produced by Crucible, these skills alone are not enough.

They must be supported by modern and costly tools and equipment — mechanical marvels of today's American industrial might which help Crucible employes produce more and better while making jobs easier and safer.

The London Economist once spelled it out as follows: "If our children are going to produce twice as much as we do they are not going to do it by working harder than we do or by being cleverer than we are, but by having twice as many inanimate slaves to assist them. The way to plenty is to build up the national capital of machines, of buildings to house them in, of power to drive them, and of communications between them."

Crucible employes have as their assistants the finest and most complete array of these inanimate servants that money can buy: from modern typewriters and electronic computers to giant iron and steel melting furnaces.

Directed by progressive and visionary management, Crucible has spent more than $150,000,000 since the end of World War II for additions to an improvements of its plant and equipment. This is quite an expenditure for a company whose total plant and qeuipment net value in 1946 was only $29,600,000.

Among Crucible's largest and costliest pieces of equipment are the three large blast furnaces at its Midland works. In these tall structures (the newest one known as No. 1 is as high as an 18-story building) iron ore, coke and limestone are bought together to form metallic iron. No. 1 was constructed in 1952 at a cost of $12,000,000.

Crucible's steel melting facilities are located at Midland, Sanderson - Halcomb works in Syracuse, and Spaulding works in Harrison, N. J.

Melting special products like titanium and high purity alloys requires specialized equipment.

At the Titanium division in Midland there are 11 consumable electrode vacuum furnaces for melting titanium, while at Sanderson - Halcomb's Vacuum Metals division, high purity alloys are melted in 3 vacuum induction furnaces with 3,000, 2,200 and 600 pound capacities.

## *'Survival Plan'*

### That's How Weirton Steel Looks At Promotion Of Products

*(In the March issue, editors of Weirton Steel's monthly "Bulletin" explained the importance of the Steelmark campaign to those communities whose economic life depends primarily on steel. Their remarks, reprinted below, present a clearcut challenge to such communities.)*

For more than 55 years, the Weirton Steel Co. has been a reliable producer of quality steel at a competitive price.

During that time, employes have demonstrated beyond a doubt that they are proud of their jobs and their company and that they will work hard to protect both. They have now been called upon again and have lined up solidly behind President C. G. Tournay in his efforts to strengthen the company's competitive position.

Not only employes, but many organizations throughout the community have joined in the "Better Buy—Steel" campaign of the Weirton Junior Chamber of Commerce and the promotion of the Steelmark as a buyers' guide to quality products.

The Weirton Chamber of Commerce has endorsed the effort and its individual members have taken the lead in creating public awareness of the project's importance. The object of "Better Buy—Steel" is to encourage the purchase of American - made steel products and food and drinks in tin cans. Public response has been excellent and sale of canned food and drinks has increased.

Canned beverages, of course, have many practical advantages to the distributor, the retailer and the consumer. To the consumer who is also a steelworker, however, the purchase of canned drinks offers a greater reward: Job security. Every time a steelworker — or any other consumer — buys canned food or drink he is increasing the demand of some can company for tin plate.

And Weirton Steel produces about one-fifth of all the tin plate in the industry. As far as Weirton Steel employes and their neighbors are concerned, there can be no better reason for buying cans and other American steel products.

This basic lesson has been learned quickly in Weirton. The cooperative effort, with organizations and individuals uniting for their own good, has spread through the community.

What has happened in Weirton is an example of what can happen in any community in America. If the instinct for progress is strong enough, any community can do as Weirton has done, and awaken its citizens to the economic facts of life. It is the hope of President Tourney and the management of the Weirton Steel Co. that Weirton's example will be followed. With vigorous action in every steel-producing community in the country, the steel industry can meet its competition head-on and protect its employes and their jobs.

## Man Believed Oldest Gold Rush Survivor

TAYLORVILLE, Ill. (AP) — D. D. Sharp, 90, is believed to be the oldest living survivor of the Alaskan Gold Rush of 1898.

Although he did not strike it rich, Sharp found enough gold by panning to keep going.

And once in a while, he would saw lumber for a little money and earned about $20 a week. Eggs were $12 a dozen, and tobacco was $5 a pound, he recalls.

## Couple Babies Turn Up At Wrong Homes

OKLAHOMA CITY (AP) — A couple of 4-day old infants left the same hospital only to turn up in the wrong homes.

The babies belonged to Mr. and Mrs. Albert Grimes and Mr. and Mrs. Jerry Woods.

One father discovered the slip-up when he undressed his tot and found his name - tape read something other than his given name.

He quickly called the other father. The babies were returned to the hospital and exchanged.

The switch apparently took place after the tots were dressed in identical clothing and taken to their mothers' rooms before going home.

## Flowers Flunk Out

MERIDEN, Conn. (AP) — The Board of Education got into trouble when announcements were made at the two high schools telling girls not to wear corsages to school dances. The board received protests from 12 florists.

# STEELMARK is more than a trade symbol to all of us who live in the Upper Ohio Valley!

The STEELMARK symbol represents all the great steel-producing companies in America and is a mark of quality for the thousands of steel products which proudly display this famous label. For all of us who live in the Upper Ohio Valley, STEELMARK has an extra-special significance because millions of tons of steel of almost every kind are produced here. And from this raw steel millions and millions of products are fabricated which serve people in every country in the world. Thus, STEELMARK is more than a trade symbol to thousands of families in our Ohio Valley neighborhood . . . it has become so important to our economic well-being that each of us should be concerned with how well STEELMARK products are being accepted everywhere . . . in the United States, Canada, Peru and Timbuktu! A good place to set an example is right at home in our own community . . . when you buy products made of steel, look for the mark that means quality and spells prosperity in a most "natural" way to the Upper Ohio Valley – S-T-E-E-L-M-A-R-K!

AS A PART OF ITS IRON ORE HANDLING FACILITIES, the Weirton Steel Co. operates this 1,284-foot-long conveyor belt. Ore bridges in background pick up iron ore from the stockpile (right) and place it in integral hoppers on the bridge, where it is automatically fed to the belt conveyor. The ore is carried by belt to the sinter plant or to a stationary hopper which can feed transfer cars to place ore in the blast furnace stock bins. The installation supplements a conveyor system installed in 1955 which transports coke from the coke plant to the blast furnaces where it is distributed by transfer cars to the stock bins.

## Automotive Industry Gains Coveted Goal

NEW YORK (AP)—The automotive industry has reached a long-sought goal—an engine which will deliver one horse-power for each pound of its own weight.

A California engineering company, says Steelways magazine, has unveiled a 175-pound engine which generates 175 horsepower. The American Iron and Steel Institute publication says the secret of the four-cyclinder engine is an engine block assembly made of thin stainless steel sheet.

The engine will be tested in sports and racing cars and boats.

# 'Fashions' In The Mills

What's the latest in men's apparel?

The safety engineers of the nation's steel plants could display enough outfits for a full-scale fashion show.

But for these fashions, the emphasis would be on safety, not style.

Everyone knows that through the years the steel industry has increasingly become a safer place to work.

Successful safety programs consist of many factors. One of the most conspicuous to the men on the job are the special safety clothes that they wear. Hard hats, safety goggles and safety shoes, for instance, are getting to be standard items of equipment.

—:—

**WHO WAS** the first person to wear a hard hat for safety? It was probably a prudent caveman, annoyed by bits of flying glacier, who defied convention and clapped a tortoise shell onto his bushy head.

The history of the industrial hard hat goes back to the sixth century, when an obelisk was being set up in front of St. Peter's in Rome.

The construction boss became disgusted by the number of men being laid low by errant chunks of masonry. He told the men to don battle helmets.

Hard hats worn today by steelworkers have come a long way from the tortoise shell or heavy battle helmets.

They weigh less than a pound, and are suspended by hammock headbands on a cushion of air that increases comfort while providing an extra barrier of insulation against injury.

Designed according to government specifications, the hat must withstand the shock of 40 foot-pounds, the equivilent of a five-pound hammer falling eight feet. Most can do much better than that, however.

Safety glasses made their first industrial appearance in 1870 in steel mills and chemical plants.

As other industries followed suit, the incidence of eye injuries dropped sharply. Today, there is a variety of styles for a variety of jobs.

—:—

**GOGGLES** with side shields protect workers from objects which can fly in at an angle.

Cup goggles protect men who are chipping, or working with molten iron or steel. Mask goggles with rubber or vinyl frames safeguard against splashing acid or fine dust.

Lenses are made of heat-treated glass, transparent plastic and wire screen. For melters and welders they are specially tinted to filter out harmful light rays.

Hard hats and goggles are commonplace in the mills, but less familiar to most steelworkes are the special head-to-toe safety outfits worn only for certain jobs.

When the blast furnace "keeper", for instance, is ready to cast a furnace, he dons a long wool coat and hood, special goggles and gloves, and flame - proof leather leggings which cover his legs and the tops of his safety shoes.

The men in the open hearth shops who tap the furnaces wear a heavy plastic face shield which is connected to their hard hats, safety goggles and gloves, a wool coat with asbestos patches, and leather leggings.

A solution tester at the continuous pickle tanks will wear a rubber apron and rubber gloves, as well as a heavy plastic face shield which hangs down from his hard hat.

# How Steel, Iron Differ

Several months ago a great many persons living in the East Liverpool area might have asked, "What's the Steelmark?"

"Steelmark Days" was devised partially to answer that vey question.

Just about everyone knows that the steelmark is a bright new symbol which identifies steel products and points out that modern steels are bright and gay and light and stylish — in step with the times.

—:—

**SO, NOW** that you know what the steelmark is, here's another question for you:

What is steel?

No pulling of your leg is intended. Everyone knows that steel is a metal, and that a lot of it is made at Midland and Weirton. But, seriously, what is steel? How does it differ from iron?

The questions have been asked, so they had better be answered.

Iron contains a number of elements such as manganese, silicon, carbon, sulphur and phosphorus in such high proportions as to make it brittle.

To make steel, the Bessemer converters and open hearth furnaces are employed to burn out, or oxidize, these elements.

The carbon in the iron is not burned out entirely, but reduced to less than 1 per cent. In short, ordinary steel is an alloy of iron with carbon, and called carbon steel.

Plain cabon steel constitutes about 90 per cent of all steel produced. The remaining 10 per cent consists of alloy steels, made by adding precise amounts of one or more alloying metals to a heat of steel in the open hearth furnace or after it has been tapped.

Some of the principal alloys are manganese, nickel, copper, chromium and cobalt. Each alloy is added, depending on the specific purpose the steel is to serve.

Steel with 1 per cent chromium, for instance, is frequently used to make ball bearings.

**STEEL WITH** about 12 per cent manganese is very tough and is used in railroad crossings, switches and power shovels, which must withstand hard usage.

High - speed cutting tools made of steel with 18 per cent tungsten do not lose their cutting ability, even when turning so fast that the point of the tool becomes red hot.

The alloy steels probably best known to the public are stainless steels. Either chromium o a combination of chromium and nickel are the alloys that are used, and a multitude of stainless steels for a multitude of purposes results simply from varying the amounts of the alloys.

Actually, the answer to "what is steel?" is not an easy one, as it can come in so many versatile packages.

Using various combinations of the alloy elements, as a cook uses ingredients, modern steels are made according to thousands of recipes.

# Steel Chemist Assumes Role Of 'Custom Tailor'

The steel chemist is the custom tailor of steelmaking.

He is responsible for analyzing the composition of this vital metal to a hundredth, and sometimes, thousandths of a per cent.

The chemists make thousands of chemical determinations a month to assure that the steel produced is within the ranges specified on a customer's order. Each batch or heat of steel is a tailor-made item.

Too much or too little of alloying elements such as carbon, manganese, silicon, nickel or chromium could cause cracking or breaking of the material when formed by the customer.

From raw materials to the finished steel products, the chemist plays an important role.

He must extract samples from the millions of tons of raw materials, such as iron ore, stone and coal to determine its composition so that the product mix may be controlled.

Taking a sample of a few pounds of raw material, and reducing it to a 3-ounce package for an analysis, which is representative of the original material weighing thousands of tons, is not a simple task.

Through rigid sampling procedures, the material is ground, mixed and quartered into an exacting cross-section of the mountains of stone, ore or coal shipped into the plant by boat and rail.

The raw material chemist in the main laboratory performs the analysis of these materials in addition to various other samples such as water, castings, corrosion products and other miscellaneous samples.

Just as a doctor charts a patient's temperature, the open hearth chemist charts the progress of a heat of steel by determining the carbon content. The amount of carbon determines to a great degree the hardness and other properties in steel.

To obtain a rapid analysis, a large spoonful of molten steel is taken from the furnace and the chemical action is stopped or "killed" by adding a prescribed amount of aluminum. It is then poured into a special mold.

After cooling, the cast sample is placed in a carbometer. This instrument measures the magnetic permeability which is then translated into carbon analyses by the chemist. The results are reported in less than five minutes from the time the sample is taken from the furnace. More than a dozen carbometer tests are made during the "cooking" of steel.

The open hearth chemist also runs analyses of the other elements used in the recipe for steel, including manganese, phosphorous and sulfur.

One of the important ingredients in the steel recipe is scrap metal, which is added to the molten iron and other materials in the open hearth furnace.

Because scrap tends to contain many alloying elements such as cooper, nickel and chromium, the chemist must analyze its contents to assure that the steel being made will be in accordance with the customer's order. A molten sample is taken from the furnace, cooled and delivered to the main laboratory where it undergoes an analysis by a spectrometer.

A spectrometer is an instrument that can record, through an electronic process, the concentration of many alloying elements in the sample under study.

**LADLE BRICK PRESS.** The Wellsville plants of the McLain Refractories Division of the H. K. Porter Co., Inc., manufacture ladle brick which are shipped to area steel mills. The workers are removing some of the brick from a large press. Ladle brick is one of the major products at the plants.

★ ★ ★ ★ ★ ★

# *McLain Products Used Principally In Steel Industry*

The bricks produced by the McLain Works, Refractories Division, H. K. Porter Co., Inc., are primarily used to line the ladles used in the pouring of iron and steel.

The clays from which McLain fire bricks are made were formed millions of years ago in the upper Ohio Valley. They are a particular kind of clay usually found immediately below seams of coal. It is believed that they were part of the soil upon which grew the lush, giant vegetation that eventually decomposed into the coal upon which our modern industrialism has been constructed.

E. S. McLain & Son first were brokers of fire clay sold principally to the steel industry in Pittsburgh.

—:—

**IN THE EARLY** 1900's there were a large number of clay banks along the Ohio River. A number of brick plants were built in the vicinity of these clay banks, manufacturing what was known in Pittsburgh steel circles as "river brick".

It is believed that these bricks were principally wire - cut and were used for building and paving. They also found their way into the steel plants. The clay was mined in the coal regions of the Ohio Valley and western Pennsylvania. Refractories are, by definition, materials which resist or withstand high temperatures — up to 3400 degrees Fahrenheit. McLain products are used primarily in the steel industry, Dando ladle brick and Champion Wire Cut ladle brick being used in open hearth and electric furnace ladles for ladle linings to contain the molten steel. Hot top brick is used on ingot molds for high grade steels. Runner brick, sleeves and nozzles and mold plugs are also used in the pouring pit in the manufacture of high grade steels.

"Quality" is the byword of McLain's products. Over the years they have gained an outstanding reputation because of high engineering skill and technical know-how.

The $2½ - million - dollar modernization and investment program initiated by H. K. Porter at the McLain Works at Wellsville will be completed in June of this year. This program consisted of two separate projects — (1) a new modern mechanized clay mine and (2) new modern tunnel kilns and related facilities.

The new mine, known as the Pleasant Valley Mine, is located on Route 45 one mile from the intersection of Routes 45 and 7 at Wellsville.

This location was chosen because it provides access to the Lower Kittanning vein of clay which by today's standards company officials say is probably the best ladle brick clay available in the entire country.

—:—

**IT WAS** necessary to remove approximately 10,000 cubic yards of earth to expose a rock ledge into which the tunnel entries could be started. The tunnel entries were made by the conventional methods of air drilling, blasting and loading out. The first 250 feet of each tunnel were lined with re-inforced concrete.

This mine is known as a "trackless" mine in which all the mining equipment is rubber tire mounted, self-propelled and the clay is conveyed from the mine on a 36-inch belt conveyor. The clay as delivered from the mine varies in size from fines up to 20-to-30-inch lumps. From the haulage conveyor it is moved through a roll type crusher where it is reduced in size to a maximum of 3½-inch lumps.

From the crusher the clay is conveyed and automatically weighed as it is delivered to a bucket elevator which elevates the material and discharges it on to a reversing conveyor known as a tripper conveyor, which proportionately feeds it to one of three 350 ton storage bins. It is discharged from the storage bin into dump trucks which pass over a set of truck scales in which the weight is automatically recorded and ejects a weight receipt for the driver.

The driver then takes the load of clay to one of the local plants for further processing into ladle brick. In connection with the tunnel kilns and related facilities, the project includes raw material storage and handling facilities; grinding, screening and pressing facilities; drying and burning facilities, and finished product storage facilities.

The raw clay storage and handling facilities consists of a truck hopper which receives the clay as it is delivered by truck from the mine. The action of the truck backing up to the hopper automatically starts the apron feeder conveying the clay out of the hopper into a bucket elevator where it is elevated and discharged into one of two 1,000 ton concrete stave silos.

The clay is discharged from these silos by means of electric vibrating feeders which discharge onto the 18" conveyor belt for delivery into the plant.

—:—

**IN THE PLANT** the clay is fed to a dry pan where moisture is added, and the material is ground to the proper particle size. It is then screened and conveyed to an agitator type feeder which feeds the material to a mechanical brick press here the clay is formed into a brick of the proper weight, size and shape.

The pressed brick are stacked or hacked on tunnel kiln cars 6 feet wide by 8 feet long, approximately 2,000 brick to a car. These cars are then placed in a dryer where they are continuously moving through the dryer becoming bone dry in approximately 60 hours at a temperature of 190 degrees F. The cars of dried brick are removed from the dryer and placed in a tunnel kiln. They are moving continuously, but slowly through the tunnel kiln, passing progressively into a area of higher temperature until obtaining the finishing temperature of approximately 2000 degrees F.

After reaching this temperature, the cars then pass through a controlled cooling zone before being removed from the kiln. From the kiln the cars are transferred to an unloading station where the brick are sorted and palletized.

The palletized brick are then stockpiled by fork lift trucks in a covered storage area ready for shipment.

The foregoing is a brief description of the process involved in the manufacture of ladle brick, but the highlights of the improved facilities provided for by the new investment are as follows:

The raw material handling facilities provide improved blending; the screening for burned particle sizing; the pressing for more uniform size and weight.

All contribute to upgrading quality. However, the installation of two Swindell-Dressler tunnel kilns embodying all the latest engineering techniques provide the most modern facilities available for burning a high quality, uniform ladle brick.

McLain Works plants include: Champion and Buckeye at Wellsville; Dando at Merrill, Pa.; Clarion at St. Charles, Pa.; Colonial at New Salisbury, and one near Irondale.

Other Porter divisions are: Cleveland, Connors Steel, Delta-Star Electric, Henry Disston, Leschen Wire Rope, Quaker Rubber, Riverside - Alloy Metal, Vulcan Crucible Steel, W-S Fittings and H. K. Porter Co. (Canada) Ltd.

## *Here's List Of Products By Crucible*

Here is a breakdown on the products turned out at the various Crucible Steel operations:

Midland Works — Pig iron, alloy and special carbon blooms, billets, plates, bars, solid and hollow drill steels, cold drawn products, forging stock, stainless bars, sheet and strip, agricultural discs and shapes, electrical steels, titanium and vacuum melted alloys

Sanderson - Halcomb Works, Syracuse, N. Y. — High speed, tool steel, stainless, high alloy, super alloy, vacuum melted alloy, and titanium bar, rod, and wire products

Spaulding Works, Harrison, N.J. —Specialty carbon, alloy and stainless cold rolled strip and wire products, Alnico magnets, Rexweld hard surfacing rod, Rexalloy castings and tool bits

Spring Division, Pittsburgh, Pa. —Coil and elliptic springs

Trent Tube Co., East Troy, Wis., and Fullerton, Calif. — Electricweld stainless, high alloy, and titanium pipe and tubing

Magnatronics, Inc., Elizabethtown, Ky. — Ceramic permanent magnets

Crucible Steel of Canada Ltd., Sorel, Quebec — Stainless, alloy and tool steel ingots, blooms, billets, bars and forgings

Acciaierie Crucible Vanzetti S.p.A., Milan, Italy — Stainless, alloy and tool steel ingots, blooms, billets, bars, forgings and steel castings

## Check May Not Be Worth While Cashing

COLUMBUS, Ohio (AP) — S. Sgt. James L. Allen of nearby Lockbourne Air Force Base has received a government check that may not even be worth his while cashing.

Allen, a native of Bristow, Okla., says he is a full-blooded member of the Yuchi Indian tribe. Several years ago, he said, the government made a settlement "of some kind" with his tribe. So far, he has received about $6 in "headright" money.

Recently he got another such payment from the government.

U. S. Treasury experts estimated it cost the government about $1, including keeping of records, to give Allen another share.

The check, which could cost a nickel or a dime to cash in a bank or supermarket, was for one cent.

# *Here's Story Behind 'Steelmark'*

The Steelmark program, an industrywide activity to merchandise steel and products made of steel at the consumer level, is being coordinated through the American Iron and Steel Institute.

The program is built around a distinctive symbol adopted by the industry — the Steelmark. This is an ultra-modern insignia suggesting the lightness, smartness and versatility of modern steel and products made from it.

In its simplest form the Steelmark symbol features three hypocycloids — four-pointed, starlike figures — within a circle which also embraces the word Steel.

Its design permits variations of the steel insignia to identify special kinds of steel such as stainless, galvanized, steel spring wire, tool steel.

—:—

**THE STEELMARK** symbol, imprinted in four colors, was made available initially in three sizes of hang tags, gummed labels and pressure-sensitive stickers to be attached to consumer products made from steel.

In addition, it is being used in company advertisements, catalogs and sales literature as well as stationery, postage cancellation advertising and a host of other applications. Some forms of the hang tags carry selling messages designed to heighten consumer interest in products made from steel.

"We want to be sure the American consumer has the correct modern image of steel in his mind," Benjamin F. Fairless, president of the Institute, asserted at ceremonies launching the program.

"Products of steel can be light, modern and outstandingly stylish. At the same time they offer the durability, reliability and modest cost for which steel is famous.

"We are now bringing great new emphasis to bear on the vital role of merchandising. The Steelmark program is an evidence of the vigorous preparation of the steel industry to move forward with the opportunities of the decade of the '60's."

—:—

**DEVELOPED AS** a symbol for the industry, the Steelmark was tested by one member of the Institute for more than a year on a wide variety of products at the retail level and gained extraordinary acceptance by retailers and steel product manufacturers.

Designed to provide a powerful new selling tool for retailers and steel product manufacturers, the program was spearheaded initially by basic steel producers through their advertising, sales and merchandising efforts.

Steel company advertisements incorporating the insignia following its industrywide adoption have appeared in many consumer and trade publications.

"The adoption of the Steelmark program ushered in a new era of salesmanship in the steel industry," according to Norman W. Foy, chairman of the Institute Committee to Promote the Use of Steel.

The program "comes at the start of a decade which will carry steel salesmen closer to the retail level than ever before," Foy added.

He said that extending steel salesmanship to that level "will contribute not only to sales but may contribute just as importantly to the development of new steels." He explained: "The point of sale is unmatched as a source of information on market possibilities for new products, many of which may require new qualities in steel."

For these reasons, Foy continued, the industry "looks forward to a decade which will see an intensification of research and development. This trend has made possible many of the wondrous conveniences we have — and an economy undreamed of a decade ago." In the future, he remarked, steel "will prove its presence (in these developments) through the Steelmark."

The symbol is the outgrowth of a nationwide study which revealed that although steel is synonomous with quality in the minds of the public, people frequently do not recognize products as being made of steel. There are today thousands of types, grades and finishes of steel.

## Youngsters On Hikes To Be Well Equipped

ELMIRA, N. Y. (AP) — Youngsters going on overnight hikes with the Elmira YMCA Fun Club don't intend to be "caught short" in any emergency.

The list of items taken on hikes includes: flashlight, canteen, cook kit, knife, fork, spoon, knapsack, sleeping bag, waterproof ground cloth, poncho, scout knife, matches, notebook, pencil, handkerchief, an emergency dime for a telephone call, wallet, jacket or sweater, food for three meals, sneakers or moccasins, comb, towel, toothbrush, toothpaste, bathing trunks.

Steel

We Are Happy to join the community in saluting the men who make steel . . . during Steelmark days being celebrated this month of May. We take this opportunity, too, to extend thanks to the communities that manifest their concern . . . about the important part the Steelmark plays in our mutual well-being . . . by instituting means to promote the use of products made of domestic steel. We recognize that if Weirton Steel employees, their friends and neighbors, look for the Steelmark when they buy, and wherever practical purchase their food and drinks in convenient tin cans, we will have taken an important step toward keeping the Upper Ohio Valley "a Good Place to Live . . . A Friendly Place to Work".

**LADLE BRICK PRESS.** The Wellsville plants of the McLain Refractories Division of the H. K. Porter Co., Inc., manufacture ladle brick which are shipped to area steel mills. The workers are removing some of the brick from a large press. Ladle brick is one of the major products at the plants.

★ ★ ★ ★ ★ ★

# McLain Products Used Principally In Steel Industry

The bricks produced by the McLain Works, Refractories Division, H. K. Porter Co., Inc., are primarily used to line the ladles used in the pouring of iron and steel.

The clays from which McLain fire bricks are made were formed millions of years ago in the upper Ohio Valley. They are a particular kind of clay usually found immediately below seams of coal It is believed that they were part of the soil upon which grew the lush, giant vegetation that eventually decomposed into the coal upon which our modern industrialism has been constructed.

E. S. McLain & Son first were brokers of fire clay sold principally to the steel industry in Pittsburgh.

—:—

**IN THE EARLY** 1900's there were a large number of clay banks along the Ohio River. A number of brick plants were built in the vicinity of these clay banks, manufacturing what was known in Pittsburgh steel circles as "river brick".

It is believed that these bricks were principally wire - cut and were used for building and paving. They also found their way into the steel plants. The clay was mined in the coal regions of the Ohio Valley and western Pennsylvania. Refractories are, by definition, materials which resist or withstand high temperatures — up to 3400 degrees Fahrenheit. McLain products are used primarily in the steel industry, Dando ladle brick and Champion Wire Cut ladle brick being used in open hearth and electric furnace ladles for ladle linings to contain the molten steel. Hot top brick is used on ingot molds for high grade steels. Runner brick, sleeves and nozzles and mold plugs are also used in the pouring pit in the manufacture of high grade steels.

"Quality" is the byword of McLain's products. Over the years they have gained an outstanding reputation because of high engineering skill and technical know-how.

The $2½ - million - dollar modernization and investment program initiated by H. K. Porter at the McLain Works at Wellsville will be completed in June of this year. This program consisted of two separate projects — (1) a new modern mechanized clay mine and (2) new modern tunnel kilns and related facilities.

The new mine, known as the Pleasant Valley Mine, is located on Route 45 one mile from the intersection of Routes 45 and 7 at Wellsville.

This location was chosen because it provides access to the Lower Kittanning vein of clay which by today's standards company officials say is probably the best ladle brick clay available in the entire country.

# Crucible Proud Of War Service

Crucible Steel's part in the production achievements on which the nation's survival depended in World War I and World War II is one of its proudest records.

Military requirements call for steels of the highest quality. And in periods of war, special purpose steels are of crucial importance in enabling manufacturers to convert, retool and expand facilities for the emergency production of guns, ammunition, ships, aircraft, food and war material of every description.

A founding company of Crucible, the Benjamin Atha and Illingworth Co., had developed a new type armor - piercing shell for the U. S. Navy in the years before the Spanish - American War.

The Atha Works, at Harrison, N. J., on the site of the company's present Spaulding Works, became Crucible's ordnance center.

—:—

**AS EARLY** as 1910, the company began expanding its facilities at the Atha Works to produce armor - piercing shells and gun forgings for the U. S. government.

Crucible also developed a process to make steel for the Springfield rifle. This process later made the company a leading manufacturer of rifle barrel steel for military purposes.

At the beginning of World War I, Crucible contracted to make shells for the British and gun barrel forgings for Russian rifles.

When the United States became involved, the company supplied large quantities of steel for Lee-Enfield rifles, Lewis guns and Thompson sub - machine guns. Crucible also made guns and armor - piercing shells for the U. S. Navy, was a large manufacturer of torpedo launching tubes and the largest maker of periscope tubes.

—:—

**IN ORDER** to supply the needs of other wartime industry, all Crucible plants pushed the company's output of special purpose steels to record levels during the war years.

At the outset of World War II, Crucible contracted to manufacture ordnance for the Netherlands and the French and British governments.

While the Atha Works was being expanded to meet these commitments, the United States entered the conflict. Crucible became a leading supplier of high grade shells and gun steels to the U. S. Navy. In addition to guns ranging from 20-mm. to 12-inch, and shells from 37-mm. to 18-inch, the company manufactured submarine periscope tubes and was the largest maker of antenna masts.

Crucible made the first armor-piercing bombs and high - velocity shells for the Navy and was one of the first companies to receive the Navy "E" flag for production excellence.

World War II again demonstrated the key importance of Crucible steels in every major industry.

Demands were urgent and standards of quality were more stringent than ever before. New types of steel were required for new weapons and equipment. Production was again pushed to record levels.

# Crucible Puts Emphasis On Its Training

Training is an essential part of Crucible Steel's activity today.

Supervisory training was begun approximately 10 years ago because it was realized then that it was essential for supervisory people to be acquainted with new and constantly improving techniques and devices used in the making and processing of steels. It also was recognized that the human element is one of the most important factors in the day-to-day relationship between employer and the employe.

Today's training encompasses much more than the programs of 10 years ago. It covers the fundamentals of apprentice training, where young men who are attempting to become journeymen in the crafts — such as machinist trade, electrical trade, construction trade and brick department — are given training which follows a prescribed curriculum on the job. It is supplemented by academic training which gives the young craftsmen understanding and skill in the use of academic subjects related to the fundamentals of his work.

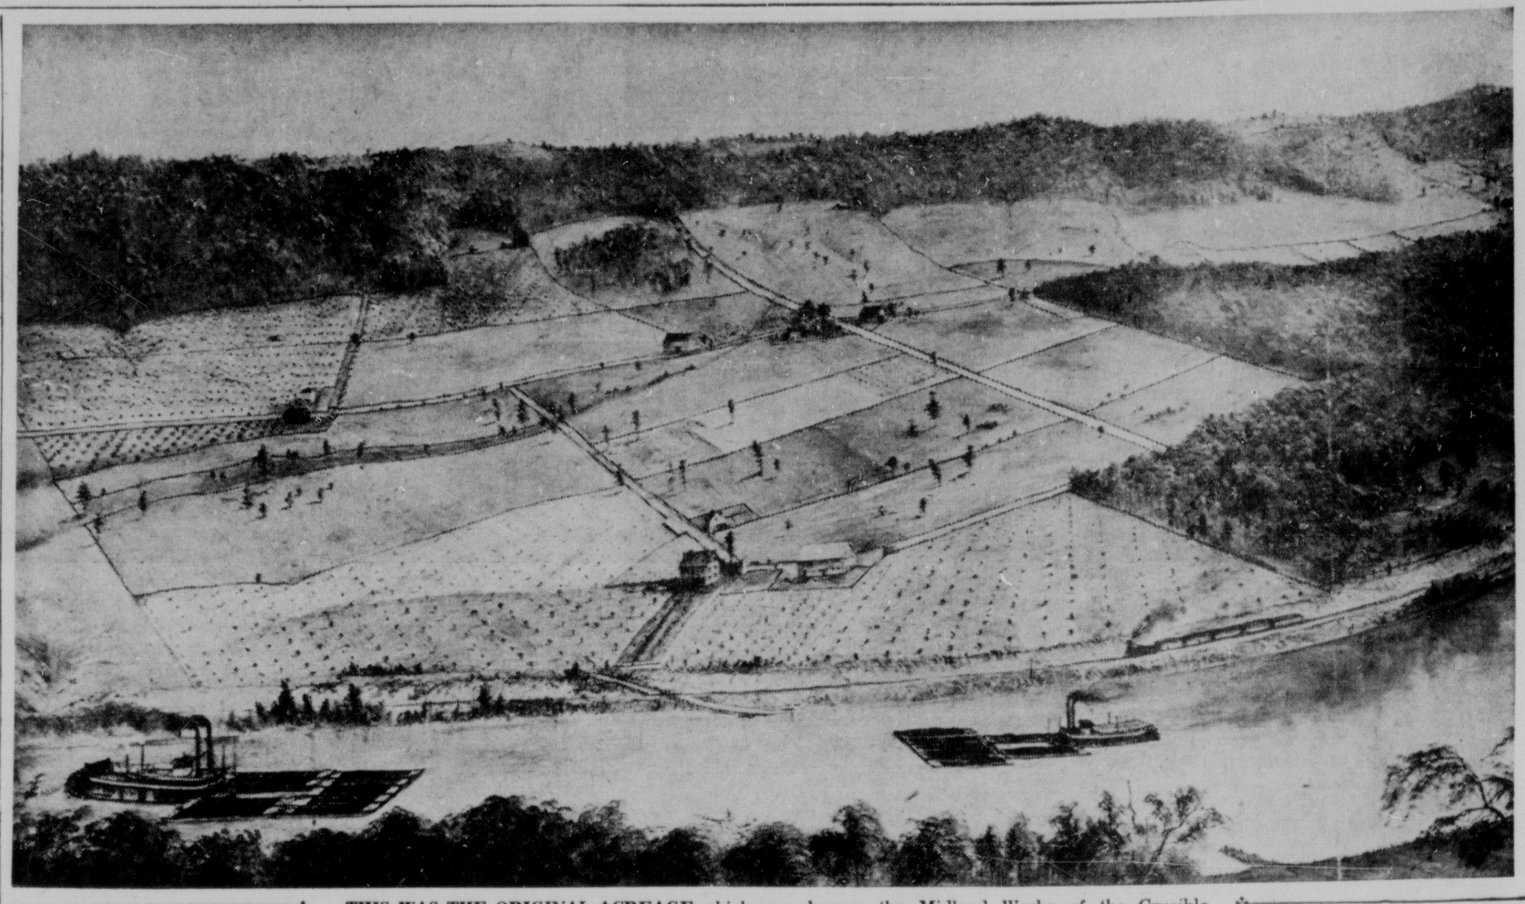
Others who are trained in special skills and given a general indoctrination on a plantwide scope are management trainees.

These are young men who, for the most part, have engineering or scientific degrees before coming to the company. They are quickly taught to apply the academic and technical skills which they have acquired through education to the practical realities of day-to-day steel plant activities.

All of this specialized training is essential in today's involved and highly intricate industrial operations.

Devices and mechanisms which are coming into common use throughout industry today were unheard of, or only an engineer's dream, 10 years ago. It is a commonly held opinion throughout the steel industry that the necessity for training will increase in future years.

Crucible has taken, and is continuing to take, further steps to prepare its people for any requirement that may arise in the foreseeable future.



**THIS WAS THE ORIGINAL ACREAGE** which now houses the Midland Works of the Crucible Steel Company of America. J. A. Neel of McKeesport, Pa., owned much of the land and what was once his family home is still being used by Crucible as an office—with many renovations and remodeling, naturally. The Neel homestead can be seen in the photo above.

## Tobacco Industry's Anniversary Slated

JAMESTOWN, Va. (AP) — Pocahontas may have saved the life of Captain John Smith, but she married an Englishman named John Rolfe.

The romance of Rolfe and the Indian princess will play an important part in next year's commemoration here of the 350th anniversary of the American tobacco industry.

Rolfe planted and sold the first successful crop of tobacco at Jamestown in 1612, saving the colony from economic collapse. From the beginning, tobacco has grown into a $7 billion industry.

The anniversary will be staged May 16-19 by the Jamestown Foundation.

The St. Lawrence Seaway project created 38,000-acre Lake St. Lawrence in Ontario.

## Family Custom

BUFFALO, N. Y. (AP) — Sociologist Gerhard J. Falk of Buffalo State Teachers College says a study he concluded recently in 86 American cities showed that 90 percent of all murders involve people related to each other and living in the same house.

# Steel Serves Housewife In Great Variety Of Ways

Ummm . . . smell those hamburgers sizzling on the grill outside.

As spring rolls into high gear, area families are dusting off their barbecue equipment and getting it in shape for the coming season.

But thanks to the good things that new developments in steel make possible, more and more people are able to enjoy the fun of a barbecue all year long.

Particularly with the developments in stainless steel, the fun that used to be confined to outdoors and nice weather, because grills got all discolored with use, is now completely practical indoors. The stainless still scrubs up bright and shining.

As to outdoor grills, the stainless steel means longer service because of its resistance to rusting.

Among the developments in kitchen accessories is a rotisserie that fits into a counter well in the kitchen, but can be taken out and run on bottled gas or with a long cord in the back yard this summer.

The satin luster of stainless steel has increasingly been acknowledged as a design element in the kitchen as in other areas of the home. Therefoe, in built-in ovens, in refrigeator or oven fronts, in counter tops, in cabinet doors . . . stainless steel shows its face and is welcome.

Just as it has gone to the table in high style flatware and serving accessories, stainless steel has taken to the stove top and the oven in utensils that make cooking a pleasure.

The same is true in food preparations. Everything from paring knives and spatulas to mixing bowls and measuring cups is available in stainless steel.

And while talking about food preparation, it would be an oversight not to mention the stainless steel kitchen sink.

Many a bride's rose - colored dreams have been shattered when her "first" kitchen features a "stained" rather than stainless sink.

As well as stainless steel, kitchen utensils and appliance made of steel are treated in other ways.

For example, porcelain-enameled steel is a kitchen coup for the bride and established homemaker alike. Bright yellows, soft greens and blues, charming and gay patterns highlight the handsome porcelain finish made strong by its steel backbone. Again, these are utensils that can go from the kitchen to the table with the ease of an aristocrat.

Another example of plated steel is chromium-plated steel for the kitchen. Some appliances are chromium-plated. Certainly many kitchen tables and chairs along with counter stools and utility carts are so treated.

And what is any kitchen without a can of food? Today's "tin" cans are strip steel coated with a thin layer of tin.

So from the steel shopping cart to the steel shelf of her kitchen, the homemaker's food in its steel container goes from her steel can opener to the steel pan on the steel range, from the steel serving accessory to the stainless steel fork on the dining table in a complete "steel" kitchen cycle.

## Dringing Drivers Would Be 'Branded'

COLUMBUS, Ohio (AP) — A constituent of State Rep. Terry Drake of Galion thinks Drake should introduce a measure to put a mark on drinking drivers.

His suggestion is that the car, truck or other vehicle of a person convicted of drunk driving be painted with alternate verticle black and white stripes — five inches wide — from front to rear.

The vehicle could not be sold, and the driver would be examined by the sheriff six months later to see if repainting in normal colors should be permitted.

## Auto Crash Causes Show Up In Planes

COLUMBUS, Ohio (AP) — Three human factors which have caused countless automobile accidents are beginning to show up in airplane crashes, says education specialist Norman J. Crabtree of the Ohio Division of Aviation.

They are (1) a tendency to be prouder of willingness to take chances, (2) trying to justify what one wants to do rather than what one knows is right and proper and (3) risking losses all out of proportion to possible gains — such as chancing a risky landing to save a few minutes.

# *Crucible Proud Of War Service*

Crucible Steel's part in the production achievements on which the nation's survival depended in World War I and World War II is one of its proudest records.

Military requirements call for steels of the highest quality. And in periods of war, special purpose steels are of crucial importance in enabling manufacturers to convert, retool and expand facilities for the emergency production of guns, ammunition, ships, aircraft, food and war material of every description.

A founding company of Crucible, the Benjamin Atha and Illingworth Co., had developed a new type armor - piercing shell for the U. S. Navy in the years before the Spanish - American War.

The Atha Works, at Harrison, N. J., on the site of the company's present Spaulding Works, became Crucible's ordnance center.

—:—

**AS EARLY** as 1910, the company began expanding its facilities at the Atha Works to produce armor - piercing shells and gun forgings for the U. S. government.

Crucible also developed a process to make steel for the Springfield rifle. This process later made the company a leading manufacturer of rifle barrel steel for military purposes.

At the beginning of World War I, Crucible contracted to make shells for the British and gun barrel forgings for Russian rifles.

When the United States became involved, the company supplied large quantities of steel for Lee-Enfield rifles, Lewis guns and Thompson sub - machine guns. Crucible also made guns and armor - piercing shells for the U. S. Navy, was a large manufacturer of torpedo launching tubes and the largest maker of periscope tubes.

—:—

**IN ORDER** to supply the needs of other wartime industry, all Crucible plants pushed the company's output of special purpose steels to record levels during the war years.

At the outset of World War II, Crucible contracted to manufacture ordnance for the Netherlands and the French and British governments.

While the Atha Works was being expanded to meet these commitments, the United States entered the conflict. Crucible became a leading supplier of high grade shells and gun steels to the U. S. Navy. In addition to guns ranging from 20-mm. to 12-inch, and shells from 37-mm. to 18-inch, the company manufactured submarine periscope tubes and was the largest maker of antenna masts.

Crucible made the first armor-piercing bombs and high - velocity shells for the Navy and was one of the first companies to receive the Navy "E" flag for production excellence.

World War II again demonstrated the key importance of Crucible steels in every major industry.

Demands were urgent and standards of quality were more stringent than ever before. New types of steel were required for new weapons and equipment. Production was again pushed to record levels.

# Crucible Puts Emphasis On Its Training

Training is an essential part of Crucible Steel's activity today.

Supervisory training was begun approximately 10 years ago because it was realized then that it was essential for supervisory people to be acquainted with new and constantly improving techniques and devices used in the making and processing of steels. It also was recognized that the human element is one of the most important factors in the day-to-day relationship between employer and the employe.

Today's training encompasses much more than the programs of 10 years ago. It covers the fundamentals of apprentice training, where young men who are attempting to become journeymen in the crafts — such as machinist trade, electrical trade, construction trade and brick department — are given training which follows a prescribed curriculum on the job. It is supplemented by academic training which gives the young craftsmen understanding and skill in the use of academic subjects related to the fundamentals of his work.

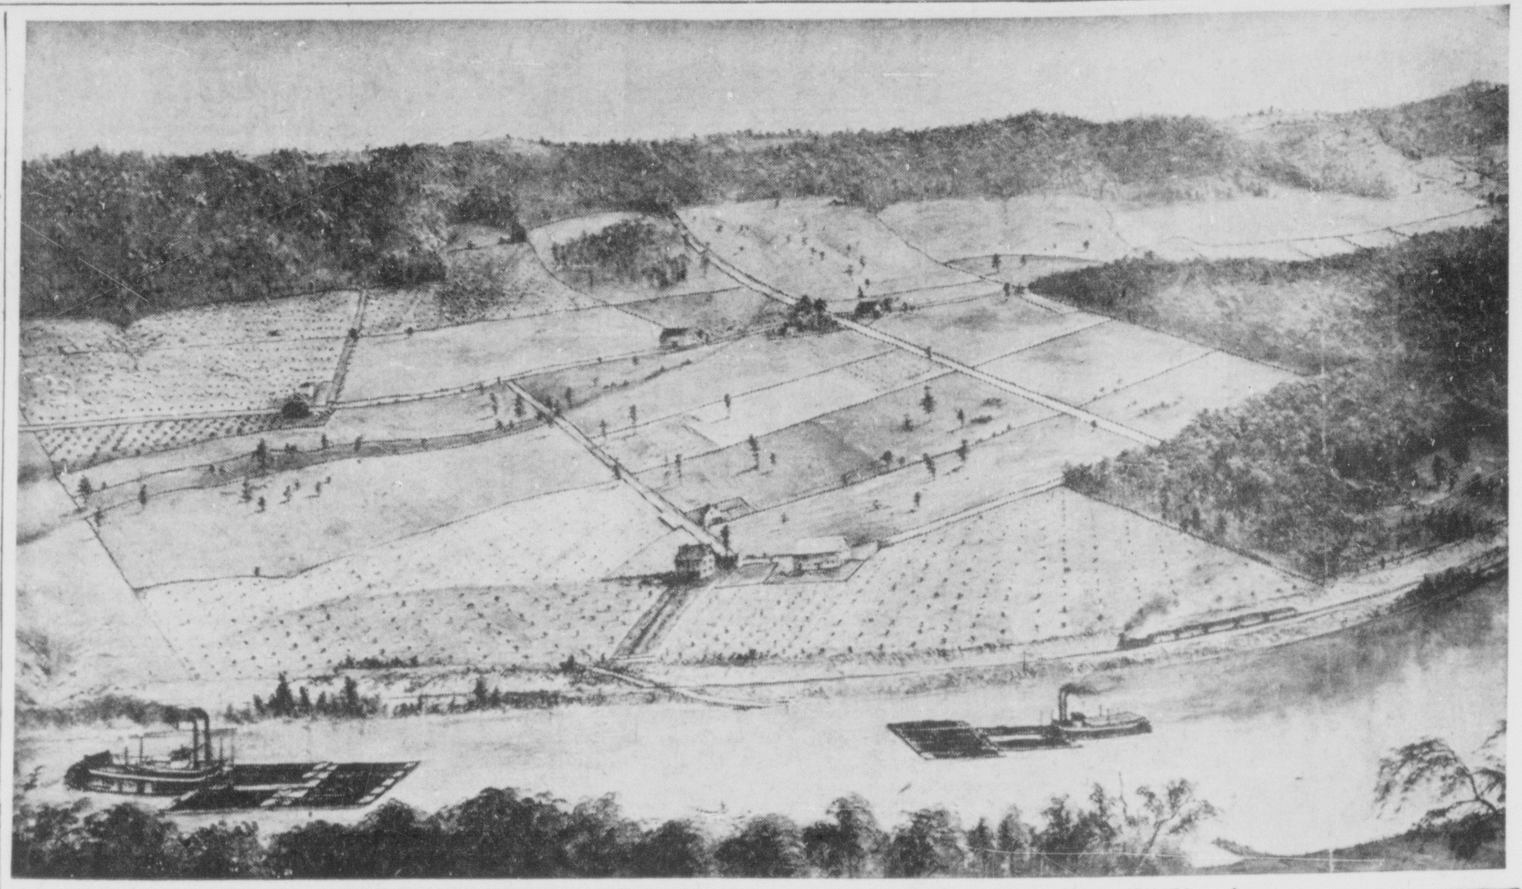
Others who are trained in special skills and given a general indoctrination on a plantwide scope are management trainees.

These are young men who, for the most part, have engineering or scientific degrees before coming to the company. They are quickly taught to apply the academic and technical skills which they have acquired through education to the practical realities of day-to-day steel plant activities.

All of this specialized training is essential in today's involved and highly intricate industrial operations.

Devices and mechanisms which are coming into common use throughout industry today were unheard of, or only an engineer's dream, 10 years ago. It is a commonly held opinion throughout the steel industry that the necessity for training will increase in future years.

Crucible has taken, and is continuing to take, further steps to prepare its people for any requirement that may arise in the foreseeable future.



**THIS WAS THE ORIGINAL ACREAGE** which now houses the Midland Works of the Crucible Steel Company of America. J. A. Neel of McKeesport, Pa., owned much of the land and what was once his family home is still being used by Crucible as an office—with many renovations and remodeling, naturally. The Neel homestead can be seen in the photo above.

## Tobacco Industry's Anniversary Slated

JAMESTOWN, Va. (AP) — Pocahontas may have saved the life of Captain John Smith, but she married an Englishman named John Rolfe.

The romance of Rolfe and the Indian princess will play an important part in next year's commemoration here of the 350th anniversary of the American tobacco industry.

Rolfe planted and sold the first successful crop of tobacco at Jamestown in 1612, saving the colony from economic collapse. From the beginning, tobacco has grown into a $7 billion industry.

The anniversary will be staged May 16-19 by the Jamestown Foundation.

The St. Lawrence Seaway project created 38,000-acre Lake St. Lawrence in Ontario.

## Family Custom

BUFFALO, N. Y. (AP) — Sociologist Gerhard J. Falk of Buffalo State Teachers College says a study he concluded recently in 86 American cities showed that 90 percent of all murders involve people related to each other and living in the same house.

# Steel Serves Housewife In Great Variety Of Ways

Ummm . . . smell those hamburgers sizzling on the grill outside.

As spring rolls into high gear, area families are dusting off their barbecue equipment and getting it in shape for the coming season.

But thanks to the good things that new developments in steel make possible, more and more people are able to enjoy the fun of a barbecue all year long.

Particularly with the developments in stainless steel, the fun that used to be confined to outdoors and nice weather, because grills got all discolored with use, is now completely practical indoors. The stainless still scrubs up bright and shining.

As to outdoor grills, the stainless steel means longer service because of its resistance to rusting.

Among the developments in kitchen accessories is a rotisserie that fits into a counter well in the kitchen, but can be taken out and run on bottled gas or with a long cord in the back yard this summer.

The satin luster of stainless steel has increasingly been acknowledged as a design element in the kitchen as in other areas of the home. Therefoe, in built-in ovens, in refrigeator or oven fronts, in counter tops, in cabinet doors . . . stainless steel shows its face and is welcome.

Just as it has gone to the table in high style flatware and serving accessories, stainless steel has taken to the stove top and the oven in utensils that make cooking a pleasure.

The same is true in food preparations. Everything from paring knives and spatulas to mixing bowls and measuring cups is available in stainless steel.

And while talking about food preparation, it would be an oversight not to mention the stainless steel kitchen sink.

Many a bride's rose - colored dreams have been shattered when her "first" kitchen features a "stained" rather than stainless sink.

As well as stainless steel, kitchen utensils and appliance made of steel are treated in other ways.

For example, porcelain-enameled steel is a kitchen coup for the bride and established homemaker alike. Bright yellows, soft greens and blues, charming and gay patterns highlight the handsome porcelain finish made strong by its steel backbone. Again, these are utensils that can go from the kitchen to the table with the ease of an aristocrat.

Another example of plated steel is chromium-plated steel for the kitchen. Some appliances are chromium-plated. Certainly many kitchen tables and chairs along with counter stools and utility carts are so treated.

And what is any kitchen without a can of food? Today's "tin" cans are strip steel coated with a thin layer of tin.

So from the steel shopping cart to the steel shelf of her kitchen, the homemaker's food in its steel container goes from her steel can opener to the steel pan on the steel range, from the steel serving accessory to the stainless steel fork on the dining table in a complete "steel" kitchen cycle.

## Dringing Drivers Would Be 'Branded'

COLUMBUS, Ohio (AP) — A constituent of State Rep. Terry Drake of Galion thinks Drake should introduce a measure to put a mark on drinking drivers.

His suggestion is that the car, truck or other vehicle of a person convicted of drunk driving be painted with alternate verticle black and white stripes — five inches wide — from front to rear.

The vehicle could not be sold, and the driver would be examined by the sheriff six months later to see if repainting in normal colors should be permitted.

## Auto Crash Causes Show Up In Planes

COLUMBUS, Ohio (AP) — Three human factors which have caused countless automobile accidents are beginning to show up in airplane crashes, says education specialist Norman J. Crabtree of the Ohio Division of Aviation.

They are (1) a tendency to be prouder of willingness to take chances, (2) trying to justify what one wants to do rather than what one knows is right and proper and (3) risking losses all out of proportion to possible gains — such as chancing a risky landing to save a few minutes.

# Crescent Brick Plans Expansion

Crescent Brick Co. Inc., of New Cumberland, a supplier of ladle brick to the steel industry for almost 37 years, heads into the "Soaring Sixties" with hopes of increasing production by 25 per cent with an $175,000 expansion project.

D. R. Ferguson Jr., president of the Hancock County company since 1950, said the expansion project will include construction of three new periodic kilns.

An additional grinder will be installed to provide the facilities for operating a fourth dry press.

—:—

**THE COMPANY** will convert to gas - fired kilns this summer, moving ahead to the more modern method like other brick factories.

Crescent's ladle brick, marked under the brand name of "Omega," are used in open hearth furnaces of such steel mill centers as Weirton, Youngstown, Pittsburgh and Cleveland.

Located along State Routes 2 and 66, Crescent Co. produces an estimated million and one-quarter ladle brick per month when operating in normal fashion. The plant employs 90 men, members of the AFL-CIO United Brick and Clayworkers Unions of America.

Ferguson said the work on the expansion project will begin soon. The one-track Pennsylvania Railroad line which is laid on the company's acreage will be moved to the Ohio River banks to make room for the additional kilns.

Organized in 1924 with Walter A. Bonitz as its first president, Crescent was one of the first factories in the entire industry to completely mechanize its clay mine.

—:—

**THE COMPANY** approved a major investment in 1950 to have installed electric drilling, "shooting" and loading equipment. Mechanical loaders drop the clay into 15-ton shuttle cars which transport it to a belt conveyor and then up the inclined mine to the crusher house.

Ten men and a superintendent are employed in the mine. Ferguson estimated the company has claim to enough top - quality clay of the rich vein paralleling the Ohio River to last for another 100 years.

When Crescent converts to gas firing this summer for its 15 "beehive" kilns, and the three new structures, no great reduction in personnel is expected, even though the automatic firing system will eliminate the necessity of kiln firemen. Additional setters, wheelers and hackers will be required and the kiln firemen will fill the vacancies whenever possible, Ferguson said.

Commenting on the expansion project, Ferguson said, I think the gas firing system will save money and increase our percentage of output by improving the quality."

A native of Mount Lebanon, he is the third president of Crescent Co. He succeeded D. D. Moses. A son, D. Robert Ferguson, is assistant to the president. W. Edward Adkins of East Liverpool heads the company's sales staff.

## Biggest Ice Pick Will Probe Glaciers

CHICAGO (AP) — A Chicago engineering firm has designed and built the world's largest ice pick to probe the mysteries of polar glaciers.

The U.S. Army Corps of Engineers received delivery of a 23-foot-long thermal drill that melts its way into a solid glacier and brings up 10-foot ice cores for study.

It can probe 12,000 feet down, deeper than man has ever penetrated ice before.

The drill is now being used in Greenland to obtain facts that will be useful for the construction of military outposts in polar regions.

## You Take 2 Women And You Get Accident

WICHITA, Kan. (AP) — "The strangest accident I've handled in almost four years with the department," muttered Jim Rudisell, police traffic accident investigator. These were the ingredients:

1. Take two women, one in each car.
2. Put the cars in driveways directly opposite each other.
3. Have both women wanting to back out of the driveways at the same time.
4. Mix in a couple looks to each side, but never behind.
5. Whammo . . in the middle of the street.

---

You can roast a two - pound piece of Canadian bacon in a moderate oven for two hours. Baste it with a mixture of brown sugar, prepared mustard and fruit juice.

A CRESCENT BRICK CO. hacker, Charles Porter, is shown at work on a dry press machine in the New Cumberland firm's clay shop. Clay for the dry presses is mined near Hardins Run.

# Special Steel Given Stress

In an early morning mist an Atlas missile rises from its launching pad at Cape Canaveral and begins to arch across the Atlantic.

In Detroit, a fully automated engine block assembly line, equipped with twist drills, reamers, counter bores and other high speed tools, starts a rough sand cast block and in a matter of minutes produces a completely machined engine block, machined to close tolerances.

In Pittsburgh a crew erects stainless steel mullions to frame the walls of the city's newest skyscraper.

In Portland, Ore., a woman with a stainless steel frying pan scrambles eggs for her family's breakfast.

All of these incidents are unrelated, but they have special significance to each Crucible employe, because without them they might never happen. Crucible employes help to make them possible by producing special purpose steels.

A part of that Atlas missile, for example, was once a heat poured from one of Crucible's furnaces and processed by many Crucible steelmen before it became a missile part. The high speed steel and the stainless sheet and strip require hundreds of manhours to produce.

These products are typical of the special purpose steels of which Crucible is a world leader. Crucible, in fact, turns out a greater variety of special steels than any other company in the industry — more than 1,100 grades processed into 50,000 separate items.

Most of such steel is sold to customers as bar products, flat-rolled products, semi-finished ingots, blooms, billets and the tube rounds.

From these Crucible customers nake high speed drills, welded stainless tanks, valves, gears, oil-well pipe, food mixers, surgical equipment, mining drills and thousands of other products that require "out of the ordinary" steels.

This is what special purpose steels are — metals that are out of the ordinary. These are alloys which are made for unusual applications or must withstand extraordinary conditions, such as extreme heat and cold, stress, strain, oxidation or rust and strong chemical attacks.

---

Between 40 and 50 ships, loaded with 12 to 15 million bushels of grain, serve as "floating warehouses" in the harbor of Buffalo, N. Y. each winter.

# Steel Output Expected To Rise In May

CLEVELAND (AP)—May steel production and shipments will be 10 per cent above last month's, Steel Magazine predicted today.

Market developments the metal working weekly cited that make the outlook bright are (1) seasonal upswing in steel consumption, (2) stepped-up auto output, and (3) an end to the steel inventory trimming that started a year ago.

Ingot production this week is expected to exceed 1,810,000 tons Steel estimates the industry pured this past week. Production has gained for seven straight weeks, Steel noted, with last week's output the highest in 11½ months.

"It's a safe bet that operations won't fall below this level in a nonholiday week before June 30, 1962, when the industry-USW labor contract expires," the publication said.

The market picture shows that many industries are buying, Steel said, pointing out product gains and the demand for quick shipments.

Production was up in all but two districts, with the biggest jumps in Youngstown, where ingot production was up 8 points to 78 (1957-59 average equals 100), and Cincinnati, up 11 points to 98. Production was up 4 points to 92 at Buffalo, 4 points to 95 at Cleveland and 3 points to 116 in the western district.

Steel's price composite on No. 1 heavy melting dropped another $1.34 to $37.33 a gross ton, reflecting a continued scrap price decline.

## Versatile Navy Wife

NORFOLK, Va. (AP)—Mrs. Grace Rhine has been a matron in a home for orphaned children, a lifeguard, a coach, a wife and mother of five, and now a fuel oil truck driver. She is still a wife but she finds the delivery of fuel oil a help when her Navy husband is at sea. And she frequently takes one or more of the kids with her in making deliveries.

That's right, Folks, It doesn't cost you one red cent to walk into MIKE TURK'S Showroom and get the best deal for your money in East Liverpool or Anywhere on a new 1961 CHEVROLET. MIKE TURK will give you the best deal available on any one of the following cars. If you don't see what you want, let us know and we will get it for you.

CORVAIRS

A463—CORVAIR 500, 4 door sedan, green, green interior, standard transmission, heater.

A474—CORVAIR 700, 4 door sedan, blue, blue interior, automatic transmission, heater, whitewalls, folding rear seat, wheel discs.

A459—CORVAIR Monza, 2 door coupe, black, red bucket seats, interior, standard transmission, radio, heater, whitewalls.

A437—CORVAIR 700, 4 door station wagon, red-white, red interior, standard transmission, heater, whitewalls.

CHEVROLETS

A422—BISCAYNE, 6 cylinder, 4 door sedan, white, blue interior, standard transmission, heater.

A430—BISCAYNE, 6 cylinder, 2 door sedan, maroon, grey interior, automatic transmission, heater, whitewalls, wheel discs.

A429—BISCAYNE, 6 cylinder, 2 door sedan, white, blue interior, standard transmission, heater.

A405—BELAIR, 8 cylinder, 2 door sedan, beige, fawn interior, automatic transmission, heater, radio, whitewalls, w/washer.

A426—BELAIR, 8 cylinder, 4 door sedan, turquoise, turquoise interior, automatic transmission, heater, radio, whitewalls, w/wash, wheel discs.

A436—BELAIR, 8 cylinder, 4 door sedan, fawn, fawn interior, automatic transmission, heater, radio, whitewalls, w/washer, wheel discs.

A423—IMPALA, 8 cylinder, 2 door hardtop, red, red interior, automatic transmission, heater, radio, whitewalls, w/washer, 230 h.p. engine, wheel discs, padded dash.

A451—IMPALA, 8 cylinder, 2 door hardtop, silver, red interior, automatic transmission, heater, radio, whitewalls, w/washer, wheel covers, padded dash.

A419—IMPALA, 8 cylinder, 2 door hardtop, white, red interior, automatic transmission, heater, radio, whitewalls, w/washer, wheels discs, padded dash.

A449—IMPALA, 8 cylinder, 4 door sedan, white, turquoise interior, automatic transmission, heater, radio, whitewalls, w/washer, wheel discs.

A418—IMPALA, 8 cylinder, 4 door hardtop, black, red interior, automatic transmission, heater, radio, whitewalls, w/washer, power steering, wheel covers, padded dash.

A456—IMPALA, 8 cylinder, 4 door hardtop, white, fawn interior, automatic transmission, heater, radio, whitewalls, w/washer, wheel covers, padded dash.

A427—IMPALA, 8 cylinder, 4 door hardtop, maroon, grey interior, automatic transmission, heater, radio, whitewalls, w/washer, wheel covers, padded dash.

STATION WAGONS

A464—GREENBRIER sports wagon, red - white, red interior, standard transmission, heater, whitewalls, three seats.

A453—BROOKWOOD, 6 cylinder, light/dark green tu-tone green interior, automatic transmission, heater, w/washer.

A424 PARKWOOD 9 passenger, 8 cylinder, light/dark turquoise tu-tone, turquoise interior, automatic transmission, heater, radio, power steering, whitewalls.

A411—NOMAD, 8 cylinder, blue-white, blue interior, automatic transmission, heater, radio, whitewalls, w/washer, 230 h.p. engine, power steering, power rear windows, wheel discs.

CORVAIR TRUCKS

A931 LOADSIDE, yellow, standard transmission, heater.

A926—RAMPSIDE, blue, standard transmission, heater.

A924—CORVAN, green, standard transmission, heater.

A925—CORVAN, blue, standard transmission, heater.

# Crucible Steel Launched In 1900

In 1900, fabulous demands for steel were in the making. The population of the United States was increasing rapidly.

Great industrial cities and large manufacturing plants were being established. Mass production of many consumer products already was under way.

At the turn of the century, the U. S. Steel industry knew well how to produce iron and basic steels in large quantities.

The main need was to speed and enlarge the processes by which these basic steels, and alloy materials, could be converted into special purpose steels — the tool and alloy steels essential to industry for its production facilities and for many products as well.

—:—

**TO MEET** the demand, the makers of fine steels had to keep pace with the greatest and fastest industrial growth the world had ever seen. The challenge was formidable.

Their products were produced in small amounts, by craft methods, and were processed largely by hand. The best of the special purpose steels were made by the crucible process, which insured quality, but was essentially a small-output method.

It became apparent that the role of the manufacturers of these steels, and their ability to produce in the quantities needed, would grow in importance in the American industrial pattern.

The need was clear: a better coordination of the efforts of various companies producing special purpose steels and new methods to increase production.

In 1900, the following companies processing special purpose steels joined to form the Crucible Steel Company of America, with articles of incorporation filed in New Jersey on July 21:

Park Steel Co. of Pittsburgh, Singer, Nimick & Co. of Pittsburgh, Howe, Brown & Co. of Pittsburgh, Crescent Steel Co. of Pittsburgh, La Belle Steel Co. of Allegheny (now Pittsburgh), Anderson, DuPuy & Co. of McKees Rocks, Pa., the steel department of Cumberland Steel & Tin Plate Co. of Cumberldand, Md., Burgess Steel & Iron Works of Portsmouth, Ohio, the steel department of the Benjamin Atha & Illingworth Co. of Harrison, N.J., Spaulding & Jennings Co. of Jersey City, N.J., Sanderson Bros. Steel Co. of Syracuse, N.Y., Beaver Falls Steel Works of Beaver Falls, Pa., and Aliquippa Steel Co. of Aliquippa, Pa.

—:—

**THESE COMPANIES** possessed a major share of America's fine steel melting and processing capacity. Their craftsmen practiced all the known arts of melting, heat - treating and working alloy, tool and specialty steels.

Their experience and traditions stemmed from the Old World steel centers. Between 1845 and 1900, they had added skills and developed specialized facilities that made them world leaders in fine steel production.

This union of skills and facilities enabled Crucible to serve the needs of fast-growing industries to better advantage.

Important technical information was exchanged between plants. A wider range of products and better products were made by regrouping skilled craftsmen and by using special facilities for their best possible purposes.

The company's development began to center around certain key plants. The names and plants of some of the founder companies ceased to exist as facilities were transferred and new installations made at Pittsburgh in Pennsylvania, Harrison and Jersey City in New Jersey, and at Syracuse, New York.

From the time of the company's formation, the men who managed Crucible were alert to the importance in fine steelmaking of high quality raw materials such as metallurgical coal, iron, and basic steels for special processing.

—:—

**IN 1901,** the Company took its first step toward supplying its own requirements.

Crucible formed the St. Clair Furnace Co. and the St. Clair Steel Co. at Clairton, Pa., and redesignated them as the Clairton Steel in 1902.

W. P. Snyder of Pittsburgh headed this company until its properties were sold in 1904 to the then 2-year-old United States Steel Corp. Crucible's requirements for the time being were provided by a contract with the new owner for iron and basic steel.

The great need, however, was for a method of producing the finest steels in far greater quantities than could be obtained by the crucible process. Electric melting soon was developed to meet that need.

## Years Spent On Research Reap Results

Crucible has been described as "truly a frontier company, a pre-eminent producer of the special steels required by other industries for their own technological breakthroughs."

This description of the company is substantiated by the steel produces: steels with many times the strength of those available 25 years ago; superalloys for high-temperature and high pressure steam generators, atomic reactors and transformers, high temperature alloys that can handle the intense heat of jet engines, the impact of rock drill pistons, the stress of flexible aircraft wings and the corrosive attack of atmospheric elements and chemicals.

Crucible has a reputation for developing new steels for special purposes.

That is why aircraft manufacturers have asked the company for a new alloy which will stand temperatures 100 degrees higher than present steels can take. Such a metal would enable them to increase the thrust of their jet engines substantially and thus materially reduce their costs per horsepower. Utility companies want steels that can stand higher temperatures so that they can cut fuel costs while increasing electric power outlet. For Crucible, development of these new alloys will mean new markets.

And as important as the development of new and future markets is finding methods to produce steel more economically — processes that will yield top-grade metal at the lowest possible manufacturing cost. With today's increasing costs of production, this goal is taking precedence over all others.

Crucible research enjoys a proud tradition, going back more than half a century to Dr. John A. Mathews, inventor of 18-4-1 high speed tool steel, at Halcomb, and to Dr. C. M. Johnson, pioneer of the first austenitic stainless steel in America, at Park.

These were essentially one-man operations. To meet today's and tomorrow's needs, Crucible research at four locations:

Oliver Building — administration.

Central Research Lab — process and product research on air melted steels and specialty alloys.

Midland Research Lab — process and product research on vacuum arc melted steels, titanium and specialty alloys.

Syracuse Research Lab — process and product research on vacuum induction melted steels, superalloys and other specialty materials.

Crucible research is definitely of the "applied" variety; that is, the work is directed towards solving specific problems so that, with the cooperation and often with the further work of other departments, lower-cost processes and-or better, more salable and more profitable products are brought into being. Thus many of the research personnel are often in the various mills.

# Steel Plays Role In Operation Of Patterson Plant

Steel, all types and grades, used in the fabrication of its wide range of processing machinery plays a predominant role in the manufacturing operations of The Patterson Foundry and Machine Co.

Industrial plants the world over utilize well known machines built by Patterson in the processing of chemicals, resins, paints and varnishes, paper and pulp, greases, pharmaceuticals, rubber, porcelain enamel, ceramics, and in the refining of animal and vegetable oils and fats, and innumerable other process operations.

The Patterson company dates back to 1865 and up to about 1915 specialized in equipment for ceramics manufacture — until today, through continuous progress, and as the outgrowth of a persistent program of research and development, it has become a leading designer and manufacturer of machinery and complete process systems for the chemical and process industries.

Patterson operates large plants in East Liverpool and in Toronto, Canada.

Its East End plant covers 8½ acres and its facilities include a large steel fabricating division, large machine shop and a most versatile customers' service laboratory for research, experimental and development work in all processing operations.

## Steel's Story Goes Back To Early Times

Hundreds of volumes and millions of words have been written about the age of steel and the development of the steel industry.

In honor of Steelmark Days, here's a capsule history of steel.

Once, on a day lost in antiquity, primitive man discovered iron. It was meteoric iron, a gift from the skies that fell in a white-hot fireball. Man, the hunter, shaped this metal into a spear point . . . the hardest, sharpest weapon he had ever known. He called it "metal from heaven."

—:—

**IRON** remained a mystic, heaven-sent thing until around 1400 B. C. Then, in Asia Minor, metal workers learned to smelt a mixture of reddish earth and charcoal and the Iron Age was born. Tools, plowshares, weapons were fashioned from the new material, as the techniques of smelting spread throughout the ancient world.

Nine centuries later, in India, man learned how to change iron into something infinitely better.

Iron ore and charcoal were heated in small crucibles. When the mass congealed, it was reheated . . . hammered . . . reheated . . . hammered . . . till the laborious process finally produced the new metal called steel.

For centuries, steel was made in small quantities. It was used in armor, surgical instruments, delicate tools and the fabulous Damascus swords that were worth their weight in gold.

Only a Damascus blade would bend to the hilt and snap back without breaking.

But it was not until the middle of the 19th Century that steel could be produced in large quantities in a few hours time — and the Steel Age was born!

The first steel rails were rolled from a Bessemer ingot in America in 1865. Railroads caried steel tools, farm machinery and barbed wire into the wilderness to transform it into fertile pastures and fields of grain.

By the end of the 19th Century, the era of structural steels was under way — fashioning the strong and durable framework on which the United States would build its fabulous 20th Century.

The progress of man is the progress of steel.

## Steel Plays A Basic Role In Daily Life

Steel is the foundation — literally — of the American family at work, at play and at home.

In 1959, American families made use of 26½ million tons of steel in and around their homes. Mostly, the steel was used in automobiles and appliances.

Each of the nation's 50 million families consumed about one-half ton of steel that year. Of the estimated 79 million tons of steel shipped in America in 1959, 26.6 per cent of it went into the American home.

Automobile sales alone accounted for 12 million tons. The Automobile Manufactures Assn., Inc., Detroit, figures that in 1958 the automobile industry purchased nearly 17 per cent of all steel produced that year — some 10 million tons.

—:—

**IT IS DIFFICULT** to conjure with such hefty figures. To get a better idea of where all that steel goes, here are some breakdowns:

Cans and containers used up 5 million tons.

Appliances took 1,800,000 tons.

Another 1,500,000 tons went into construction uses, including heating, air conditioning, and builders' hardware — plumbing supplies, metal lathe in home building.

Household equipment and furnishings, such as furniture, pots and pans, home workshop equipment, tools and toys, took one million tons.

Steel is everywhere, under us, over us, the tools in our hands.

Consider the routine of an average housewife going through a normal day:

She is awakened by that horrible device, the alarm clock, made of steel. She arises from a bed which has a steel, innerspring mattress, and steel springs.

She slips on house slippers, held together with steel nails, hurries downstairs on stairs supported by steel structural materials and enters a kitchen where steel is all around her.

—:—

**A STAINLESS** steel coffeemaker is soon perking. On her steel range she puts a steel frying pan to make breakfast.

The bread box, the refrigerator, the cabinets, the toaster, the eating utensils — all are steel.

Her children are soon off to school in a steel bus and spend their day in a school made lighter and bigger because of steel.

Her husband climbs into his automobile—which contains some 3,600 pounds of steel — and goes to work with steel tools, steel office equipment — or steel medical instruments.

The estimates above are from the American Iron & Steel Institute.

In addition, there are another two million tons which fall in the miscellaneous category.

The figures are for American use only, and do not include exports.

Try to imagine life in America without steel. It is well nigh impossible. Consider the wife without canned goods, or the husband with no automobile.

In America, you depend on steel — and steels depends on you.

## Comedy Is Tougher For U.S. Actor

HOLLYWOOD (AP) — Glenn Ford says it's easier to do drama than comedy.

"Any soap opera type of dialogue can cause a person to reach for a handful of handkerchief. But nothing is so unpredictable as dialogue supposed to be funny.

"For no reason at all it can lay an egg as large as a medicine ball. That's why getting laughs is a serious business."

# Millsop Began Career As Riveter In Sharon

Thomas E. Millsop, chairman of the National Steel Corp., was born in Sharon, Pa., Dec. 4, 1898, and was educated in the public schools there.

Following service in the U. S. Marine Corps from April 1917 to May 1919, Millsop was employed as a riveter with the Standard Tank Car Co. of Sharon in December 1919.

He then was promoted to foreman, assistant purchasing agent and purchasing agent with the Sharon firm, which he left in 1924 to enter the scrap business with the Rotter - Spear Co. of Cleveland. In December 1925, he returned to the Standard Tank Car Co. as production manager.

It was in 1927 that Millsop went to the Weirton Steel Co., now a division of the National Steel Corp. Starting as a salesman, he advanced to assistant sales manager, assistant to the president and vice president. In 1936 he became president of the company and held that position until 1954 when he was named president and chief executive officer of National Steel.

In a realignment of National Steel officers in February 1961, Millsop became chairman and chief executive officer, succeeding as board chairman former Secretary of the Treasury George M. Humphrey, a founder of the company, who remains as chairman of the National Steel executive committee, a position he has held continuously since 1929 except for his period of government service. Paul H. Carnahan, chairman of the Great Lakes Steel Corp., National's Detroit subsidiary, became president of National Steel.

Millsop is president and director of the National Steel Products Co. of Houston, Tex.; and chairman of the Midwest Steel Corp. of Portage, Ind., in the Chicago area. He is a director of the Great Lakes Steel Corp., Detroit; the Hanna Furnace Corp., Buffalo, N. Y.; the National Mines Corp.; the Stran - Steel Corp., Terre Haute, Ind.; the Mathies Coal Co.; the Donner-Hanna Coke Corp., and the Iron Ore Company of Canada, Cleveland.

Weirton Steel, Great Lakes Steel, Midwest Steel, National Mines, Stran - Steel, National Steel Products, Hanna Iron Ore and Hanna Furnace are all divisions of National Steel.

THOMAS E. MILLSOP
*Chairman Of National Steel.*

In addition to his work in industry, Millsop has played a prominent role in civic affairs of Weirton.

Following the city's incorporation, he was elected its first mayor in June 1947 for a four-year term and was re-elected in June 1951 for a second four-year term. A Republican, he was the only Eisenhower adherent in the delegation which West Virginia sent to the national convention in 1952.

Millsop is the immediate past president of the Weirton Hospital Association, a director of the Bank of Weirton and The Peoples Bank of Weirton. He served as director of the Federal Reserve Bank, Fourth District, Cleveland, from 1940 to 1947.

In 1948, he was appointed a member of the Board of Governors of West Virginia University, with his term ending in 1957, and was president of this board in 1954-55.

He is a member of the Board of Advisors of the College of Steubenville and a former member of the Board of Bethany College, from which he received the Honorary LL.D. in 1943.

He received the honorary Doctor of Humanities degree from Wilberforce (Ohio) University in 1952 and a similar degree from Marietta College in 1953.

# Head Of Weirton Steel Joined Company In '26

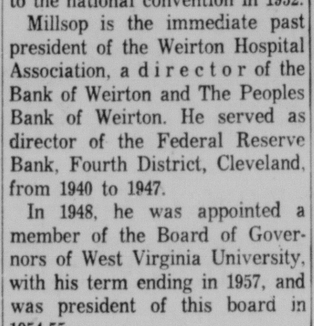
Charles G. Tournay is president and chief executive officer of the Weirton Steel Co. division of the National Steel Corp.

A native of McDonald, Pa., where he was born Oct. 27, 1906, he received his education in the elementary and high schools there and in the Pittsburgh School of Accounting, from which he was graduated in 1925.

Tournay's service with the National Steel organization began in 1926 in the Invoice Department of the Weirton Steel division at Weirton. Following transfer to the Operating Department, he advanced through a number of positions to assistant to the general superintendent in 1941. He became comptroller in 1943 and treasurer in 1944.

In July 1952, Tournay was elected comptroller and assistant treasurer of the National Steel Corp. In July 1956, he returned to Weirton Steel as assistant to the president and later in the same year was transferred to the Great Lakes Steel Corp., National Steel division in Detroit, where he was elected vice president.

In April 1958, Tournay again went to the Pittsburgh headquarters of National Steel as assistant to the president and held that position until assuming the presidency of Weirton Steel.



CHARLES G. TOURNAY
*Began In Invoice Department.*

Dry ice was first manufactured commercially in Long Island City, N. Y., in 1925.

## Academy Of Sciences Not For Sale, Mister

BALTIMORE (AP) — This is the full text of a letter the Maryland Academy of Sciences received from South Carolina:

"Dear Sirs: Please send me the Maryland Academy of Sciences. I enclose 25 cents for cost. Sincerely yours, L.R.B., Route 2, Walhalla, S. C."

Instead of mailing the whole academy to Walhalla, officials sent a copy of a recent astronomical chart, "Graphic Time Table of the Heavens."

## Don Ameche Believes Hollywood Is Same

HOLLYWOOD (AP) — Don Ameche, who returned to Hollywood recently to make a movie after a 12-year absence, says the situation hasn't changed much.

"Most of the same people seem to be running the industry," he says, "and the same nervous urgency to get as many scenes as possible done in a day pervades everybody's thinking."

## Panhandler Wanted Extra 15c For Cabbie

BALTIMORE (AP) — The panhandler at Howard and Baltimore streets asked for 50 cents to pay for a taxi ride to a nearby mission.

"That's only a 35-cent ride," said the man being asked.

"I know," the panhandler replied. "But don't you expect me to tip the cabbie?"

## Talking Mynah Bird Taught Wrong Words

BALTIMORE (AP) — Major, a talking Mynah bird at the Baltimore Zoo, has been removed from public sight and hearing because someone taught it to say two six-letter bad words.

The bird cost $200 when bought in 1957. Zoo Director Arthur Watson is trying to salvage his investment by teaching the Mynah to say instead, "Mother found her little boy."

## Clumsy Thief Fails In Bid To Steal TV

TUCSON, Ariz. (AP) — Oscar Tellez Celaya, 28, couldn't escape with a portable television set from an appliance store. He was just too clumsy.

Officers said Celaya attempted to slip out with the small set but stumbled into a large world globe, knocking it to the floor and alerting the store owners.

And when he tried to outrun pursuit he crashed into the side of an auto and was captured.

## Pun For A Bun

INDIANAPOLIS (AP) — Sign on a meat truck: "Our Wurst Is the Best."

## Steel's Story Goes Back To Early Times

Hundreds of volumes and millions of words have been written about the age of steel and the development of the steel industry.

In honor of Steelmark Days, here's a capsule history of steel.

Once, on a day lost in antiquity, primitive man discovered iron. It was meteoric iron, a gift from the skies that fell in a white-hot fireball. Man, the hunter, shaped this metal into a spear point . . . the hardest, sharpest weapon he had ever known. He called it "metal from heaven."

—:—

**IRON** remained a mystic, heaven-sent thing until around 1400 B. C. Then, in Asia Minor, metal workers learned to smelt a mixture of reddish earth and charcoal and the Iron Age was born. Tools, plowshares, weapons were fashioned from the new material, as the techniques of smelting spread throughout the ancient world.

Nine centuries later, in India, man learned how to change iron into something infinitely better.

Iron ore and charcoal were heated in small crucibles. When the mass congealed, it was reheated . . . hammered . . . reheated . . . hammered . . . till the laborious process finally produced the new metal called steel.

For centuries, steel was made in small quantities. It was used in armor, surgical instruments, delicate tools and the fabulous Damascus swords that were worth their weight in gold.

Only a Damascus blade would bend to the hilt and snap back without breaking.

But it was not until the middle of the 19th Century that steel could be produced in large quantities in a few hours time — and the Steel Age was born!

The first steel rails were rolled from a Bessemer ingot in America in 1865. Railroads caried steel tools, farm machinery and barbed wire into the wilderness to transform it into fertile pastures and fields of grain.

By the end of the 19th Century, the era of structural steels was under way — fashioning the strong and durable framework on which the United States would build its fabulous 20th Century.

The progress of man is the progress of steel.

## Talking Mynah Bird Taught Wrong Words

BALTIMORE (AP) — Major, a talking Mynah bird at the Baltimore Zoo, has been removed from public sight and hearing because someone taught it to say two six-letter bad words.

The bird cost $200 when bought in 1957. Zoo Director Arthur Watson is trying to salvage his investment by teaching the Mynah to say instead, "Mother found her little boy."

## Clumsy Thief Fails In Bid To Steal TV

TUCSON, Ariz. (AP) — Oscar Tellez Celaya, 28, couldn't escape with a portable television set from an appliance store. He was just too clumsy.

Officers said Celaya attempted to slip out with the small set but stumbled into a large world globe, knocking it to the floor and alerting the store owners.

And when he tried to outrun pursuit he crashed into the side of an auto and was captured.

## Pun For A Bun

INDIANAPOLIS (AP) — Sign on a meat truck: "Our Wurst Is the Best."

## Steel Plays A Basic Role In Daily Life

Steel is the foundation — literally — of the American family at work, at play and at home.

In 1959, American families made use of 26½ million tons of steel in and around their homes. Mostly, the steel was used in automobiles and appliances.

Each of the nation's 50 million families consumed about one-half ton of steel that year. Of the estimated 79 million tons of steel shipped in America in 1959, 26.6 per cent of it went into the American home.

Automobile sales alone accounted for 12 million tons. The Automobile Manufactures Assn., Inc., Detroit, figures that in 1958 the automobile industry purchased nearly 17 per cent of all steel produced that year — some 10 million tons.

—:—

**IT IS DIFFICULT** to conjure with such hefty figures. To get a better idea of where all that steel goes, here are some breakdowns:

Cans and containers used up 5 million tons.

Appliances took 1,800,000 tons.

Another 1,500,000 tons went into construction uses, including heating, air conditioning, and builders' hardware — plumbing supplies, metal lathe in home building.

Household equipment and furnishings, such as furniture, pots and pans, home workshop equipment, tools and toys, took one million tons.

Steel is everywhere, under us, over us, the tools in our hands.

Consider the routine of an average housewife going through a normal day:

She is awakened by that horrible device, the alarm clock, made of steel. She arises from a bed which has a steel, innerspring mattress, and steel springs.

She slips on house slippers, held together with steel nails, hurries downstairs on stairs supported by steel structural materials and enters a kitchen where steel is all around her.

—:—

**A STAINLESS** steel coffeemaker is soon perking. On her steel range she puts a steel frying pan to make breakfast.

The bread box, the refrigerator, the cabinets, the toaster, the eating utensils — all are steel.

Her children are soon off to school in a steel bus and spend their day in a school made lighter and bigger because of steel.

Her husband climbs into his automobile—which contains some 3,600 pounds of steel — and goes to work with steel tools, steel office equipment — or steel medical instruments.

The estimates above are from the American Iron & Steel Institute.

In addition, there are another two million tons which fall in the miscellaneous category.

The figures are for American use only, and do not include exports.

Try to imagine life in America without steel. It is well nigh impossible. Consider the wife without canned goods, or the husband with no automobile.

In America, you depend on steel — and steels depends on you.

## Comedy Is Tougher For U.S. Actor

HOLLYWOOD (AP) — Glenn Ford says it's easier to do drama than comedy.

"Any soap opera type of dialogue can cause a person to reach for a handful of handkerchief. But nothing is so unpredictable as dialogue supposed to be funny.

"For no reason at all it can lay an egg as large as a medicine ball. That's why getting laughs is a serious business."

# Millsop Began Career As Riveter In Sharon

Thomas E. Millsop, chairman of the National Steel Corp., was born in Sharon, Pa., Dec. 4, 1898, and was educated in the public schools there.

Following service in the U. S. Marine Corps from April 1917 to May 1919, Millsop was employed as a riveter with the Standard Tank Car Co. of Sharon in December 1919.

He then was promoted to foreman, assistant purchasing agent and purchasing agent with the Sharon firm, which he left in 1924 to enter the scrap business with the Rotter - Spear Co. of Cleveland. In December 1925, he returned to the Standard Tank Car Co. as production manager.

It was in 1927 that Millsop went to the Weirton Steel Co., now a division of the National Steel Corp. Starting as a salesman, he advanced to assistant sales manager, assistant to the president and vice president. In 1936 he became president of the company and held that position until 1954 when he was named president and chief executive officer of National Steel.

In a realignment of National Steel officers in February 1961, Millsop became chairman and chief executive officer, succeeding as board chairman former Secretary of the Treasury George M. Humphrey, a founder of the company, who remains as chairman of the National Steel executive committee, a position he has held continuously since 1929 except for his period of government service. Paul H. Carnahan, chairman of the Great Lakes Steel Corp., National's Detroit subsidiary, became president of National Steel.

Millsop is president and director of the National Steel Products Co. of Houston, Tex.; and chairman of the Midwest Steel Corp. of Portage, Ind., in the Chicago area. He is a director of the Great Lakes Steel Corp., Detroit; the Hanna Furnace Corp., Buffalo, N. Y.; the National Mines Corp.; the Stran - Steel Corp., Terre Haute, Ind.; the Mathies Coal Co.; the Donner-Hanna Coke Corp., and the Iron Ore Company of Canada, Cleveland.

Weirton Steel, Great Lakes Steel, Midwest Steel, National Mines, Stran - Steel, National Steel Products, Hanna Iron Ore and Hanna Furnace are all divisions of National Steel.

THOMAS E. MILLSOP
*Chairman Of National Steel.*

In addition to his work in industry, Millsop has played a prominent role in civic affairs of Weirton.

Following the city's incorporation, he was elected its first mayor in June 1947 for a four-year term and was re-elected in June 1951 for a second four-year term. A Republican, he was the only Eisenhower adherent in the delegation which West Virginia sent to the national convention in 1952.

Millsop is the immediate past president of the Weirton Hospital Association, a director of the Bank of Weirton and The Peoples Bank of Weirton. He served as director of the Federal Reserve Bank, Fourth District, Cleveland, from 1940 to 1947.

In 1948, he was appointed a member of the Board of Governors of West Virginia University, with his term ending in 1957, and was president of this board in 1954-55.

He is a member of the Board of Advisors of the College of Steubenville and a former member of the Board of Bethany College, from which he received the Honorary LL.D. in 1943.

He received the honorary Doctor of Humanities degree from Wilberforce (Ohio) University in 1952 and a similar degree from Marietta College in 1953.

## Academy Of Sciences Not For Sale, Mister

BALTIMORE (AP) — This is the full text of a letter the Maryland Academy of Sciences received from South Carolina:

"Dear Sirs: Please send me the Maryland Academy of Sciences. I enclose 25 cents for cost. Sincerely yours, L.R.B., Route 2, Walhalla, S. C."

Instead of mailing the whole academy to Walhalla, officials sent a copy of a recent astronomical chart, "Graphic Time Table of the Heavens."

## Don Ameche Believes Hollywood Is Same

HOLLYWOOD (AP) — Don Ameche, who returned to Hollywood recently to make a movie after a 12-year absence, says the situation hasn't changed much.

"Most of the same people seem to be running the industry," he says, "and the same nervous urgency to get as many scenes as possible done in a day pervades everybody's thinking."

# Head Of Weirton Steel Joined Company In '26

Charles G. Tournay is president and chief executive officer of the Weirton Steel Co. division of the National Steel Corp.

A native of McDonald, Pa., where he was born Oct. 27, 1906, he received his education in the elementary and high schools there and in the Pittsburgh School of Accounting, from which he was graduated in 1925.

Tournay's service with the National Steel organization began in 1926 in the Invoice Department of the Weirton Steel division at Weirton. Following transfer to the Operating Department, he advanced through a number of positions to assistant to the general superintendent in 1941. He became comptroller in 1943 and treasurer in 1944.

In July 1952, Tournay was elected comptroller and assistant treasurer of the National Steel Corp. In July 1956, he returned to Weirton Steel as assistant to the president and later in the same year was transferred to the Great Lakes Steel Corp., National Steel division in Detroit, where he was elected vice president.

In April 1958, Tournay again went to the Pittsburgh headquarters of National Steel as assistant to the president and held that position until assuming the presidency of Weirton Steel.

CHARLES G. TOURNAY
*Began In Invoice Department.*

Dry ice was first manufactured commercially in Long Island City, N. Y., in 1925.

# What! A "compact" with big car room?

ONLY RAMBLER HAS BIG CAR ROOM WHERE IT COUNTS—HEADROOM, SHOULDER ROOM, HIP ROOM

| | Headroom (inches) FRONT | REAR | Shoulder Room (total inches, front and rear) | Hip Room |
|---|---|---|---|---|
| Rambler Classic | 36.0 | 34.5 | 115.3 | 119.9 |
| Falcon—Comet | 33.8 | 32.7 | 110.4 | 114.1 |
| Corvair | 33.5 | 33.5 | 107.5 | 116.5 |
| Buick Special —Olds F-85 | 34.0 | 33.6 | 109.8 | 116.8 |
| Valiant—Lancer | 33.6 | 33.1 | 108.1 | 113.7 |
| Lark | 35.3 | 34.8 | 110.0 | 118.5 |
| Pontiac Tempest | 34.0 | 33.7 | 109.8 | 116.8 |

†Free Car X-Ray Books At Any Rambler Dealer

**DID YOU KNOW**—that the Rambler Classic has more front-seat headroom than any of the "Big 3" makes, plus easier entry and exit than even the regular-sized Ford, Chevrolet or Plymouth? • That the X-Ray Books† prove all this and more in side-by-side illustrated comparisons?

# Get Rambler Excellence

*"I can even wear my hat in this Rambler Classic, and I'm six feet!"*

*Rambler Classic—the all-purpose compact*

**No other car is built like, saves like, lasts like the Classic with Rambler Excellence**

- RATTLE-FREE—all-welded, safer, stronger Single-Unit construction.
- GREATEST RUST PROTECTION—with exclusive Deep-Dip rustproofing.
- LONGER TIRE LIFE—big 15-inch wheels.
- PROVED LONG TIME ECONOMY—no U.S. car matches the gas-saving Rambler Classic for lowest maintenance, highest resale value.

**WE'LL PAY THE COST IF THE MUFFLER RUSTS OUT**

Rambler's exclusive Ceramic-Armored muffler and tailpipe are guaranteed against defect for as many years as you own your new Rambler. If this muffler and tailpipe rust out (collision damage excepted), just go to your Rambler dealer who will replace them. You won't pay a cent—not even for the installation.

"You Can Make A Deal To Help Sell Steel"

# Union, Community Link Stressed By USW Aide

Discussing "Steelmark Days," Kay Kluz of Ambridge, director of the United Steelworkers' District 20, said today: "I cannot conceive of a union and a community working at odds with each other, they must work together."

He said steelworkers are citizens first and union members second and they are just as concerned with welfare and progress as they are with wages, hours and working conditions in the steel mills and fabricating plants.

Kluz, elected director of District 20 in February, served as acting director since October 1957 during Bert Hough's illness and following his death April 29, 1960.

—:—

**DISTRICT** 20 forms a triangle, with East Liverpool, East Palestine and Sewickley its three corners. Its area lies between the Ohio and Beaver Rivers. During regular employment, the district has some 36,000 members. The number is down now to 29,000, Kluz said.

He called the "Steelmark Days" program one indication of the union's interest in the community. "It is an excellent example of the corporation and union working together for the betterment of the community."

He pointed out that during the district's four - day conference April 25-28 at Beaver Falls, two of the four days were concerned with bettering relations with the community. He said much of the union and corporation's time is spent working co-operatively for the betterment of all, but the public is most aware of the relationship only during new labor contract negotiations.

Kluz said the community benefits from the talents and resources of the labor organization and "the benefits are financial as well as manpower-wise."

"The union was organized to raise the pitifully low wages, to reduce the staggering hours of work and to improve working conditions. But the union has taken on a greater responsibility. It serves its members and their families and neighbors outside the mill gates and it is a friend and neighbor in what we think is the greatest industrial area in the world."

Kluz emphasized that the union and its members participate in community activities "so we can help make the District 20 area a better place in which to live, raise children and prosper in peace and harmony."

KAY KLUZ
*'They Must Work Together.'*

**THE UNION** is proud of the relationships it has with management, governmental officials and community organizations. The union is pledged to the ever increasing prosperity of all area residents."

The Steelworkers Union is constantly occupied with problems confronting communities' health, welfare and recreational agencies and civic organizations. Union members and officers participate in the United Funds of Beaver County program, of which Kluz is a director, and in other welfare services.

The union has an effective political action program, which Kluz cites as further proof that the union and community must work together. He pointed out that the program includes voter registration and a Political Action Committee, which functions in electing candidates and is partisan. He explained the union's legislative committee "is nonpartisan and prepares legislation in behalf of labor, state and community."

Kluz also declared that the district is a leader in educational activities and is highly regarded in the international union's program which also keeps members and their families up to date on state and national legislation.

—:—

**THE UNION** has many representatives on local governmental bodies, serving as burgesses, mayors, Councilmen and in other offices.

Kluz stated that creation of the Steelworkers Organizing, Committee, parent of the United Steelworkers of America, brought unionism to the steel industry. Founded in 1936, the SWOC signed a contract with U.S. Steel Corp. on March 2, 1937. He said that first contract resulted in a 40-hour work week, with time-and-one-half for over time and a $5-a-day minimum wage rate as well as the recognition of the SWOC as the collective bargaining agent for its members.

The director said that in Beaver County the SWOC program quickly became the pattern which other unions use. As the union expanded its areas of responsibility and won greater economic benefits and job security for its members, its membership rolls grew in number.

Kluz said that District 20 is now completely represented in the big 11 bargaining companies, including U.S. Steel, Jones & Laughlin, Bethlehem Steel, Republic Steel, Armco and Crucible. He said "this makes the district influential in the nation in establishing steel union policies".

Headquarters of District 20 is at Ambridge.

## Canary Offers Life Protecting Scientists

NEWARK, N. J. (AP) — Alphos, a $6 canary, sings all day long, flutters about his cage and awaits his assignment — to die.

His job is to protect scientists in a chemical laboratory at the Newark branch of Rutgers University from poison gas, which could leak out of their apparatus while they are engaged in separating and engaging stable isotopes.

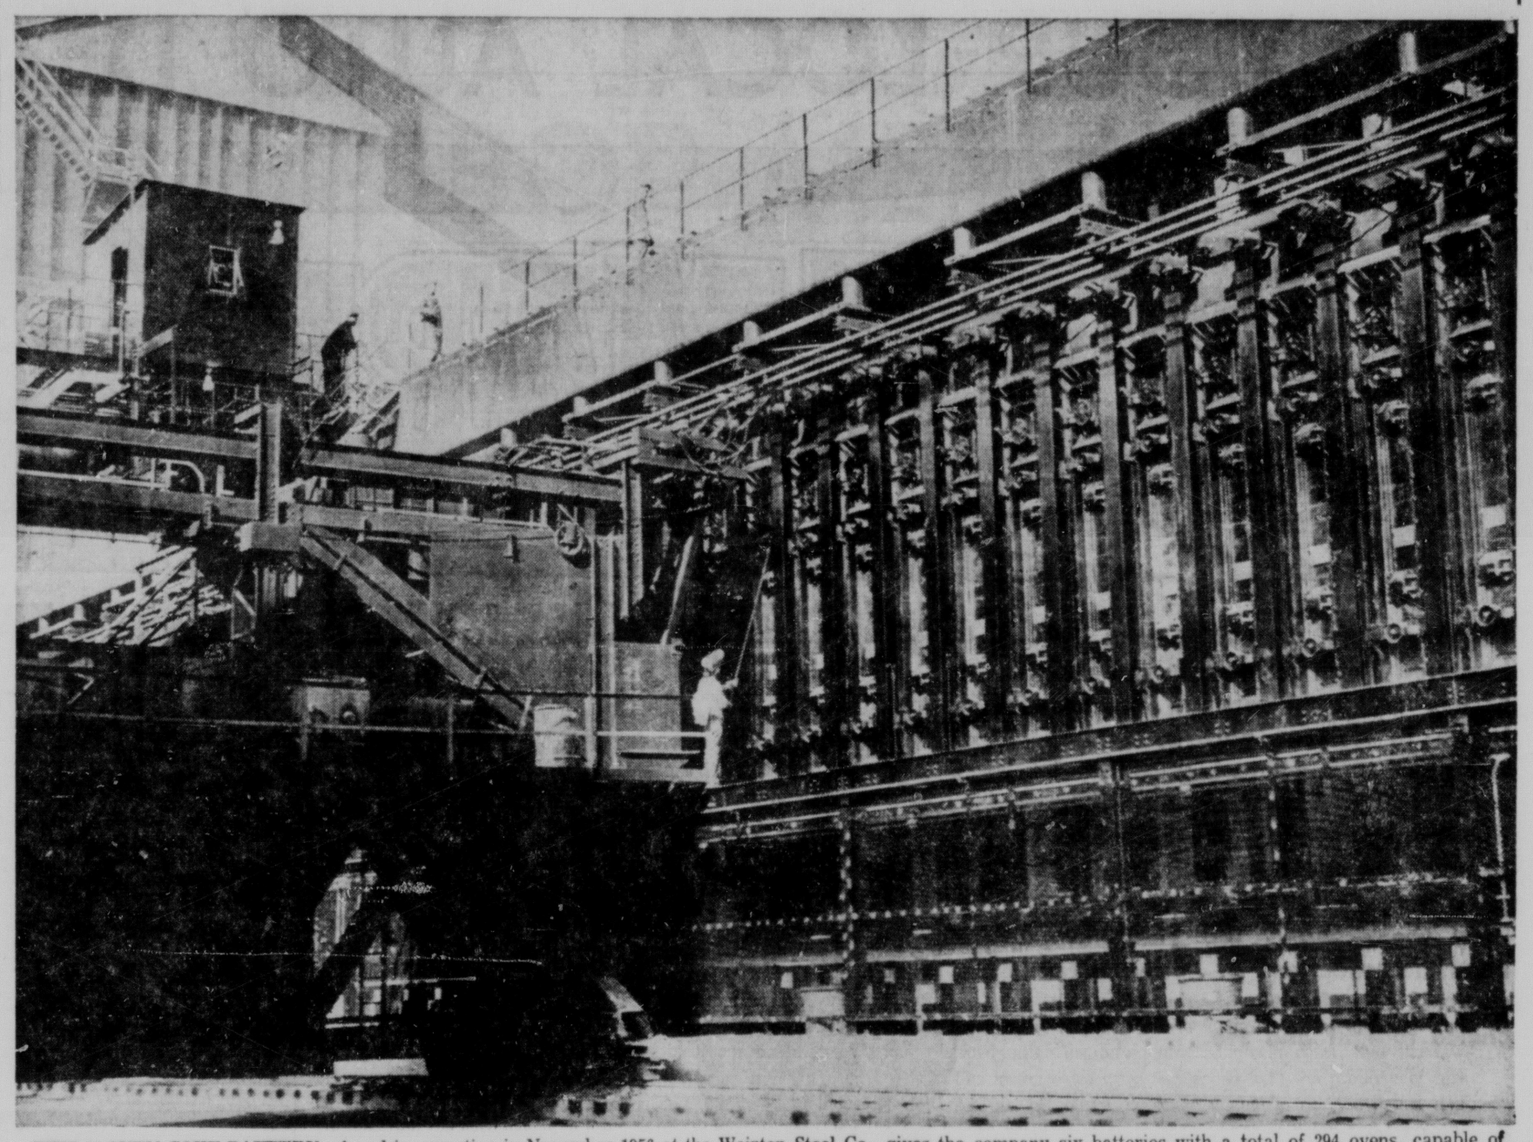
Canaries are most susceptible to dangerous gases. If any such gas should escape, Alphos would give his life. That would be the signal for the scientists to leave the lab in a hurry.

## Mentallist's Crystal Ball Slightly Clouded

BALTIMORE (AP) — A theatrical mentalist billed as a man "with x-ray eyes" wore adhesive tape with a black cloth to obscure his vision as he walked into a store for a demonstration.

Without hesitation, he approached a stranger in uniform and said, "Hello, officer. How are you?"

The performance would have been more astounding if the man in uniform had been a policeman instead of a soft-drink truck driver.



**THIS 41-OVEN COKE BATTERY,** placed in operation in November 1956 at the Weirton Steel Co., gives the company six batteries with a total of 294 ovens, capable of producing 5,200 tons of coke from 7,500 tons of coal each day. By-products such as ammonium sulphate, ammonia liquor, tar, light oil and coke oven gas are also recovered in the coke oven operations. The ovens are 17 inches wide, 3-inch taper and 13 feet high and are on a 16½-hour cooking time.
